# 2013-2017 Iowa Transportation Improvement Program 

The Iowa Transportation Improvement Program (Program) is published to inform you of planned investments in our state's transportation system. The Iowa Transportation Commission (Commission) and Iowa Department of Transportation (DOT) are committed to programming those investments in a fiscally responsible manner.

This document describes planned investments in Iowa's multimodal transportation system including aviation, transit, railroads, trails, and highways. A large part of funding available for highway programming comes from the federal government. Accurately estimating future federal funding levels is dependent on having a multiyear federal transportation authorization bill in place. The most recent authorization, Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), expired September 30, 2009, and to date it has been extended nine times because a new authorization has not yet been enacted. The current extension will expire June 30, 2012.

In recent years the highway program has been developed based on very conservative federal funding estimates due to the lack of a multiyear authorization and the potential insolvency of the Highway Trust Fund. However, as Congress extended SAFETEA-LU and passed annual appropriations, they essentially maintanned existing federal funding levels which were higher than initial conservative estimates. This required the Commission to amend previous highway programs and hindered long range planning efforts resulting in inefficient use of funding. In order to avoid this inefficient use of funding, the Commission is basing this highway program on federal funding levels much closer to current federal funding levels. This does increase financial risk. If federal funding is reduced, adjustments to the highway program will be required.

As part of initiatives to assess road funding needs and potential revenue sources, Governor Branstad directed the Iowa DOT to identify $\$ 50$ million of efficiencies from Iowa's Road Use Tax Fund (RUTF). With this Program, the Commission implemented $\$ 33$ million of the efficiencies identified. Legislative and low DOT action is required to implement the remaining efficiencies.

One of the RUTF efficiencies included development of a Transportation Asset Management Plan (TAMP). The TAMP, when fully implemented, will help the Iowa DOT, along with cities and counties, operate, maintain, and preserve the transportation system in the most cost effective manner to achieve desired service objectives. This effort has already identified the need for a shift in the type of roadway improvements that are programmed and increased investments for non-interstate bridge modernization activities. Both of these actions have been included in this highway program. In fact, this Program includes almost $\$ 800$ million of investments in Iowa's state owned bridges.

For fiscal years (FY) 2013-2017, approximately $\$ 2.6$ billion is forecast to be available for highway right of way and construction. In developing the highway program, the Commission's primary investment objective remains stewardship (ie. safety, maintenance and modernization) of Iowa's existing highway system. Over $\$ 1.3$ billion is programmed in FY2013 through FY2017 for modernization of Iowa's existing highway system and for enhanced highway safety features. The highway section also includes significant interstate investments on I-29 in Sioux City, I-29/80/480 in Council Bluffs, and I-74 in Bettendorf/Davenport. Portions of these investments address stewardship needs.

Another highway programming objective is developing and constructing capacity and system enhancement projects. Several projects were added to the highway program and are listed in the highway section of the Program.

The Iowa DOT and Commission appreciate the public's involvement in the state's transportation planning process. Comments received personally, by letter or through participation in the Commission's regular meetings or public input meetings held around the state each year, are invaluable in providing guidance for the future of Iowa's transportation system.

It should be noted that this document is a planning guide. It does not represent a binding commitment or obligation of the Commission or Iowa DOT, and is subject to change.

You are invited to visit the low DOT's website at iowadot.gov for additional and regular updates about the department's programs and activities.

Respectfully,

Lone R. Miles

## Iowa Transportation Policy

Goal: The transportation goal for lowa is to provide adequate, safe and efficient transportation services to the public.

## Policy

## A. General

1. Promote a safe transportation system that addresses user needs, and maximizes economic and social benefits for lowans.
2. Provide for a participatory planning process which: (a) involves public, private and citizen interests; (b) encourages complementary transportation and land development patterns; and (c) gives consideration to the effects of transportation on the state's natural, cultural, human, and economic resources.
3. Encourage and support programs to provide commodity movement and mobility for all lowans.
4. Develop, promote, administer, and enforce just and equitable policies and procedures for the registration, regulation and operation of motor vehicles, aircraft, and common carriers of passengers and freight.
5. Promote financing of the transportation system through user and nonuser sources in an equitable manner, including public and private cost-sharing partnerships where government and the private sector share in the responsibility for transportation planning and development, and for service and facility improvements
6. Administer the land and resources under its jurisdiction in a manner that both protects the rights of individuals and gives consideration to the effects of its activities on the environment.
7. Encourage and support an intermodal transportation system by identifying, improving and/or facilitating points of transfer between modes.
8. Promote a transportation research and technology transfer program to develop and improve services, methods and materials.

## B. Plan

1. Develop a transportation system plan, which:

- Considers all transportation modes as interacting elements.
- Considers facilities and services necessary for person and commodity movement from origin to destination.
- Contributes to the development and implementation of a comprehensive state plan.
- Exerts a positive influence on social, economic, environmental, and aesthetic values.
- Provides safe and convenient travel opportunities
- Minimizes economic, energy and environmental costs.
- Coordinates available federal, state and local resources
- Recommends appropriate investment and funding procedures.
- Makes the best use of land resources for permanent transportation use.
- Encourages more efficient use of energy resources.
- Fosters usage of technological advancements in transportation facilities.
- Evaluates progress toward achievement of the goal contained in this policy.

2. Encourage and assist in the development, preservation, maintenance, improvement, and efficient use of all transportation systems, including:

- General aviation, airport facilities and air carrier services
- Highway transportation systems and services, including accessibility for commercial and industrial economic development throughout lowa.
- Public transit systems and services.
- Railroad transportation systems and services
- River transportation.
- Multiuse trails and corridors for transportation, recreation and tourism.

3. Develop and participate in programs to improve the safety of transportation systems
4. Encourage and support development of transportation education programs.

## C. Program

1. Annually prepare a program of capital investment, services and regulatory practice.

## Aviation Program

## Aviation Program

The lowa DOT's Office of Aviation promotes, maintains, and develops lowa's air transportation system through advocacy, planning, technical assistance, and the administration of state and federal funds. The office also enhances the safety and security of the air transportation system through routine airport inspections, administration of the annual aircraft registration process, educational programs, and safety related programs. The office produces an airport directory and aeronautical chart on a biennial basis as a service to the pilot community using lowa's air transportation system.

For additional information, see the Office of Aviation's website at http://www. iowadot.gov/aviation

The Airport Improvement Program (AIP) funds aviation safety programs and aviation planning and development projects. The Commission approves annual funding allocations for various aviation safety programs and aviation planning and development projects.

Aviation Safety includes Immediate Safety Enhancements (ISE) and Wildlife Mitigation programs. Airports may apply for grants on an as-needed basis while funding is available. The percentage of local match required for the projects varies by type of program.

Automated Weather Observation Systems (AWOS) provides a network of aviation weather reporting stations at 43 airports throughout the state.

AWOS enhances safety by providing real-time weather information to pilots via ground-to-air radio weather broadcasts, the Internet, and phone. The system is useful both for in-flight and pre-flight planning functions. The AWOS system provides temperature, dew point, barometric pressure, wind direction, wind speed, peak gusts, visibility, and cloud height.

The majority of AWOS sites were installed with assistance from the federal airport program. Annual state funding provides operational maintenance and transfer of data into the national system, which enables a broad network of users to access the information for aviation and weather-forecasting needs.

Other members of the public can access AWOS information via the telephone and Internet at weatherview.iowadot.gov.

The Runway Marking Program provides safety critical markings that provide key operational information to pilots on the ground and from the air. Markings such as runway numbers, touchdown markings, hold lines, and center lines are painted on runways, taxiways, and other key operational areas of an airport. Every year, public-owned airports are identified by the lowa DOT and are marked based on need and available state funding

Windsocks are very basic safety tools that provide valuable information to pilots regarding wind direction and speed prior to takeoff and landing. Windsocks are subject to weathering and need to be replaced every one to two years. They are supplied to public-use airports and hospital heliports by the lowa DOT at no charge

Aviation Planning and Development includes airport land use planning, airport development projects at public-owned airports, required match for federally funded statewide studies, and air service development funds for commercial service airports.

Airport development projects include: land acquisition; runway, apron and taxiway preservation and construction; access control; planning studies; airport lighting; fuel facilities; and, installation of visual navigational and communication aids. The percentage of local match required for projects varies, depending on the type of project

Applications are solicited each spring and are approved by the Commission when funding is available.

The General Aviation Vertical Infrastructure (GAVI) Program provides funding for land side development projects such as terminal, hangar and fuel-facility construction and/or renovation at public-owned general aviation airports.

Applications are solicited each spring and are approved by the Commission when funding is available.

The Commercial Service Vertical Infrastructure (CSVI) Program provides funding for land side development projects such as terminal, hangar, maintenance and fuel-facility construction, and/or renovation at commercial service airports.

Applications are solicited each spring, and are approved by the Commission when funding is available.

These funds are divided among the commercial service airports by a 50/40/10 formula. One-half of the funds are allocated equally among the airports, 40 percent of the funds are allocated based on the percentage of enplaned passengers at each airport versus the total number of enplaned passengers in the state, and 10 percent of the funds are allocated based on the percentage of the air cargo tonnage at each airport versus the total tonnage in the state.

Federal Airport Improvement Program (AIP) funding is available to airports that are part of the National Plan of Integrated Airports System (NPIAS). Administered by the Federal Aviation Administration (FAA), the AIP provides funds for projects to improve infrastructure including runways, taxiways, noise control, land purchases, navigational aids, and safety. There are 78 airports in lowa that are eligible for federal funding
lowa is a channeling state, which means that general aviation airports that are eligible for federal funds and small commercial service airports with fewer than 10,000 annual passenger boardings are required to submit pre-applications for the AIP to the lowa DOT's Office of Aviation. Pre-applications are submitted in December, and forwarded to the FAA in February after the Commission has approved prioritization of the pre-applications. Applications are then prioritized by the FAA and a program for the next federal fiscal year is developed.

For additional information, see the Office of Aviation's website at http://www.iowadot.gov/aviation.

## Transit Program

## Transit Program

The Iowa DOT's Office of Public Transit promotes a public transportation system that meets the needs of lowans through advocacy, technical assistance, and administration of state and federal financial assistance to lowa's 35 local public transit systems. The office is responsible for administering all of the state transit programs, plus all federal transit assistance for regional and small urban transit systems, and intercity bus carriers, and most of the federal nonformula projects for transit systems serving lowa's urbanized areas. Planning projects are administered for the state's metropolitan planning organizations and regional planning affiliations by the department's Office of Systems Planning.

State Transit Assistance (STA) - lowa devotes four percent of the fees for new registration collected on sales of motor vehicles and accessory equipment to support public transportation. Most of this money is distributed by a formula based on each transit system's performance during the previous year in terms of rides, miles and local funding support. These formula funds can be used to support any operating, capital or planning expenses related to the provision of public passenger transportation. Up to $\$ 300,000$ of each year's STA funds are available for technical training and other projects to improve public transit in lowa. Estimated STA receipts for FY2011 are \$10,238,656.

Public Transit Infrastructure Grant Program (PTIG) - This program was established by the 2006 session of the lowa General Assembly, but is based on annual appropriations. $\$ 2.2$ million was appropriated for FY2007, FY2008, and FY2009. $\$ 1.25$ million was appropriated in FY2010 and $\$ 2.0$ million in FY2011. The purpose of the program is to provide funding for improvement of the vertical infrastructure of lowa's designated public transit systems. These funds are available on a competitive basis. Program funds may reimburse up to 80 percent of transit-related costs, with at least 20 percent of transit-related projec costs derived from local sources. When this funding is combined with federal or other state resources, the project's transit-related costs may not exceed 80 percent.

The Federal Transit Administration (FTA) is a unit of the U.S. Department of Transportation that administers a number of programs offering financial support for local public transportation. All FTA programs providing assistance to lowa transit systems are funded through the 2.86 cents per gallon of the federal motor fuel tax dedicated to transit. When FTA funds are used for support of operating costs, the FTA participation is limited to 50 percent of the net project cost. When used for capital improvements, the FTA participation is normally limited to 80 percent of net cost, but can go to 90 percent for specific features required for compliance with the Americans with Disabilities Act or the Clean Air Act, or a "blended" 83 percent for purchase of rolling stock equipped with such features. When used for planning, the FTA participation is limited to 80 percent.

- Section 5303 Metropolitan Transportation Planning Program - These FTA funds come to lowa based on the number of individuals living in urbanized areas (over 50,000 population) compared to other states. lowa uses these funds to support intermodal transportation planning activities in urbanized areas by metropolitan planning organizations.
- Section 5304 Statewide Transportation Planning Program - These FTA funds come to lowa based on the number of individuals living in urbanized areas (over 50,000 population) compared to other states. A minimum allocation provision assures all states receive a portion of the available funds. Funds may be used to support intermodal transportation planning activities anywhere in the state. lowa uses these funds, along with part of the nonurbanized formula funding, to support intermodal transportation planning activities in urbanized areas by regional planning affiliations.
- Section 5307 Urbanized Area Formula Program - These FTA funds for areas with populations between 50,000 and 200,000 are apportioned to the state on the basis of the collective population and population density of the urbanized areas. The department suballocates them using the same formula. In areas over 200,000 in population, the FTA directs allocations, using the same formula, plus additional performance-based factors. Funds may be used to support transit capital, maintenance and planning activities in all urbanized areas, and general operations in areas under 200,000 in population. Transit systems may use up to ten percent of these funds to pay for some of the Americans with Disabilities Act paratransit costs on an 80 percent federal and 20 percent non-federal basis. In urbanized areas with populations greater than 200,000, at least one percent of these funds must be set aside for transit enhancement activities. Match for FTA funds must be from non-federal sources.
- Section 5309 Capital Investment Grants - Bus and Bus Facilities - These FTA funds are available to Iowa based on Congressional appropriations. They may be used only for transit capital improvements. Match for FTA funds must be from non-federal sources.
- Section 5310 Transportation for Elderly Persons and Persons with Disabilities Program - These FTA funds come to lowa on the basis of the number of persons who are elderly or who have disabilities within the state, compared to other states. These funds can be used to support the capital costs (including costs of contracted services) of transit services that predominantly serve elderly persons or persons with disabilities. In lowa, 70 percent of the funds are distributed among transit systems serving urbanized areas for use on such projects, while 30 percent of the funds are administered in conjunction with the non-urbanized (5311) program funds. Match for the FTA funding may come from non-DOT federal funds as well as from nonfederal sources.
- Section 5311 Non-Urbanized Area Formula Program - These FTA funds come to lowa on the basis of the number of lowans who live outside urbanized areas, compared to other states. The funds may be used to support the cost of transit operations or capital or planning activities in non-urbanized areas. Match for the FTA funding may come from non-DOT federal funds, as well as from non-federal sources. Federal law requires that 15 percent of the funds be used for support of intercity bus projects.
- Section 5316 Job Access Reverse Commute Program (JARC) - These FTA funds are distributed at the national level based on the number of lowincome persons. Separate apportionments are made to each urbanized area with a population of 200,000 or more, and two separate apportionments to each state (one for non-urbanized areas and one for urbanized areas of less than 200,000 population). Each apportionment must be made available locally on a competitive basis. These funds may be used to provide transportation services to assist welfare recipients and low-income individuals to access employment opportunities and related services. Funding can be used to support operating or capital costs. Match for the FTA funding may come from non-DOT federal funds, as well as from nonfederal sources.
- Section 5317 New Freedom Program - These FTA funds are distributed at the national level based on the number of persons with disabilities. Separate apportionments are made to each urbanized area with a population of 200,000 or more, and two separate apportionments to each state (one for non-urbanized areas and one for urbanized areas of less than 200,000 population). Each apportionment must be made available locally on a competitive basis. This program may be used to support operating or capital projects that address the transportation needs of persons with disabilities that are new since passage of SAFETEA-LU, and that go beyond the minimum requirements of the Americans with Disabilities Act (ADA). Match for the FTA funding may come from non-DOT federal funds, as well as from non-federal sources.

Federal Flexible Transportation Funding - These federal funds may be "flexed" to fund public transit projects, or roadway or bicycle/pedestrian projects. When programmed for transit projects, these funds are transferred to the FTA and administered under the rules of one of the FTA programs, except that the matching requirements remain as legislated for the specific flex-funding program.

- Surface Transportation Program (STP) - These are federal funds that may be "flexed" to fund public transit capital projects, roadway or trail projects with an 80 percent federal participation limit, and match required to come from non-federal sources. In lowa, about half of these funds are
programmed by local governments acting through metropolitan or regional planning agencies. When programmed for transit projects, these funds are transferred to the FTA and administered the same as Section 5307 or 5311 funds, depending on whether an urbanized or non-urbanized transit system is the project sponsor.
- Iowa's Clean Air Attainment Program (ICAAP) - This is a state program which commits federal funds to address the federal congestion mitigation and air quality program. This program allows "flexing" of funds to transit, roadways or trails. lowa receives a minimum allocation of these funds because it does not have any areas in violation of federal air-quality standards. These funds can be used for any purpose that STP funds can be used for, plus certain start-up operating costs for transit and rideshare projects. Federal participation is limited to 80 percent (including for net start-up operating costs), and match must be from non-federal sources. In lowa, funds are programmed based on a statewide application process that selects projects based on their anticipated air quality or congestion relief benefits. When programmed for transit projects, these funds are transferred to the FTA and administered through statewide grant by the Office of Public Transit, using the rules of either the 5307 or 5311 program, depending on whether an urbanized or non-urbanized transit system is the project sponsor.

Additional information and assistance can be found on the Office of Public Transit website at http://www.iowadot.gov/transit.

## Large Urban, Small Urban and Regional Transit Systems

## Railroad Program

## Railroad Program

The lowa DOT's Office of Rail Transportation encourages and assists with the development and maintenance of a safe, efficient and economical railroad transportation system. Toward that end, the office administers programs that:

- Enhance safe track conditions through routine track inspections.
- Advocate for policies and practices that benefit the rail transportation system.
- Promote the rail transportation system as a component of a balanced, statewide transportation system.

More information about the Office of Rail Transportation, program application forms and other rail activities is available at http://www.iowadot gov/iowarail.

The Highway-Railroad Crossing Safety Program promotes public safety at rail crossings and near rail lines throughout the state. The federallyfunded program participates in the cost of safety improvements at public highway-railroad crossings. These funds are used to install or upgrade crossing signal devices, and provide low-cost improvements, such as crossbucks and yield signs, increased sight distance, increased signal lens size or crossing closures. Funding is based on a benefit/cost calculation that considers a number of factors, including highway and train traffic, accident history and project cost.

A railroad or roadway jurisdiction must apply for a project annually by July 1 to be considered for funding. The federal-aid safety fund provides 90 percent of the cost of the automatic warning devices.

Projects funded for 2012 and 2013 are shown on pages $23-29$. For more information call 515-239-1549.

The Highway-Railroad Crossing Surface Repair Program promotes public safety at highway-rail crossings throughout the state. The program participates in the cost of surface replacement at public highway-railroad grade crossings. The annual allocation of \$900,000 from the Road Use Tax Fund pays 60 percent of the cost of the replacement, with the roadway jurisdiction and railroad each paying 20 percent. Applications must be submitted jointly by railroads and highway authorities to be considered for funding. Eligible projects are programmed in the order applications are received by the lowa DOT.

Annually, \$1 million in federal-aid safety funding is used to rebuild public highway-railroad crossings with higher train and vehicle traffic. Federal funds pay for 60 percent of the project cost, with the roadway jurisdiction and railroad each paying 20 percent. Projects are selected from the applicants for the state-funded surface repair program.

Funding from lowa's Primary Road Fund is used annually to rebuild high-way-railroad crossing surfaces on the Primary Road System. This allows federal and state surface repair funds to be utilized on city and county projects.

State and federal highway-railroad grade crossing surface repair projects programmed for FY2012-2013 are shown on pages 25-28. For more information call 515-239-1108.

The Railroad Revolving Loan and Grant Program assists business and industry to improve rail infrastructure. The program helps finance, through loans and grants, construction or expansion of rail connections (e.g., sidings, switches, etc.) and railroad rehabilitation or expansion. Rail loan repayments and state appropriations fund the program. Applications may be submitted at any time and are evaluated as funding becomes available All projects funded in FY2012 are shown on page 29. For more information call 515-239-1066.

## State and Federal Trails Programs

## State Recreational Trails Program

The State Recreational Trails Program provides funds to establish transportation and recreation trails in lowa for the use and enjoyment of the public. Eligible applicants include state and local government agencies, municipal corporations, counties, and nonprofit organizations. Private organizations must have a governmental agency as a co-sponsor. The program is restricted to the acquisition, construction or improvement of trails open for public use, or trails that will be dedicated to public use when completed. A proposed trail project must meet the following requirements.

- The project must be part of a local, area-wide, regional or statewide plan.
- The trail route must be designed to allow enjoyment of scenic views or points of historical interest, and maximize safety.
- The project must include a contribution of at least 25 percent matching funds from other sources. This match cannot include grants from other state agencies or provisions of in-kind services.

The deadline for applications is July 1 of each year, depending on funding availability.

Applications are evaluated primarily using the following criteria.

- Need, in terms of population to be served and existing trails in the area (25 points)
- Compatibility with local, area-wide, regional or statewide plans (15 points)
- Benefits of multiple uses and recreational opportunities (20 points)
- Quality of the site (25 points)
- Economic benefits to the local area (10 points)
- Special facilities for disabled users (5 points)

Due to lack of legislative appropriated funding, the July 2010 round of applications were suspended.

Additional information and assistance can be found on the Office of Systems Planning website at http://www.iowadot.gov/systems_planning/fedstate_ rectrails.htm, or by calling 515-239-1664.

Fiscal Year 2012
Water Trails Planning, Design and Construction Activities 2011-2013 (Iowa DNR)

## Federal Recreational Trails Program

The Federal Recreational Trails Program is a program of the U.S. Department of Transportation's Federal Highway Administration that provides funding for both motorized and nonmotorized trail projects.

The Federal Recreational Trails Program funding represents a portion of the revenue received by the federal Highway Trust Fund from the federal motor fuel excise tax paid by users of off-road recreational vehicles, such as snowmobiles, off-road motorcycles, all-terrain vehicles, and off-road light trucks.

Funding Distribution - State Level - Each state administers its own program and establishes its own procedures to solicit and select trail projects for funding. lowa has chosen to have applications for funding assistance postmarked by October 1.

States may use up to seven percent of their funds for administrative costs and up to five percent of their funds for education. The remaining funds are for projects from the following categories.

- Maintaining existing trails, including grooming trails across snow
- Restoring damaged trails or areas damaged by trail-related use
- Providing trail access for people with disabilities
- Developing trailside or trailhead facilities
- Purchasing or leasing equipment for trail construction, maintenance, or grooming
- Acquiring easements or property for trails
- Constructing new trails

States may provide grants to city and county governments, and other government entities, including federal agencies and special government districts.

Iowa has established a minimum $\$ 5,000$ grant amount. Iowa does not have a maximum allowable grant amount. The maximum federal share for each project is 80 percent. The remaining amount may come from federal, state, local or private funding sources. Other select federal funding sources may be used as matching funds. In-kind materials and services may also be permitted toward the project match.

Twenty-nine applications were received by the October 1, 2011, deadline. The applications represented total project costs of $\$ 25,507,412$ with $\$ 12,910,901$ requested from the Federal Recreational Trails Program. Six projects were
approved by the Commission for a total funding award of \$1,239,400 and total project cost of $\$ 2,658,872$.

Additional information and assistance can be found on the Office of Systems Planning website at http://www.iowadot.gov/systems_planning/fedstate_ rectrails.htm, or by calling 515-239-1664.

## Revitalize lowa's Sound Economy (RISE)

## Revitalize Iowa's Sound Economy (RISE)

The RISE Fund was created in 1985 to promote economic development in lowa through construction or improvement of roads and streets. The fund is designed to target value-adding activities, provide maximum economic benefits, emphasize local involvement and initiative, and address situations requiring an immediate response and commitment of funds. RISE currently receives approximately $\$ 39$ million annually. City and county governments can apply for the city and secondary road RISE funds. Primary road RISE funds are deposited in the Primary Road Fund for use on the Commercial and Industrial Network.

When the RISE Fund was established, an amount equal to one cent per gallon of taxable fuel was designated for RISE improvements on the primary road system. An equal amount, split evenly, with $1 / 2$ cent each for city streets and secondary roads was also allocated to the RISE Program. However, over the last 25 years, the legislature has on two occasions modified how the RISE revenues for secondary roads are allocated. Currently, half of the secondary road RISE revenues are directly allocated to the Secondary Road Fund and the remaining half are allocated to secondary road RISE projects.

RISE funding assists the efforts of local communities to attract industries to lowa, as well as expand existing ones. Since its beginning, RISE has assisted in creating or retaining more than 56,660 jobs. In addition, many other jobs may be created as new and expanding industries take advantage of land that is opened up for development with the help of RISE funding.

Several factors must be considered when evaluating RISE applications. These factors include the effect on competition, economic impact to the state, quality of jobs to be assisted, and a business record of law violations.

There are two types of projects considered under the RISE Fund with the city street and secondary road funds.

Immediate Opportunity Projects - This category is reserved for projects related to an immediate, nonspeculative opportunity for permanent job creation or retention. The applicant should be in the process of negotiating a location or retention decision with a developer or firm, and must be able to demonstrate that an immediate funding commitment is essential to influence a job location or retention decision.

Applications are presented to the Commission for a decision as quickly as possible, following a reasonable period for review and evaluation.

Local Development Projects - This category is for projects that support local economic development, but that do not require an immediate commitment of funds or meet the threshold set for immediate opportunity projects. These projects are selected through a competitive evaluation process conducted semi-annually. Deadlines for submittal of applications are February 1 and September 1 of each year.

RISE Overview - A summary of the 22 projects awarded funding during FY2011 is included on pages 40-41.

Annual Report - This summary also serves as the annual report required by 761 lowa Administrative Code section 163.3(4). The following table documents the amount of RISE funding awarded/programmed in FY2011, compared with the amount of revenue distributed to the RISE Fund that year. It is possible that more funding is awarded/programmed in a year than is generated due to the timing of fund obligation, project construction and fund expenditure.

## Summary of FY2011 RISE Funding

|  | Amount <br> Awarded/ | Annual <br> Revenue <br> Programmed | Percent of Annual <br> Revenue Awarded/ |
| :--- | :---: | :---: | :---: |
| Programmed |  |  |  |

# Iowa Statewide Transportation Enhancements 

## Iowa Statewide Transportation Enhancements

Transportation enhancement projects are intended to go beyond the normal mitigation of a transportation improvement project. To be eligible as a transportation enhancement activity, any project or area served by the project must fit one or more of the following categories.

- Facilities for pedestrians and bicycles
- Safety and educational activities for pedestrians and bicyclists
- Acquisition of scenic easements and scenic or historic sites, including historic battlefields
- Scenic or historic highway programs, including tourist and welcome centers
- Landscaping and other scenic beautification
- Historic preservation
- Rehabilitation and operation of historic transportation buildings, structures or facilities, including historic railroad facilities and canals
- Preservation of abandoned railway corridors, including the conversion and use of those corridors for pedestrian or bicycle trails
- Inventory, control and removal of outdoor advertising
- Archaeological planning and research
- Environmental mitigation to address water pollution due to highway runoff or to reduce vehicle-caused wildlife mortality, while maintaining habitat connectivity
- Establishment of transportation museums

Activities already required under the SAFTEA-LU or any other federal law may not be funded as transportation enhancements. In addition, transportation enhancements must have a direct relationship to the surface transportation system, either as it exists or is planned

In addition to meeting eligibility requirements, statewide transportation enhancement projects should have a statewide significance. Projects of statewide significance may be defined as having one or more of the following characteristics.

- Statewide use or importance
- Impacts beyond regional or metropolitan area boundaries
- Enhancement of the quality or utility of the state transportation system
- State tourism benefits
- Statewide planning

Statewide enhancement funding is requested by submitting a project application. Forms are available from the lowa DOT's website at iowadot.gov. Applications for statewide enhancement projects will be reviewed by one of three advisory committees: Trail and Bicycle Facility; Historic and Archaeological; or Scenic and Environmental. Projects that may qualify under several categories will be reviewed by the category specified by the project sponsor. A committee may refer an application to another committee for evaluation.

The Trail and Bicycle Facility Project Review Committee reviews statewide projects predominantly categorized as:

- Facilities for pedestrians and bicycles
- Preservation of abandoned railway corridors, including the conversion and use of those corridors for pedestrian or bicycle trails.
- Safety and educational activities for pedestrians and bicyclists.

The Historic and Archaeological Project Review Committee reviews statewide projects predominantly categorized as:

- Acquisition of historic sites and historic battlefields.
- Historic highway programs, including tourist and welcome centers.
- Historic preservation.
- Rehabilitation and operation of historic transportation buildings, structures or facilities, including historic railroad facilities and canals.
- Archaeological planning and research.
- Establishment of transportation museums.

The Scenic and Environmental Project Review Committee reviews statewide projects predominantly categorized as:

- Acquisition of scenic easements and scenic sites.
- Scenic highway programs, including tourist and welcome centers.
- Landscaping and other scenic beautification.
- Inventory, control and removal of outdoor advertising.
- Environmental mitigation to address water pollution due to highway runoff or to reduce vehicle-caused wildlife mortality, while maintaining habitat connectivity.

Advisory committee members include recognized experts and representatives of interest groups appointed by the lowa DOT, and representatives of the lowa Departments of Natural Resources, Cultural Affairs, Economic Development, and Transportation.

Federal funding can provide up to 70 percent of the proposed cost of eligible activities.

Applicants must provide a commitment of at least 30 percent of eligible costs. Federal funds cannot be used as matching funds, unless expressly permitted by law. State funds are eligible for use as a match.

Twenty Trail and Bicycle Facility applications totaling \$24,639,808 and requesting $\$ 12,586,131$ plus fifteen Scenic and Environmental applications totaling $\$ 9,081,338$ and requesting $\$ 5,038,867$ plus six Historic and Archaeological applications totaling $\$ 4,294,865$, and requesting $\$ 2,441,332$ were received by the October 1, 2011, deadline. Four Trail and Bicycle Facility projects for $\$ 2,350,000$, four Scenic and Environmental projects for $\$ 1,739,375$ and three Historic and Archaeological projects for $\$ 1,201,785$ were approved by the Commission.

Additional information and assistance can be found on the Office of Systems Planning website at: http://www.iowadot.gov/systems_planning/
trans_enhance.htm, or by calling 515-239-1664.

# lowa's Clean Air Attainment Program (ICAAP) 

# Iowa's Clean Air Attainment Program (ICAAP) 

ICAAP projects are intended to improve air quality by maximizing vehicle emission reductions via traffic-flow improvements, reduction of vehicle miles of travel, reduction of single-occupant vehicle trips, and congestion reduction. Projects should reflect a strong planning process involving close coordination among the lowa DOT, metropolitan planning organizations, transportation management areas, regional planning affiliations, and other state and local air quality agencies. Projects should have a high priority in appropriate conges-tion-management processes or long-range transportation plans. The state may use its funds for any eligible project under the Congestion Mitigation and Air Quality Improvement Program or Surface Transportation Program. Should Iowa become a nonattainment state, transportation control measures or other projects that are documented as improving air quality in lowa's State Implementation Plan (SIP) will receive the highest priority for funding.

The following types of projects are priorities for funding in lowa's program.

- Projects that reduce ozone, carbon monoxide, or PM-2.5 and PM-10 air quality problems
- Projects that reduce single-occupant vehicle trips or vehicle miles of travel
- Transportation projects that reduce highway congestion and improve roadway traffic flow
- Transportation control measures or other transportation-related projects identified in an approved SIP, if applicable
- Projects that assist in the development of management systems for traffic congestion, public transportation or intermodal facilities

Eligibility - lowa's program funds may be used anywhere in the state for any activity eligible under the Surface Transportation Program, as described in Section 133(b) of Title 23, U.S. Code, as amended by SAFTEA-LU, or the Congestion Mitigation and Air Quality Program, as indicated in Section 149(b) of Title 23, U.S. Code, as amended by SAFETEA-LU. To be eligible for lowa program funds, the project should fit into one or more of the following categories.

## Traffic Flow Improvements

- Highway and street projects that improve air quality or reduce congestion

## Shared-Ride Services

- Establishment of carpool and vanpool programs, parking areas for people using these services, and programs to match drivers and riders

## Transit Improvements

- System and service expansion for bus and rail services, operational improvements, or demand and market strategies to make transit a more attractive transportation alternative and divert riders from single-occupant vehicle trips

## Travel Demand-Management Strategies

- Techniques or programs that attempt to reduce demand for single-occupant vehicle travel, such as promotion of employee trip reduction programs, development of transportation management plans and establishment of auto-free zones

## Pedestrian and Bicycle Programs

- Pedestrian and bicycle facilities, promotional activities designed to encourage bicycle commuting and improved pedestrian walkways

## Vehicle Inspection and Maintenance Programs

- Start-up activities, such as updating quality assurance software, developing mechanic training curricula, construction of high-tech diagnostic facilities, and equipment purchases in networks meeting Environmental Protection Agency criteria

## Other Projects and Programs

- Other projects and programs that use promising technologies and feasible approaches to reduce transportation emissions
- Conversion of public fleets to alternative-fueled vehicles (eligible under certain conditions)
- Feasibility studies necessary to provide environmental documentation, although general planning studies, traffic data collection activities and similar assessments are not eligible

## Transportation Control Measures

- Transportation control measures specified in Section 108 (f)(1)(A) of the Clean Air Act Amendment are generally eligible.
(Many of these also fall into one of the previous categories listed.)
Transportation Activities in the State Implementation Plan
- Transportation activities in an approved state implementation plan, if applicable

Program Administration - Iowa's program administration, project application process and eligibility determination are coordinated by the lowa DOT's Office of Systems Planning. A project evaluation committee evaluates and ranks projects. The Office of Systems Planning submits project funding recommendations to the Commission for approval. The project evaluation committee consists of one representative selected from each of the following organizations: Iowa Department of Transportation; Iowa Department of Natural Resources; lowa Public Transit Association; metropolitan planning organizations; and regional planning affiliations. The Commission has final project selection authority.

Twelve applications were received by the October 1, 2011, deadline. The applications represented total project costs of $\$ 11,756,003$, with $\$ 5,752,803$ requested from Iowa's Clean Air Attainment Program. Eleven projects were approved by the Commission for a total funding award of $\$ 4,700,000$ and tota project cost of $\$ 11,308,343$.

Requests for assistance or information should be addressed to the lowa Department of Transportation, Office of Systems Planning, 800 Lincoln Way Ames, IA 50010, telephone 515-239-1664.

# Safe Routes to School (SRTS) Program 

## Safe Routes to School Program

The Safe Routes to School (SRTS) program resulted from enactment of the federal transportation bill SAFETEA-LU. The purposes of SRTS are to enable and encourage children, including those with disabilities, to walk and bicycle to school; make walking and bicycling to school safe and more appealing; and facilitate the planning, development and implementation of projects that will improve safety, and reduce traffic, fuel consumption, and air pollution in the vicinity of schools.

Funding Distribution - Each state administers its own program and establishes its own procedures to solicit and select projects for funding. lowa requires that applications for funding assistance be submitted by October 1.

Funding is available for both infrastructure and noninfrastructure projects. States are required to use at least 10 percent, but no more than 30 percent, of their total funding for noninfrastructure projects. All projects must address the " 5 Es"-engineering, education, encouragement, enforcement, and evaluation. Some of the eligible uses of funds include, but are not limited to:

- Planning, design and construction of projects that will improve the ability of students to walk and bicycle to school.
- Sidewalk improvements.
- Traffic calming and speed reduction improvements.
- Pedestrian and bicycle crossing improvements.
- On-street bicycle facilities.
- Off-street bicycle and pedestrian facilities
- Traffic diversion improvements within two miles of the school.
- Public awareness campaigns and educational materials
- Traffic education and enforcement in the vicinity of a school
- Student sessions on bicycle and pedestrian safety, health and environment.
- Development of school studies or plans to examine safety issues and identify walking and biking routes
- Training, including SRTS training workshops that target school and community audiences.

Eligible applicants for infrastructure projects are state and local governments. Eligible applicants for noninfrastructure projects include state and local governments, non-profit organizations, schools (both public and private), parent teacher associations, etc.
lowa has established an infrastructure grant amount minimum of \$25,000 and a maximum award of $\$ 250,000$ per jurisdiction each funding cycle. The noninfrastructure grant amount minimum is $\$ 3,500$. The federal share of funding for each project is 100 percent. No local matching funds are required.

Twelve noninfrastructure applications totaling $\$ 702,158$, and requesting $\$ 702,158$ plus 43 infrastructure applications totaling \$6,959,243 and requesting $\$ 6,145,627$ were received by the October 1, 2011, deadline. Four noninfrastructure projects for $\$ 410,552$ and 9 infrastructure projects for $\$ 1,102,333$ were approved by the Commission.

Additional information and assistance can be found on the Office of Systems Planning website at http://www.iowadot.gov/systems_planning/saferoutes.htm, or by calling 515-239-1664.

## Traffic Safety Improvement Program

## Traffic Safety Improvement Program

Traffic Safety Improvement Program funds can be used for traffic safety improvements or studies on public roads under county, city or state jurisdiction. Projects can be initiated by any incorporated city or county, or the lowa DOT The program is administered by the lowa DOT, with funding of about $\$ 6$ million per year.

Three separate funding categories are available.

## Construction or Improvement of Traffic Operations at a Specific Site -

 Eligible projects for construction or improvement of traffic operations at a specific site include the following.- Road modernization, upgrading or reconstruction
- Bridge and culvert modernization, replacement or removal
- Road intersection and interchange improvement, including channelization, traffic control devices and lighting
- Right-of-way required for a traffic safety project
- Drainage and erosion control measures that are an integral part of the project
- Traffic control devices required by the project
- Guardrail
- Tree removal
- Other construction activities directly related to or required by the safety project

Purchase of Materials for Installation of New or Replacement of Obsolete Traffic Control Devices - Costs of materials purchased for the initial installation of traffic control devices or replacement of obsolete traffic control devices to comply with the applicable warrants in the Manual on Uniform Traffic Control Devices are eligible for funding.

Transportation Safety Research, Studies or Public Information
Initiatives - Funding is available for research, studies and public information initiatives relating to traffic safety, which can include:

- Research addressing traffic safety concerns.
- Studies to address remedies for traffic operations safety at a specific location.
- Public information initiatives to emphasize traffic safety.

The maximum traffic safety funding for a site-specific project shall not exceed $\$ 500,000$, and total funding allotted for traffic control materials cannot exceed
\$500,000 annually. Total funding allotted for all research, studies and public information initiatives shall not exceed $\$ 500,000$ annually.

Applications for FY2013 funding consideration were due June 15, 2011. 66 applications were submitted requesting $\$ 7,546,800$ in safety funding. 25 of the applications requested site-specific funding, 11 requested traffic control device funding, and 30 requested funding for studies and public information initiatives. In December 2011, the Commission approved funding for 43 projects totaling $\$ 5,903,480$ in traffic safety improvement funding. A list of the approved projects is shown on the following pages.

Traffic and Safety Information and Services - Applications for funding consideration for FY2014 will be due by August 15, 2012. Application forms or further information concerning the Traffic Safety Improvement Program may be obtained by contacting the lowa Department of Transportation, Office of Traffic and Safety, 800 Lincoln Way, Ames, IA 50010, telephone 515-239-1557, or at www.dot.iowa.gov/tsip.htm

## Traffic Safety Improvement Program Projects Fiscal Year 2013

| Applicant | Location/Description | Funding Category | Approved Amount |
| :---: | :---: | :---: | :---: |
| Sioux City | Outer Drive, northern boundary of Sioux City - Pave Shoulders and Mill-in Rumble Strips | Sites | \$ 200,000 |
| Ankeny | SE Oralabor Road (IA 160) \& SE Peachtree Drive - Install left turn lanes, raised median, and traffic signals | Sites | \$ 500,000 |
| Des Moines | Beaver Ave \& Urbandale Ave - Install a modern single-lane roundabout | Sites | \$ 350,000 |
| Des Moines | Hubbell Ave, E 18th St to E 33rd St - Restriping, Including Bicycle Lanes | Sites | \$ 330,000 |
| Des Moines | E 4th Street, Court Ave to Walnut St - Install Traffic Signals | Sites | \$ 230,000 |
| Des Moines | Various locations - Purchase and Install School Flasher Control Systems | Sites | \$ 156,000 |

Page 58

## Highway Program

## Highway Program

The highway section of the lowa Transportation Improvement Program (Program) contains the primary and interstate highway construction-related investments planned for FY2013 through FY2017. In general, contracts awarded during a fiscal year are constructed during the corresponding calendar year. The highway section is arranged by county and route. A map showing the location of each 2013 project is located in the highway section of this report.

A large part of funding available for highway programming comes from the federal government. Accurately estimating future federal funding levels is dependent on having a current enacted multi-year federal transportation authorization. The most recent authorization, Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), expired September 30, 2009, and to date it has been extended nine times because a new authorization has not yet been enacted. The current extension will expire June 30, 2012. This leads to significant uncertainty in federal funding; however, the lowa Transportation Commission (Commission) and the lowa Department of Transportation (DOT) will continue to monitor federal revenues and will adjust future investments as needed to maintain a fiscally responsible Program.

## Highway Program Objectives

The Commission and the lowa DOT remain committed to providing modern, safe and efficient transportation services to the public. For FY2013-2017, approximately $\$ 2.6$ billion is forecast to be available for highway right of way and construction. The highway section was developed to achieve several objectives. The Commission's primary investment objective is the modernization of lowa's existing highway system, and its operational and safety features Funding exceeding $\$ 1.3$ billion is programmed in FY2013 through FY2017 for modernizing and maintaining lowa's existing highway system and for enhanced highway safety features. The chart on the next page shows projected available funding and the types of projects in the Program. The chart also shows the scope of Capacity/System Enhancement projects being developed but not yet funded.

The highway section also includes significant interstate investments on I-29 in Sioux City, I-29/80/480 in Council Bluffs, and I-74 in Bettendorf/Davenport. The programming for construction on portions of l-74 in Bettendorf/Davenport has been delayed to coordinate schedules with the Illinois DOT.

Another highway programming objective is developing and constructing capacity and system enhancement projects. Projects added to the Program include U.S. 20 Woodbury County in Correctionville, U.S. 20 Delaware County interchange at Dyersville, U.S. 30 Linn County Mount Vernon and Lisbon bypass, U.S. 52 Jackson County Mississippi River Bridge replacement at Sabula, Iowa 58 Black Hawk County Viking Road interchange in Cedar Falls, U.S. 75 Sioux County in Sioux Center, Iowa 100 Linn County from U.S. 30 to Covington Road, U.S. 169 Kossuth County, lowa 196 Sac County, and U.S. 218 Black Hawk County interchange at County Road C57. Projects advancing in the Program include U.S. 30 Benton County from lowa 21 to U.S. 218, U.S. 61 Louisa County from south of lowa 92 to Muscatine County, Iowa 100 Linn County from Covington Road to Edgewood Road and U.S. 20 Woodbury County from east of Moville to Correctionville.

## Public Participation

Throughout the year lowa DOT staff meet with individuals, local agencies and organizations to discuss potential projects and transportation issues. Comments on the proposed program are encouraged

During 2011, the Commission conducted meetings at four locations around the state for the specific purpose of receiving public input concerning planning and programming. Meetings were conducted in Cedar Rapids, Sioux City, Decorah, and Council Bluffs. Approximately 40 delegations presented their views.

## Highway Program Information and Services

On a periodic basis, the Commission considers adjustments to the highway section. Information regarding these changes can be accessed on the lowa DOT's website site at iowadot.gov

## Cooperative State Traffic Engineering Program (U-STEP and C-STEP)

In 1977 a special purpose safety program was established by the Commission as a means of reducing crashes and improving operations on the urban extensions of the State Primary Road System. The Urban-State Traffic Engineering Program (U-STEP) was established to share the construction cost of traffic engineering improvements at spot locations, such as intersections or other bottlenecks. This program has funded new or remodeled traffic signal systems, interconnection or coordination of signals, intersection reconstruction, construction of turning lanes, bottleneck elimination, widening or adding lanes for through traffic, and other safety-related improvements.

Effective January 1, 1983, the Commission established the County-State Traffic Engineering Program (C-STEP) to join with interested counties in resolving similar problems outside of the cities. The state share of the construction and right-of-way costs for both U-STEP and C-STEP spot improvement projects
has been set at 55 percent, with the local jurisdiction furnishing the engineering and project supervision. Some improvements of larger scope, requiring linear, rather than spot improvements, are also eligible. Projects are approved by the lowa DOT's highway division director.

Many candidate projects have been identified as a result of a state-federal Traffic Engineering Assistance Program (TEAP). Traffic engineering consultants have been retained by the lowa DOT and are available to local governments, as requested on a first-come, first-served basis. The program is funded by the Federal Highway Administration. A city or county can obtain a traffic engineering evaluation of a problem situation at no cost.

## County - State Traffic Engineering Program (C-STEP)

A. Spot Improvements - Safety or Operational

For cooperative safety or operational improvements on the rural portion of the State Primary Road System (outside corporate limits).

State share - 55 percent of the construction cost of a qualified project, with a limit of $\$ 200,000$ of state funds per project. The county will furnish the engineering.
B. Linear Improvements - Safety or Operational

Cooperative Improvement
State Jurisdiction Retained

| Rehabilitation |  | Reconstruction |  | Rehabilitation |  | Reconstruction |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| State | Limit | State | Limit | State | Limit | State | Limit |
| Share(\%) | $(\$ / \mathrm{Mi})$. | Share(\%) | $(\$ / \mathrm{Mi})$. | Share(\%) | $(\$ / \mathrm{Mi})$. | Share(\%) | $(\$ / \mathrm{Mi})$. |
| 30 | 45,000 | 30 | 75,000 | 60 | 90,000 | 60 | 150,000 |

## Urban - State Traffic Engineering Program (U-STEP)

A. Spot Improvements - Safety or Operational

For cooperative safety or operational improvements on municipal extensions of the State Primary Road System. State Share - 55 percent of the construction cost of a qualified project, with a limit of $\$ 200,000$ of state funds per project. The city will furnish the engineering.
B. Linear Improvements - Safety or Operational

For occasional safety or operational improvements spanning two or more intersections on municipal extensions of the State Primary Road System. Limited to situations for which a single location improvement is inadequate. State Share is 55 percent of the construction cost of a qualified project with a limit of $\$ 400,000$ of state funds per project. The city will furnish the engineering.

[^3]
## Living Roadway Trust Fund

The Living Roadway Trust Fund (LRTF) was established by the lowa Legislature in July 1989. This fund was created to implement Integrated Roadside Vegetation Management (IRVM) programs on city, county or state rights-of-way or areas adjacent to traveled roadways. As part of the legislation, an IRVM coordinator's office was established to administer grants and assist in developing community enhancement projects or other planting demonstration projects throughout the state. Examples of projects eligible for funding through this program are planning and public education, installation or initial maintenance and development, special staff training, special equipment, or increased protection for existing vegetation. The Iowa Code, Section 314.22, requires that county or city applicants must have an IRVM plan on file with the IRVM coordinator's office before applying for funds. It further states that all county applications must be sponsored by the county engineer or county conservation board. The application deadline is June 1 of each year. All applications received are reviewed by the IRVM technical advisory committee. This committee is appointed by the director of the lowa DOT and recommends approval of qualified applications. The director authorizes funding based on the recommendations of the advisory committee.

The (LRTF) has four funding sources.

1. $\$ 250,000$ from the Road Use Tax Fund (RUTF)
2. Fees obtained from utility easements along interstate and other divided four-lane, access-controlled highways
3. Three percent of Resource Protection and Enhancement (REAP) funds
4. Three percent of REAP license plate revenue

Income from these sources, after distribution of the legislatively mandated amounts, are divided between city, county and state projects in the same proportions as the RUTF distribution formula.

Since the beginning of this program, more than $\$ 14.3$ million have been approved for nearly 1,348 projects around the state. These funds supported the purchase of special equipment, roadside inventories, gateway plantings, native grass and forb seed, tree and shrub plantings, and research and educational programs.

The IRVM coordinator's office established the framework to begin the program and state IRVM plan. The office has funded a wildflower brochure, educational display and native wildflower posters. Also, native seed for planting has been provided to lowa DOT garages for use on interstate rest areas and public school grounds. These projects will enhance aesthetics, provide identification and management training, and provide future seed sources.

Public education is one of the major goals of the LRTF program. The coordinator's office makes presentations and attends conferences around the state to explain the program. Distribution of brochures, posters and other information to increase awareness and public support for lowa's native vegetation is available on request.

51 applications for FY2012 funding were submitted by cities, counties and the state. The total amount of funding requested was nearly $\$ 900,000$. Forty-eight projects were awarded a total of $\$ 787,712$.

Requests for applications or additional information about this program should be directed to the Iowa Department of Transportation, Office of Design, 800 Lincoln Way, Ames IA 50010, Attention: Roadside Coordinator, or call 515-239-1768. More information on projects and the Living Roadway Trust Fund program can be viewed at www.iowalivingroadway. com
