Oregon Department of Transportation

## **INTRODUCTION**

**DUII Control System Performance Measures for Oregon Counties** has been compiled for your use by the staff of the Transportation Safety Division, Oregon Department of Transportation (TSD-ODOT). It is hoped that the document will aid you in assessing the severity of Driving Under the Influence of Intoxicants (DUII) related problems in your jurisdiction.

Crashes involving alcohol and/or other drugs account for nearly half of the fatal and serious injury crashes occurring in Oregon each year. Many of these crashes involve youth that are inexperienced both as drinkers and drivers. Though these problems are not unique to the state of Oregon, Oregonians are taking a "hard line" on alcohol and/or other drug-related fatal and injury traffic crashes.

Driving Under the Influence of Intoxicants (DUII) is a complex social problem that has origins in both internal and external system factors. Due to its complexity, Oregon communities and involved agencies must concentrate on addressing the negative reinforcing DUII variables. Chief among these variables are: 1) system deficiencies in dealing with the intoxicated driver, and 2) the public's knowledge, attitudes and behavior relating to impaired driving.

**DUII Control System Performance Measures for Oregon Counties** seeks to present data compiled from a number of state agency sources that may be used in conjunction with alternative sources, such as attitude and perception surveys, to analyze and identify DUII-related problems. With this information, plus input received from involved agencies and groups, it is hoped that specific problems will be identified and targeted for special countermeasure efforts.

If you find this publication useful, please contact us at TSD-ODOT. We want to design future editions to meet your needs and would appreciate any and all comments concerning the utility of the publication.

## **SYSTEM HIGHLIGHTS - 2001**

- Fatal and injury traffic crashes decreased from their highest point in 1996, when 25,024 crashes occurred, to 18,422 in 2001. The fatal and injury crash rate for Oregon (crashes per million vehicle miles traveled) has declined from 0.79 in 1991 to 0.54 in 2001.
- Nighttime fatal and injury crashes have decreased by 19% from 2,930 in 1991 to 2,383 in 2001.
- The percentage of fatalities that were determined to be alcohol-related has decreased from 47.7% in 1991 to 35.5% in 2001.
- DUII offenses have decreased 13.8% from a high of 29,108 in 1991 to 25,097 in 2001, while Oregon's population increased 15.6% during the same period.
- DUII arrests for drugs, *other than alcohol*, have increased from 101 in 1991 to 933 in 2001. This marked increase is due, in part, to the Drug Recognition Expert Program which trains officers to recognize impairment due to intoxicants other than alcohol.
- Breath test refusals decreased from 5,438 in 1991 to 3,257 in 2001.
- The number of diversion agreements has decreased slightly from 14,517 in 1991 to 12,134 in 2001.
- DUII convictions have decreased from their highest point in 1991, when 12,905 offenders were convicted of DUII, to 10,046 in 2001. The percent of convictions that were for a third or subsequent DUII has decreased from 6.8% in 1991 to 5.5% in 2001.
- The number of treatment enrollments for persons convicted of DUII has increased from 8,550 in 1991 to 9,023 in 2001. In 2001, 98.1% of the enrollments were in rehabilitation treatment programs.
- Fatalities of youth under 21 years of age have decreased from 104 in 1991 to 100 in 2001. This figure has increased significantly from 77 in 1999. There were 22 alcohol-related fatalities reported for youth under 21 in 2001.
- Minor in Possession (MIP) citations numbered 12,721 in 1991 and increased to 14,069 by 2001. In 2001, 1,534 juveniles were actually denied their license privileges.

## USING THE DATA

**DUII Control System Performance Measures for Oregon Counties** is designed to be used by persons familiar with the DUII control system in Oregon. The information presented in this document is intended to provide comparative data on Oregon counties for assessment of DUII-related problems and countermeasure activities. It can also be useful in obtaining support for county traffic safety programs by providing a comparison of the severity of the major traffic safety problems from county to county and to the state as a whole.

The seven DUII system areas considered are:

- Crashes
- Enforcement Activity
- Implied Consent Suspensions
- Diversion Program
- DUII Convictions
- Additional Court Activity
- Youth Under 21 Years of Age

A series of data tables has been constructed to summarize data representative of the DUII system for each county in Oregon. Use the data cautiously and only after you have reviewed the "Document Citations and Notations" contained in the Appendix. Data from different sources and/or different time periods may not necessarily be comparable. In some instances, data tables are missing one or two system elements because the data elements were unknown, unreported, not applicable, or not available.

Data can be the basis for a complete analysis of the DUII control system in your county. It can be used to answer such questions as:

- Are fatal and injury crashes increasing or decreasing?
- Is the change significantly different than for other similar sized counties or the state as a whole?

Simple statistical techniques such as normalizing data from two different sized populations and performing chi square analysis can make such analysis more meaningful. Chi square analysis is used to determine if the difference between two different occurrences over time, or between one area or another or two or more different data elements is significant. Other questions might call for relating two or more different kinds of data, such as offenses, arrests and convictions.

You will find that the data will not only help you answer questions about how the DUII system is operating in your county, but will lead you to raise additional questions. It may encourage you to do additional research. If more detailed data is needed, contact either the source cited or Transportation Safety Division staff. Transportation Safety Division staff will try to help you secure additional information.

DUII CONTROL SYSTEM PERFORMANCE MEASURES FOR THE STATE OF OREGON, 1991-2001

	<u>1991</u>	<u>1992</u>	<u>1993</u>	<u>1994</u>	<u>1995</u>	<u>1996</u>	<u>1997</u>	<u>1998</u>	<u>1999</u>	<u>2000</u>	<u>2001</u>
1. Population Characteristics											
a. Population (in thousands)	2,930	2,979	3,038	3,082	3,132	3,181	3,217	3,268	3,301	3,437	3,472
