16. Abstract

Five (5) 50% left offset barrier impact tests were conducted for research and development in support of the CRASH3 damage algorithm reformulation. These tests were conducted on a 1990 Chevrolet Caprice, VIN 1G1BL53EXMW115995, at Transportation Research Center Inc. on June 7, 1994. The following five tests were conducted on the vehicle:

Section 1.0

Purpose And Test Procedure

## Purpose And Test Procedure

The purpose of the five (5) 50% left frontal offset barrier impact tests was for research and development in support of the CRASH3 damage algorithm reformulation.

The 1987 Chevrolet Caprice was equipped with a 5-liter, 8-cylinder, inline, gasoline engine with a 4-speed automatic transmission. The test weight of the vehicle was 1852 kilograms.

The vehicle was instrumented with seven (7) accelerometers to measure vehicle X-axis and Y-axis acceleration.

Each crash test event was recorded by three (3) high-speed motion picture cameras operating at approximately 500 frames per second.

## Data Acquisition Explanations

Test Number 940607-3:

The left rear sill X-axis accelerometer, LRSXG1, did not return to zero following the impact event. The data not returning to zero affected the velocity and displacement calculations.

Test Number 940607-4:

The vehicle center of gravity Y-axis accelerometer, VCGYG1, did not return to zero following the impact event. The data not returning to zero affected the velocity and displacement calculations and the vehicle center of gravity resultant acceleration calculations.

The vehicle center of gravity Z-axis accelerometer, VCGZG1, exceeded the data acquisition circuits full scale limit at 33 milliseconds. The data exceeding the full scale limit affected the velocity and displacement calculations and the vehicle center of gravity resultant acceleration calculations.

Test Number 940607-5:

The vehicle center of gravity Z-axis accelerometer, VCGZG1, exceeded the data acquisition circuits full scale limit at 48 milliseconds. The data exceeding the full scale limit affected the velocity and displacement calculations and the vehicle center of gravity resultant acceleration calculations.
