INTRODUCTION

This Statewide Transportation Improvement Program for federal fiscal years 1995 through 1997 has been prepared by the Arkansas State Highway Commission in response to Title 23 U.S.C. 135 - Statewide Planning Requirements, as amended by the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991.

The projects listed are for the program period from October 1, 1994 through September 30, 1997. Authorization may be requested for any phase of development (i.e., Preliminary Engineering, Right of Way, Utilities, or Construction) during F.Y.'s 1995-1997. Authorization for pre-construction phases of development for projects scheduled for F.Y.'s 1996-1997 may be requested in 1995 in order to prepare the project for construction within the year scheduled.

With respect to urban areas greater than 50,000 in population, the Federal Transit Administration Projects listed in the Transportation Improvement Programs (TIP's) that have been developed by the various Metropolitan Planning Organizations are hereby included as part of the overall Federal-Aid highway construction program. For additional information on projects located within a TIP Area , consult the following TIP's:

- Bi-State - Bi-State Transportation Study
(Crawford & Sebastian Counties)
- CARTS - Central Arkansas Regional Transportation Study
(Pulaski, Saline, Faulkner & Lonoke Counties)
- NARTS - Northwest Arkansas Regional Transportation
Study (Washington & Benton Counties)
- PBATS - Pine Bluff Area Transportation Study
(Jefferson County)
- TUTS - Texarkana Urban Transportation Study
(Miller County)
- WMATS - West Memphis Area Transportation Study
(Crittenden County)

Projects (including Federal Transit Administration Projects) utilizing funds set aside for rural areas (populations less than 5,000) were selected in consultation with the appropriate local officials.

This program is financially constrained in accordance with federal regulations set forth in 23 U.S.C. 135. This program includes both the Federal-Aid portion and the 100% State funded portion of the State's overall highway construction program.

Further information regarding this program may be obtained by contacting:

Mr. Steve Teague
Assistant Chief Engineer for Planning
Arkansas State Highway and Transportation Department
