## **Part 1 - Background and Purpose**

In January 1996, Secretary Peña set a goal of deploying the integrated metropolitan Intelligent Transportation System (ITS) infrastructure in 75<sup>1</sup> of the nation's largest metropolitan areas by 2006:

"I'm setting a national goal: to build an intelligent transportation infrastructure across the United States to save time and lives, and improve the quality of life for Americans. I believe that what we do, we must measure . . . Let us set a very tangible target that will focus our attention . . . I want 75 of our largest metropolitan areas outfitted with a complete intelligent transportation infrastructure in 10 years." <sup>2</sup>

-- Secretary Peña, 1996

In 1997, the U.S. Department of Transportation initiated an effort to track progress toward fulfillment of this goal by conducting a survey of deployment in the nation's largest metropolitan areas. Traditionally, the product of a transportation infrastructure investment consists of a fixed asset such as a highway, bridge, or public transportation vehicle developed, constructed, or purchased by a single agency. Tracking the level of deployment for such traditional fixed assets can be accomplished by simply counting the number of such assets deployed. Measuring the deployment of the metropolitan ITS infrastructure is more complex because it consists of a set of systems, often deployed by multiple agencies, and integrated through a combination of complex institutional and technical arrangements. In brief, it is often difficult to simply count the number of systems deployed without first devising a measurement approach that captures the essential features of such systems in a consistent fashion across many deployment environments.

In order to track progress toward fulfillment of the Secretary's goal for deployment, the U.S. Department of Transportation ITS Joint Program Office developed the metropolitan ITS deployment tracking methodology. This methodology tracks deployment of the nine components that make up the Metropolitan ITS infrastructure: Freeway Management; Incident Management; Arterial Management; Emergency Management; Transit Management; Electronic Toll Collection; Electronic Fare Payment; Highway-Rail Intersections; and Regional Multimodal Traveler Information. Through a set of indicators tied to the major functions of each component, the level of deployment is tracked for the nation's largest metropolitan areas. In addition, the integration links between agencies operating the infrastructure are also tracked. The details of

<sup>&</sup>lt;sup>1</sup> Since Secretary Peña's speech, the number of metropolitan areas that DOT will measure has been increased from 75 to 78. However, to maintain reporting consistency across the 10-year goal period, this report considers only the original 75 metropolitan areas.

<sup>&</sup>lt;sup>2</sup> Excerpt of a speech delivered by Secretary of Transportation Peña at the Transportation Research Board in Washington, DC on January 10, 1996.

the methodology are explained elsewhere.<sup>3</sup>

During the summer and fall of 1999, the U.S. DOT undertook a new data collection effort for the purpose of examining ITS deployment progress in the nation's largest metropolitan areas. The Houston, Galveston, Brazoria metropolitan area was among the areas surveyed in 1997 and again in 1999. This report presents the results of the 1999 survey efforts and compares the results of the 1997 survey against those observed in 1999. The overall response rate for the surveys administered in the Houston, Galveston, Brazoria region was 93% in 1997 and 61% in 1999.

Part 2 contains a summary of the 1999 survey results, and Part 3 provides a comparison of 1999 survey results and the 1997 survey results.

The report also contains a set of appendices containing a map of the survey area, the list of local contacts surveyed along with a status of their response to the survey and a summary of the data collected from the surveys.

Agencies are encouraged to review the data presented in this report for completeness and accuracy and to direct any comments or corrections to the data provided to the contacts listed below:

#### Part 2 - Summary 1999 Survey Results

Deployment indicators have been developed for two broad areas of interest: (1) the individual components, including their basic functions and characteristics and (2) integration of components, including how these components work together to provide coordinated regional service. As mentioned earlier, these indicators are expressed as percentages of the possible deployment opportunity and not necessarily what should be deployed based on local needs. Requirements for deployment and integration between each component will vary based on local conditions and cannot be assigned without extensive coordination with individual metropolitan areas.

The following two figures portray the surrogate indicators for each of the nine components in Houston, Galveston, Brazoria and the same indicators at the national level. These are judged to be the single best representative of a component and are being used as summary indicator for component. The summary indicators are expressed as a percentage; however, because deployment goals have yet to be established, these indicators should not be read as a comparison of what is deployed versus eventual deployment goals. Instead, they only reflect what is deployed compared to full market saturation (i.e., opportunity for deployment).

Each component indicator was selected to reflect a critical function of the individual components. For example, in the case of Freeway Management, three basic functions were defined: surveillance, traffic control, and information display. The three indicators developed to reflect these functions are: percentage of freeway centerline miles under electronic surveillance (surveillance function), percentage of freeway entrance ramps managed by ramp meters (traffic control function), and percentage of freeway centerline miles covered by permanent VMS, HAR, or in-vehicle signing (information display function). The indicators are surrogates that do not necessarily reflect the full breadth of metropolitan ITS deployment activity.

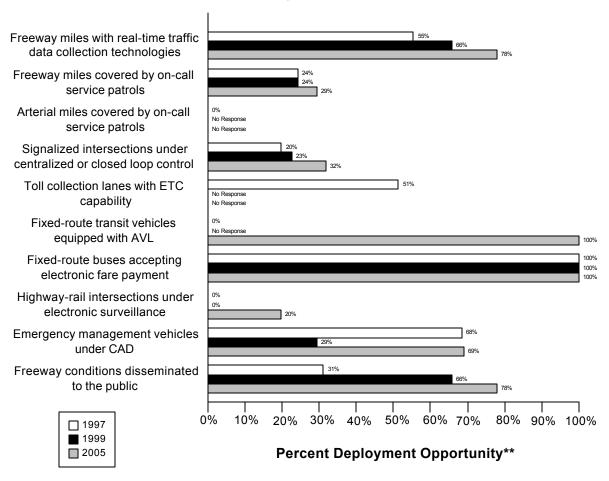

A critical aspect of ITS that provides much of its capability is the integration of individual components to form a unified regional traffic control system. Individual ITS components routinely collect information that is used for purposes internal to that component. For example, the Arterial Management component monitors arterial conditions to revise signal timing and to convey these conditions to travelers through such technologies as variable message signs and highway advisory radio. Other ITS components can make use of this information in formulating their control strategies. For example, Transit Management may alter routes and schedules based on real-time information on arterial traffic conditions, and Freeway Management may alter ramp metering or diversion recommendations based on the same information.

As with the component indicators, definitions for inter- and intra-component integration were developed for each component, and indicators, derived from these definitions, were produced for each component. A total of 34 individual integration indicators was specified and is portrayed in the third figure which follows. Each integration indicator has been assigned a number and an origin/destination path from one ITS infrastructure component to another. For example, the

integration of information from the Freeway Management component to the Regional Multimodal Traveler Information component is identified by the number "10."

Data as of 5/1/00

## **Part 3 - Detailed 1999 Survey Results**

The following figures and tables summarize the complete set of component and integration indicators developed for the Houston, Galveston, Brazoria metropolitan area. The figures summarizing the component indicators consist of a bar chart portraying the deployment levels for 1997, 1999, and 2005 accompanied by detailed tables of the data used to calculate each component indicator value (*Num* stands for numerator and *Den* stands for denominator; blank space indicates that no response was received.)

Example: Calculating Component Indicators for Freeway Management

Consider a metropolitan area with 100 miles of freeway and 25 freeway entrance ramps. The area has no ramp meters, 10 freeway miles for which traffic data are collected electronically, and 5 freeway miles, which are covered by highway advisory radio.

The component indicator for electronic surveillance is calculated as (10/100) or 10%.

The component indicator for ramp meter control is calculated as (0/25) or 0%.

The component indicator for HAR coverage is calculated as (5/100) or 5%.

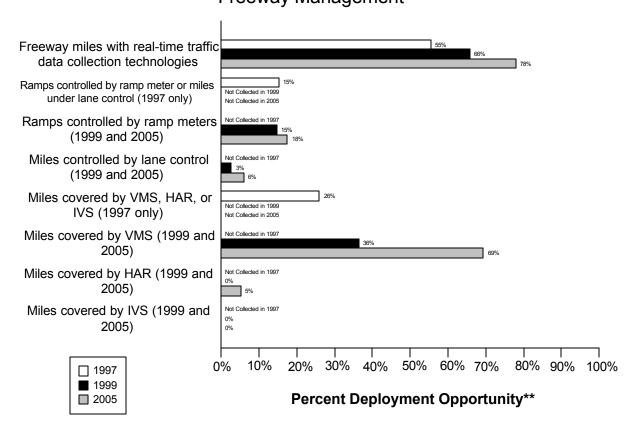

The summary indicator for the metropolitan area is calculated as (10%+0%+5%)/3 = 5%.

The figures summarizing the integration indicators consist of a diagram for each of the nine metropolitan ITS components portraying the integration level for 1999 (*italic*) and 2005 (**bold**), accompanied by tables providing an explanation of the data and calculations performed to develop each integration indicator value for 1999 and 2005. Each diagram portrays the proportion of agencies providing information to a component (e.g., the flow of incident information from Incident Management to Freeway Management) and the proportion of agencies providing information from one component to other components (e.g., the flow of freeway travel condition information from Freeway Management to Arterial Management).

Example: Calculating Integration between Arterial Management and Regional Multimodal Traveler Information

Consider a metropolitan area with three arterial management agencies. One out of three provides information to the public using a Regional Multimodal Traveler Information Media (e.g., internet, kiosk, pager, etc...). The integration indicator is 1/3 or 33%.

Houston, Galveston, Brazoria B-2 Surveyed Agencies

Appendix C Freeway Management Components

	Texas Department of Trans	sportation-Houston District
	1999	2005
Agency Returned Survey?	Yes	
FREEWAY MANAGEMENT SECTION		
Number of freeway centerline miles that agency owns or maintains	562	
Number of freeway centerline miles that is used for planning	562	
Number of freeway entrance ramps that agency owns, operates or maintains	564	
Number of freeway entrance ramps that is used for planning	564	
Type of facilities used to conduct freeway/incident management activities		
Activities housed in a free-standing dedicated building?	Yes	
Activities housed in a building shared with other activities?	No	
Activities conducted in a dedicated control room?	Yes	
Control room contains operator console(s)?	Yes	
Control room contains electronic wall map?	No	
Control room contains CCTV display(s)?	Yes	
Activities conducted in a room containing workstations or PCs that manage traffic?	No	
Facilities are electronically linked to other transportation mgt facilities?	No	
Staffing and hours of operation of freeway/incident management activities		
Number of full-time agency staff members	NR	
Number of full time contractor staff members	NR	
Number of part-time agency staff members	NR	
Number of part-time contractor staff members	NR	
Staffed 24 hours day by agency staff or by others	agency	
Staffed during peak hours only by agency staff or by others	NR	
Staffed by others during off-peak hours	Yes	
Agency staff perform transportation management as an ancillary duty	No	
Agency staff dedicated to transportation management duty	Yes	
Types of operations conducted for freeway/incident management		
Incident detection and management?	Yes	
This metropolitan area?	Yes	
Other metropolitan area?	Yes	
Statewide?	No	
Monitoring and troubleshooting status of system components?	Yes	
Manual override of ramp metering rates at freeway on-ramps?	Yes	
Operating transportation management roadside devices?	Yes	
Radio communications with other agencies?	No	
Exchange of electronic data with other agencies such as computer aided dispatch?	Yes	
Real-Time Traffic Data Collection Technologies		
Total number of miles under surveillance with real-time data collection tech.	380	450

	Texas Department of Tran	sportation-Houston District
	1999	2005
Number of Stations with data collection technologies		
Loop detectors	150	200
Video imaging detectors	0	0
Probe readers (elec. toll tags, transit vehicles, other technology)	187	300
Microwave radar	0	0
Other (e.g., acoustic detectors)	0	0
Number of Miles covered with data collection technologies	0	U U
Loop detectors	30	40
Video imaging detectors	0	0
Probe readers (elec. toll tags, transit vehicles, other technology)	170	225
Microwave radar	0	0
Other (e.g., acoustic detectors)	0	0
/ariable Message Signs (VMS) on Freeways	Ů	Ţ.
Candidate locations for deployment of VMS where VMS has been deployed	84	160
Candidate locations for deployment of VMS	NR	NR
Roadside Technologies used to Distribute Traveler Information		
Total number of miles where information is distributed	0	30
Number deployed		
Highway advisory radio	0	10
In-vehicle signing	0	0
Portable variable message signs	3	3
Other	0	0
Miles covered		
Highway advisory radio	0	30
In-vehicle signing	0	0
Portable variable message signs	NR	NR
Other	0	0
Ramp Meters on Freeways		
Number of entrance ramp meters operated under isolated control	0	0
Number of entrance ramp meters operated under central control	97	115
Number of entrance ramp meters that provide preemption for emergency vehicles	0	0
Number of entrance ramp meters that provide priority for transit vehicles	0	0
Total number of metered ramps	97	115
reeway centerline miles under lane control	16	35
Communication Links		
Freeway centerline miles covered by the following type of communication		
Twisted pair cable	0	0
Coaxial cable	0	0
Fiber-optic cable	220	300
Microwave radio	0	0
Other	0	0

	Texas Department of Tran	sportation-Houston District
	1999	2005
ATMS Data Dictionary Sections 1 and 2 (ITE TM 1.01)	Yes	
ATMS Data Dictionary Sections 3 and 4 (ITE TM 1.02)	No	
Message Set for External TMC Communication (ITE-9604-1)	No	
NTCIP Class B Profile (AASHTO TS 3.3)	Yes	
NTCIP Data Collection and Monitoring Devices (AASHTO TS 3.DCM)	No	
NTCIP Object Definitions for Environmental Sensor Stations (AASHTO TS 3.7)	No	
NTICP Object Definitions for Dynamic Message Signs (AASHTO TS 3.6)	Yes	
NTICP Object Definitions for Highway Advisory Radio (AASHTO TS 3.HAR)	No	
NTICP Object Definitions for Ramp Meter Control (AASHTO TS 3.RMC)	Yes	
NTICP Object Definitions for Transportation Sensor Systems (AASHTO TS 3.TSS)	No	
NTICP Object Definitions for Video Camera Control (AASHTO TS 3.VCC)	No	
Would agency be willing to participate in testing of ITS Standards?	Yes	
Have agreements in place with other agencies to use similar hardware		
and software to aid maintenance and interoperability?	No	
INCIDENT MANAGEMENT SECTION		
Use of Service Patrols to Assist in Detection and Response to Incidents		
Publicly operated service patrol vehicles	Yes	
Privately operated service patrol vehicles operated under public contract	No	
Total number of freeway miles patrolled by these services	140	170
Miles Covered by Methods to Detect and Verify Incidents		
Free cellular phone call to a dedicated phone number other than 911	562	562
Police patrols	NR	NR
Computer algorithms linked to traffic surveillance equipment	0	100
CCTV	200	300
Private sector sources (e.g., Shadow Traffic, SmartRoutes)	NR NR	NR
Other (e.g., free cell phone call to an area radio system, etc.)	NR	NR
Procedures in place for Freeway Incident Response?		
Working agreement(s)/arrangement(s) with other agencies	Yes	
Inter-agency incident management admin. team that meets regularly	No	
Major incident response team that responds to major incidents	No	
Set of goals/objectives for incident mgt that has been adopted by agencies in region	Yes	
Central focal point for facilitating the two-way flow of information		
among agencies responding to an incident?		
The central focal point is a Freeway or Traffic Management Center	Yes	
The central focal point is a Police, Fire or joint dispatch center	No	
The central focal point is another center	No	
Methods of Communication Used On-Site at an Incident		
Police		
Two-way radio	Yes	
800 MHz trunked radio	No	
Cellular telephone	Yes	

	Texas Department of Tran	sportation-Houston District
	1999	2005
Hand-held (i.e., walkie-talkie)	Yes	
Automated data systems (i.e., CAD)	Yes	
<u>Fire</u>		
Two-way radio	Yes	
800 MHz trunked radio	Yes	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	No	
DOT		
Two-way radio	Yes	
800 MHz trunked radio	Yes	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	No	
Towing		
Two-way radio	Yes	
800 MHz trunked radio	No	
Cellular telephone	No	
Hand-held (i.e., walkie-talkie)	No	
Automated data systems (i.e., CAD)	No	
Which police agencies typically respond to incidents on freeways?	110	
State Police	Yes	
County Police or Sheriff	Yes	
City Police	Yes	
Nho provides on-site emergency medical response?		
Fire	No	
Emergency Management Service Agency	Yes	
Private hospital	No	
las a multi-agency contact list been developed in area containing the		
names, phone numbers, etc. for the appropriate response personnel?	Yes	
s the Incident Command System used to manage incident scenes?	No	
s there a legal specification by state law or formal agreement as to who		
is "in charge" at the incident scene?		
Specified by state law?	No	
Formal agreement?	Yes	
Not specified or don't know?	No	
On-scene command post used to manage activities of responding agencies?	Yes	
Are there communication linkages to a communications traffic/freeway mgt center?	Yes	
Plan developed and adopted by responding agencies for staging and parking		
response vehicles and equip. at incident site that minimizes lane blockage		
and facilitates the re-opening of lanes?	No	
Respondents protected through law or court opinion for liability claims		

	Texas Department of Tran	sportation-Houston District
	1999	2005
for damages to vehicles or cargoes during clearance activities?	Yes	
Are overturned tank trucks, which are intact and not leaking, uprighted		
without first off-loading?	Yes	
Does your state or local jurisdiction have a law that requires drivers		
involved in property-damage-only accidents to move the vehicles		
from travel lanes to a safe location to exchange info and wait for police?	Yes	
Have laws or policies regarding the removal of stalled/abandoned vehicles		
from freeway shoulders?	Yes	
Hours abandoned vehicles are allowed to remain on a freeway shoulder?	>36	
Have policies or procedures for quick removal of vehicles?	No	
Is Total Station equipment used to investigate major incidents?	No	
Handling of Towing Responses to Incidents		
Formal contract based on qualifications?	No	
Rotation with companies under contract?	Yes	
Separate lists kept for light and heavy response and for specialty recovery?	Yes	
Rotation list with minimal qualifications?	No	
In towing qualifications, do you require towers to be certified under the		
Towing and Recovery Ass. of America's National Drivers Cert. Program?	DK	
DK: Don't know		
NR: No Response		
Leg: Legislation or action being planned		

Appendix D Freeway Management Integration

Appendix I Transit Management Components

	Metro Transit Authority						
	1999	2005					
Agency Returned Survey?	Yes						
Number of vehicles used in revenue service							
Fixed Route Bus	1,380	1,600					
Heavy or Rapid Rail	NR	NR					
Light Rail	NR	NR					
Demand Responsive	165	200					
Commuter Rail	NR	NR					
Ferry Boat	NR	NR					
Have of plan to have an Automated Vehicle Location System?	Yes						
Primary and Secondary Location Technologies Used							
Primary Technologies							
GPS	No	No					
Sign/Odometer	No	No					
Dead-Reckoning	No	Yes					
LORAN C	No	No					
Other	No	No					
Backup Technologies							
GPS	No	No					
Sign/Odometer	No	No					
Dead-Reckoning	No	No					
LORAN C	No	No					
Other	No	Yes					
Number of Vehicles Equipped with AVL							
Fixed Route Bus	NR	1,600					
Heavy or Rapid Rail	NR	NR					
Light Rail	NR	NR					
Demand Responsive	165	200					
Commuter Rail	NR	NR					
Ferry Boat	NR	NR					
Motor Buses Operated as Vehicle Probes							
Number of Motor Buses equipped as probes on freeways?	NR						
Number of Motor Buses equipped as probes on arterials?	NR						
Have Organized Regional Incident Management Program?	Yes						
Have Automated Traveler Information System?	Yes						
Services Automated Traveler Info. System Applies:							

	Metro Trans	sit Authority
	1999	2005
Fixed Route	Yes	
Heavy Rail	No	
Light Rail	No	
Demand Responsive	No	
Commuter Rail	No	
Ferry	No	
Locations where traveler information is displayed to public	110	
Number of bus stops on fixed transit routes	NR	NR
Bus stops on fixed transit routes that display traveler info to the public	NR	NR
Number of rail stations	NR	NR
Number of rail stations that display traveler information	NR	NR
Number of other locations that display traveler information to public	NR	NR
Number of vehicles the traveler information system has available		
Fixed Route Bus	NR	NR
Heavy or Rapid Rail	NR	NR
Light Rail	NR	NR
Demand Responsive	NR	NR
Commuter Rail	NR	NR
Ferry Boat	NR	NR
Deployment of Communications Technology		
Attributes of Radio System:		
Digital?	No	
Analog?	Yes	
Trunked?	Yes	
Regular?	No	
Services that use a Digital or Trunked Radio System	-	
Digital Only		
Fixed Route Bus	No	No
Heavy or Rapid Rail	No	No
Light Rail	No	No
Demand Responsive	No	No
Commuter Rail	No	No
Ferry Boat	No	No
Trunked Only		
Fixed Route Bus	No	No
Heavy or Rapid Rail	No	No
Light Rail	No	No
Demand Responsive	No	No

	Metro Transit Authority					
	1999	2005				
Commuter Rail	No	No				
Ferry Boat	No	No				
Have of plan to have Automatic Passenger Counters (APCs)?	Yes					
Methods used to count passengers						
Treadle Mats	No					
Infrared Beams	Yes					
Primary and Secondary Location Technologies Used						
Primary Technologies						
GPS	No	No				
Differential GPS	No	No				
Signpost/Odometer	No	No

Number of Vehicles with APCs						
Fixed Route Bus	NR	NR				
Heavy or Rapid Rail	NR	NR				
Light Rail	NR	NR				
Demand Responsive	NR	NR				
Commuter Rail	NR	NR				
Ferry Boat	NR	NR				
Remote Real-Time Monitoring and Computer Assisted Dispatching						
Remote Real-Time Monitoring						
Fixed Route Bus	400	400				
Heavy or Rapid Rail	NR	NR				
Light Rail	NR	NR				
Demand Responsive	NR	NR				
Commuter Rail	NR	NR				
Ferry Boat	NR	NR				
Automated Dispatching or Control Software						
Fixed Route Bus	1,380	1,600				

	Metro Transit Authority				
	1999	2005			
Heavy or Rapid Rail	NR	NR			
Light Rail	NR	NR			
Demand Responsive	165	165			
Commuter Rail	NR	NR			
Ferry Boat	NR	NR			
Coordinate or plan to coordinate travel request and vehicle					
dispatching for multiple agencies?	NR				
s there or will there be a Transportation Management Center					
(TMC) in the region that controls transit and highway modes?	Yes				
Modes that TMC currently controls:	100				
Highways	Yes	No			
Fixed Route Bus	Yes	No			
Heavy or Rapid Rail	No	No			
Light Rail	No	Yes			
	Yes				
Demand Responsive		No			
Commuter Rail	No	No			
Ferry Boat	No	No			
Other	No	No			
Priority at Traffic Signals and Ramp Meter Priority					
Priority at Traffic Signals  Fixed Route Bus	NR	1,600			
Light Rail	NR NR	NR			
Demand Responsive	NR	NR NR			
Ramp Meter Priority		1,11,1			
Fixed Route Bus	NR	NR			
Demand Responsive	NR	NR			
Number of Vehicles Equipped with Navigation Aids					
Fixed Route Bus	NR	NR			
Heavy or Rapid Rail	NR	NR			
Light Rail	NR	NR			
Demand Responsive	NR	NR			
Commuter Rail	NR NB	NR NB			
Ferry Boat	NR	NR			
ITS Standards Used Related to Transit Management	V				
TCIP On Boad Objects (TCIP-OB)	Yes				
TCIP Traffic Management Objects (TCIP-TM)	No				
TCIP Common Public Transportation Objects (TCIP-CPT)	No				

	Metro Tran	sit Authority				
	1999	2005				
TCIP Passenger Information Objects (TCIP-PI)	No					
TCIP Incident Management Objects (TCIP-IM)	No					
TCIP Fare Collection Objects (TCIP-FC)	No					
TCIP Spatial Representation Objects (TCIP-SP)	No					
TCIP Control Center Objects (TCIP-CC)	No					
TCIP Scheduling/Runcutting Objects (TCIP-SCH)	No					
Send data communication between micro computer and heavy duty	· · · · · · · · · · · · · · · · · · ·					
vehicle applications (SAE J1708)	No					
Would agency be willing to participate in testing of ITS Standards?	Yes					
Have agreements in place with other agencies to use similar hardware						
and software to aid maintenance and interoperability?	Yes					
Electronic Fare Payment						
Have full operational Electronic Fare Payment System?	Yes					
Methods of Fare Payment						
Stored value card with fare deducted for each trip						
Magnetic Stripe	Yes					
Smart Card	No					
Debit Card	No					
Billed by the month for trips taken						
Magnetic Stripe	No					
Smart Card	No					
Credit Card	No					
Monthly Pass						
Magnetic Stripe	No					
Smart Card	No					
Vehicles/Stations Equipped with Automated Payment Mechanism						
Magnetic Stripe Readers						
Fixed Route Bus Vehicles	1,380	1,600				
Heavy or Rapid Rail Stations	NR	NR				
Light Rail Stations	NR	NR				
Demand Responsive Vehicles	NR	NR				
Commuter Rail Stations	NR	NR =				
Ferry Boat Landings	NR	NR				
Smart Card Readers	ND	ND.				
Fixed Route Bus Vehicles	NR NB	NR NB

NR: No Response				

Appendix J Transit Management Integration

	Metro Transit Authority					
Agency Name	1999	2005				
Agency Returned Survey?	Yes					
Transit operators in the region that use the same electronic payment system	None listed					
Toll operators from whom you accept electronic payment of transit	Trone noted					
fare through the use of ETC media	None listed					
Receiving real-time information via electronic means from others	Trene neted					
Freeway Management agencies from which your agency receives						
freeway travel times, speeds, and conditions						
Receive Information	Texas Department of Transportation-Houston District	None listed				
Share Infrastructure	Texas Department of Transportation-Houston District	None listed				
Arterial Management agencies from which your agency receives arterial travel times, speeds, and conditions						
Receive Information	Harris County, Houston City, Texas Department of Transportation-Houston District	Baytown City, Fort Bend County, Galveston City, Montgomery County, Pasadena City				
Share Infrastructure	Harris County, Houston City, Texas Department of Transportation-Houston District	Baytown City, Fort Bend County, Galveston City				
Incident Management agencies from which your agency receives						
incident severity, location, and type						
Receive Information	Texas Department of Transportation-Houston District	None listed				
Share Infrastructure	Texas Department of Transportation-Houston District	None listed				

Appendix K
Transit Management Information Collection and Dissemination

### Data Collection and Dissemination: Transit Management Agencies for Metropolitan Area: Houston, Galveston, Brazoria

	Metro Transit Authority							
Agency Name	1999	2005						
Agency Returned Survey?	Yes							
Methods used to disseminate transit information to the public								
Technologies your agency uses to disseminate:								
Transit routes, schedules and fares	Telephone System	E-mail or other direct PC communication, Kiosks, Internet Web Sites						
Real-time transit schedule adherence or arrival and departure times	NR	Kiosks						
Technologies employed by other organization receiving your data								
Transit routes, schedules and fares	NR	NR						
Real-time transit schedule adherence or arrival and departure times	NR	NR						
Internet web site reporting transit routes, schedules and fare, etc.	www.hov-metro.harris.tx.us	•						
Telephone system for reporting transit information to the public	713-635-5000							
Organizations your agency sends information for dissemination to the public	NR							
Data collected, archived, and/or transferred to another agency								
Collected by your agency	Incidents	Passenger information (e.g., surveys, O/D), Trip itinerary planning records, Passenger count, Vehicle time and location						
Archived by your agency	Incidents	Passenger information (e.g., surveys, O/D), Trip itinerary planning records, Passenger count, Vehicle time and location						
Transferred to another agency by your agency	Incidents	Passenger information (e.g., surveys, O/D), Trip itinerary planning records, Passenger count, Vehicle time and location						
Importance of making information available to the public								
Ranked High	Incidents, Passenger information (e.g., surveys, O/D), Trip itinerary planning records, Passenger count, Vehicle time and location							
Ranked Medium	NR							
Ranked Low	NR							
Groups that make requests for the data	Federal DOT personnel, Universities							
What is the data used for?	Planning, Traffic analysis
