DEPARTMENT OF TRANSPORTATION

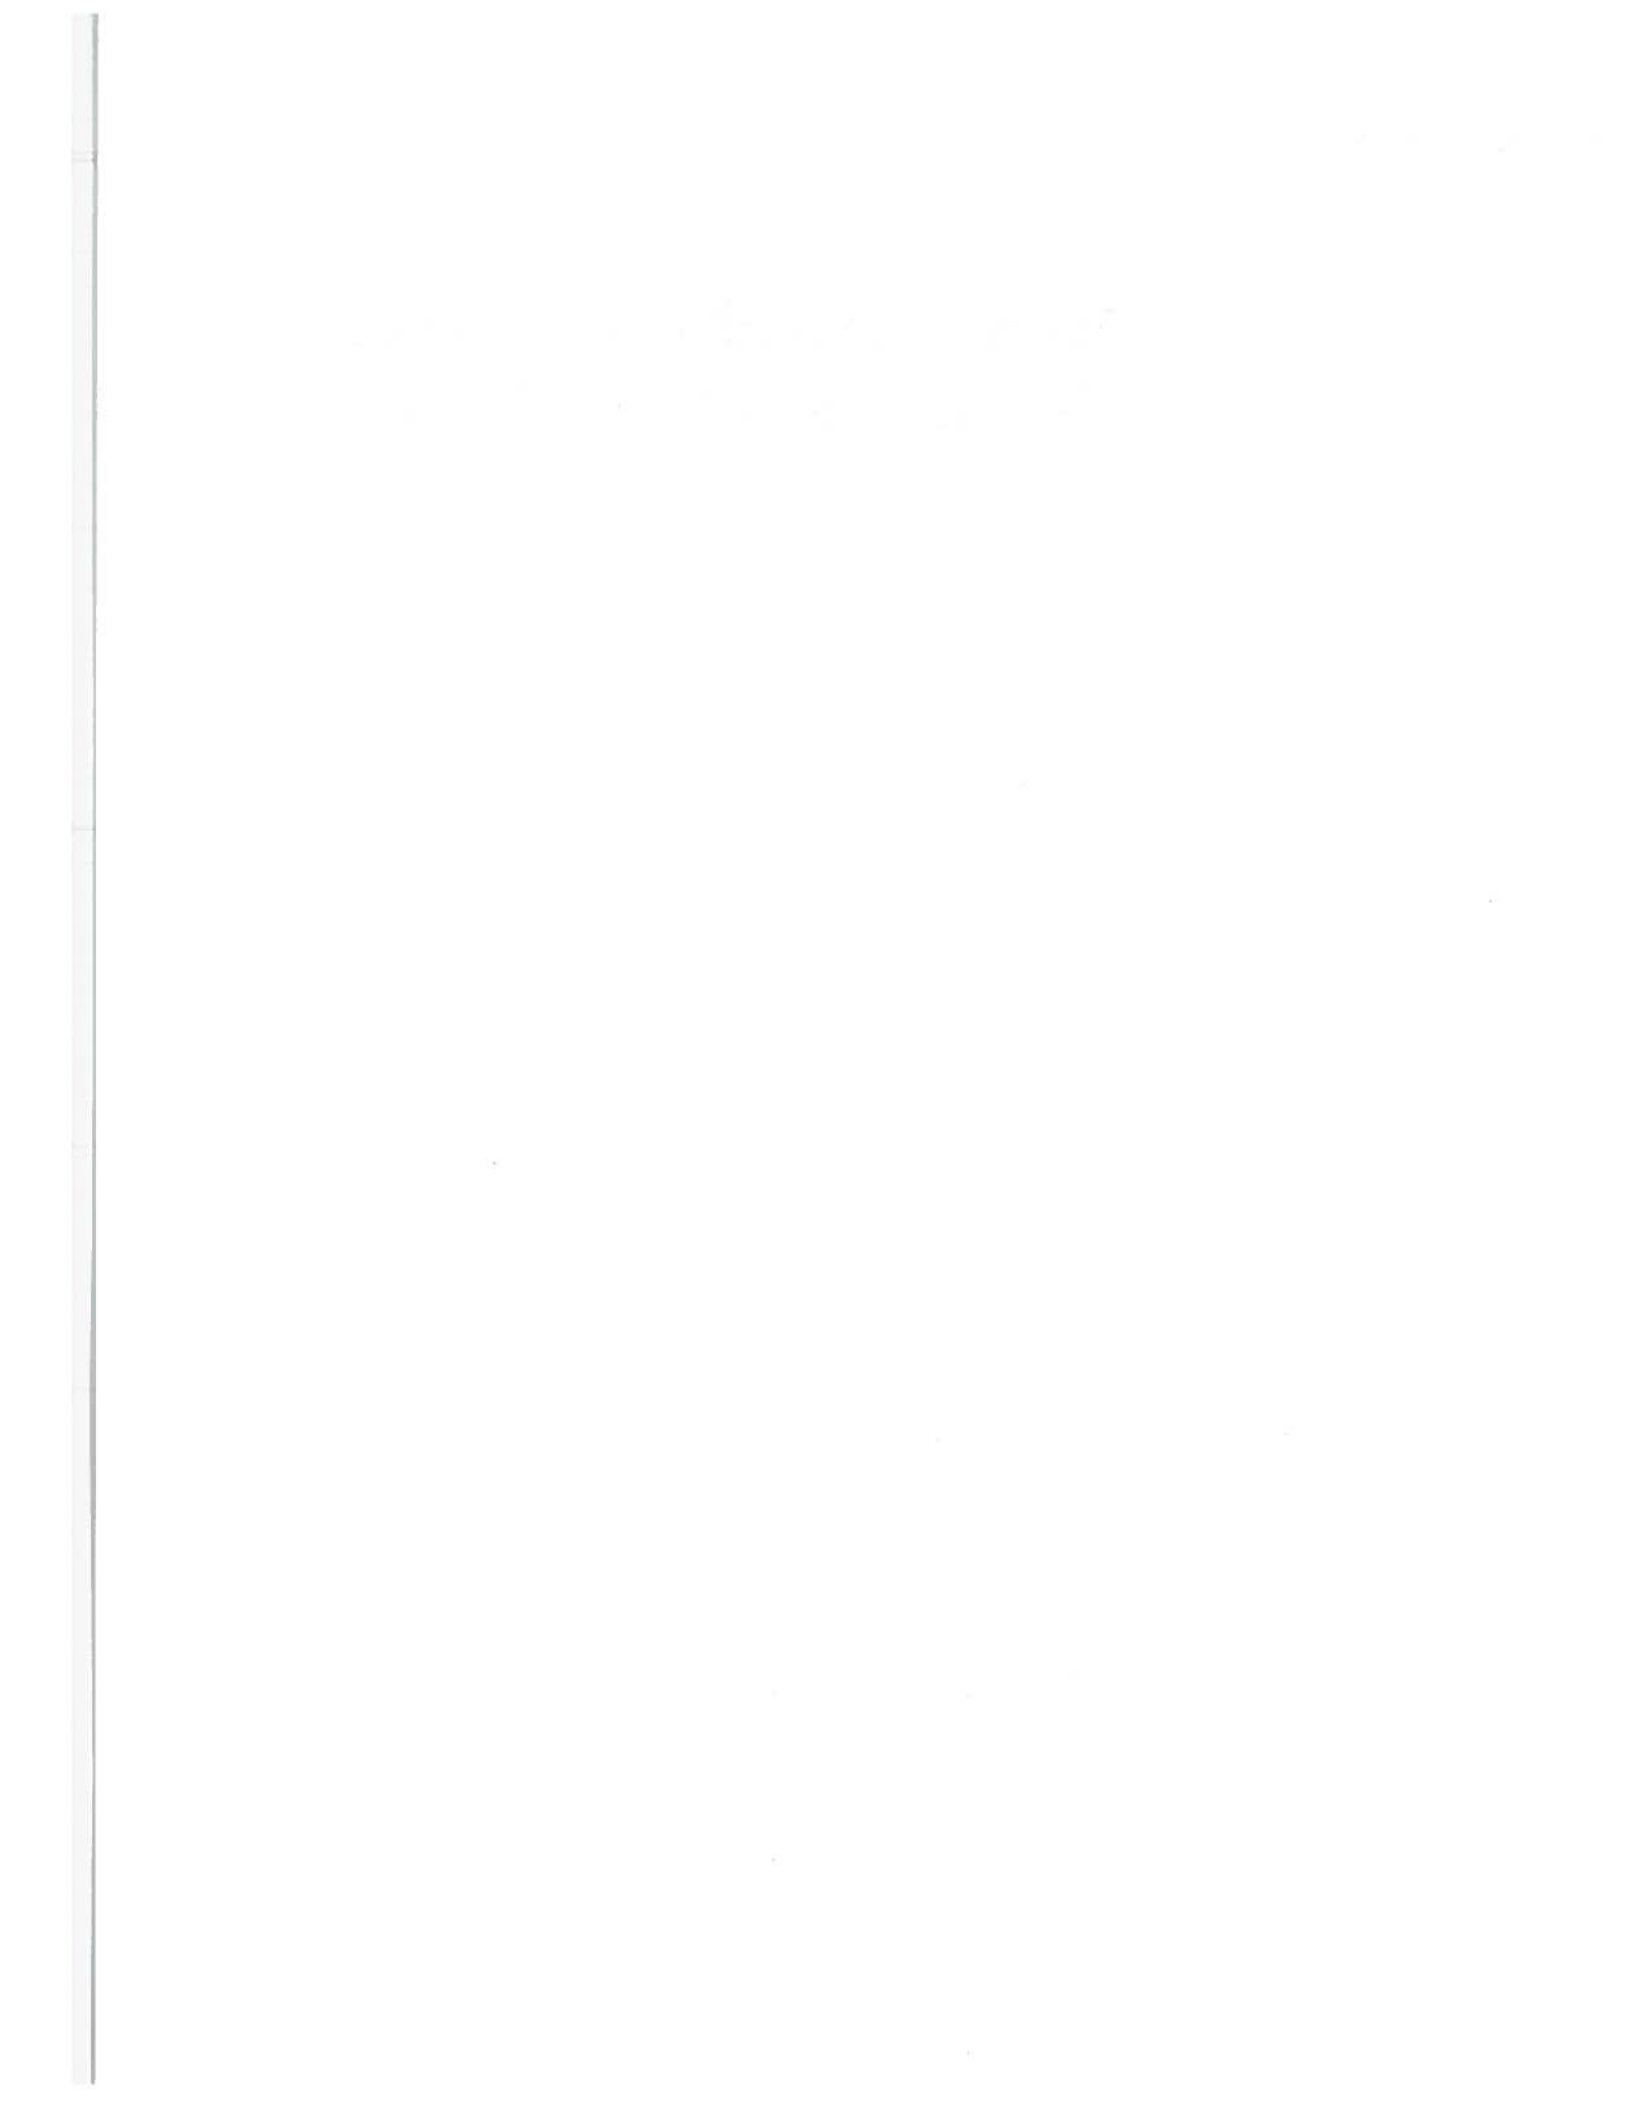

NOTICE

This document disseminated under the sponsorship of the Department of Transportation in the interest of information exchange. The United States Government assumes no liability for its contents or use thereof.

The United States Government does not endorse products or manufacturers. Trade or manufacturers' names appear herein solely because they are considered essential to the object of this report.

Bibliography of Transit Performance Indicators

November 1981

INTRODUCTION

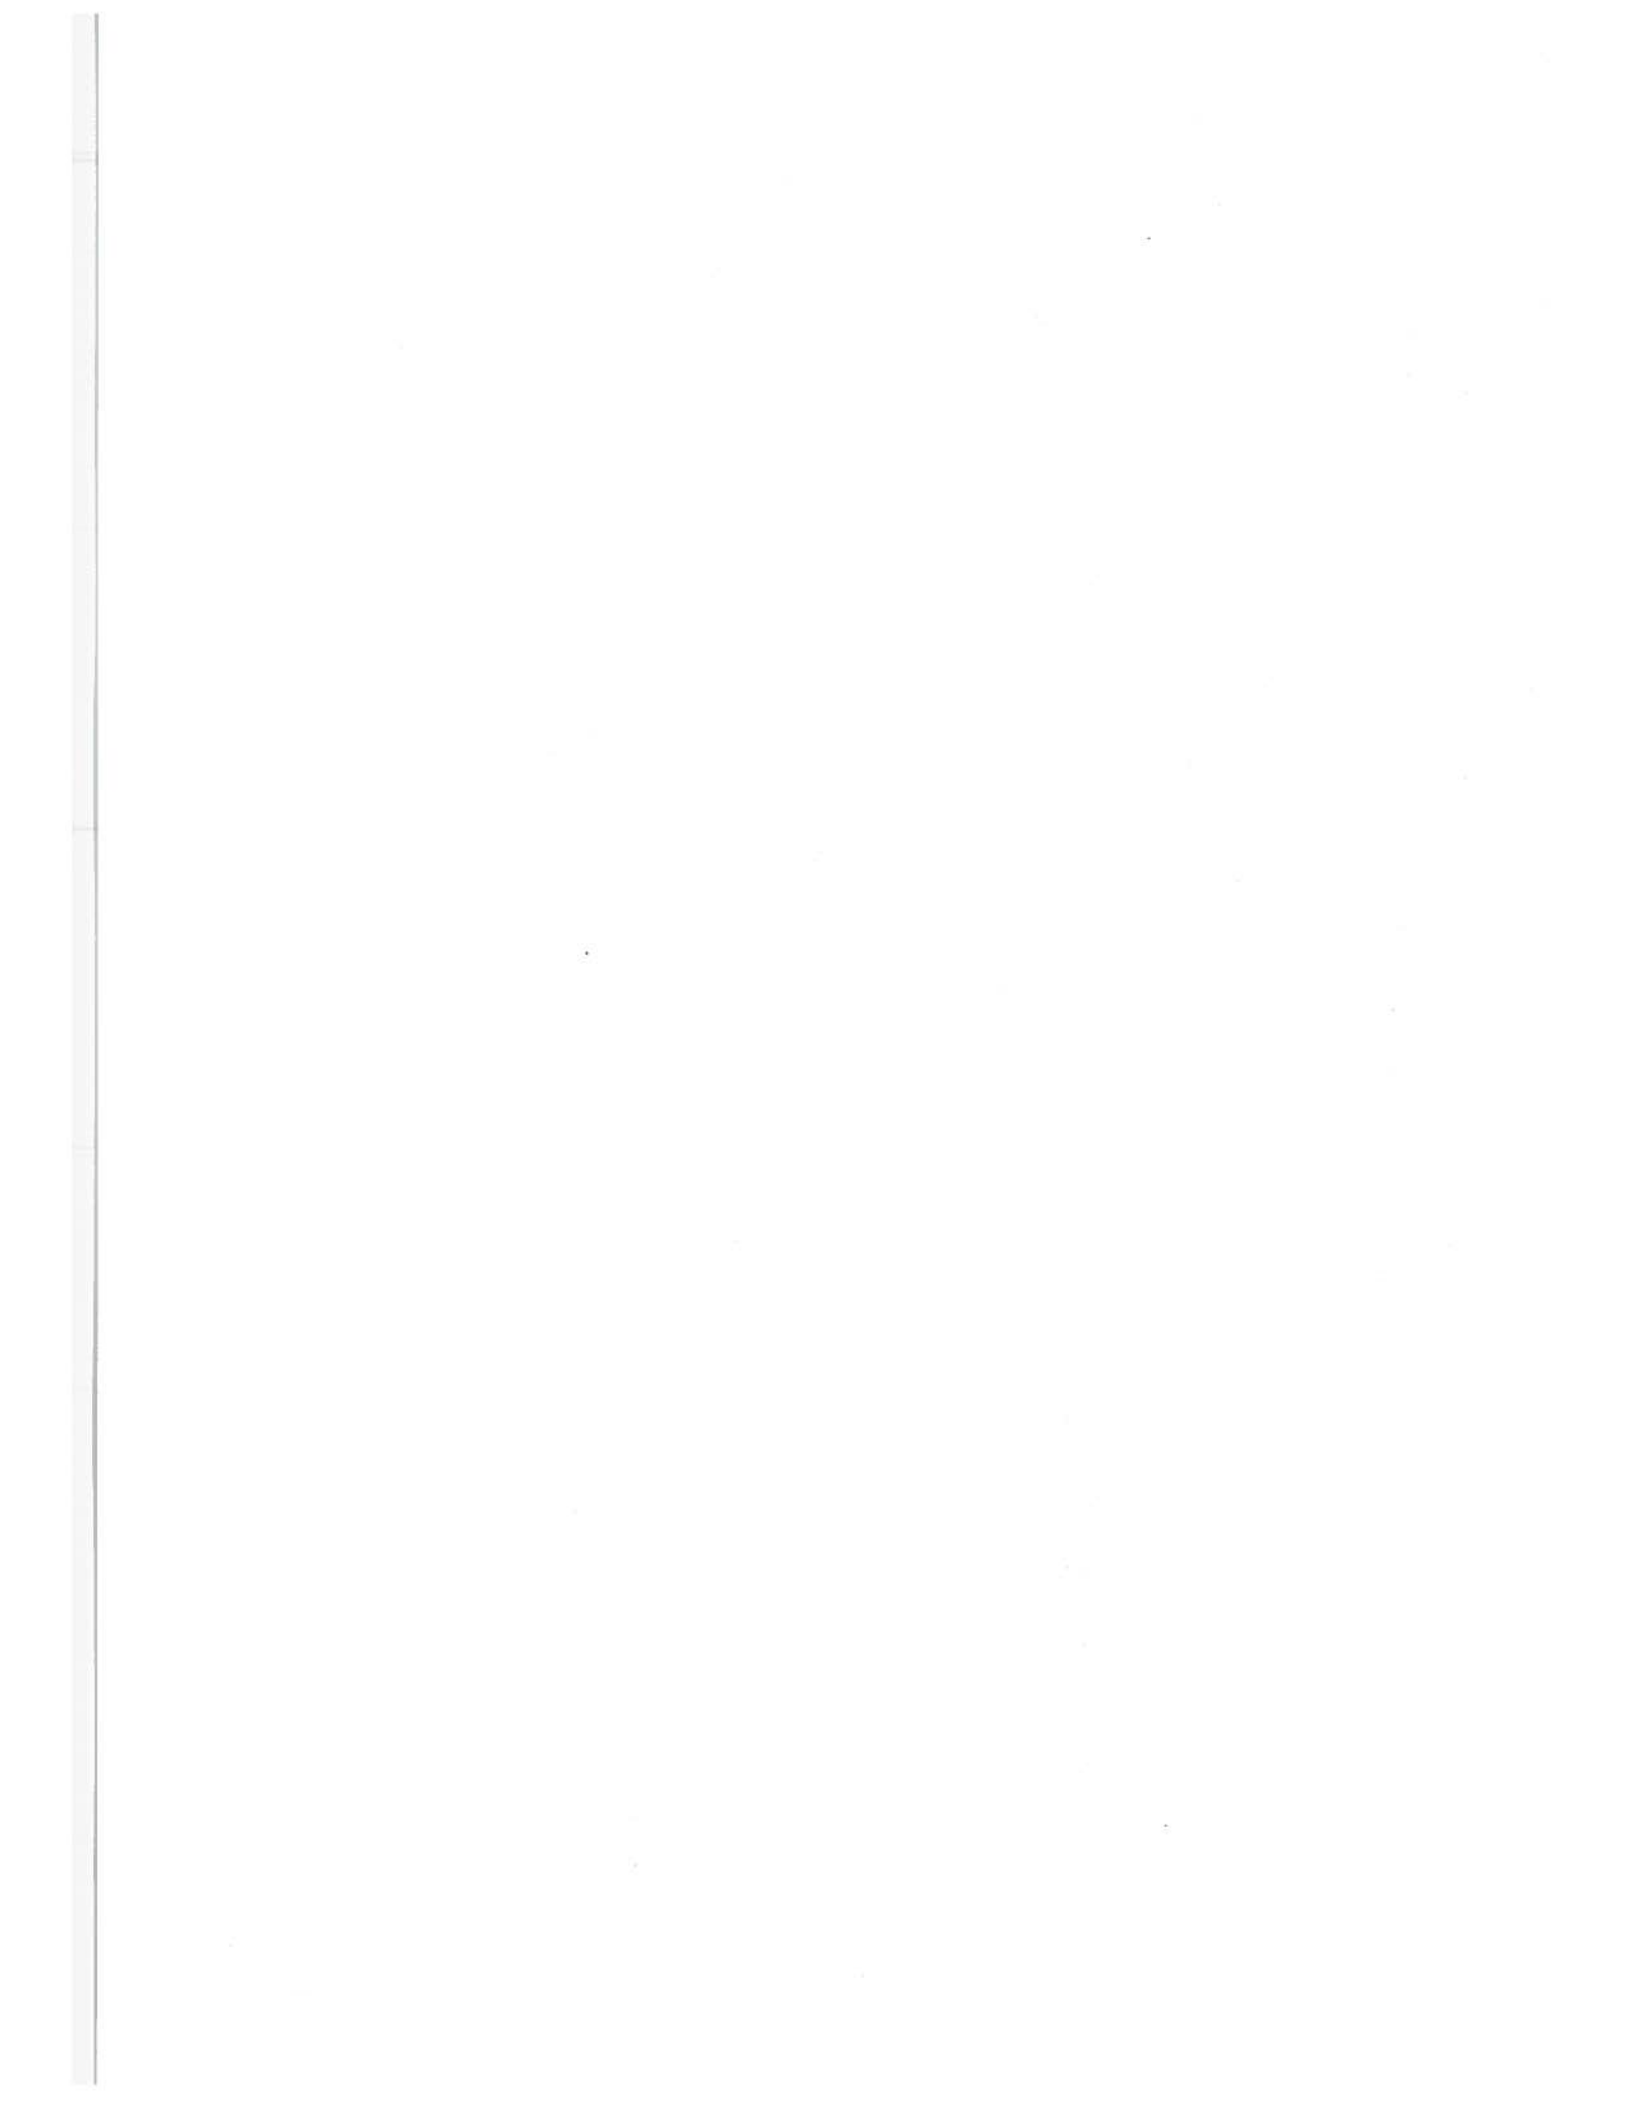

Performance measurement for public transit is a concept developed to quantify transit efficiency and effectiveness. Accompanying this effort, indicators have been developed to measure the overall productivity of public transportation.

Accumulated knowledge on transit performance measurement has not been readily available to transit planners and operators or widely disseminated because the published documents are not listed by, or available through, any national clearinghouse.

This bibliography is intended to provide those interested in transit performance measurement with a sampling of the reports, studies, and documents that have been published in recent years. The collection is not comprehensive, but rather, is intended to illustrate the range of key issues and developments that have been explored. Work is continuing on a comprehensive annotated bibliography as well as a state-of-the-art overview on transit performance indicators.

The bibliography is divided into two sections. Section I, General Analysis, highlights research from a variety of sources. Section II, Demonstration Programs, pertains to the actual implementation of performance indicators in transit system demonstration programs.

The published selections listed in this bibliography may be obtained from technical, university, or transportation libraries. The reports for which PB numbers are indicated can be ordered from the National Technical Information Service, Springfield, VA.

I. GENERAL ANALYSIS

"Analysis of Urban Transportation Criteria"

Zakaria, T.

ASCE Journal of Transportation Engineering,

Vol. 101, No. TE3.

August 1975, pp. 521-536.

Approaches to Performance Measurement

A Report of the APTA Planning and Policy Committee

American Public Transit Association

Transit Systems Performance Division

December 1979.

Automated Guideway Transit

Workshop on Performance Measures, Evaluation Techniques,
and Goals

Roesler, W.J., Editor

The John Hopkins University

Applied Physics Laboratory

for U.S. DOT, UMTA,

Office of Technology Development and Deployment

August 25, 1976, PB 277 046, 105 pp.

Better Transportation for City

Procedure Manual 4A: Measuring Transit Service

Procedure Manual 8A: Recommended Standards, Warrants,
and Objectives for Transit Service and Facilities

National Committee on Urban Transportation

Chicago: Public Administration Service

1958.

Bus Service Evaluation Procedures: A Review

Attanucci, J.P., L. Jaeger, J. Baker

Massachusetts Bay Transportation Authority

for U.S. DOT, UMTA

March 1979, PB 296 314/AS, 227 pp.

City Transportation: Municipal Performance Report

Council on Municipal Performance

New York, New York

1975.

"Choosing Performance Indicators for Small Transit Systems"

McCrosson, D.F.

Harrisburg, Pennsylvania Capitol Area Transit

Transportation Engineering,

Vol. 48, No. 3.

March 1978, pp. 26-30.

"Comparative Analysis and Selection of Transportation Mode"

Vuchic, Vukan R.

Transportation Research Record 559

1976.

Comparing the Efficiency of Privately and Publicly Owned
Bus Systems
Burbank, Cindy
for U.S. DOT, UMTA
1976.

A Comprehensive Analysis of Urban Bus Transit Efficiency
and Productivity
Purdue University
School of Civil Engineering
