15. Supplementary Notes

The investigation was conducted in cooperation with the U. S. Department of Transportation, Federal Highway Administration. MoDOT research reports are available in the Innovation Library at http://www.modot.org/services/OR/byDate.htm. This report is available at https://library.modot.gov/RDT/reports/TR201522/.

16. Abstract

Overall statewide satisfaction with MoDOT and additional feedback about MoDOT's operations was obtained from a representative sample of the general adult public in Missouri. A professional calling center was engaged to obtain a diverse sample across Missouri. Specific minimums were given, such as 500 responses per district, with gender and age-range targets for each county in Missouri. 3,502 completed responses were obtained between June 26, 2017 and July 31, 2017. With the exception of a few questions (e.g., demographics), all statewide results presented in this document are weighted results. The data was weighted in accordance with the true distribution of the regional population in terms of geographic (county), gender, and age distributions using the most recent (2010) US government census information available. Following past practice, all district measures presented in this document are unweighted. With a minimum of 500 responses per district, the district measures have a 95% level of confidence with a precision (margin of error) of +/- 4.4%. The statewide results for the stratified-random sample of 3,502 Missourians have a 95% level of confidence with a precision of +/- 1.66%.

EXECUTIVE SUMMARY

BACKGROUND

Heartland Market Research LLC completed a comprehensive statewide customer satisfaction study to evaluate MoDOT's overall performance as perceived by Missouri's general public and to identify the transportation services and improvements that are most important to Missourians. The survey asked questions to populate multiple MoDOT Tracker measures and to assess the public's support for transportation. Heartland Market Research obtained a representative sample of the state as well as each of MoDOT's seven districts, with a minimum of 500 respondents per district. A total of 3,502 Missourians participated in the study.

GENERAL SATISFACTION FINDINGS

- The majority of Missourians were satisfied with the job MoDOT is doing. Overall satisfaction was at 83% as compared to 81% in 2015.
- 28% of Missourians were very satisfied with the job MoDOT is doing.
- Many measures of satisfaction with individual MoDOT services have stayed the same or slightly increased from 2015. While the overall satisfaction measures remain statistically similar to 2015, the strength of most measures has grown. In other words, the percentage of people who were very satisfied with MoDOT has increased in most satisfaction measures compared to 2015. This is an important finding because those who answer on the extremes such as very satisfied or very dissatisfied tend to be firm in their opinions. The greater the percentage of those in the middle such as somewhat satisfied or somewhat dissatisfied the greater the chance of movement in the other direction. Thus, while the 2017 measures are statistically similar to 2015, the overall picture is one of a population that is more confident that MoDOT is satisfying their transportation needs than was the case two years ago.
- Missourians continued to agree that MoDOT provides accurate (93%), timely (92%), and understandable (91%) information about projects in their areas, similar to the statistical results since 2009.
- 93% of Missourians agreed that MoDOT was the "primary transportation expert" similar to results since 2009.
- 87% of the residents indicated they trust MoDOT to keep its commitments to the public compared to 85% in 2015. In 2017, 41% of the population strongly agreed with this measure, up from 35% in 2015.
- 75% of Missourians were satisfied with the job MoDOT has done keeping the surface of major highways in good condition, compared to 70% in 2015.

- Missourian satisfaction with MoDOT's efforts to maintain other state highways (67%) and bridges (67%) were also higher than two years ago when both were measured at 63%.
- Most (86%) residents agreed that MoDOT did a good job of minimizing travel delays caused by construction and maintenance on highways, similar to the findings from 2015. 93% agreed that MoDOT did a good job providing advanced warnings to motorists before they entered work zones.

FUNDING FINDINGS

- Most Missourians do not know the average driver currently pays \$30 per month in taxes and fees to fund Missouri state roads.
- Out of those making an estimate, 36% of the respondent believed drivers spent less than \$30 per month, 37% selected the correct answer of \$30 per month, and 27% thought that Missouri drivers spent \$50 or more per month in taxes and fees.
- 86% of residents were willing to pay more to adequately fund Missouri state roads.
- Missourians grossly underestimate the cost of congestion, poor road conditions, and safety issues. Over half of all respondents estimated this cost at under \$50 per month. 81% of the respondents thought the cost was \$100 or less per month. In 2016, the actual average cost per driver was about \$169 per month.
- In 2017, the option of increasing fuel taxes continued to grow in popularity, with 29% of the respondents selecting it as their preferred option for increasing funding for Missouri's state highways and roads. The option of raising fuel taxes was first selected by a plurality of residents (24%) in 2015 as the most acceptable option for increasing revenues to adequately fund Missouri state highways and roads. This was a significant increase from the 2013 score of 15%. Other listed options in 2017 included adding tolls (23%), increasing the sales tax (15%), replacing the gas tax with a mileage tax (12%), and increasing car registration and license fees (10%). The option to increase fuel taxes was the only funding option to see a growth in overall support from 2015. While none of these was not provided as an option, 12% of Missourians volunteered this option anyway.

IMPORTANCE-SATISFACTION ANALYSIS FINDINGS

- The essential findings of the Importance-Satisfaction analysis were similar to those measured in 2015 other than the change in the perceived importance of MoDOT's mowing and trimming the foliage along state highways. This has increased since 2015.
- In 2017, **Missourians indicated there were a number of very important services needing improvement**. Based upon the importance-satisfaction analysis, MoDOT can most improve resident satisfaction with improved offerings on three key services:
 - 1. Keeping bridges in good condition.
 - 2. Keeping the surface of *major* highways in good condition.
 - 3. Keeping the surface of *other* highways in good condition.

Conclusions

- The findings were clear that overall satisfaction remained high, and has increased slightly over the last two years. Moreover, the ratio between those very satisfied and satisfied a measure of how deep or solid the underlying satisfaction is has increased from 2015.
- While most measures of satisfaction with individual MoDOT services have stayed the same or increased slightly from 2015, they are still slightly below most of the 2013 measures. When considering this year's results along with some of the conclusions of the 2015 research "...Missourians showing increased concern about MoDOT's ability to meet their transportation needs can be best explained by the public's belief that MoDOT is doing well with insufficient resources" one is left with the impression that Missourians are both satisfied with MoDOT's service in the current resource environment and are more open to the idea of increasing transportation funding through increasing the fuel tax.

METHODOLOGY

The survey was administered by a professional calling center to Missourians starting on June 26, 2017 and ending on July 31, 2017. The calling center randomly called a representative sample of people from every county considering age and gender. During this time, the calling center made 189,228 calls, spoke with 10,103 people, and completed 3,502 phone interviews. The average respondent took 14.5 minutes to complete the survey. The following tables show how many surveys were conducted in each county. Some counties had significantly more participants than others due to the research design mandating a minimum of 500 responses per district.

Total	500	Total	500	Total	500

Most statewide results presented are weighted results. The demographic responses are not and these are noted as such when presented. The data were weighted in accordance with the true distribution of the regional population in terms of geographic (county), gender, and age distributions using the most recent (2010) U.S. government census information available. Following past practice, all district measures presented are unweighted. With a minimum of 500 responses per district, the district measures have a 95% level of confidence with a precision (margin of error) of +/- 4.4%. The statewide results for the stratified-random sample of 3,502 Missourians have a 95% level of confidence with a precision of +/- 1.66%.

Following standard practice for Tracker measures, responses of don't know/not sure and none chosen/refused were excluded from the results in this report. This practice also facilitated valid comparisons of the results with previous customer satisfaction surveys. All charts, graphs, and summaries are rounded. More precise numbers rounded to the nearest tenth of a percent may be found in the tables in Sections 2. Totals may not sum to exactly 100% because of rounding artifacts.

The survey was based on the previous (2015) statewide satisfaction study. At MoDOT's request, Question 8 was adjusted to be more current and Question 9 was added to gather citizen input on newer issues of concern. The wording of the other questions was kept the same as previous years to facilitate comparisons across surveys.

TRENDS: Overall Agreement Missouri Residents Rely on MoDOT for Real-Time Traffic Information

This question was first asked in 2013 only of residents of the Kansas City and St. Louis districts. In 2015, the question was expanded to all districts.

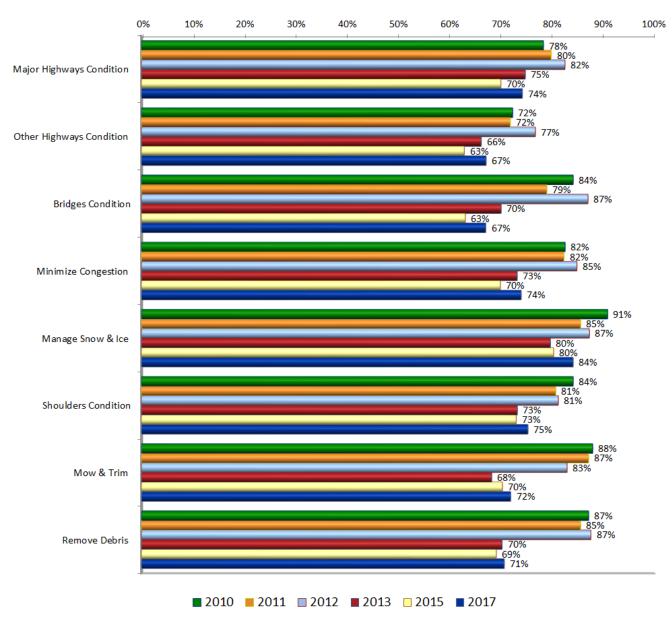

Level of Satisfaction With the Job the Missouri Department of Transportation is Doing

The MoDOT descriptions in the above chart are abbreviated from the more detailed descriptions provided to the survey respondents.

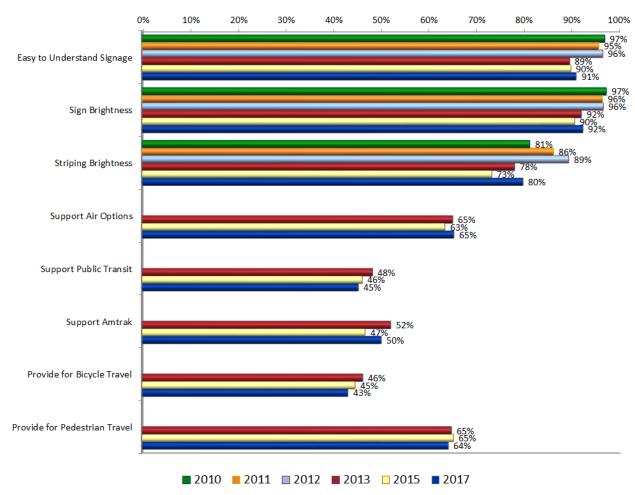

TRENDS: Overall Satisfaction With MoDOT's Efforts to Provide Various Services on Missouri Highways

Overall satisfaction for the years above was calculated by adding the very satisfied and the satisfied responses.

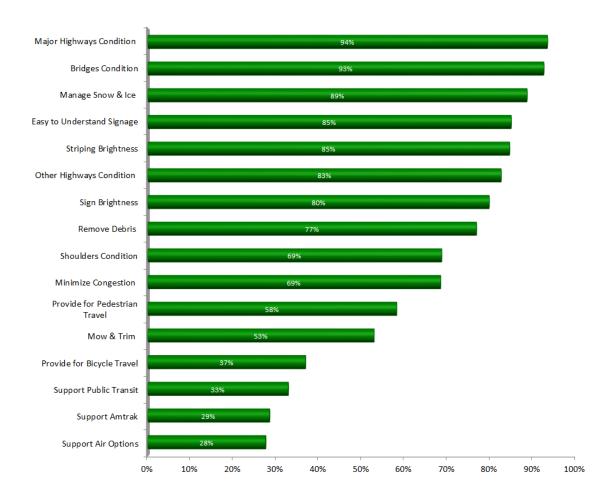

TRENDS: Overall Satisfaction With MoDOT's Efforts to Provide Various Services on Missouri Highways

The two sign questions were asked differently from 2010 through 2012 which may have slightly impacted the results for these measures. The wording was revised in 2013 as part of an effort to facilitate consistent standards across many measures.

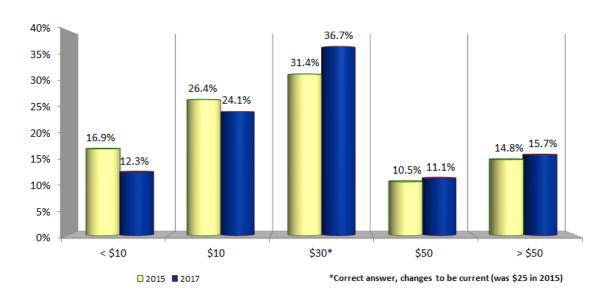

Transportation Services Residents Felt were Very Important

Services listed in order of greatest importance to least importance based on the percentage of Missourians who stated each service was very important.

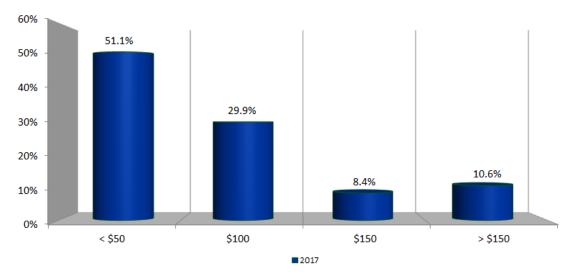

Estimate of Missourians on How Much the Average Driver Pays Per Month in Taxes and Fees to Fund Missouri State Roads

On average, Missourians actually spend \$30 per month in taxes and fees to fund Missouri state roads.

Estimate of Missourians on How Much Traffic Congestion, Poor Road Conditions, and Safety Issues Costs the Average Driver Per Month

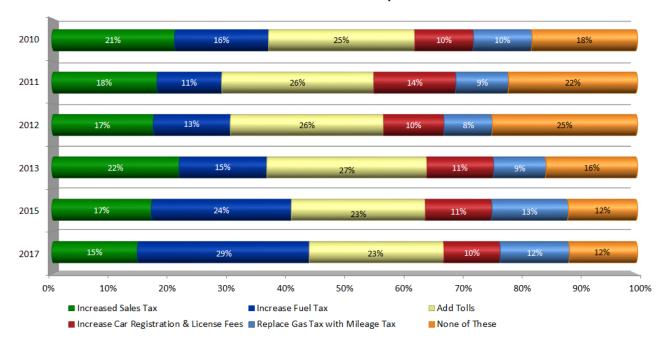

This question was added in 2017. In 2016, the most current year available, the estimated cost was about \$169 per month.¹

^{*}The statewide (Total) sample was weighted based on the relative population of each district so that the data contained in the statewide total column reflects the actual population of Missouri considering age, gender, and geographic factors.

Q8. How much do you think the average driver currently pays a month in taxes and fees to fund Missouri state roads? (Excluding don't knows and none chosen)

	District								
	NW	NE	КС	CD	SL	SW	SE	Total*	
Q8. How much do you think the average driver	currently p	ays a mon	th in taxes	and fees t	o fund Mis	ssouri stat	e roads?		
Less than \$10 per month	14.1%	11.3%	13.6%	6.7%	13.3%	13.4%	12.8%	12.3%	
\$10 per month	21.6%	23.3%	21.0%	24.6%	22.5%	29.0%	22.7%	24.1%	
\$30 per month	37.8%	37.3%	35.0%	37.3%	39.3%	34.0%	32.9%	36.7%	
\$50 per month	11.5%	10.5%	13.8%	10.9%	10.7%	9.2%	11.5%	11.1%	
More than \$50 per month	15.1%	17.6%	16.7%	20.5%	14.2%	14.4%	20.1%	15.7%	

^{*}The statewide (Total) sample was weighted based on the relative population of each district so that the data contained in the statewide total column reflects the actual population of Missouri considering age, gender, and geographic factors.

Q9. Traffic congestion, poor road conditions and safety issues cost Missouri drivers time, fuel, and car repairs. How much do you think this totals each month for an average driver?

(Excluding don't knows and none chosen)

		District								
	NW	NE	KC	CD	SL	SW	SE	Total*		
Q9. Traffic congestion, poor road conditions an much do you think this totals each month for a			issouri dri	vers time,	fuel, and	car repairs	s. How			
Less than \$50 per month	51.8%	52.0%	46.6%	52.5%	52.9%	57.8%	51.4%	51.1%		
\$100 per month	30.3%	29.0%	31.8%	29.8%	28.4%	28.0%	30.0%	29.9%		
\$150 per month	9.5%	8.8%	9.7%	6.4%	8.7%	5.5%	8.1%	8.4%		
More than \$150 per month	8.5%	10.2%	11.9%	11.2%	10.0%	8.7%	10.5%	10.6%		

^{*}The statewide (Total) sample was weighted based on the relative population of each district so that the data contained in the statewide total column reflects the actual population of Missouri considering age, gender, and geographic factors.

Q10. If it was determined that the State of Missouri needed to increase revenues in order to adequately fund Missouri state highways and roads, which one of the following five methods would be most acceptable to you? (Excluding don't knows)

		District							
	NW	NE	KC	CD	SL	SW	SE	Total*	
Q10. What method would be most acceptable to	you?								
Increase general sales tax	14.3%	14.9%	13.9%	15.9%	12.3%	20.4%	15.8%	14.6%	
Increase state fuel tax	28.7%	34.0%	33.8%	29.6%	31.7%	23.4%	24.1%	29.3%	
Add tolls to some interstate highways	21.8%	19.1%	21.6%	21.9%	25.5%	20.6%	19.1%	23.0%	
Increase car registration and license fees	8.5%	8.8%	10.3%	7.5%	10.2%	9.1%	7.2%	9.6%	
Replace state gas tax with vehicle mileage tax	12.5%	12.1%	10.5%	11.5%	12.3%	11.7%	15.3%	11.8%	
None of these (unread)	14.3%	11.2%	9.9%	13.7%	7.9%	14.8%	18.5%	11.6%	

^{*}The statewide (Total) sample was weighted based on the relative population of each district so that the data contained in the statewide total column reflects the actual population of Missouri considering age, gender, and geographic factors.

Q11. If it was determined the state of Missouri needed to increase revenues in order to adequately fund Missouri state roads through some sort of tax as discussed in the previous question, how much more per month would you be willing to pay for safer roads? (Excluding don't knows and none chosen)

		District								
	NW	NE	КС	CD	SL	SW	SE	Total*		
Q11. How much more per month would you be	willing to pa	ay for safe	r roads?							
Nothing	16.1%	12.1%	10.6%	15.1%	13.3%	16.2%	16.3%	13.7%		
\$1 per month	18.4%	13.1%	12.0%	13.8%	17.7%	18.7%	20.9%	16.4%		
\$5 per month	30.6%	32.4%	33.0%	35.2%	35.1%	34.9%	31.0%	34.6%		
\$10 per month	23.0%	26.7%	28.6%	24.3%	22.2%	21.0%	19.0%	23.1%		
More than \$10 per month	11.8%	15.7%	15.8%	11.5%	11.7%	9.3%	12.8%	12.2%		

^{*}The statewide (Total) sample was weighted based on the relative population of each district so that the data contained in the statewide total column reflects the actual population of Missouri considering age, gender, and geographic factors.
