Port overview

The Port of Port Arthur is located 19 miles from the Gulf of Mexico, on Lake Sabine in southeastern Texas. It is located at the approximate midpoint of the Gulf Intracoastal Waterway, which stretches from St. Marks, Florida, to Brownsville, Texas. A five-member board of commissioners oversees the port.

The port has one public terminal that handles break-bulk and dry bulk cargoes; facilities also include a dedicated Ro/Ro area. The port's primary cargoes handled include petroleum products, chemical products (e.g., metallic salts, naphtha), and forest products such as lumber and wood pellets.

The port has access to one Class I rail service and to barge services on inland waterways and the Gulf Intracoastal Waterway.
