To help commemorate the 10th anniversary of the TLR’s debut, Amanda Wilson serves as this TRL’s speaker. Amanda, who is now head of the National Network Coordinating Office at the National Library of Medicine, played a vital role in planning and launching the TLR in 2007 and -- for most of the past decade -- served as its guiding light.

Amanda will touch upon how the TLR came into existence and how it evolved over the years. She will also reflect on the various changes that have become an integral part of our professional and personal lives since 2007, and how these changes (the ever-growing applications of social media as a key example) have ultimately influenced the content and character of the TLR presentations.
10 Years of the TLR

12 October 2017

Amanda J. Wilson
Head, National Network Coordinating Office
National Library of Medicine

Most Enjoyable
Most Surprising
“Roundtables serve several purposes. They share information about library services such as cataloging, electronic resources, and special collections. They also allow librarians to share best practices about marketing, management, performance measures and advisory committees. They inform the transportation library community about new technologies . . . And, they address some of the pressing issues facing all transportation libraries.”

Value of TLRs (from attendee feedback):
Information exchange
Networking
Further improving our communications with each other and therefore our overall impact
The informality
Training without leaving the office
Cost-effectiveness
from [The TLR turns 100!](http://www.tlr100.com) (April 14, 2016) SPEAKERS: Amanda Wilson and Bob Cullen
Paths Not Taken
Favorite Parts and Fondest Moments
From NTL to NLM
