PREFACE

Selected information on toll facilities in the United States open to the public are contained in this report. The information is based on a survey of facilities in operation, financed, or under construction as of January 1, 1993. Table T-1 provides information such as the name, financing or operating authority, location and termini, feature crossed, length, and road system for toll bridges, roads, tunnels, and ferries that connect highways. For toll facilities located on the National System of Interstate and Defense Highways, the Interstate route numbers are included in Table T-1, Parts 1 and 3. A functional system code has also been included for toll bridges, roads, and tunnels in Table T-1, Parts 2 and 4. Toll ferries are identified in Table T-1, Part 5.

Table T-2 contains a list of those projects under serious consideration as toll facilities, awaiting completion of financing arrangements, or proposed as new toll facilities that are being studied for financial and operational feasibility.

Table T-3, Part 1, contains data on receipts of State-administered toll road and crossing facilities; Table T-4, Part 1, disbursements of these State-administered toll road and crossing facilities; Table T-3, Part 2, data on receipts of county toll facilities; and Table T-4, Part 2, data on disbursements for these county toll facilities.

This report is not intended to be a complete reference on toll facilities nor is it intended to duplicate data that are published by other organization. Nearly all of the publicly owned toll authorities publish monthly and/or quarterly, semiannual, and annual reports that contain such information as width and clearance on bridges, type of structure, road limits, year built or put in service, traffic volumes, cost, toll rates, etc. On ferries, information such as seasonal or hourly operating schedules has been included when easily obtainable, but complete information on schedules and on the number and capacity of boats in operation may be obtained directly from the operating authority.

Other organizations also compile data related to toll facilities. The International Bridge, Tunnel and Turnpike Association, Inc., 2120 L Street, NW., Suite 305, Washington, D.C. 20037, maintains an address directory of its membership and serves as an information clearing house and research center. It also conducts surveys and studies, and publishes a variety of reports, statistics, and analyses. The American Automobile Association, 1000 AAA Drive, Heathrow, Florida 32746-5063, compiles a directory of toll facilities containing such current information as rates, load limits, frequency of service, etc.

The data for this report were obtained by the field offices of the Federal Highway Administration (FHWA) in cooperation with the State highway agencies. The material was collected and organized by the Office of Highway Information Management. Comments are welcomed and may be submitted to the Highway Systems Performance Division, FHWA, HPM-20, Washington, D.C. 20590.
