

PORT OF SOUTH LOUISIANA

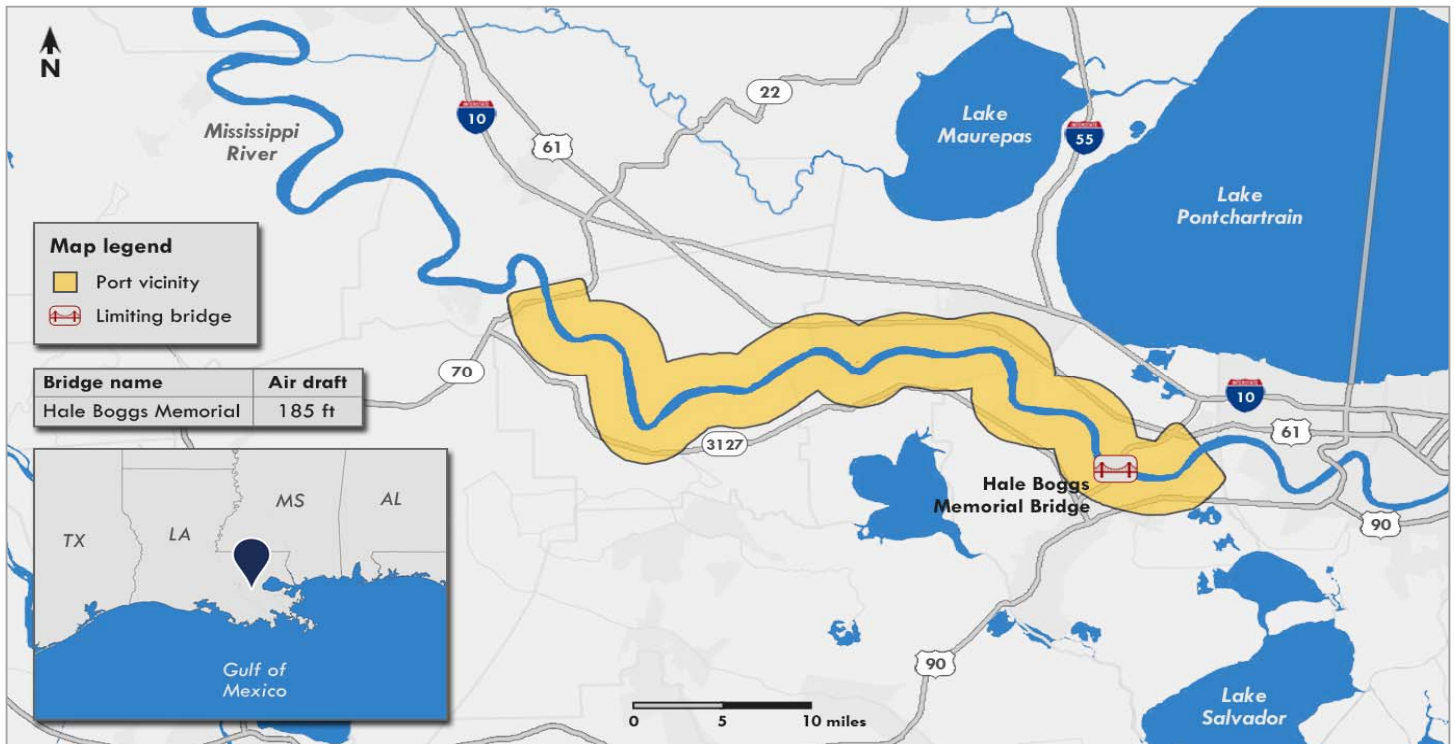

Louisiana

Gulf Coast & Mississippi River

Port list:

Tonnage

Dry bulk

Port vicinity map illustrates area facilities. Bridge air drafts may limit vessel traffic.

The Huey P. Long Bridge (132 ft), not shown, may limit vessels serviced at the Port of South Louisiana.

Port overview

The Port of South Louisiana extends for 54 miles along the Mississippi River and includes more than 40 liquid and dry bulk terminals between Baton Rouge and New Orleans, Louisiana. A nine-member Board of Commissioners governs the port.

The port has one public terminal (Globalplex Intermodal Terminal), which handles dry bulk (including cement, mineral ores, and woodchips), break-bulk, and containerized cargo. The port also has four facilities leased to private operators, including grain elevators, oil terminals, and liquid and dry bulk terminals. The port handles a variety of bulk and liquid bulk cargoes, including soybeans, corn, and liquid fuel, as well as coal, cement, woodchips, fertilizers, and stone.

The port has access to three Class I railroads.

Port Updates:

In May 2017, the port expanded bulk storage facilities at the Globalplex Intermodal Terminal. This project also involved developing terminal infrastructure including a new roadway and loading dock ramp. In August 2017, the port opened a new liquid bulk terminal and storage facility in conjunction with a private terminal operator.
