## Part 1 - Background and Purpose

In January 1996, Secretary Peña set a goal of deploying the integrated metropolitan Intelligent Transportation System (ITS) infrastructure in 75<sup>1</sup> of the nation's largest metropolitan areas by 2006:

*"I'm setting a national goal: to build an intelligent transportation infrastructure across the United States to save time and lives, and improve the quality of life for Americans. I believe that what we do, we must measure . . . Let us set a very tangible target that will focus our attention . . . I want 75 of our largest metropolitan areas outfitted with a complete intelligent transportation infrastructure in 10 years."*<sup>2</sup>

-- Secretary Peña, 1996

In 1997, the U.S. Department of Transportation initiated an effort to track progress toward fulfillment of this goal by conducting a survey of deployment in the nation's largest metropolitan areas. Traditionally, the product of a transportation infrastructure investment consists of a fixed asset such as a highway, bridge, or public transportation vehicle developed, constructed, or purchased by a single agency. Tracking the level of deployment for such traditional fixed assets can be accomplished by simply counting the number of such assets deployed. Measuring the deployment of the metropolitan ITS infrastructure is more complex because it consists of a set of systems, often deployed by multiple agencies, and integrated through a combination of complex institutional and technical arrangements. In brief, it is often difficult to simply count the number of systems deployed without first devising a measurement approach that captures the essential features of such systems in a consistent fashion across many deployment environments.

In order to track progress toward fulfillment of the Secretary's goal for deployment, the U.S. Department of Transportation ITS Joint Program Office developed the metropolitan ITS deployment tracking methodology. This methodology tracks deployment of the nine components that make up the Metropolitan ITS infrastructure: Freeway Management; Incident Management; Arterial Management; Emergency Management; Transit Management; Electronic Toll Collection; Electronic Fare Payment; Highway-Rail Intersections; and Regional Multimodal Traveler Information. Through a set of indicators tied to the major functions of each component, the level of deployment is tracked for the nation's largest metropolitan areas. In addition, the integration links between agencies operating the infrastructure are also tracked. The details of

---

<sup>1</sup> Since Secretary Peña's speech, the number of metropolitan areas that DOT will measure has been increased from 75 to 78. However, to maintain reporting consistency across the 10-year goal period, this report considers only the original 75 metropolitan areas.

<sup>2</sup> Excerpt of a speech delivered by Secretary of Transportation Peña at the Transportation Research Board in Washington, DC on January 10, 1996.

the methodology are explained elsewhere.<sup>3</sup>

During the summer and fall of 1999, the U.S. DOT undertook a new data collection effort for the purpose of examining ITS deployment progress in the nation's largest metropolitan areas. The San Antonio metropolitan area was among the areas surveyed in 1997 and again in 1999. This report presents the results of the 1999 survey efforts and compares the results of the 1997 survey against those observed in 1999. The overall response rate for the surveys administered in the San Antonio region was 100% in 1997 and 57% in 1999.

Part 2 contains a summary of the 1999 survey results, and Part 3 provides a comparison of 1999 survey results and the 1997 survey results.

The report also contains a set of appendices containing a map of the survey area, the list of local contacts surveyed along with a status of their response to the survey and a summary of the data collected from the surveys.

Agencies are encouraged to review the data presented in this report for completeness and accuracy and to direct any comments or corrections to the data provided to the contacts listed below:

## Part 2 - Summary 1999 Survey Results

Deployment indicators have been developed for two broad areas of interest: (1) the individual components, including their basic functions and characteristics and (2) integration of components, including how these components work together to provide coordinated regional service. As mentioned earlier, these indicators are expressed as percentages of the possible deployment opportunity and not necessarily what should be deployed based on local needs. Requirements for deployment and integration between each component will vary based on local conditions and cannot be assigned without extensive coordination with individual metropolitan areas.

The following two figures portray the surrogate indicators for each of the nine components in San Antonio and the same indicators at the national level. These are judged to be the single best representative of a component and are being used as summary indicator for component. The summary indicators are expressed as a percentage; however, because deployment goals have yet to be established, these indicators should not be read as a comparison of what is deployed versus eventual deployment goals. Instead, they only reflect what is deployed compared to full market saturation (i.e., opportunity for deployment).

Each component indicator was selected to reflect a critical function of the individual components. For example, in the case of Freeway Management, three basic functions were defined: surveillance, traffic control, and information display. The three indicators developed to reflect these functions are: percentage of freeway centerline miles under electronic surveillance (surveillance function), percentage of freeway entrance ramps managed by ramp meters (traffic control function), and percentage of freeway centerline miles covered by permanent VMS, HAR, or in-vehicle signing (information display function). The indicators are surrogates that do not necessarily reflect the full breadth of metropolitan ITS deployment activity.

A critical aspect of ITS that provides much of its capability is the integration of individual components to form a unified regional traffic control system. Individual ITS components routinely collect information that is used for purposes internal to that component. For example, the Arterial Management component monitors arterial conditions to revise signal timing and to convey these conditions to travelers through such technologies as variable message signs and highway advisory radio. Other ITS components can make use of this information in formulating their control strategies. For example, Transit Management may alter routes and schedules based on real-time information on arterial traffic conditions, and Freeway Management may alter ramp metering or diversion recommendations based on the same information.

As with the component indicators, definitions for inter- and intra-component integration were developed for each component, and indicators, derived from these definitions, were produced for each component. A total of 34 individual integration indicators was specified and is portrayed in the third figure which follows. Each integration indicator has been assigned a number and an origin/destination path from one ITS infrastructure component to another. For example, the

integration of information from the Freeway Management component to the Regional Multimodal Traveler Information component is identified by the number “10.”

Data as of 5/1/00

## San Antonio Summary Indicators\*

\* Indicators are single surrogates that do not necessarily reflect the full breadth of ITS deployment activity.

\*\* Deployment opportunity reflects potential totals that do not necessarily reflect actual need.

### **Part 3 - Detailed 1999 Survey Results**

The following figures and tables summarize the complete set of component and integration indicators developed for the San Antonio metropolitan area. The figures summarizing the component indicators consist of a bar chart portraying the deployment levels for 1997, 1999, and 2005 accompanied by detailed tables of the data used to calculate each component indicator value (*Num* stands for numerator and *Den* stands for denominator; blank space indicates that no response was received.)

Example: Calculating Component Indicators for Freeway Management

Consider a metropolitan area with 100 miles of freeway and 25 freeway entrance ramps. The area has no ramp meters, 10 freeway miles for which traffic data are collected electronically, and 5 freeway miles, which are covered by highway advisory radio.

The component indicator for electronic surveillance is calculated as  $(10/100)$  or 10%.

The component indicator for ramp meter control is calculated as  $(0/25)$  or 0%.

The component indicator for HAR coverage is calculated as  $(5/100)$  or 5%.

The summary indicator for the metropolitan area is calculated as  $(10\%+0\%+5\%)/3 = 5\%$ .

The figures summarizing the integration indicators consist of a diagram for each of the nine metropolitan ITS components portraying the integration level for 1999 (*italic*) and 2005 (**bold**), accompanied by tables providing an explanation of the data and calculations performed to develop each integration indicator value for 1999 and 2005. Each diagram portrays the proportion of agencies providing information to a component (e.g., the flow of incident information from Incident Management to Freeway Management) and the proportion of agencies providing information from one component to other components (e.g., the flow of freeway travel condition information from Freeway Management to Arterial Management).

Example: Calculating Integration between Arterial Management and Regional Multimodal Traveler Information

Consider a metropolitan area with three arterial management agencies. One out of three provides information to the public using a Regional Multimodal Traveler Information Media (e.g., internet, kiosk, pager, etc...). The integration indicator is  $1/3$  or 33%.

**Appendix C**  
**Freeway Management Components**

Freeway Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
Agency Returned Survey?	Yes	
<b>FREEWAY MANAGEMENT SECTION</b>		
Number of freeway centerline miles that agency owns or maintains	300	
Number of freeway centerline miles that is used for planning	200	
Number of freeway entrance ramps that agency owns, operates or maintains	200	
Number of freeway entrance ramps that is used for planning	200	
<b>Type of facilities used to conduct freeway/incident management activities</b>		
Activities housed in a free-standing dedicated building?	Yes	
Activities housed in a building shared with other activities?	Yes	
Activities conducted in a dedicated control room?	Yes	
Control room contains operator console(s)?	Yes	
Control room contains electronic wall map?	Yes	
Control room contains CCTV display(s)?	Yes	
Activities conducted in a room containing workstations or PCs that manage traffic?	No	
Facilities are electronically linked to other transportation mgt facilities?	Yes	
<b>Staffing and hours of operation of freeway/incident management activities</b>		
Number of full-time agency staff members	20	
Number of full time contractor staff members	NR	
Number of part-time agency staff members	NR	
Number of part-time contractor staff members	NR	
Staffed 24 hours day by agency staff or by others	agency	
Staffed during peak hours only by agency staff or by others	NR	
Staffed by others during off-peak hours	No	
Agency staff perform transportation management as an ancillary duty	No	
Agency staff dedicated to transportation management duty	Yes	
<b>Types of operations conducted for freeway/incident management</b>		
Incident detection and management?	Yes	
This metropolitan area?	Yes	
Other metropolitan area?	No	
Statewide?	No	
Monitoring and troubleshooting status of system components?	Yes	
Manual override of ramp metering rates at freeway on-ramps?	No	
Operating transportation management roadside devices?	Yes	
Radio communications with other agencies?	Yes	
Exchange of electronic data with other agencies such as computer aided dispatch?	Yes	
<b>Real-Time Traffic Data Collection Technologies</b>		
Total number of miles under surveillance with real-time data collection tech.	53	120

Freeway Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
<u>Number of Stations with data collection technologies</u>		
Loop detectors	1,600	4,000
Video imaging detectors	8	50
Probe readers (elec. toll tags, transit vehicles, other technology)	53	53
Microwave radar	0	0
Other (e.g., acoustic detectors)	0	0
<u>Number of Miles covered with data collection technologies</u>		
Loop detectors	53	120
Video imaging detectors	NR	NR
Probe readers (elec. toll tags, transit vehicles, other technology)	98	98
Microwave radar	0	0
Other (e.g., acoustic detectors)	0	0
<b>Variable Message Signs (VMS) on Freeways</b>		
Candidate locations for deployment of VMS where VMS has been deployed	125	350
Candidate locations for deployment of VMS	125	350
<b>Roadside Technologies used to Distribute Traveler Information</b>		
Total number of miles where information is distributed	NR	NR
<u>Number deployed</u>		
Highway advisory radio	NR	2
In-vehicle signing	0	0
Portable variable message signs	0	0
Other	0	0
<u>Miles covered</u>		
Highway advisory radio	NR	NR
In-vehicle signing	0	0
Portable variable message signs	0	0
Other	0	0
<b>Ramp Meters on Freeways</b>		
Number of entrance ramp meters operated under isolated control	NR	NR
Number of entrance ramp meters operated under central control	NR	NR
Number of entrance ramp meters that provide preemption for emergency vehicles	NR	NR
Number of entrance ramp meters that provide priority for transit vehicles	NR	NR
Total number of metered ramps	NR	NR
<b>Freeway centerline miles under lane control</b>	53	120
<b>Communication Links</b>		
<u>Freeway centerline miles covered by the following type of communication</u>		
Twisted pair cable	0	0
Coaxial cable	0	0
Fiber-optic cable	53	120
Microwave radio	0	0
Other	0	0
<b>ITS Standards Used Related to Freeway Management</b>		
ATMS Data Dictionary Sections 1 and 2 (ITE TM 1.01)	No	

Freeway Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
ATMS Data Dictionary Sections 3 and 4 (ITE TM 1.02)	No	
Message Set for External TMC Communication (ITE-9604-1)	No	
NTCIP Class B Profile (AASHTO TS 3.3)	No	
NTCIP Data Collection and Monitoring Devices (AASHTO TS 3.DCM)	No	
NTCIP Object Definitions for Environmental Sensor Stations (AASHTO TS 3.7)	No	
NTICP Object Definitions for Dynamic Message Signs (AASHTO TS 3.6)	Yes	
NTICP Object Definitions for Highway Advisory Radio (AASHTO TS 3.HAR)	No	
NTICP Object Definitions for Ramp Meter Control (AASHTO TS 3.RMC)	No	
NTICP Object Definitions for Transportation Sensor Systems (AASHTO TS 3.TSS)	No	
NTICP Object Definitions for Video Camera Control (AASHTO TS 3.VCC)	No	
Would agency be willing to participate in testing of ITS Standards?	Yes	
<b>Have agreements in place with other agencies to use similar hardware and software to aid maintenance and interoperability?</b>	Yes	
<b>INCIDENT MANAGEMENT SECTION</b>		
<b>Use of Service Patrols to Assist in Detection and Response to Incidents</b>		
Publicly operated service patrol vehicles	Yes	
Privately operated service patrol vehicles operated under public contract	No	
Total number of freeway miles patrolled by these services	200	200
<b>Miles Covered by Methods to Detect and Verify Incidents</b>		
Free cellular phone call to a dedicated phone number other than 911	NR	NR
Police patrols	200	200
Computer algorithms linked to traffic surveillance equipment	53	120
CCTV	53	120
Private sector sources (e.g., Shadow Traffic, SmartRoutes)	NR	NR
Other (e.g., free cell phone call to an area radio system, etc.)	NR	NR
<b>Procedures in place for Freeway Incident Response?</b>		
Working agreement(s)/arrangement(s) with other agencies	Yes	
Inter-agency incident management admin. team that meets regularly	Yes	
Major incident response team that responds to major incidents	No	
Set of goals/objectives for incident mgt that has been adopted by agencies in region	No	
<b>Central focal point for facilitating the two-way flow of information among agencies responding to an incident?</b>		
The central focal point is a Freeway or Traffic Management Center	Yes	
The central focal point is a Police, Fire or joint dispatch center	No	
The central focal point is another center	No	
<b>Methods of Communication Used On-Site at an Incident</b>		
<u>Police</u>		
Two-way radio	Yes	
800 MHz trunked radio	Yes	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	Yes	

Freeway Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
<u>Fire</u>		
Two-way radio	Yes	
800 MHz trunked radio	Yes	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	Yes	
<u>DOT</u>		
Two-way radio	Yes	
800 MHz trunked radio	No	
Cellular telephone	Yes	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	No	
<u>Towing</u>		
Two-way radio	Yes	
800 MHz trunked radio	No	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	No	
<b>Which police agencies typically respond to incidents on freeways?</b>		
State Police	No	
County Police or Sheriff	No	
City Police	Yes	
<b>Who provides on-site emergency medical response?</b>		
Fire	No	
Emergency Management Service Agency	Yes	
Private hospital	No	
<b>Has a multi-agency contact list been developed in area containing the names, phone numbers, etc. for the appropriate response personnel?</b>		
	No	
<b>Is the Incident Command System used to manage incident scenes?</b>		
	No	
<b>Is there a legal specification by state law or formal agreement as to who is "in charge" at the incident scene?</b>		
Specified by state law?	No	
Formal agreement?	No	
Not specified or don't know?	Yes	
<b>On-scene command post used to manage activities of responding agencies?</b>		
Are there communication linkages to a communications traffic/freeway mgt center?	NR	
<b>Plan developed and adopted by responding agencies for staging and parking response vehicles and equip. at incident site that minimizes lane blockage and facilitates the re-opening of lanes?</b>		
	No	
<b>Respondents protected through law or court opinion for liability claims for damages to vehicles or cargoes during clearance activities?</b>		
	Yes	
<b>Are overturned tank trucks, which are intact and not leaking, uprighted</b>		

Freeway Management  
 Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
without first off-loading?	Yes	
<b>Does your state or local jurisdiction have a law that requires drivers involved in property-damage-only accidents to move the vehicles from travel lanes to a safe location to exchange info and wait for police?</b>	Yes	
<b>Have laws or policies regarding the removal of stalled/abandoned vehicles from freeway shoulders?</b>	Yes	
<b>Hours abandoned vehicles are allowed to remain on a freeway shoulder?</b>	0-24	
<b>Have policies or procedures for quick removal of vehicles?</b>	Yes	
<b>Is Total Station equipment used to investigate major incidents?</b>	No	
<b>Handling of Towing Responses to Incidents</b>		
Formal contract based on qualifications?	Yes	
Rotation with companies under contract?	No	
Separate lists kept for light and heavy response and for specialty recovery?	Yes	
Rotation list with minimal qualifications?	No	
<b>In towing qualifications, do you require towers to be certified under the Towing and Recovery Ass. of America's National Drivers Cert. Program?</b>	Yes	
DK: Don't know		
NR: No Response		
Leg: Legislation or action being planned

<b>Receiving real-time information via electronic means from others</b>		
<b>Emergency Management agencies from which your agency receives incident clearance and/or incident severity and type</b>		
Receive Arterial Incident Clearance Information	San Antonio City Police Department	None listed
Receive Arterial Incident Severity Information	San Antonio City Police Department	None listed
<b>Arterial Management agencies from which your agency receives arterial travel times, speeds, and conditions</b>		
	San Antonio City, Texas Department of Transportation	None listed
<b>Freeway Management agencies from which your agency receives freeway travel times, speeds, and conditions</b>		
	Texas Department of Transportation	None listed

\*short survey: Agency responded using a short survey. The survey did not include names of individual agencies, but only identified whether integration exists.

**Appendix E**  
**Freeway Management Information Collection and Dissemination**

Data Collection and Dissemination: Freeway Management  
Agencies for Metropolitan Area: San Antonio

Agency Name	Texas Department of Transportation	
	1999	2005
Agency Returned Survey?	Yes	
<b>Freeway Management Section</b>		
<b>Data collected, archived, and/or transferred to another agency</b>		
Collected by your agency	Traffic volumes, Traffic speeds, Lane occupancy, Probe vehicles, Ramp queues, Road conditions, Route designations (snow emergency, etc.), Weather conditions, Incidents, Current work zones, Scheduled work zones, Intermodal (air, rail, water) connections, Emergency/evacuation routes and procedures, Highway operations coordination information	NR
Archived by your agency	Traffic volumes, Traffic speeds, Lane occupancy, Probe vehicles, Ramp queues, Road conditions, Route designations (snow emergency, etc.), Weather conditions, Incidents, Current work zones, Scheduled work zones, Intermodal (air, rail, water) connections, Emergency/evacuation routes and procedures, Highway operations coordination information	NR
Transferred to another agency by your agency	NR	NR
<b>Importance of making information available to the public</b>		
Ranked High	Traffic volumes, Traffic speeds, Lane occupancy, Probe vehicles, Ramp queues, Road conditions, Route designations (snow emergency, etc.), Weather conditions, Incidents, Current work zones, Scheduled work zones, Intermodal (air, rail, water) connections, Emergency/evacuation routes and procedures, Highway operations coordination information	
Ranked Medium	NR	
Ranked Low	NR	
<b>Groups that make requests for the data</b>	Universities, State DOT personnel, Media (i.e., TV stations, radio stations), MPOs, Advanced Traveler Information Systems (ATIS) provi	
<b>What is the data used for?</b>	Traffic analysis, Planning, Dissemination to the public	
<b>Methods used to disseminate freeway information to the public</b>		
Technologies your agency uses to disseminate:	Dedicated cable TV, Telephone system, Internet Web sites, Pagers or personal data assistants, Kiosks, In-vehicle navigation systems, Cell phone/voice, Cell phone/data	NR
Technologies your agency (through another agency or org.) uses to disseminate:	E-mail or other direct PC communication, Cell phone/voice, Cell phone/data, Facsimile	NR
<b>Internet web site reporting freeway conditions</b>	www.transguide.dot.state.tx.us	

Data Collection and Dissemination: Freeway Management  
 Agencies for Metropolitan Area: San Antonio

**Appendix F**  
**Arterial Management Components**

Arterial Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
Agency Returned Survey?	Yes	
<b>ARTERIAL MANAGEMENT SECTION</b>		
Number of arterial miles that agency owns or maintains	53	
Number of arterial miles that is used for planning	191	
Number of highway-rail intersections that agency maintains	6	
Number of highway-rail intersections that is used for planning	10	
<b>Type of facilities used to conduct arterial management activities</b>		
Activities housed in a free-standing dedicated building?	No	
Activities housed in a building shared with other activities?	No	
Activities conducted in a dedicated control room?	No	
Control room contains operator console(s)?	No	
Control room contains electronic wall map?	No	
Control room contains CCTV display(s)?	No	
Activities conducted in a room containing workstations or PCs that manage traffic?	No	
Facilities are electronically linked to other transportation mgt facilities?	No	
<b>Staffing and hours of operation of arterial management activities</b>		
Number of full-time agency staff members	NR	
Number of full time contractor staff members	NR	
Number of part-time agency staff members	NR	
Number of part-time contractor staff members	NR	
Staffed 24 hours day by agency staff or by others	NR	
Staffed during peak hours only by agency staff or by others	NR	
Staffed by others during off-peak hours	No	
Agency staff perform transportation management as an ancillary duty	No	
Agency staff dedicated to transportation management duty	No	
<b>Types of operations conducted for arterial management</b>		
Incident detection and management?	Yes	
This metropolitan area?	No	
Other metropolitan area?	No	
Monitoring and troubleshooting status of system components?	Yes	
Radio communications with other agencies?	Yes	
Exchange of electronic data with other agencies such as computer aided dispatch?	Yes	
Manual override of traffic signal timing plans	Yes	
Operating transportation mgt roadside devices (e.g., VMS, CCTV, etc.)	Yes	
<b>Describe agency's role in traffic signal control</b>	State routes only	
<b>Traffic Signals Operated by Agency</b>		

Arterial Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
Number of signalized intersections operated and owned by agency	15	52
Number of signalized intersections operated by agency but owned by another	NR	NR
Total number of signalized intersections operated by agency	15	52
<b><i>Characteristics of signalized intersections that agency operates</i></b>		
Under closed loop or central system control	0	0
Under real-time traffic adaptive control using advanced software	0	0
Using SCOOT	No	
Using SCATS	No	
Name of software	NR	
Allow signal preemption for emergency vehicles	0	0
Allow signal priority for transit vehicles	0	0
Within 200 feet of a highway-rail intersection	0	6
Within 200 feet of a highway-rail intersection that adjust signal timing	0	6
<b>Software used to control the signals agency operates</b>		
Date of last upgrade to traffic signal control system software?	January 1999- Control Center	
How often do you update signal timing?	handled by signal section	
Software used and number of signalized intersections under control (1999, 2005)	NR	
<b>Controllers used to control signals</b>		
NEMA	4	52
170/179	0	0
2070 controller	0	0
Other	0	0
<b>Technologies Associated with Highway-Rail Intersections</b>		
Total number of highway-rail intersections under electronic surveillance	6	NR
<b><i>Highway-Rail intersection capabilities</i></b>		
Video surveillance	0	0
Electronic surveillance other than video	0	0
Ability to predict train arrival electronically	6	NR
Equipped with electronic traffic violator devices	0	0
Other	0	0
<b>Real-Time Electronic Traffic Data Collection Technologies</b>		
Total number of signalized intersections covered by electronic surveillance	6	52
<b><i>Number of signalized intersections with data collection technologies</i></b>		
Loop detectors	6	52
Video detection cameras	0	0
Probe readers reading toll tags	0	0
Probe readers reading license plates	0	0
Other	0	0
<b>Roadside Technologies used to Distribute Traveler Information</b>		
<b><i>Number deployed</i></b>		

Arterial Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
Highway Advisory Radio	NR	4
In-Vehicle Signing (IVS)	NR	NR
VMS controlling parking access	NR	NR
<i>Miles covered</i>		
Highway Advisory Radio	NR	125
In-Vehicle Signing (IVS)	NR	NR
<b>Variable Message Signs (VMS) on Arterials</b>		
Candidate locations for deployment of VMS where VMS has been deployed	114	225
Candidate locations for deployment of VMS	114	225
<b>Communication Technologies</b>		
<i>Signalized intersections communicated with by each type of communication</i>		
Twisted pair cable	0	0
Coaxial cable	0	0
Fiber-optic cable	0	0
Other (e.g., wireless, dial-up modems, leased lines, etc.)	0	0
<b>Does agency convey information on highway-rail intersection crossing status to travelers via roadside media such as VMS or HAR?</b>	Yes	
<b>ITS Standards Used Related to Traffic Signal Control</b>		
Advanced Transportation Controller (ATC) Software Application Interface (ITE 9603-1)	No	
ATC Physical Cabinet Functional Design (ITE-9603-2)	No	
ATC Functionality and Interface Definitions (ITE-9603-3)	No	
Natl. Trans. Communications for ITS Protocol (NTCIP) Class B Profile (AASHTO TS 3.3)	No	
NTCIP Data Collection and Monitoring Devices (AASHTO TS 3.DCM)	Yes	
NTCIP Object Definitions for Video Camera Control (AASHTO TS 3.VCC)	No	
NTCIP Object Definitions for Actuated Traffic Signal Controller Units (AASHTO TS 3.5)	No	
Would agency be willing to participate in testing of ITS Standards?	NR	
<b>Have agreements in place with other agencies to use similar hardware and software to aid maintenance and interoperability?</b>	No	
<b>INCIDENT MANAGEMENT ON ARTERIAL STREETS</b>		
<b>Receive information on highway-rail intersection crossing blockages for the purpose of managing incident response?</b>	Yes	
<b>Use of Service Patrols to Assist in Detection and Response to Incidents</b>		
Publicly operated service patrol vehicles	No	
Privately operated service patrol vehicles operated under public contract	No	
Total number of arterial miles patrolled by these services	NR	NR
<b>Miles Covered by Methods to Detect and Verify Incidents</b>		
Free cellular phone call to a dedicated phone number other than 911	0	0
Free cellular phone call to an area radio station	0	0
Police patrols	0	0

Automated data systems (i.e., CAD)	No	
Other	No	
<b>Which police agencies typically respond to incidents on arterials?</b>		
State Police	No	

Arterial Management  
Agencies for Metropolitan Area: San Antonio

	Texas Department of Transportation	
	1999	2005
County Police or Sheriff	No	
City Police	Yes	
<b>Who provides on-site emergency medical response?</b>		
Fire	Yes	
Emergency Management Service Agency	No	
Private hospital	No	
<b>Has a multi-agency contact list been developed in area containing the names, phone numbers, etc. for the appropriate response personnel?</b>	DK	
<b>Is the Incident Command System used to manage incident scenes?</b>	DK	
<b>Is there a legal specification by state law or formal agreement as to who is "in charge" at the incident scene?</b>		
Specified by state law?	No	
Formal agreement?	Yes	
Not specified or don't know?	No	
<b>On-scene command post used to manage activities of responding agencies?</b>	Yes	
Are there communication linkages to a communications traffic/freeway mgt center?	Yes	
<b>Plan developed and adopted by responding agencies for staging and parking response vehicles and equip. at incident site that minimizes lane blockage and facilitates the re-opening of lanes?</b>	DK	
<b>Respondents protected through law or court opinion for liability claims for damages to vehicles or cargoes during clearance activities?</b>	DK	
<b>Are overturned tank trucks, which are intact and not leaking, uprighted without first off-loading?</b>	No	
<b>Does your state or local jurisdiction have a law that requires drivers involved in property-damage-only accidents to move the vehicles from travel lanes to a safe location to exchange info and wait for police?</b>	Yes	
<b>Have laws or policies regarding the removal of stalled/abandoned vehicles from freeway shoulders?</b>	Yes	
<b>Hours abandoned vehicles are allowed to remain on a freeway shoulder?</b>	0-24	
<b>Have policies or procedures for quick removal of vehicles?</b>	Yes	
<b>Is Total Station equipment used to investigate major incidents?</b>	DK	
<b>Handling of Towing Responses to Incidents</b>		
Formal contract based on qualifications?	Yes	
Rotation with companies under contract?	No	
Separate lists kept for light and heavy response and for specialty recovery?	NR	
Rotation list with minimal qualifications?	No	
<b>In towing qualifications, do you require towers to be certified under the Towing and Recovery Ass. of America's National Drivers Cert. Program?</b>	DK
