

ORDER

U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

7400.9E

Date: 9/10/97

SUBJ: AIRSPACE DESIGNATIONS AND REPORTING POINTS

1. PURPOSE. This order, published yearly, provides a listing of all airspace designations and reporting points, and pending amendments to those designations and reporting points, established by the Federal Aviation Administration (FAA) under the authority of Title 14, Code of Federal Regulations, part 71.

2. DISTRIBUTION. This order is distributed to selected offices in Washington Headquarters, regional Air Traffic Operations branches, Air Route Traffic Control Centers, and interested aviation parties.

3. CANCELLATION. Order 7400.9D, Airspace Designations and Reporting Points, dated September 4, 1996, is canceled.

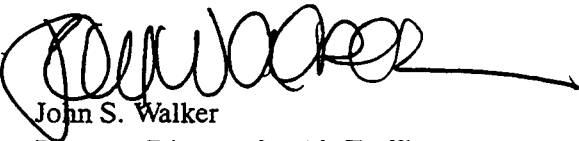

4. EFFECTIVE DATE: September 16, 1997.

5. BACKGROUND. Actions establishing, amending, or revoking airspace designations and reporting points in the United States and its territories, are issued by the FAA and published throughout the year in the FEDERAL REGISTER. These actions are generally effective on dates coinciding with the periodic issuance of National Ocean Service navigational charts. Due to the large number and the frequency of changes, the designations are not carried in 14 CFR part 71. They are published annually in this order for the benefit of the public.

For ease of reference, the FAA is providing this compilation of airspace designations and reporting points that were in effect on June 30, 1997, and pending

amendments (i.e., issued but not yet effective) published in the FEDERAL REGISTER on or before June 30, 1997. All positional data used in this handbook are based on North American Datum of 1983. No substantive change to any airspace designation or reporting point is made by this action. All substantive amendments to the affected parts of the Code of Federal Regulations have been adopted and published previously in accordance with administrative procedures in 5 U.S.C. Sections 552 and 553.

6. REQUEST FOR INFORMATION. For further information contact: Brenda Brown (202) 267-9235 or Janet Glivings (202) 267-9254, Airspace and Rules Division, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591.

IDENTIFIERS

List of Identifiers.....I-1

GENERAL

1000. Airspace classification.

- (a) The airspace assignments described in Subpart A are designated as Class A airspace areas.
- (b) The airspace assignments described in Subpart B are designated as Class B airspace areas.
- (c) The airspace assignments described in Subpart C are designated as Class C airspace areas.
- (d) The airspace assignments described in Subpart D are designated as Class D airspace areas.
- (e) The airspace assignments described in Subpart E are designated as Class E airspace areas.
- (f) Airspace not assigned in Subpart A, B, C, D, E, or H of this order is uncontrolled airspace and is designated as Class G airspace. There is no airspace within the United States designated as Class F.

1001. Reporting Points.

- (a) The reporting points listed in Subpart H of this order consist of geographic locations at which the position of an aircraft must be reported in accordance with Part 91, Subpart B, of the Federal Aviation Regulations.
- (b) Unless otherwise designated, each reporting point applies to all directions of flight. In any case where a geographic location is designated as a reporting point for less than all airways passing through that point, or for a particular direction of flight along an airway only, it is so indicated by including the airways or direction of flight in the designation of geographical location.
- (c) Unless otherwise specified, place names appearing in the reporting point descriptions indicate VOR or VORTAC facilities identified by those names.

1002. Bearings, radials, mileages, and altitudes.

Unless otherwise specified, all bearings and radials in this order are true and are applied from point of origin; all mileages in this order are stated as nautical miles; and all altitudes in this order are stated above mean sea level.

1003. Overlapping airspace designations.

- (a) **Airspace Hierarchy.** Within the airspace classes, there is a hierarchy and, in the event of an overlap of airspace: Class A preempts Class B, Class B preempts Class C, Class C preempts Class D, Class D preempts Class E, and Class E preempts Class G.
- (b) When overlapping airspace designations apply to the same airspace, the operating rules associated with the more restrictive airspace designation apply.

SUBPART A - CLASS A AIRSPACE**2000. General**

Unless otherwise specified, the Class A airspace areas listed in Sections 2001-2003 consist of airspace from 18,000 feet MSL up to and including FL 600. Unless otherwise authorized, all persons must operate their aircraft under instrument flight rules in airspace designated as Class A and comply with §91.135 of the Federal Aviation Regulations.

2001. Contiguous United States

That airspace of the United States, including that airspace overlying the waters within 12 miles of the coast of the 48 contiguous states, from 18,000 feet MSL to and including FL 600 excluding the states of Alaska and Hawaii, Santa Barbara Island, Farallon Island, and the airspace south of lat. 25°04'00"N.

2002. Alaska

That airspace of the State of Alaska, including that airspace overlying the waters within 12 miles of the coast, from 18,000 feet MSL to and including FL 600 but not including the airspace less than 1,500 feet above the surface of the earth and the Alaska Peninsula west of long. 160°00'00"W.

2003. Offshore Airspace Areas**Atlantic High**

That airspace extending upward from 18,000 feet MSL to and including FL 600 within the area bounded on the east from north to south by the Moncton FIR, New York Oceanic CTA/FIR, and the San Juan Oceanic CTA/FIR; bounded on the south from east to west by the Santo Domingo FIR, Port-Au-Prince CTA/FIR, and the Havana CTA/FIR; bounded on the west from south to north by the Houston Oceanic CTA/FIR, southern boundary of the Jacksonville Air Route Traffic Control Center and a line 12 miles offshore and parallel to the U.S. shoreline.
