PREFACE

The Safety Management Information Statistics (SAMIS) 1996 Annual Report is a compilation and analysis of mass transit accident, casualty, and crime statistics reported under the Federal Transit Administration's (FTA's) National Transit Database Reporting System by FTA-funded transit systems in the United States during 1996.

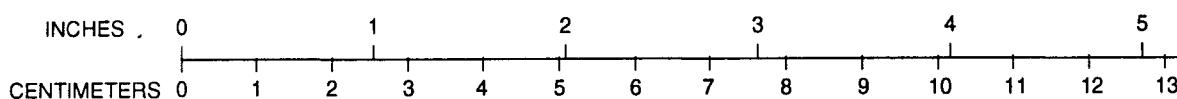

This report was prepared under the sponsorship of the Federal Transit Administration, Office of Safety and Security. The statistics for the tables, charts, and graphs are generated by the SAMIS system software, developed at the John A. Volpe National Transportation Systems Center (Volpe Center) in Cambridge, Massachusetts.

The authors wish to thank: Judy Z. Meade, Director of the FTA's Office of Safety and Security; Carole Ferguson, Transit Safety Specialist at the Office of Safety and Security; and William T. Hathaway, Senior Project Engineer and Technical Task Initiator at the Volpe Center for their direction, guidance, and valuable comments during the preparation of this report.

NARRATIVE COMMENTS

INTRODUCTION

In its seventh year of publication, the Safety Management Information Statistics (SAMIS) Annual Report continues to provide uniformly collected, comprehensive safety and security data from approximately 400 transit agencies throughout the country. Since agencies own and operate more than one mode of transportation, the number of transit services covered is approximately 600¹.

The safety and security data presented in this report are collected via Form 405 of the Federal Transit Administration's National Transit Database program. To facilitate the reader's understanding of the information presented in this report, Form 405 is shown on pages 5 and 6. This data is collected separately for each transit mode an agency operates (e.g., an agency which operates bus and light rail will submit two Form 405s).

Transit safety data are collected in four basic categories: *Collisions*; *Derailments/Buses going off road*; *Personal Casualties*; and *Fires*. Each of these categories is further delineated in order to gather detailed information on the exact nature of the incident. Transit security data are modeled after the Federal Bureau of Investigation's Uniform Crime Reporting System, using standardized offense definitions. Two types of security data are collected: report of Part I (crime index) offenses; and arrests for Part II (most other) offenses. SAMIS reports these safety statistics for the following transit modes: Motor Bus (MB); Automated Guideway (AG); Commuter Rail (CR); Heavy Rail (HR); Light Rail (LR); Demand Response (DR); and Vanpool (VP).

In this year's report, trend data for 1990 through 1996 is broken into three categories: general transit; bus modes; and rail modes.

As with previous years' SAMIS reports, caution should be used when making comparisons across different modes of transit, and also against data from other transportation reporting systems such as those for aviation and trucking. When comparing modes of transit, their differences should be kept in mind. For example, some transit modes run on exclusive rights of way while others mix with general traffic on surface roads. Some have extensive stations and

¹Only data for directly operated transit modes are included. Data for transit services under contract to recipients or beneficiaries of Section 9 funds, i.e., purchased transportation, are not included.

terminals (where most fires are set) with escalators (where many of the injuries happen) while others have no such facilities. When making comparisons with data from other transportation reporting systems, it is important to consider that the reporting thresholds, assumptions, and definitions may be very different. For example, SAMIS reports property damage when the damage exceeds \$1,000, while other transportation industries use thresholds that may be lower or higher.

GLOSSARY OF TERMS

Safety Definitions

Vehicle Accident

An incident involving a moving vehicle. Includes collisions with another vehicle, object, or person (except suicides) and derailment/left roadway.

Passenger Accident

Same as Vehicle Accident, except that Personal Casualties incidents on the vehicle and entering/exiting the vehicle are also included.

Collision with Vehicle

An incident in which a transit vehicle strikes or is struck by another vehicle. Reports are made if the accident results in death, injury, or property damage over \$1,000.

Collision with Object

An incident in which a transit vehicle strikes an obstacle other than a vehicle or person (e.g., building, utility pole). Reports are made if the accident results in a death, injury, or property damage over \$1,000.

Collision with People

An incident in which a transit vehicle strikes a person. Except where specifically indicated, collisions with people do not include suicide attempts. Reports are made if the incident results in death, injury, or property damage over \$1,000.

Derailment/Left Roadway

A non-collision incident in which a transit vehicle leaves the rails or road on which it travels. This also includes rollovers. Reports are made for all occurrences.

Employee

An individual who is compensated by the transit agency and whose expense is reported in object class 501 labor.

Fatality

A transit-caused death confirmed within 30 days of a transit incident.

Fire

Uncontrolled combustion made evident by flame and/or smoke which requires suppression by equipment or personnel. There are no thresholds; all fires are reported.

Grade Crossings

An intersection of highway roads, railroad tracks, or dedicated transit rail tracks that run either parallel or across mixed traffic situations with motor vehicles, light rail, commuter rail, heavy rail, trolleybus or pedestrian traffic. Collisions at grade crossings involving transit vehicles apply only to light rail, commuter rail, heavy rail or trolleybus.

Incident

Collisions, personal casualties, derailments/left roadway, fires, and property damage greater than \$1,000 associated with transit agency revenue vehicles and all transit facilities.

Injury

Any physical damage or harm to a person requiring medical treatment, or any physical damage or harm to a person reported at the time and place of occurrence. For employees, an injury includes incidents resulting in time lost from duty or any definition consistent with a transit agency's current employee injury reporting practice.

Passenger Miles

The total number of miles traveled by transit passengers (e.g., a bus that carries 5 passengers for a distance of 3 miles incurs 15 passenger miles).

Patron

A person who intends to use or has used the transit system and is on property affiliated with the transit system within the limits of the law. An employee is not a patron.

Personal Casualty on Vehicle

An incident in which a person is injured on a transit vehicle, but not as a result of a collision, derailment/left roadway, or fire.

Personal Casualty Entering/Exiting a Vehicle

An incident in which a person is hurt while getting on or off a transit vehicle (e.g., falls or door incidents).

Personal Casualty Associated with Lifts

An incident in which a person is hurt while using a lift to get on or off a

transit vehicle. This is a subset of the Entering/Exiting a vehicle in the Personal Casualties category.

Personal Casualty in Stations/Bus Stops

An incident in which a person is hurt while using a transit facility. This includes anyone on transit property (e.g., patrons, employees, trespassers) but does not include incidents resulting from illness or criminal activity.

Personal Casualty Associated with Escalator

An incident in which a person is hurt while using an escalator in a transit facility. Any incident in this category is a subset of Personal Casualties in Stations/Bus Stops.

Personal Casualty Associated with Elevators

Any incident in which a person is hurt while using an elevator in a transit facility. Any incident in this category is a subset of personal Casualty in Stations/Bus Stops.

Suicide

A person attempting to end his or her own life intentionally. This is a subset of Collision with People.

Transit Property

All facilities which are directly controlled by a transit agency or provided to a transit agency for its use. This includes stations, rights of way, bus stops, and maintenance facilities.

Transit Property Damage

The dollar amount required to repair or replace transit property damaged during an incident.

Vehicle Miles

The total number of miles traveled by transit vehicles. Commuter rail, heavy rail, and light rail report individual car miles rather than train miles for vehicle miles.

Security Definitions

Part I Offenses (Reports):

Homicide

The killing of one or more human beings by another. This includes murder, non-negligent manslaughter and manslaughter by negligence.

Forcible Rape

The carnal knowledge of a female forcibly and against her will. This includes rape and attempt to rape.

Robbery

The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear. The use or threat of force includes firearms, knives or cutting instruments, other dangerous weapons (clubs, acid, explosives), and strong-arm techniques (hands, fists, feet).

Aggravated Assault

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.

Larceny/Theft

The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. This includes pocket-picking, purse-snatching, shoplifting, thefts from motor vehicles, thefts of motor vehicle parts and accessories, theft of bicycles, theft from buildings, theft from coin-operated devices or machines, and all other theft not specifically classified.

Motor Vehicle Theft

The theft or attempted theft of a motor vehicle. A motor vehicle is a self-propelled vehicle that runs on the surface of land and not rails. Examples of motor vehicles are automobiles, trucks, buses, motorcycles, motor scooters, etc.

Burglary

The unlawful entry of a structure to commit a felony or a theft. This includes offenses known locally as burglary (any degree), unlawful entry with intent to commit a larceny or felony, breaking and entering with intent to commit a larceny, housebreaking, safe-cracking, and all attempts at these offenses.

Arson

To unlawfully and intentionally damage, or attempt to damage, any real or personal property by fire or incendiary device.

Part II Offenses (Arrests):**Other Assault**

An unlawful attack or attempt by one person upon another where no weapon was used or which did not result in serious or aggravated injury to the victim. This includes simple assault, minor assault, assault and battery, injury by culpable negligence, intimidation, coercion, hazing, and all attempts to commit these offenses.

Vandalism

The willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law.

Sex Offenses

Any sexual acts except forcible rape, prostitution, and commercialized vice. This includes offenses against chastity, common decency, morals, and the like, such as: adultery and fornication; buggery; incest; indecent exposure; indecent liberties; seduction; sodomy or crime against nature; statutory rape (no force); and all attempts to commit any of the above.

Drug Abuse Violations

Arrests requested based on the narcotics used. This includes all arrests for violations of state and local laws, specifically those relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs.

Driving Under the Influence (DUI)

The driving or operating of any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Drunkenness

Arrests for all offenses of drunkenness, defined as the consumption of alcoholic beverages to the extent that one's mental faculties and physical coordination are substantially impaired. This includes drunkenness, drunk and disorderly, common or habitual drunkard, and intoxication.

Disorderly Conduct

All charges of committing a breach of the peace. This includes affray; unlawful assembly; disturbing the peace; disturbing meetings, disorderly conduct in state institutions, at court, at fairs, on trains or public conveyances, etc.; blasphemy, profanity, and obscene language; desecrating the flag; refusing to assist an officer; and all attempts to commit any of the above.

Trespass

To unlawfully enter land, a dwelling, or other real property.

Fare Evasion

The unlawful use of transit facilities by riding without paying the applicable fare.

Curfew and Loitering

All arrests for violations of local curfew or loitering ordinances where such laws exist.

TRANSIT MODE DEFINITIONS

AG - Automated Guideway

Consists of one or more automatically controlled vehicles operating on an exclusive guideway.

CC - Cable Car

Streetcar type vehicles operating by means of an attachment to a moving cable located below the street surface and powered by engines or motors at a central location not on board the vehicle.

CR - Commuter Rail

Urban passenger train service for local short distance travel between a central city and suburbs. Commuter rail does not include heavy rail or light rail service. Service of a predominantly intercity nature is excluded, except where a local portion is operated under public agency contract for commuter purposes.

DR - Demand Response

Personal transit service operated on roadways providing service on demand. Vehicles are normally dispatched, and used exclusively for this service.

FB - Ferryboat

Vessels carrying passengers and/or vehicles over a body of water. The vessels are generally steam or diesel-powered conventional ferry vessels.

HR - Heavy Rail (Rapid Rail)

Transit service using rail cars powered by electricity which is usually drawn from a third rail and usually operated on exclusive rights of way. It generally uses longer trains and has longer spacing between stations than light rail.

IP - Inclined Plane

Special tramway type of vehicles operating up and down slopes on rails via a cable mechanism so that passenger seats remain horizontal while the undercarriage (truck) is angled parallel to the slope.

JT - Jitney

Passenger cars or vans operating on fixed routes (sometimes with minor deviations) as demand warrants without fixed schedules or fixed stops.

LR - Light Rail (Streetcar)

Urban transit which uses predominantly reserved but not always grade-separated rights of way. Electrically powered rail vehicles operate alone or in trains.

VP - Vanpool

Public-sponsored commuter service operating under prearranged schedules for preformed groups of riders in 8 to 18 seat vehicles. Drivers are also commuters who receive little or no compensation besides free transportation and use of the vehicle during off-hours.

MB - Motor Bus

Rubber tired passenger vehicles that operate on roadways. Motor bus service implies fixed routes and schedules. The SAMIS graph descriptions Large Motor Bus (LMB), Medium Motor Bus (MMB), and Small Motor Bus (SMB) describe the size of the transit agency which operates the bus, not the size of the buses (i.e., if the number of buses an agency operates is greater than 500, then the vehicles are called LMBs, if the agency operates less than 100 buses, they are called SMBs, and anything in between is known as MMBs). *Therefore, in this sense of the division, LMB, MMB, and SMB are not true transit modes, but a representation of the agencies' size.*

There are two reasons for this division:

- To reflect the differences in the operating environments and traffic mix.
- To have a meaningful comparison between the motor buses and the rest of the transit modes [note that since the motor buses constitute the majority of a transit agency's fleet, a chart comparing various motor bus (combined) statistics to the rest of the transit modes, would result in a graph where the motor bus statistics would have considerably dwarfed the other transit modes].

The data for Trolleybus (TB) are combined with the Motor Bus data.

Transit modes whose statistics are insignificant when compared with other modes are addressed in an abbreviated fashion. They are Cable Car (CC), Ferryboat (FB), Inclined Plane (IP), and Jitney (JT). Detailed statistics are available on request. Monorail (MO), Publico (PB), Aerial Tramway (TR), and Other (OR) modes had no reportable incidents.

The Transit Crime Clock should be viewed with care. The mode of display should not be taken to imply a regularity in the occurrence of various transit crimes. Rather, it represents the annual ratio of fixed time intervals (e.g., 365×24 hours per year, or $365 \times 24 \times 60$ minutes per year) to the total number of arsons, burglaries, homicides, robberies, etc.

Totals of all Transit Mishaps by Year

	1990	1991	1992	1993	1994	1995	1996

* This is the total incidents of Collisions, Derailments, Personal Casualties, and Fires.

** Not including suicide attempts.

A look at SAMIS safety data from 1990 through 1996
(General Transit, Bus, and Rail)

TRENDS

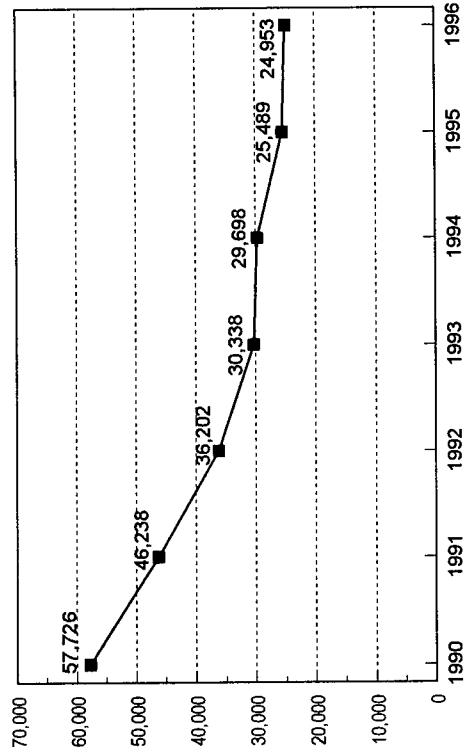

These graphs depict the trends for total number of *incidents*, *fatalities*, and *injuries* from all causes, i.e., Collisions, Derailments, Personal Casualties, and Fires.

Note: In these trend graphs (pages 25 - 32), the term *Transit* refers to the following modes:
MB, CR, HR, LR, AG, DR, VP.

Transit Collisions*

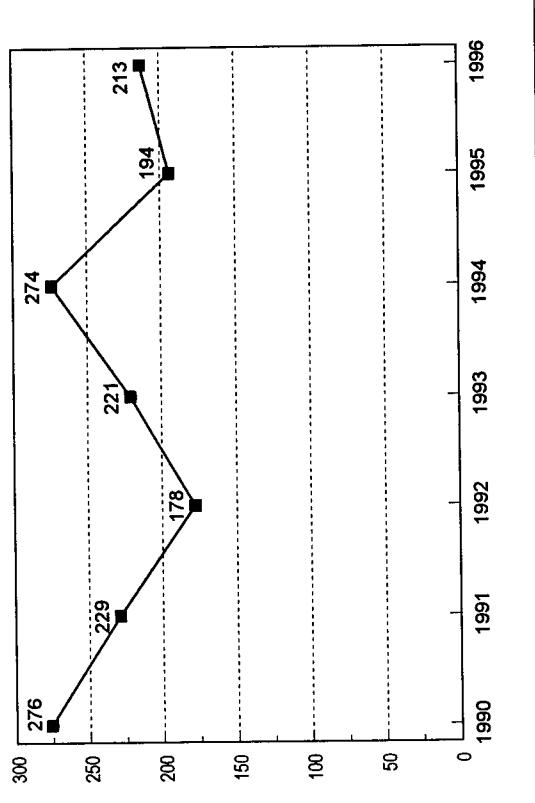

by Year

* With Vehicles, Objects, and People (not including suicide attempts).

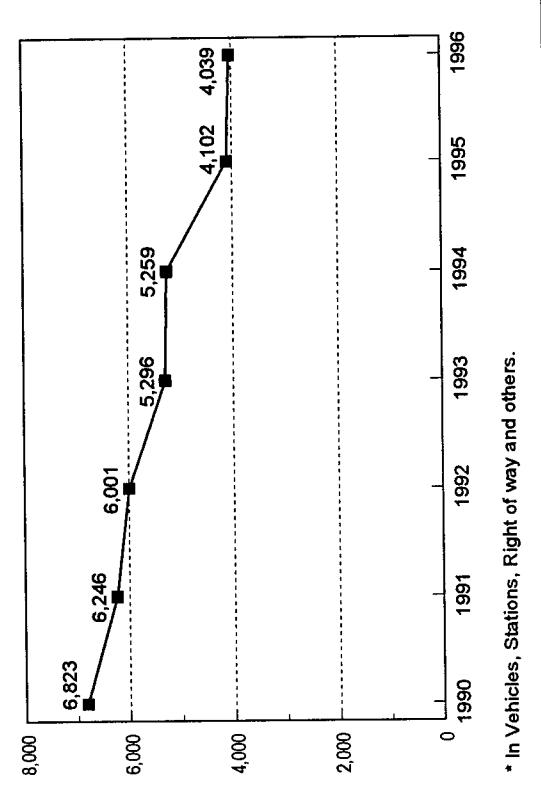

Transit Derailments/Buses going off road

by Year

Transit Fires*

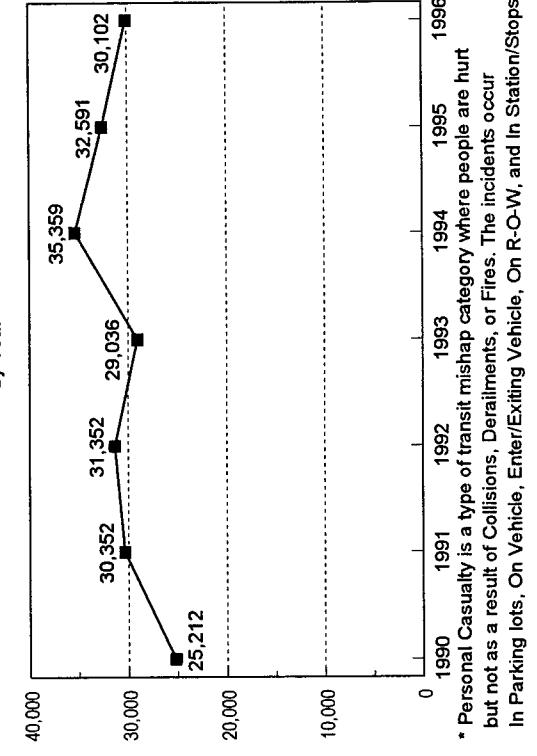

by Year

* In Vehicles, Stations, Right of way and others.

Transit Personal Casualties*

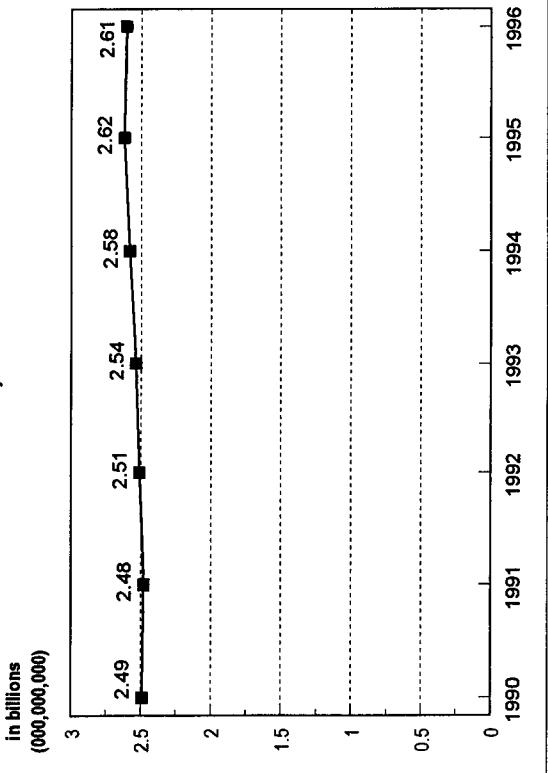

by Year

* Personal Casualty is a type of transit mishap category where people are hurt but not as a result of Collisions, Derailments, or Fires. The incidents occur In Parking lots, On Vehicle, Enter/Exiting Vehicle, On R-O-W, and In Station/Stops.

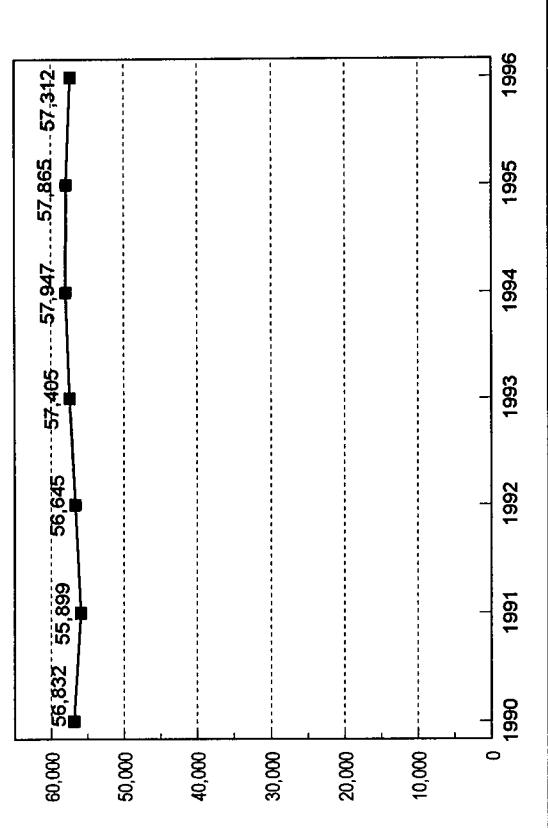

Transit Vehicle Miles

by Year

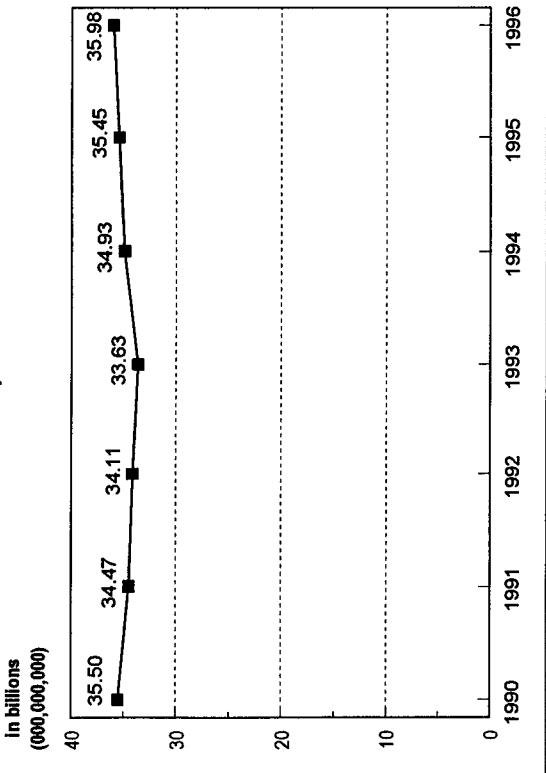

Transit Vehicles

by Year

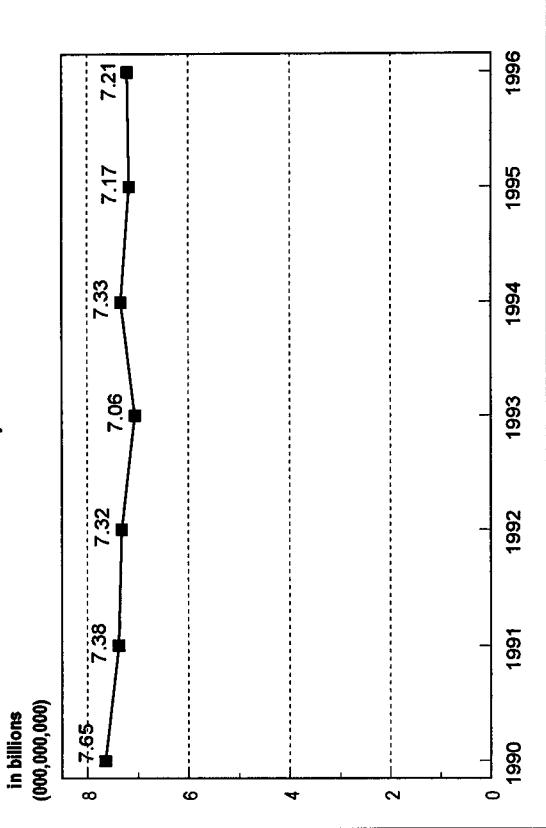

Transit Passenger Miles

by Year

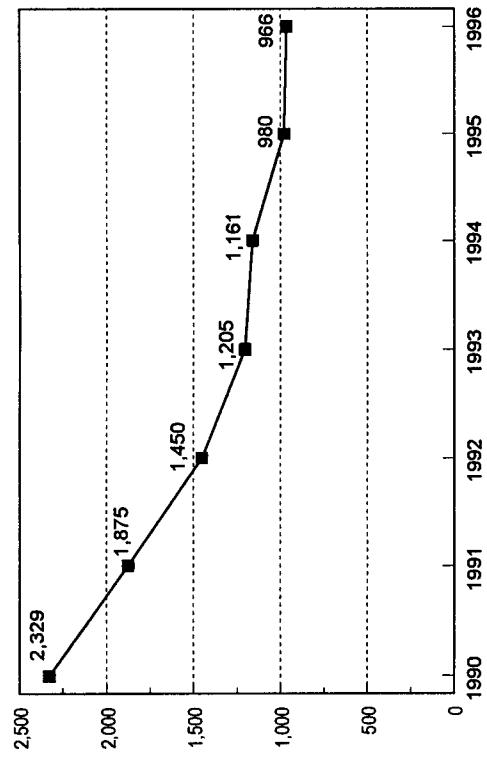

Transit Passengers

by Year

Transit Accidents

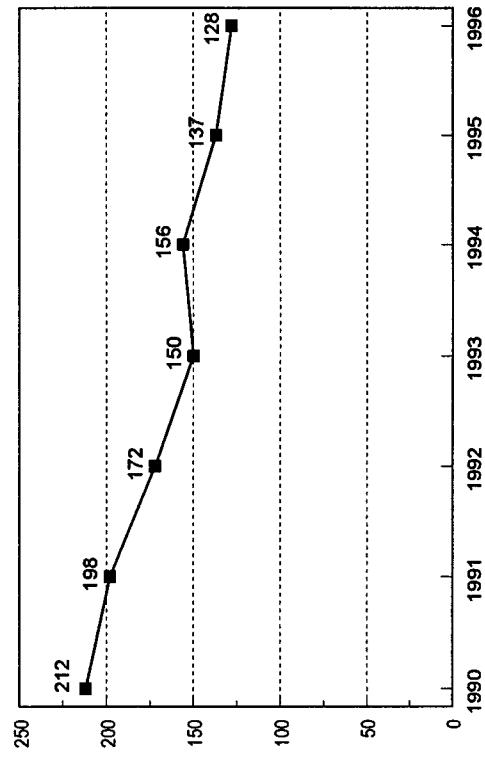

per 100,000,000 Vehicle Miles
by Year

This graph shows the accident rate which is based only on the number of vehicle accidents. These include all vehicle accidents resulting from **Collisions** [with vehicles, objects, people (not suicides)] and **Derailements** (vehicle derailed/left roadway). The vehicle mile figure includes both revenue and non-revenue miles since there are risks present during both types of operation. The three rail modes (Commuter Rail, Heavy Rail, and Light Rail) report car rather than train miles for vehicle miles.

Transit Accidents

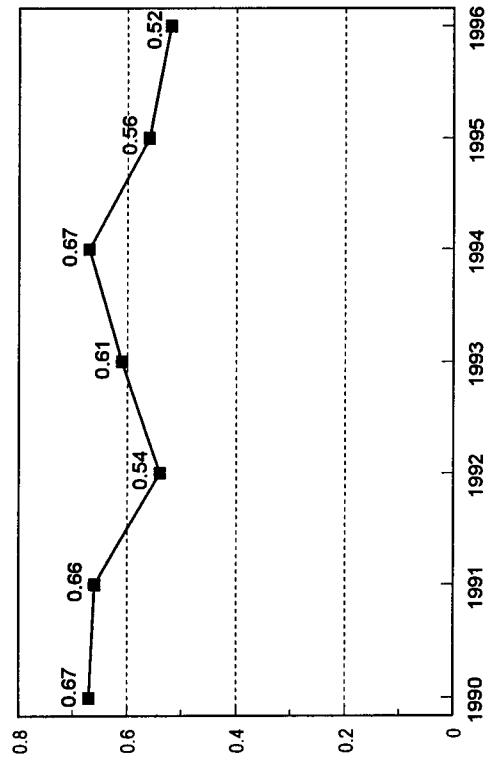

per 100,000,000 Passenger Miles
by Year

This graph shows the trend for accident (or incident) rates, which result from **Collisions** [with vehicles, objects, and people (not suicides)], **Derailements** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle). When analyzing the results on this page, consider that the number of vehicle accidents, the number of passengers, and the average trip length all affect the accident rate. This graph differs from the previous graph in that it includes **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle), and is indexed in Passenger Miles.

Transit Fatalities

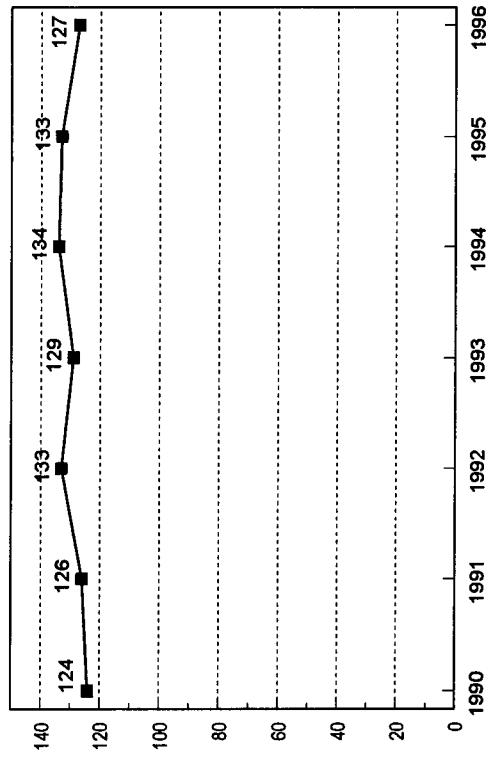

per 100,000,000 Passenger Miles
by Year

These statistics represent *fatalities* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailements** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle).

Transit Injuries

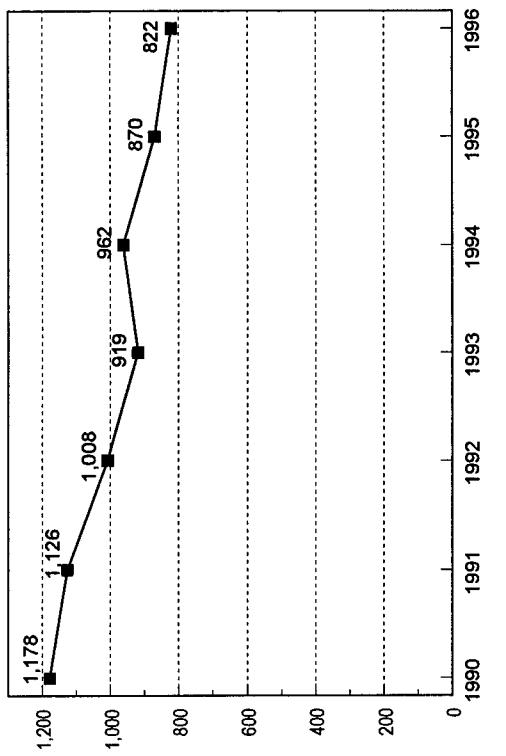

per 100,000,000 Passenger Miles
by Year

These statistics represent *injuries* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailements** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle).

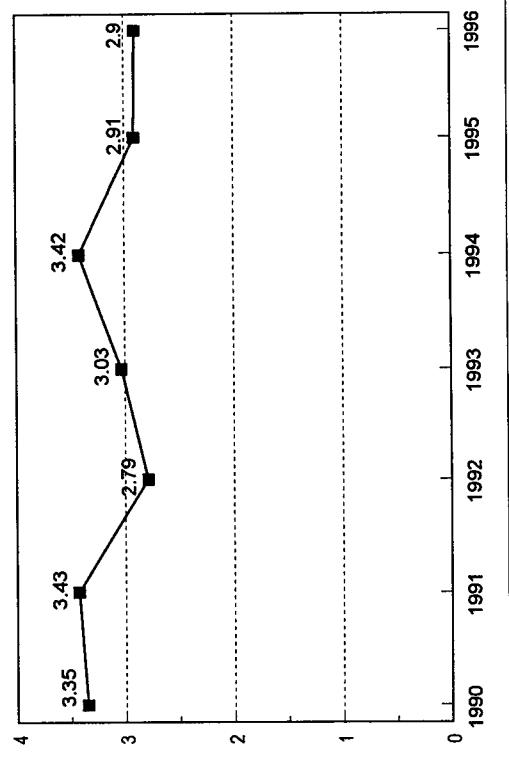

Transit Incidents

of all types
per 100,000,000 Passengers

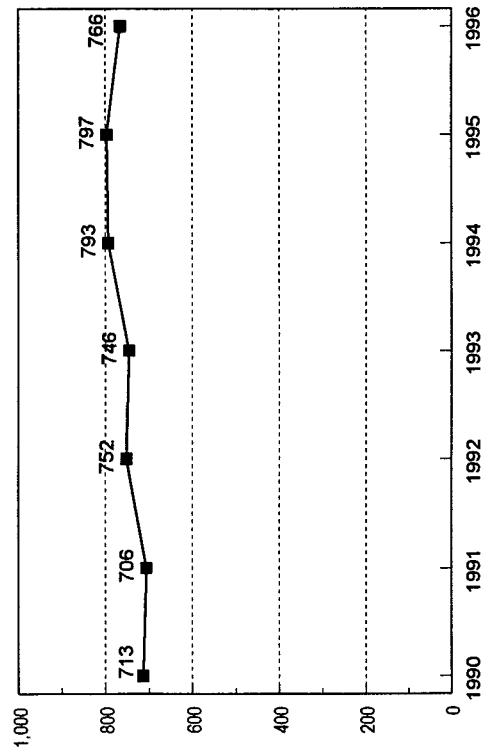

Transit Fatalities

from all causes
per 100,000,000 Passengers

Transit Injuries

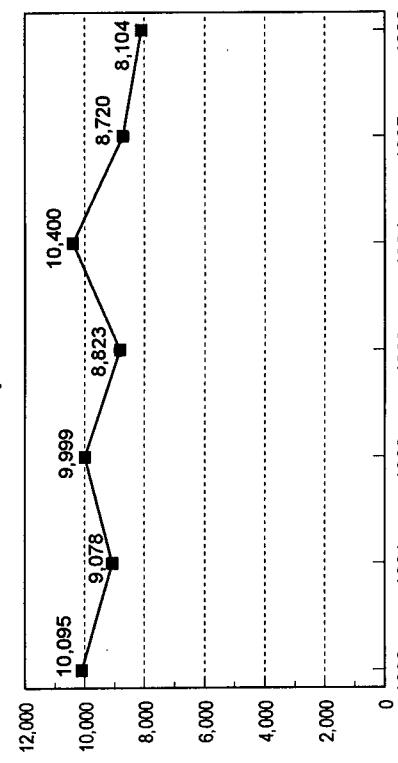

from all causes
per 100,000,000 Passengers

These graphs depict the trends for *incident*,
fatality and *injury* rates, from all causes
(except suicides) listed in the Transit Safety
Form (405), i.e., Collisions, Derailments,
Personal Casualties, and Fires.

Entering/Exiting the Transit Vehicle*

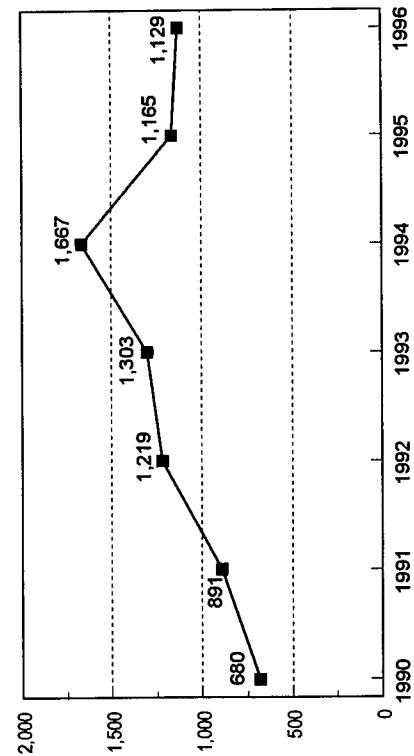

Injuries
by Year

* This is a sub-category of Personal Casualties.
It includes figures associated with Lifts.

Escalator Injuries

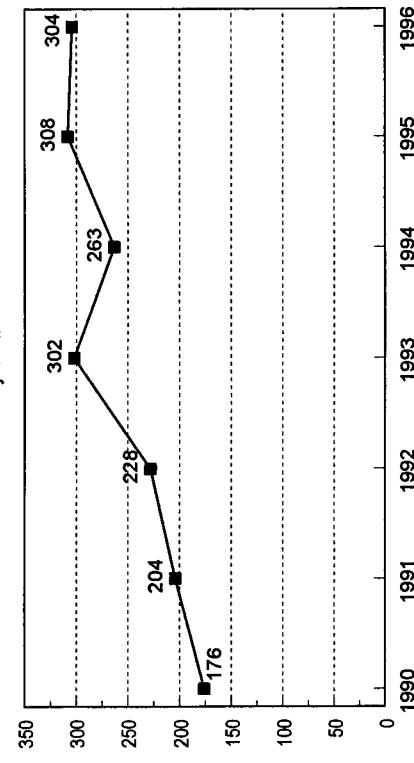

In Transit Stations/Bus Stops*
by Year

* This is a sub-category of Personal Casualties.

Lift Injuries

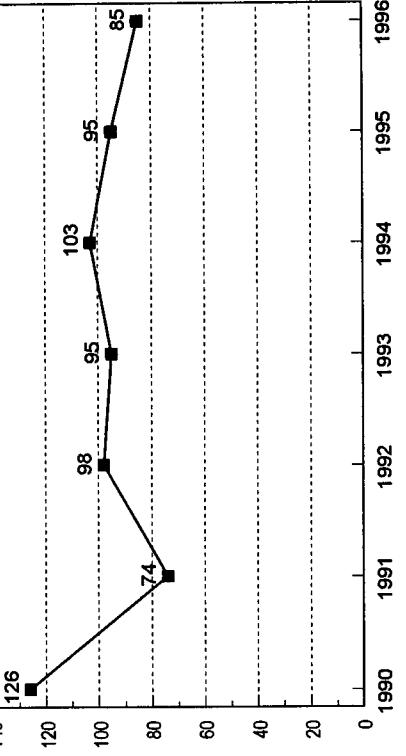

While Entering/Exiting the Transit Vehicle*
by Year

* This is a sub-category of Personal Casualties.

Transit Suicides*

by Year

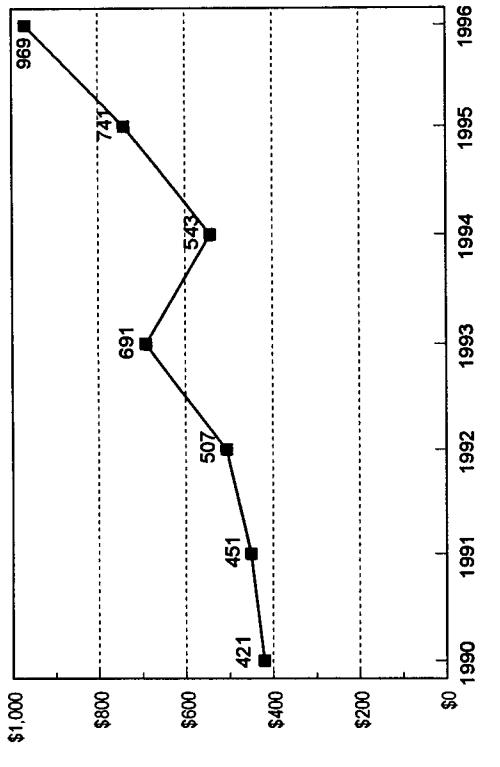

* Incidents of attempted suicides. These include fatalities, injuries, and unharmed. This is a sub-category of Collisions (with people).

Transit Property Damage

by Year

\$ In millions
(000,000)

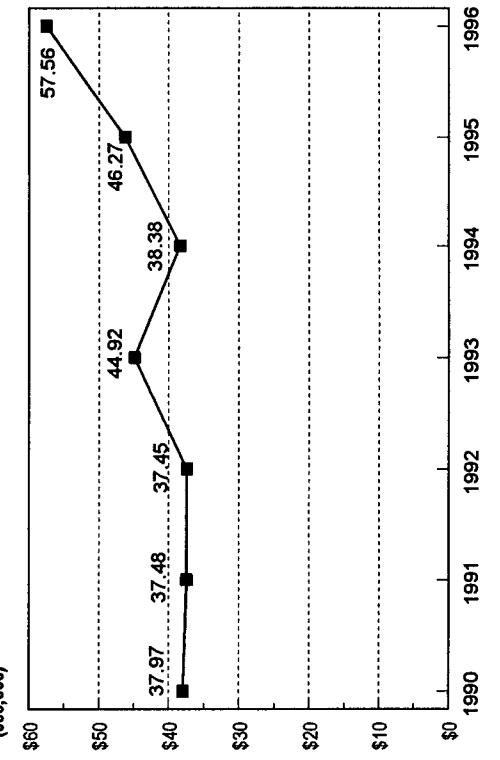

Transit Property Damage

by Year

Transit Property Damage

by Year

\$ In millions
(000,000)

Transit Property Damage

per Day
by Year

Transit Property Damage

per Day
by Year

Transit Property Damage

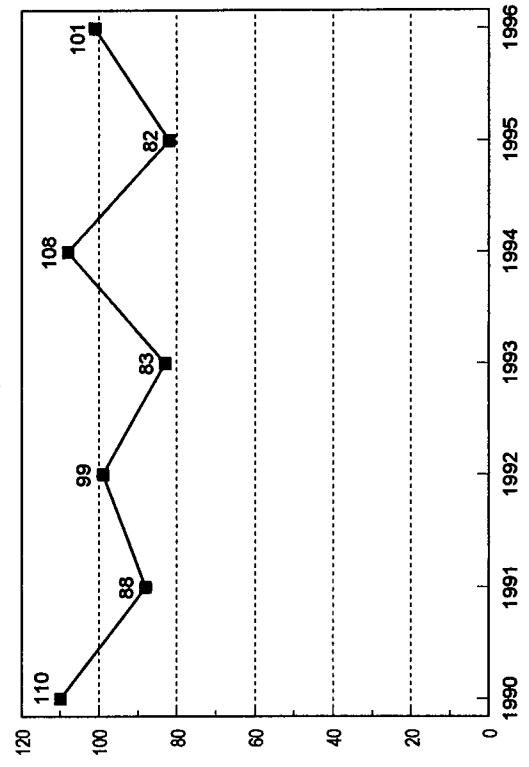

per Day
by Year

These graphs depict the trends for *property damage* to transit agency vehicles or facilities (track, signals, buildings, etc.). The dollar amounts are not adjusted for inflation.

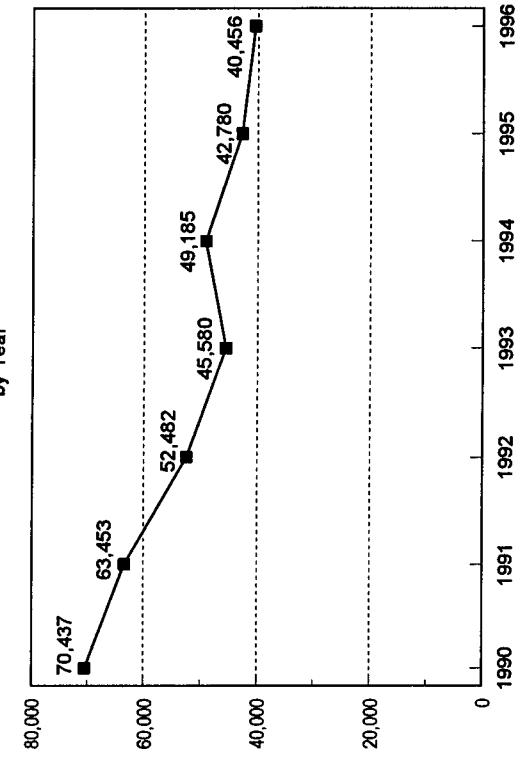

Bus Fatalities

by Year

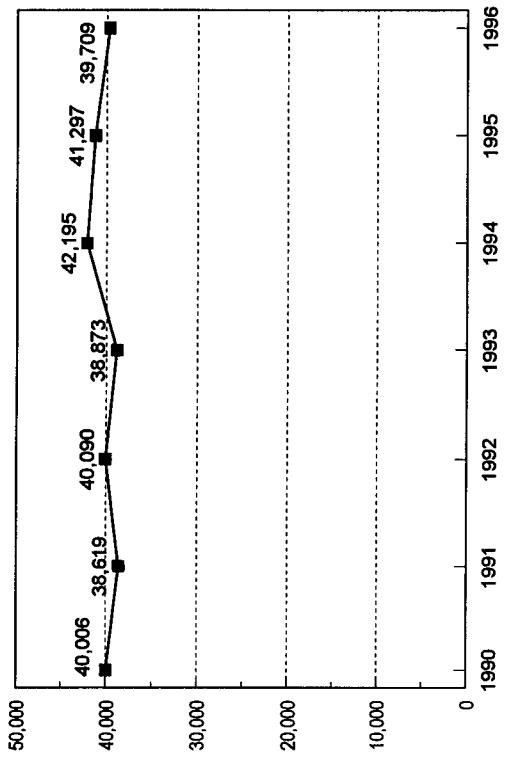

Bus Incidents

by Year

Bus Injuries

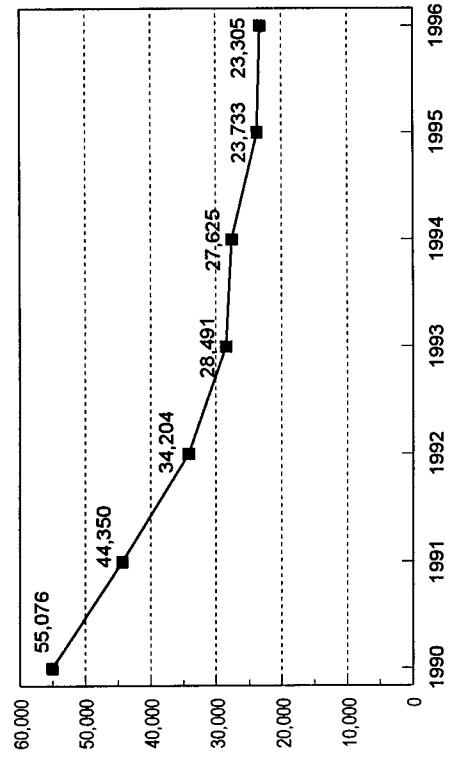

by Year

These graphs depict trends for buses. They show the total number of *incidents*, *fatalities*, and *injuries* from all causes, i.e., **Collisions**, **Derailements** (bus left roadway), **Personal Casualties**, and **Fires**.

Bus Collisions*

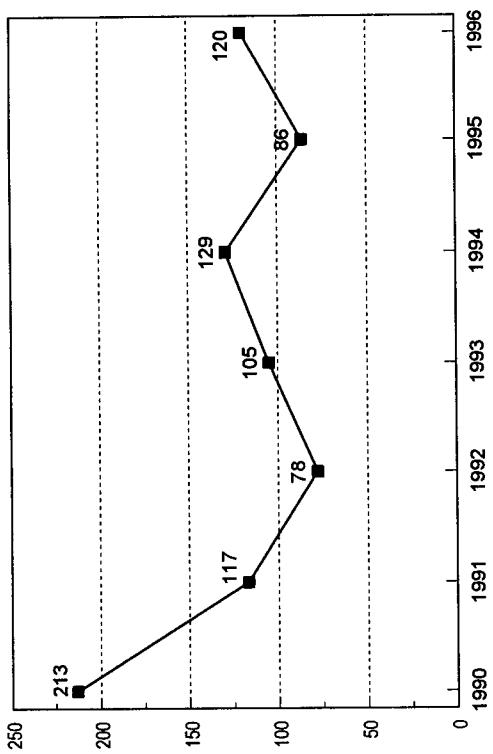

by Year

*With Vehicles, Objects, and People (not including suicide attempts).

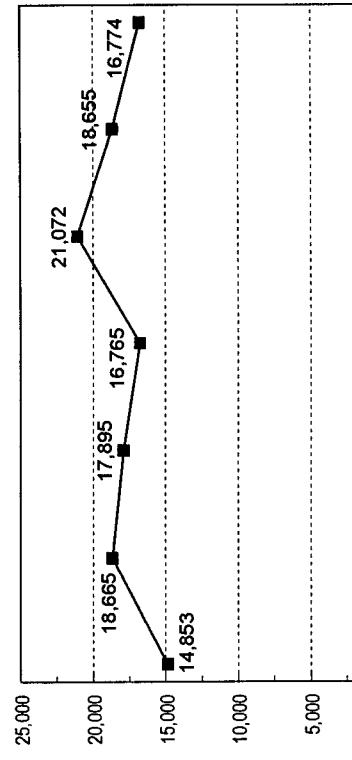

Buses going off road

by Year

Bus Personal Casualties*

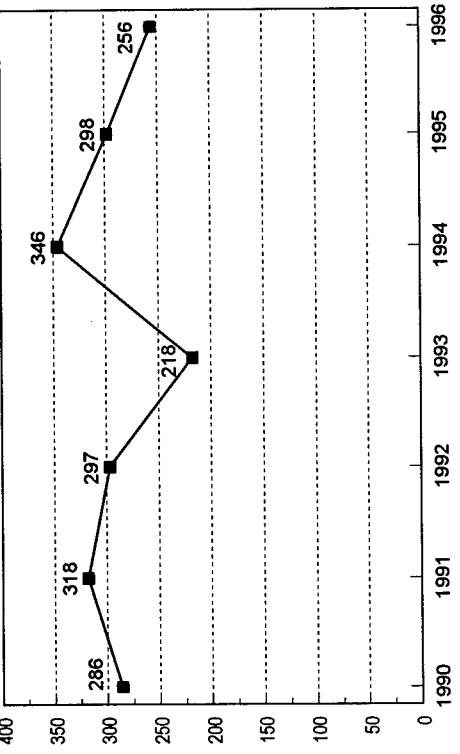

by Year

* Personal Casualty is a type of transit mishap category where people are hurt but not as a result of Collisions, Derailments, or Fires. The incidents occur In Parking lots, On Vehicle, Enter/Exiting Vehicle, On R-O-W, and In Station/Stops.

Bus Fires*

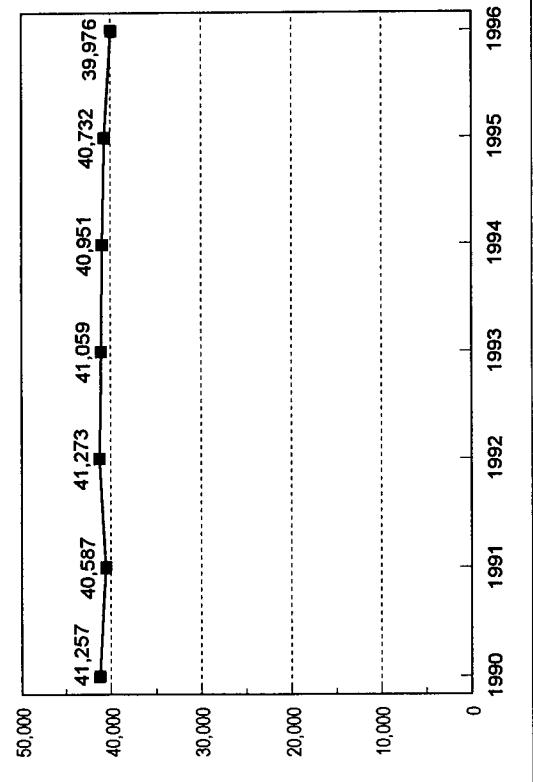

by Year

* In Vehicles, Stations, Right of way and others.

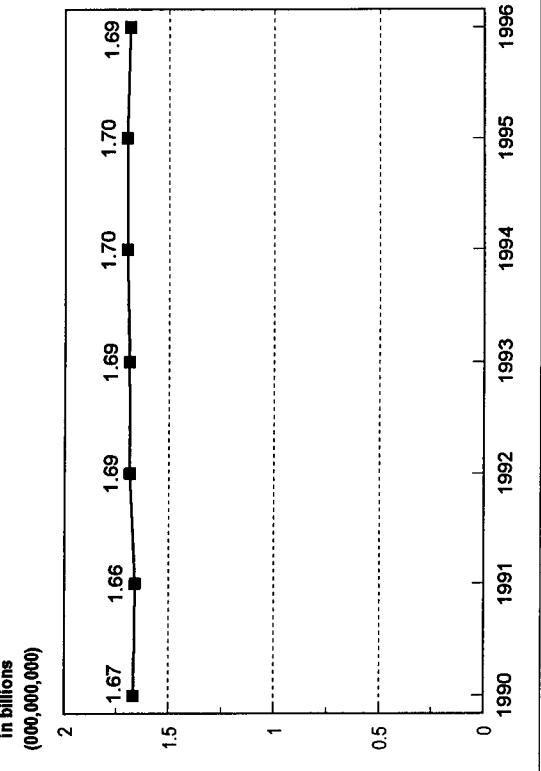

Number of Buses

by Year

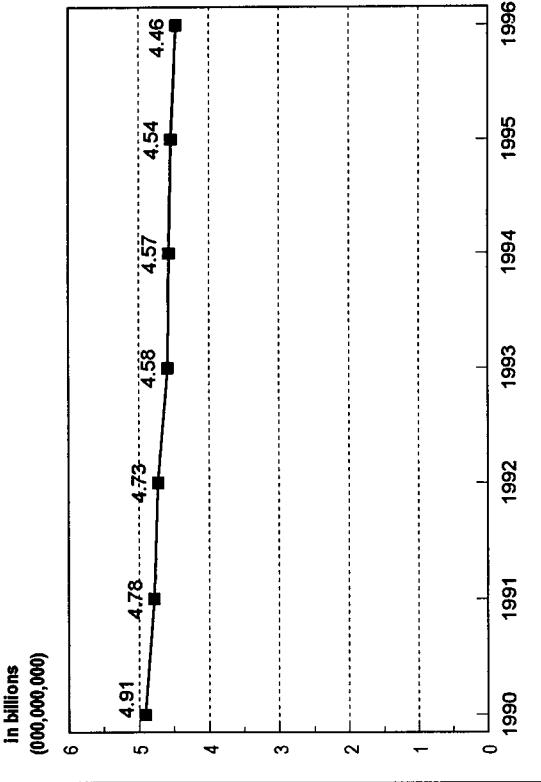

Bus (Vehicle) Miles

by Year

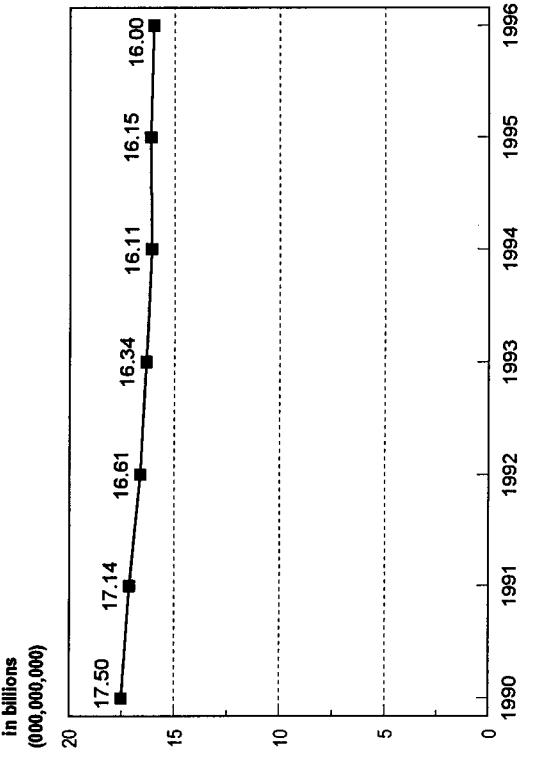

Bus Passengers

by Year

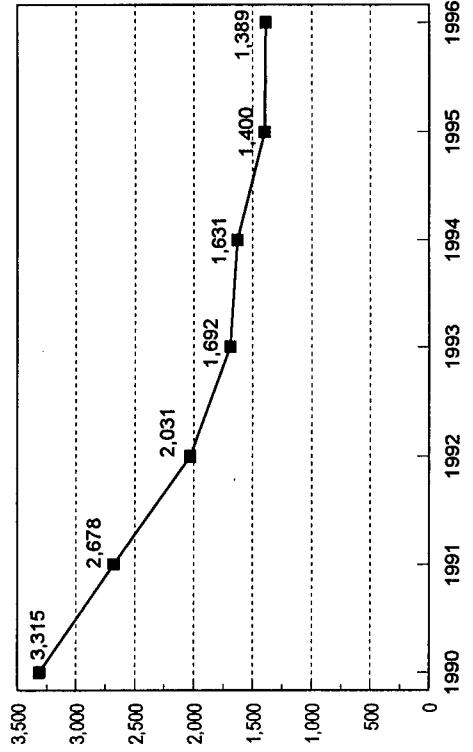

Bus Passenger Miles

by Year

Bus Accidents

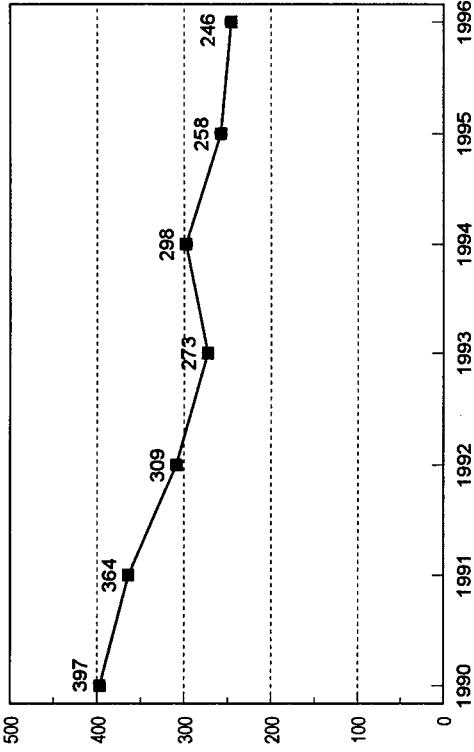

per 100,000,000 Vehicle Miles
by Year

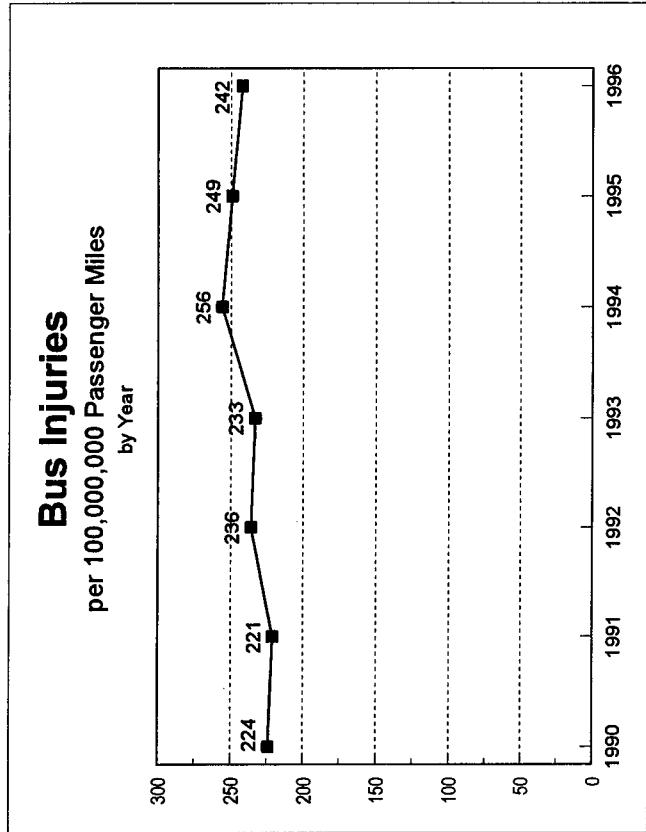

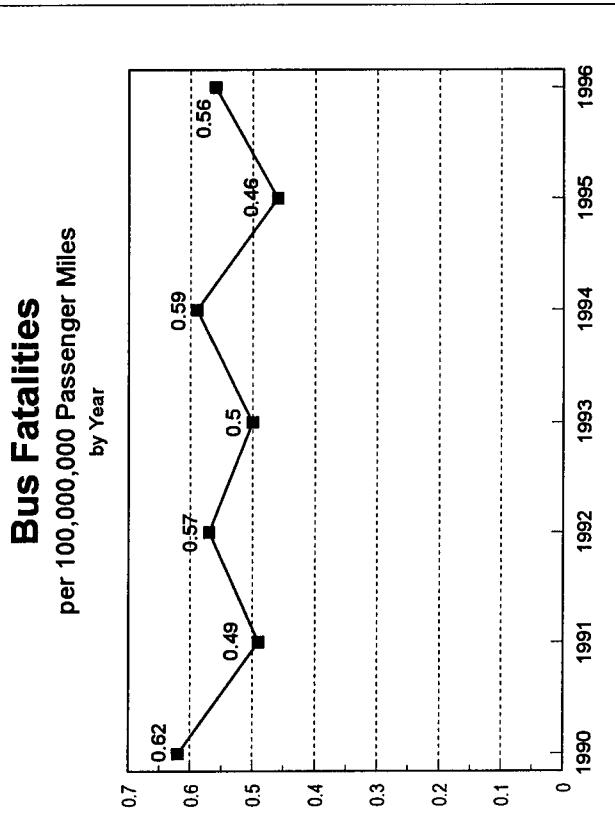

This graph shows the accident rate which is based only on the number of vehicle accidents. These include all bus accidents resulting from **Collisions** [with vehicles, objects, people (not suicides)] and **Derailments** (bus left roadway). The vehicle mile figure includes both revenue and non-revenue miles since there are risks present during both types of operation. The three rail modes (Commuter Rail, Heavy Rail, and Light Rail) report car rather than train miles for vehicle miles.

Bus Accidents

per 100,000,000 Passenger Miles
by Year

This graph shows the trend for bus accident (or incident) rates, which result from **Collisions** [with vehicles, objects, and people (not suicides)], **Derailments** (bus left roadway), and **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle). When analyzing the results on this page, consider that the number of vehicle accidents, the number of passengers, and the average trip length all affect the accident rate. This graph differs from the previous graph in that it includes **Personal Casualties** (on right of way, inside the vehicle and entering/exiting the vehicle), and is indexed in Passenger Miles.

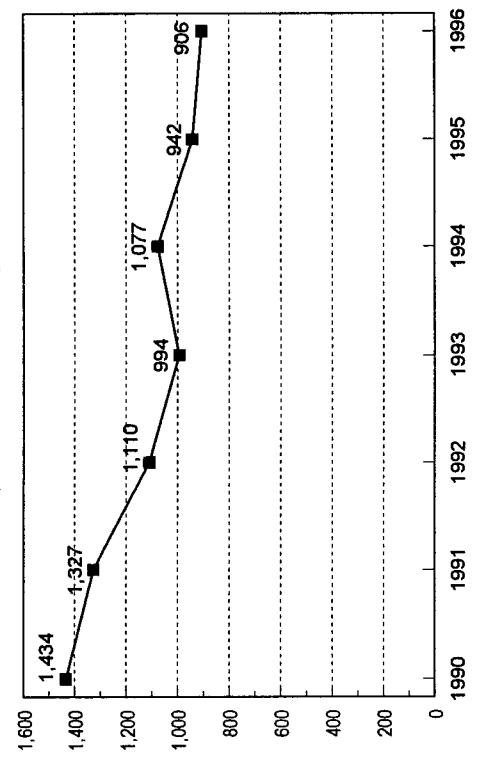

These statistics represent *fatalities* resulting from Collisions [with vehicles, objects, people (not suicides)], Derailments (bus left roadway), and Personal Casualties (on right of way, inside the vehicle and entering/exiting the vehicle).

These statistics represent *injuries* resulting from Collisions [with vehicles, objects, people (not suicides)], Derailments (bus left roadway), and Personal Casualties (on right of way, inside the vehicle and entering/exiting the vehicle).

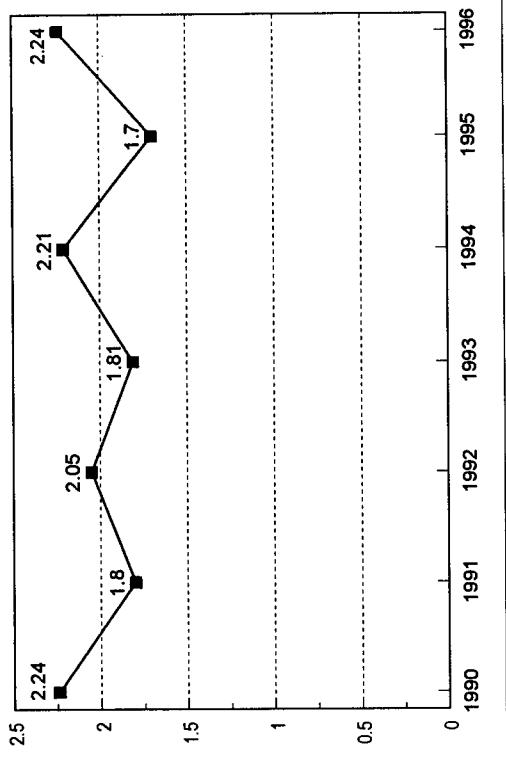

Bus Incidents

of all types
per 100,000,000 Passengers

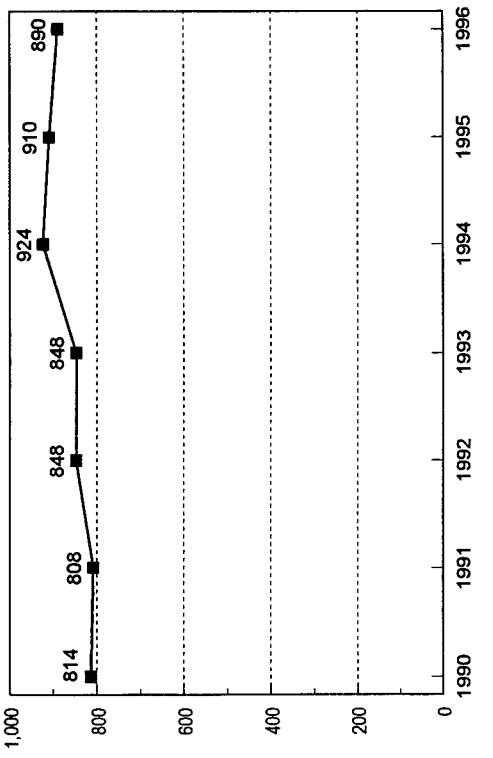

Bus Fatalities

from all causes
per 100,000 Passengers

Bus Injuries

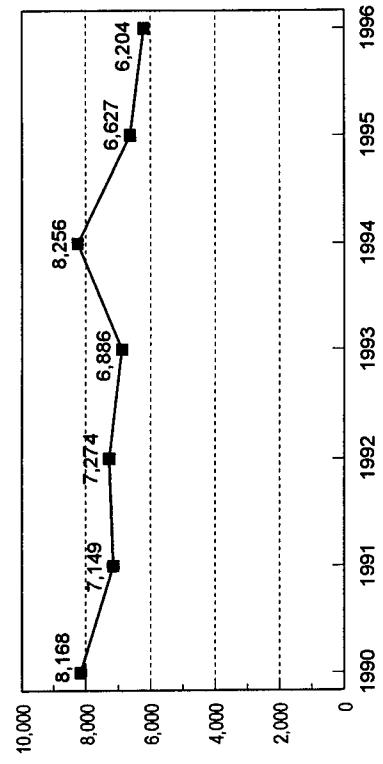

from all causes
per 100,000 Passengers

These graphs depict bus trends for *incident, fatality* and *injury* rates, from all causes (except suicides) listed in the Transit Safety Form (405), i.e., **Collisions, Derailments (bus left roadway), Personal Casualties, and Fires.**

Entering/Exiting the Bus*

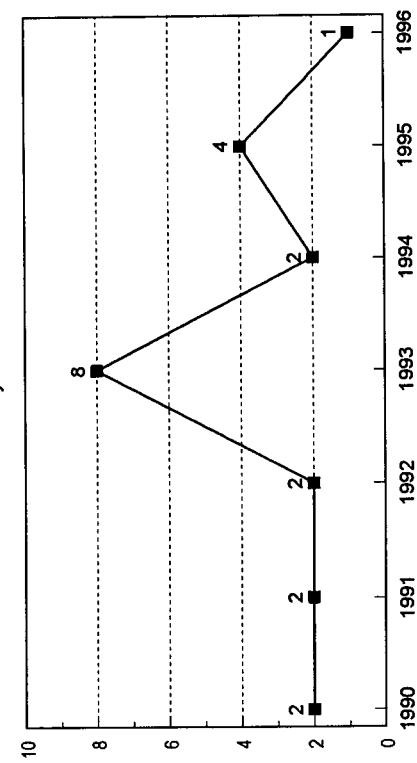

Injuries
by Year

* This is a sub-category of Personal Casualties.
It includes figures associated with Lifts.

Escalator Injuries

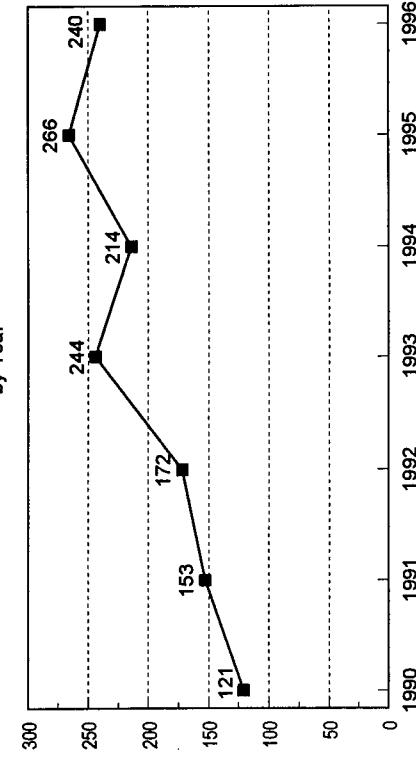

In Bus Stops*
by Year

* This is a sub-category of Personal Casualties.

Lift Injuries

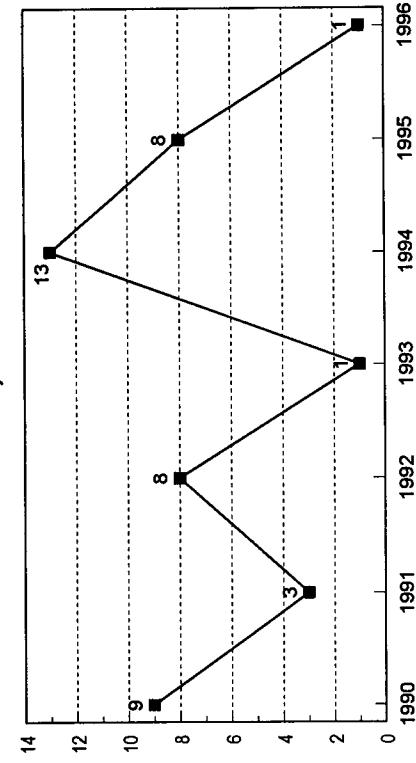

While Entering/Exiting the Bus*
by Year

* This is a sub-category of Personal Casualties.

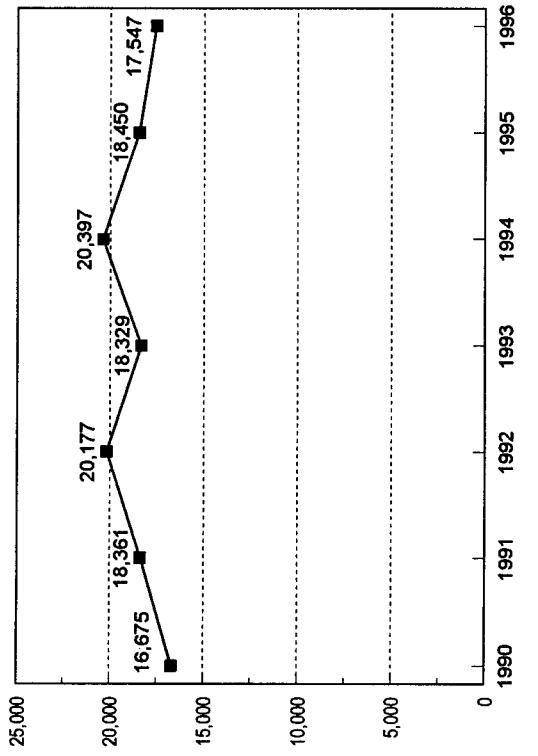

Suicides*

by means of Buses
by Year

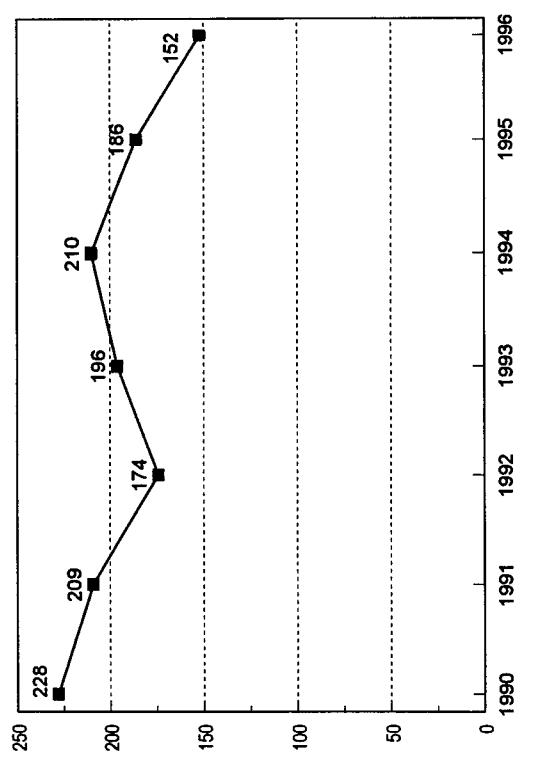

* Incidents of attempted suicides. They include fatalities, injuries, and unharmed. This is a sub-category of Collisions (with people).

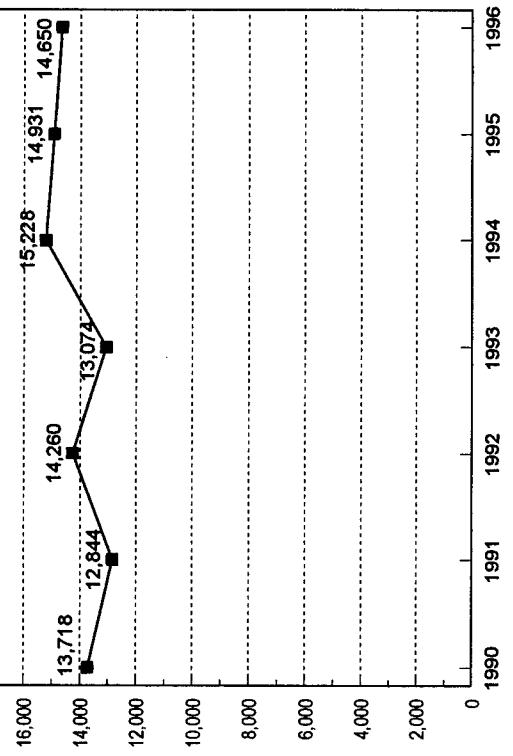

Rail Incidents by Year

Rail Fatalities by Year

Rail Injuries by Year

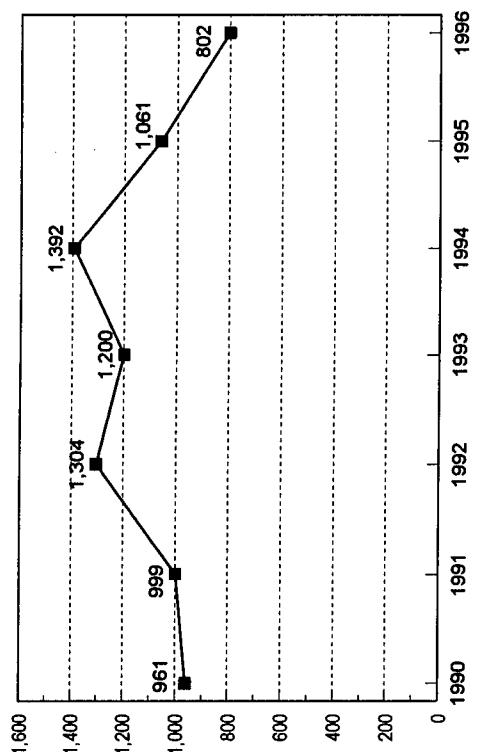

These graphs depict trends for rail vehicles.
They show the total number of incidents,
fatalities, and injuries from all causes, i.e.,
**Collisions, Derailments, Personal
Casualties, and Fires.**

VP	16	13	18	18	18	16	17

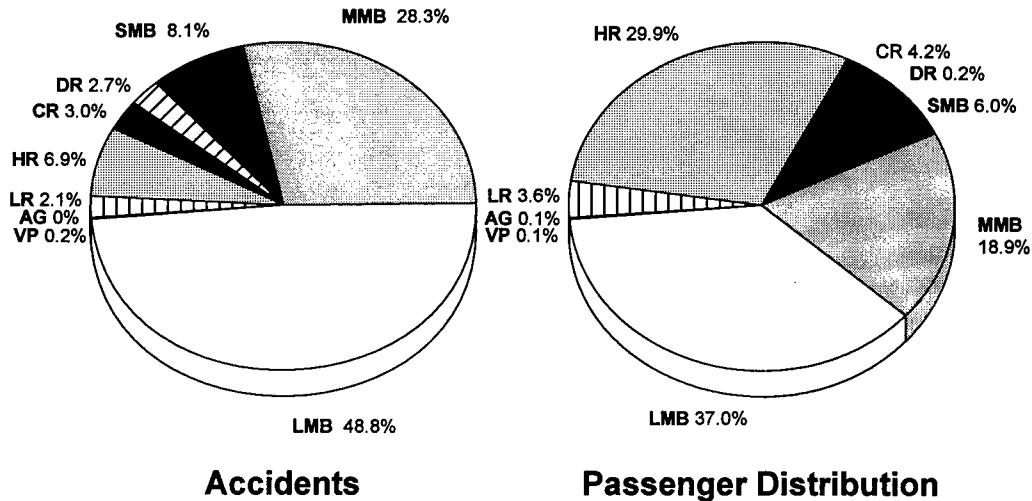

* The way to interpret the data in the table is as follows: In 1995 there were 7 agencies which operated/reported Commuter Rail (CR), 14 agencies which operated/reported Heavy Rail (HR), 19 which operated Light Rail (LR), etc.

The 1996 SAMIS safety data presented as

GRAPHS

Accidents and Passenger Distribution

by Transit Mode

AG - Automated Guideway LMB - Large Motor Bus HR - Heavy Rail
CR - Commuter Rail MMB - Medium Motor Bus LR - Light Rail
DR - Demand Response SMB - Small Motor Bus VP - Vanpool

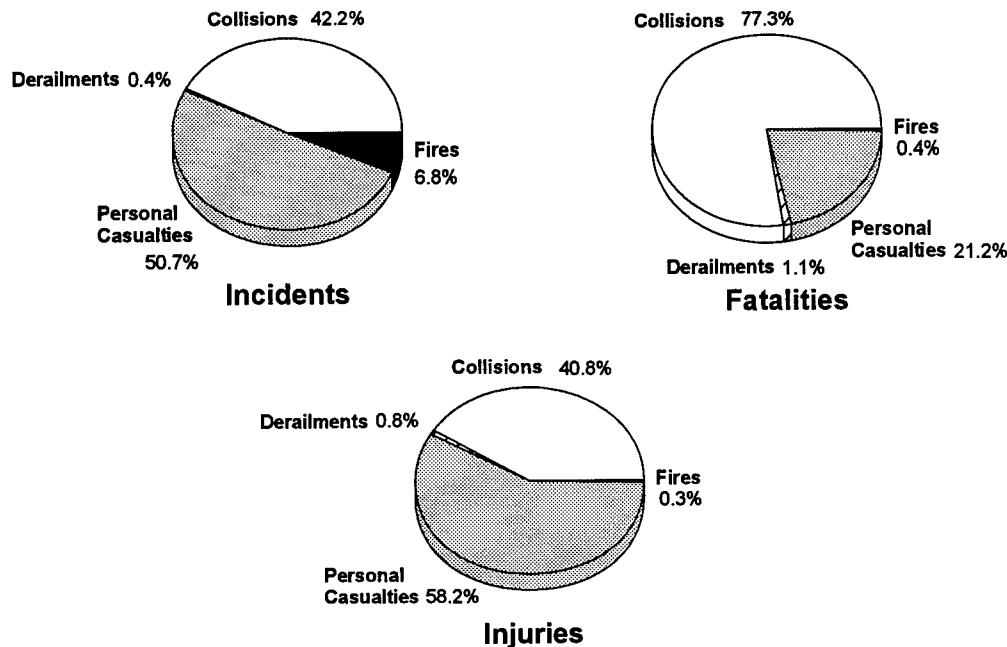

The pie chart on the left shows the percentage of accidents (or incidents) reported for each mode. The Accidents include **Collisions** (not suicides), **Derailments**, and **Personal Casualties** (inside the vehicle, on right of way, and entering/exiting the vehicle) categories.

The pie chart on the right gives the percent of total transit ridership share held by each transit mode.

When compared, these pie charts provide another view of accident rates, e.g., with approximately 30% of transit passengers Heavy Rail has only 7% of the total accidents. If all transit modes were equally safe, the pie charts would be identical.

Incidents, Fatalities, Injuries

by Cause

The pie chart on the left shows the percentage of *incidents* from each cause (**Collisions, Derailments, Personal Casualties, and Fires**) to the total incidents from all causes.

The pie chart on the right shows the percentage of the *fatalities* and the pie chart in the middle shows the percentage of *injuries* from each cause (**Collisions, Derailments, Personal Casualties, and Fires**) to the total.

The *fatalities* chart shows that Collisions are the single most contributing cause of fatalities.

Collisions

Incidents, Fatalities, Injuries
by Type

With Other Vehicles

85.0%

Suicides 0.3%
With People 4.6%
With Objects 10.0%

Incidents

With Objects 2.5%

With People 44.6%

With Other Vehicles 26.0%

Suicides 27.0%

Fatalities

With Other Vehicles

90.1%

Suicides 0.1%
With People 5.0%
With Objects 4.7%

Injuries

The pie chart on the left shows the percentage of each type of *incident* resulting from **Collisions** (i.e., with other vehicles, objects, and people) to the total Collision *incidents*.

The pie chart on the right shows the percentage of *fatalities*, and the pie chart in the middle shows the percentage of *injuries* from each type of **Collision** (i.e., with other vehicles, objects, and people) to the total.

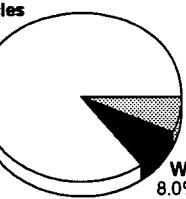

Comparing the three charts provides more insight into the causes of incidents, injuries, and deaths from Collisions.

Collisions at Grade Crossings

Incidents, Fatalities, Injuries
by Type

With Other Vehicles
85.2%

With People
6.8%
With Objects
8.0%

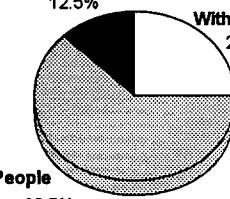

Incidents

With Objects
12.5%

With Other Vehicles
25.0%

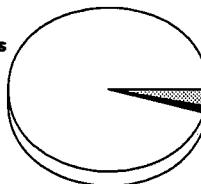

With People
62.5%

Fatalities

With Other Vehicles
95.4%

With People 3.3%
With Objects 1.3%

Injuries

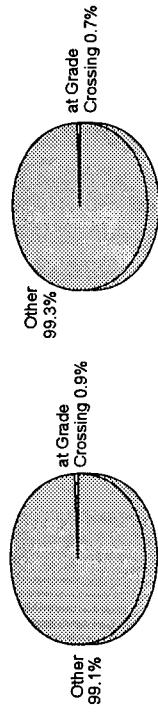

The pie chart on the left shows the percentage of each type of grade crossing *incident* (i.e., Collisions with other vehicles, objects, and people) to the total **Collisions at grade crossings**.

The pie chart on the right shows the percentage of *fatalities*, and the pie chart in the middle shows the percentage of *injuries* from each type of **Collisions at grade crossings** (i.e., with other vehicles, objects, and people) to the total.

Comparing the three charts provides more insight into the causes of incidents, injuries, and deaths from Collisions at grade crossings; e.g., most of the fatalities result from Collisions with people.

Collision Incidents

by Location

With Other Vehicles

With Objects

With People

Collision Fatalities

by Location

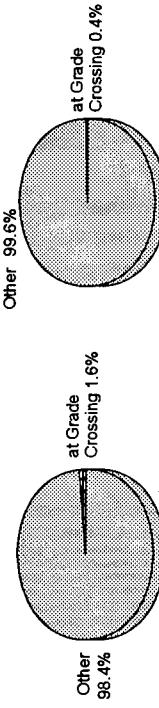

With Other Vehicles

With Objects

With People

Collision Injuries

by Location

With Other Vehicles

With Objects

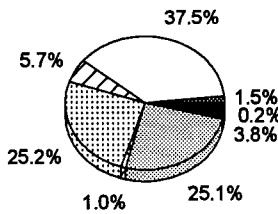

With People

In each of the charts the pie on the left shows the percentage of Collisions with other vehicles at grade crossings to the total Collisions with vehicles. The pie on the right is the percentage of Collisions with objects at grade crossings to the total Collisions with objects. And the pie chart in the middle shows the percentage of Collisions with people at grade crossings to the total Collisions with people.

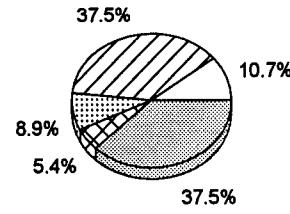

Each set of three charts show a relatively low percentage of incidents, fatalities, and injuries at grade crossings.

Personal Casualties

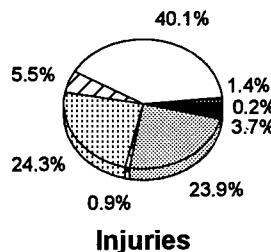

Incidents, Fatalities, Injuries
by Location

Incidents

Fatalities

Injuries

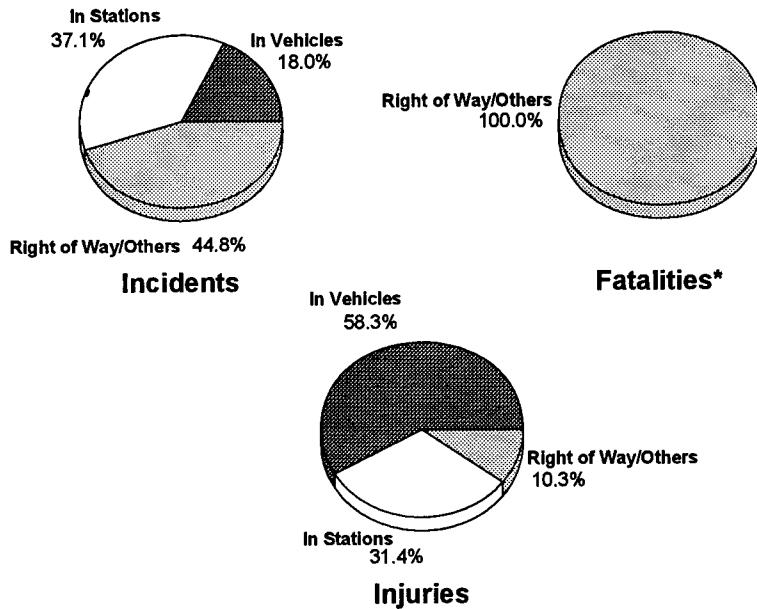

- | | | | |
|--|--|---|--|
| <input checked="" type="checkbox"/> Parking Facility | <input type="checkbox"/> Inside Vehicle | <input checked="" type="checkbox"/> On R-O-W | <input checked="" type="checkbox"/> Entering/Exiting Veh |
| <input checked="" type="checkbox"/> On Lifts | <input checked="" type="checkbox"/> In Station/Bus Stops | <input checked="" type="checkbox"/> On Escalators | <input checked="" type="checkbox"/> On Elevators |

The pie chart on the left shows the percentage of each type of *incident* in the **Personal Casualties** category [in parking facilities, inside vehicles, on right of ways, entering/exiting vehicles (associated with lifts), in stations/bus stops (associated with escalators, and associated with elevators)] to the total incidents of Personal Casualties.

The pie chart on the right shows the percentage of *fatalities*, and the pie chart in the middle shows the percentage of *injuries* from each of these incidents.

Fires

Incidents, Fatalities, Injuries by Location

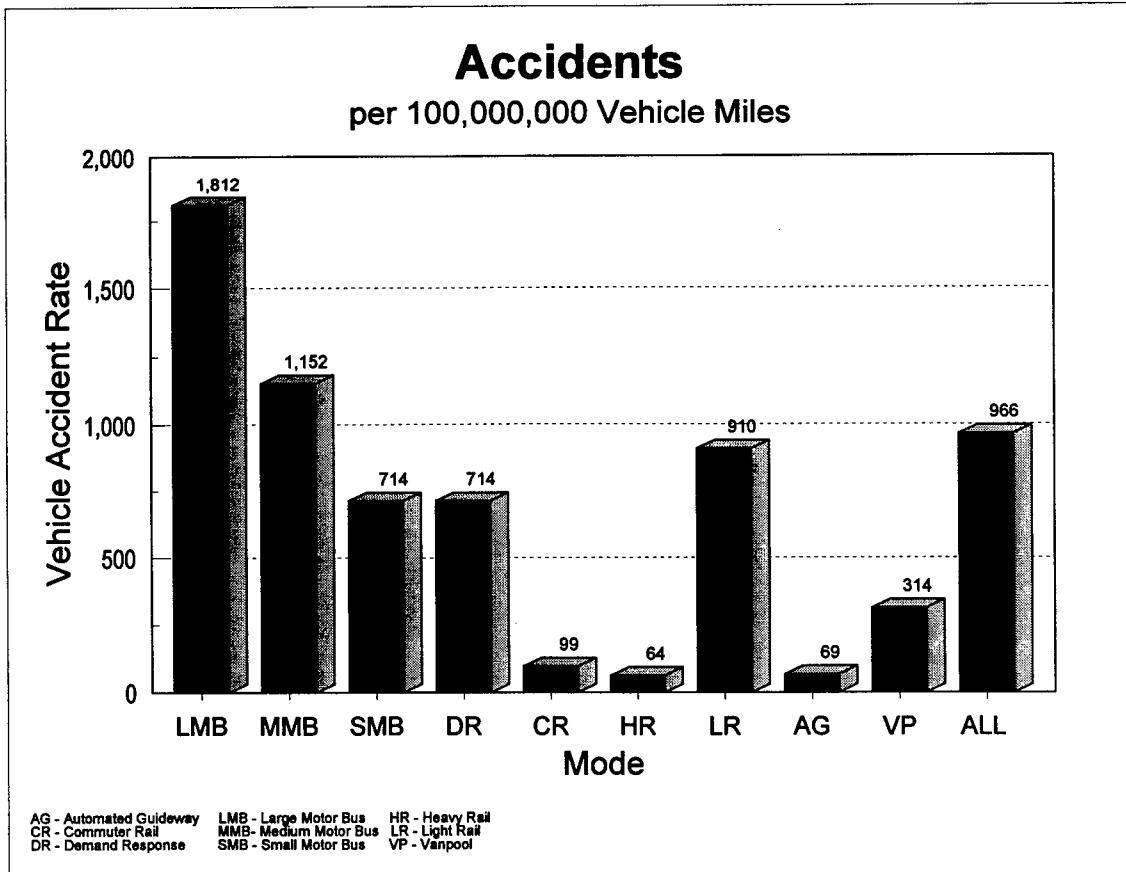

* There was one fatality from Fires.

The pie chart on the left shows the percentage of each type of **Fire incident** (in vehicles, in stations, and on right of way and others) to the total incidents of Fires.

The pie chart on the right shows the percentage of **fatalities**, and the middle one shows the percentage of **injuries** from each type of Fire incident to the total.

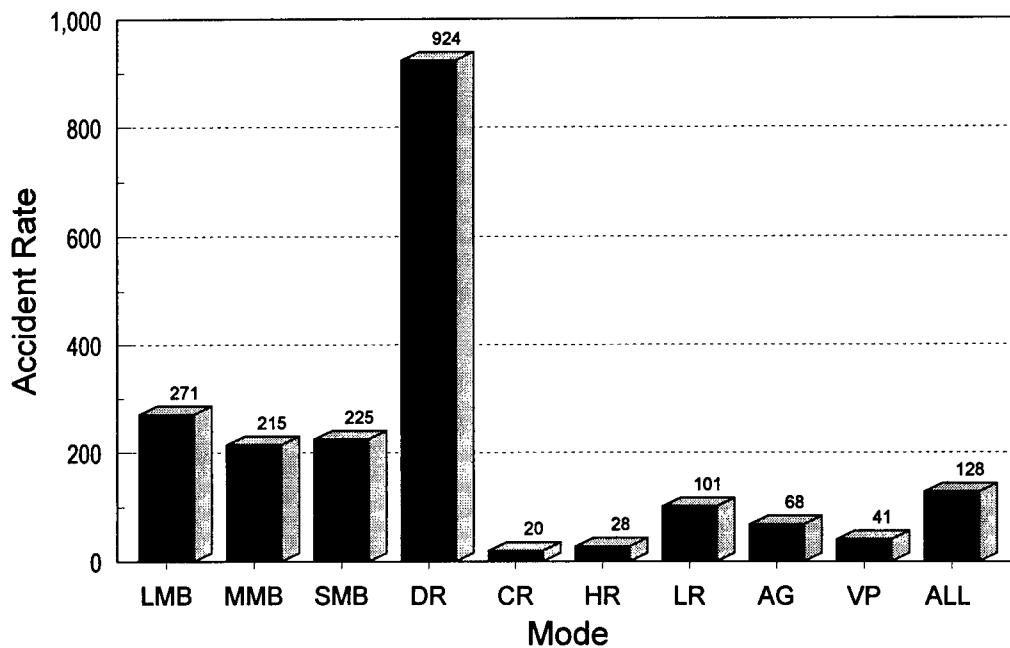

Comparing the three charts provides more insight into the types of Fires and the causes of injuries and fatalities from them, e.g., a fire inside the vehicle (the smallest percentage of the fire incidents) resulted in more injuries (and one fatality) than a fire on the road or in a station/bus stop.

This graph shows the accident rate which is based on the number of vehicle accidents only. These include all vehicle accidents resulting from **Collisions** [with vehicles, objects, people (not suicides)] and **Derailments** (vehicle derailed/left roadway). The vehicle mile figure used, includes both revenue and non-revenue miles since there are risks present during both types of operation. The three rail modes (Commuter Rail, Heavy Rail, and Light Rail) report car rather than train miles for vehicle miles.

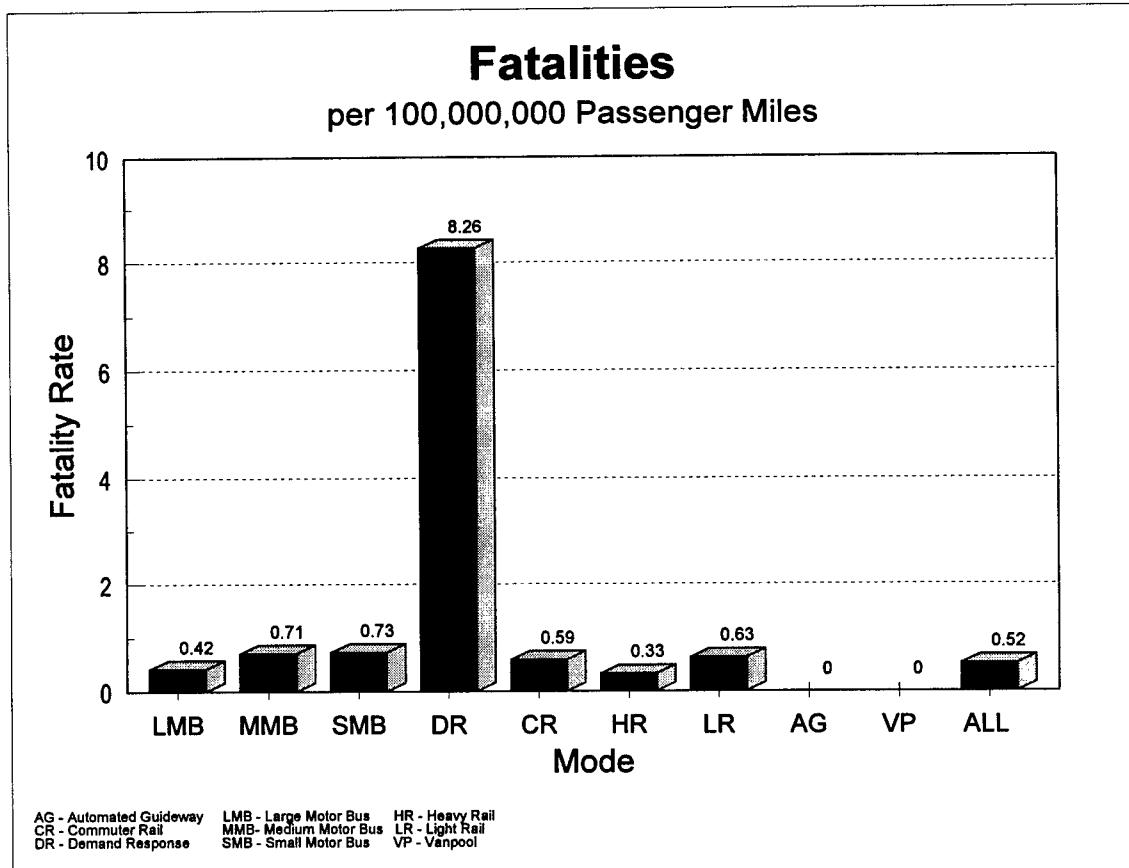

Accidents

per 100,000,000 Passenger Miles

AG - Automated Guideway LMB - Large Motor Bus HR - Heavy Rail
CR - Commuter Rail MMB - Medium Motor Bus LR - Light Rail
DR - Demand Response SMB - Small Motor Bus VP - Vanpool

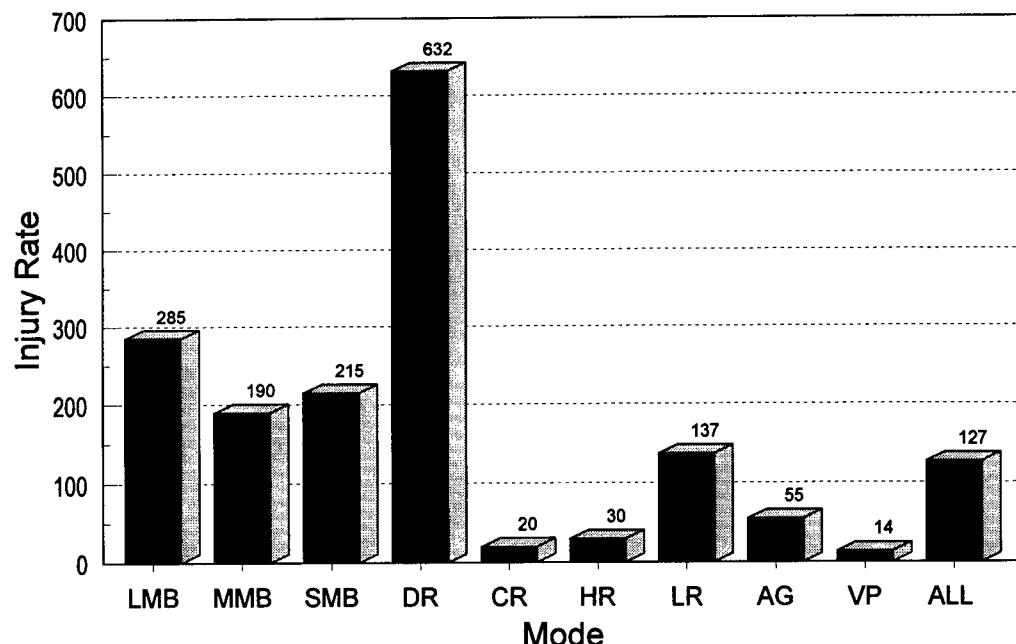

This graph shows the accident (or incident) rates which result from **Collisions** [with vehicles, objects, and people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle). When analyzing the results on this page, consider that the number of vehicle accidents, the number of passengers, and the average trip length all affect the accident rate. This graph differs from the previous page in that it also includes **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle), and is indexed in Passenger Miles.

These statistics represent *fatalities* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle).

Injuries

per 100,000,000 Passenger Miles

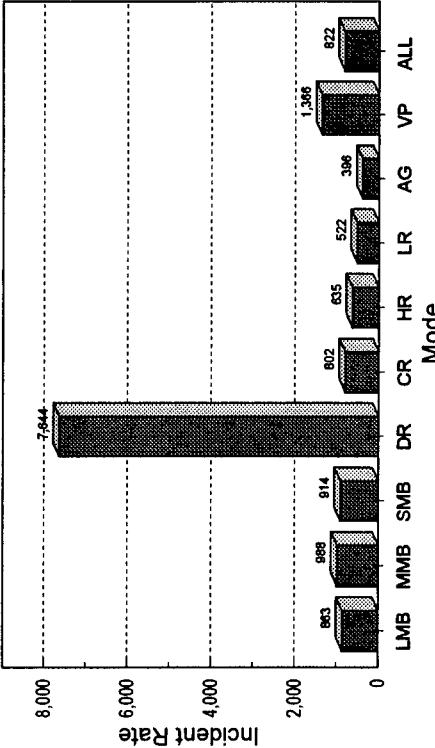

AG - Automated Guideway LMB - Large Motor Bus HR - Heavy Rail
CR - Commuter Rail MMB - Medium Motor Bus LR - Light Rail
DR - Demand Response SMB - Small Motor Bus VP - Vanpool

These statistics represent *injuries* resulting from **Collisions** [with vehicles, objects, people (not suicides)], **Derailments** (vehicle derailed/left roadway), and **Personal Casualties** (on right of way, inside the vehicle, and entering/exiting the vehicle).

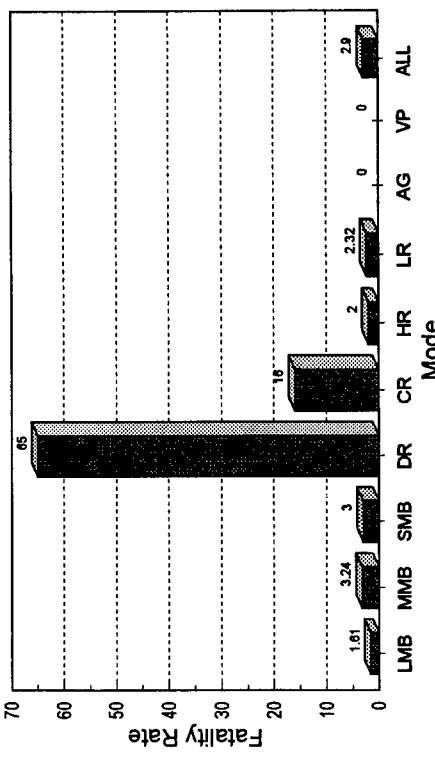

Incidents

of all types
per 100,000,000 Passengers

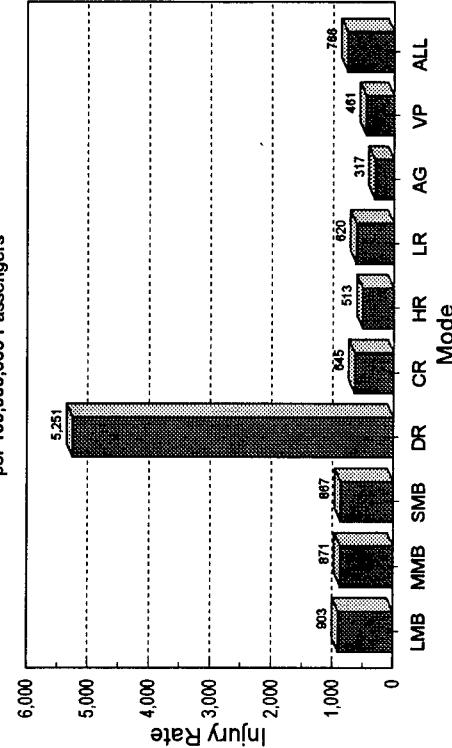

Fatalities

from all causes
per 100,000,000 Passengers

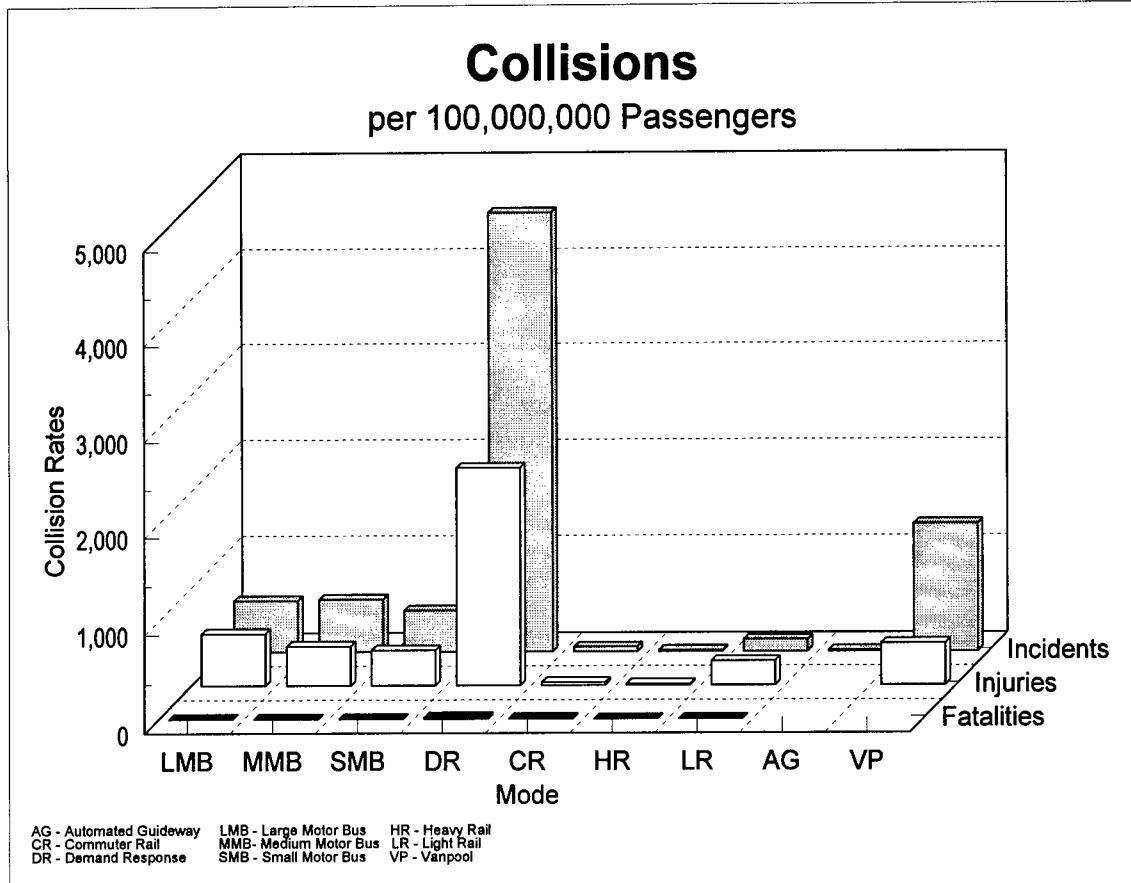

Injuries

from all causes
per 100,000,000 Passengers

These graphs depict the *incident*, *fatality*, and *injury* rates, from all causes (except suicides), listed in the Transit Safety Form (405), i.e., **Collisions, Derailments, Personal Casualties, and Fires.**

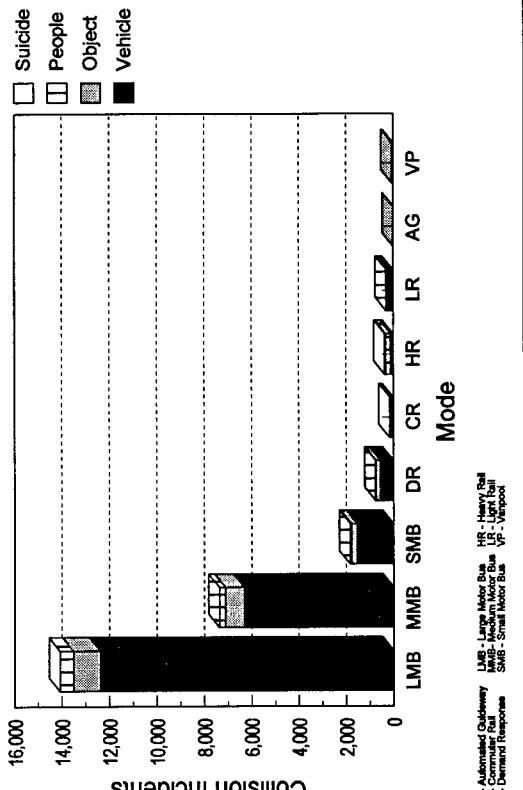

Also note that they are indexed in number of Passengers.

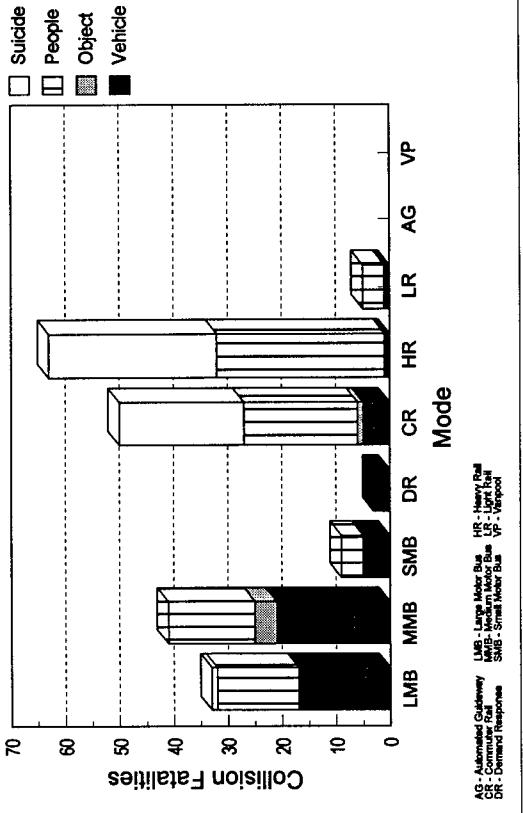

This graph shows the rates of *incidents*, *injuries*, and *fatalities* (except attempted/successful suicides) for the **Collisions** category of Form 405.

The rates show how often incidents, fatalities, and injuries occur as a result of Collisions with respect to the number of passengers carried. These rates should be considered when looking at the Collision figures (stacked bar charts on next page) which provide only raw numbers. The raw numbers alone do not provide a full picture of relative safety without data on exposure which is provided here.

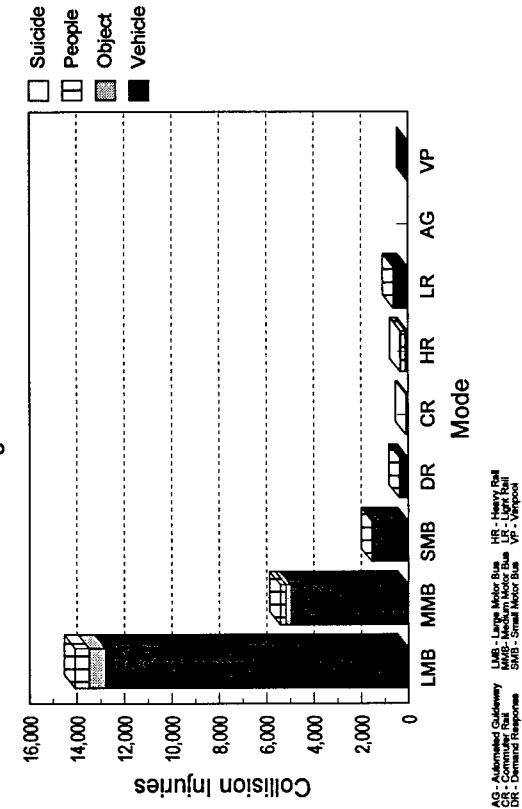

Incidents of Collision

Fatalities Resulting from Collisions

Injuries Resulting from Collisions

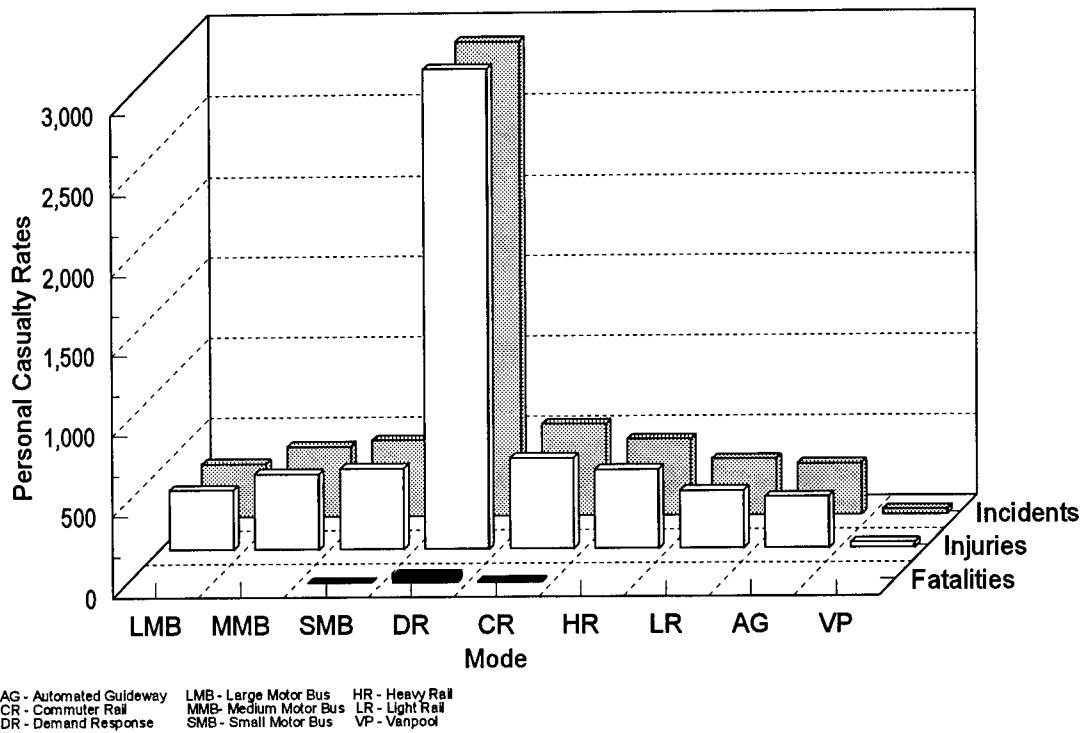

These graphs break down by type *incidents*, *injuries*, and *fatalities* resulting from **Collisions** (with vehicles, objects, and people).

Not surprisingly, most of the fatalities are the result of collisions with people.

Personal Casualties

per 100,000,000 Passengers

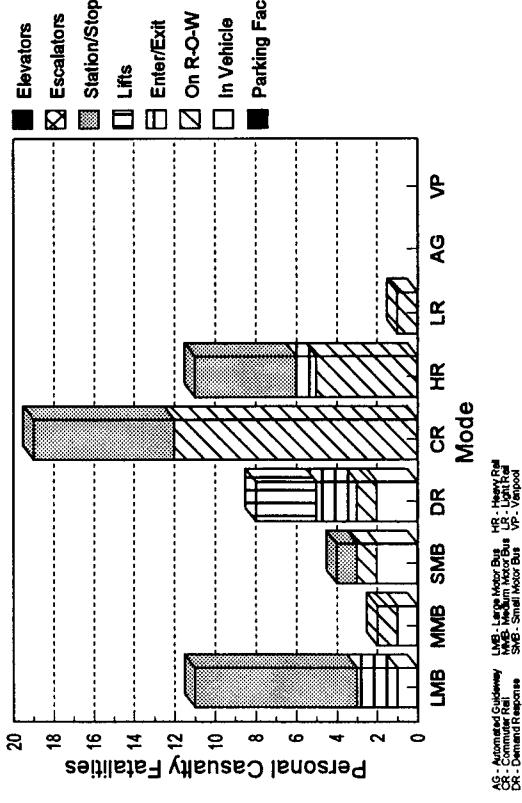

This graph provides the rates by transit mode for *incidents*, *fatalities*, and *injuries* classified under the **Personal Casualties** category of Form 405.

Keep in mind that **Personal Casualties** is a transit mishap category where people are hurt but not as a result of Collisions, Derailments, or Fires. The rates show how frequently incidents, deaths, and injuries occur, based on passenger exposure to risk. These rates should be kept in mind when looking at the Personal Casualties figures (stacked bar charts on next page) which provide only raw numbers. The raw numbers alone do not provide a complete picture of relative safety without data on exposure (provided here).

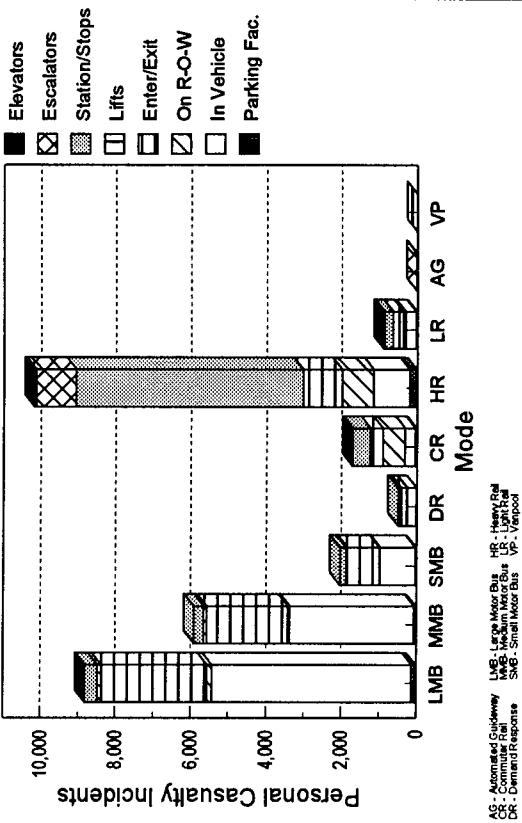

Fatalities

Resulting from Personal Casualty

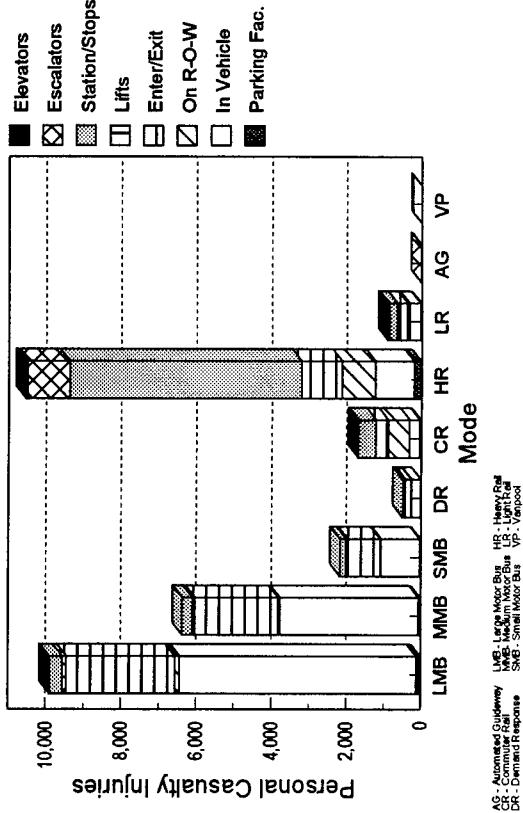

Incidents

of Personal Casualty

Injuries

Resulting from Personal Casualty

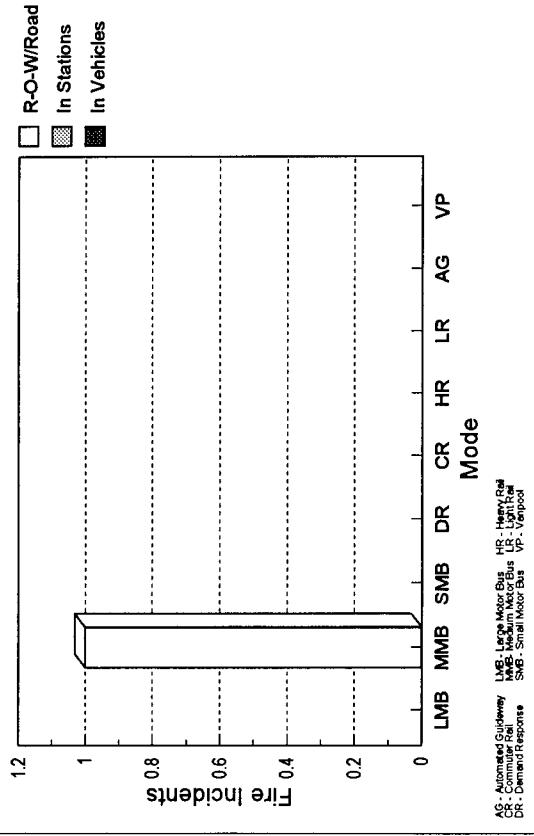

These graphs break down by type *incidents*, *injuries*, and *fatalities* that are classified under the **Personal Casualties** category of Form 405 [in parking facilities, inside vehicle, on right of way, entering/exiting the vehicle (associated with lifts), in station/bus stops (associated with escalators, and associated with elevators)].

Keep in mind that **Personal Casualties** is a transit mishap category (in Form 405) where people are hurt but not as a result of Collisions, Derailments, or Fires.

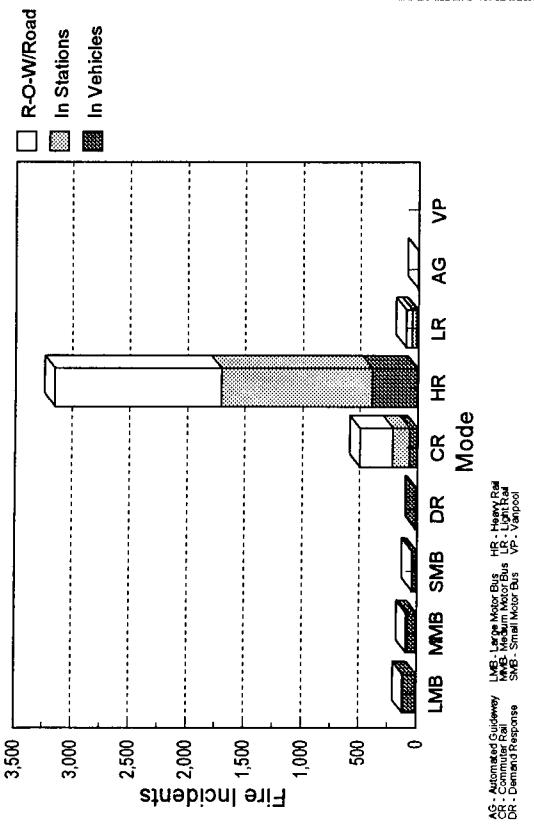

Fatalities

Resulting from Fires

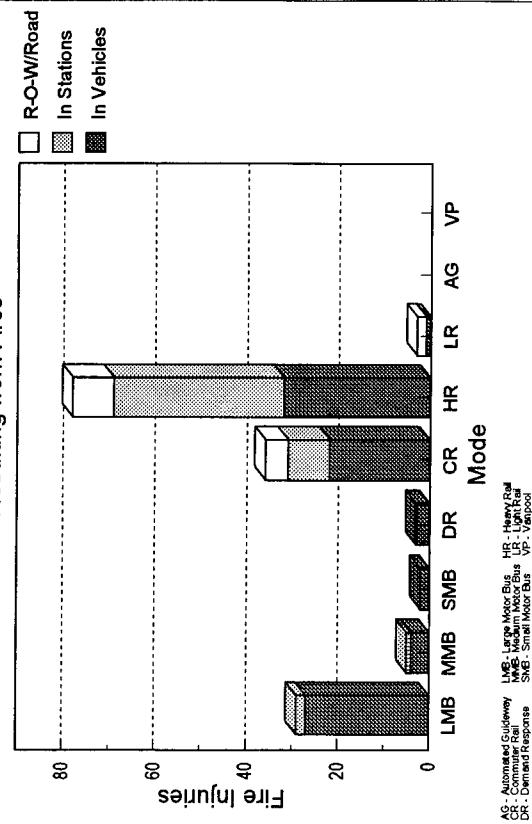

Incidents

of Fire

Injuries

Resulting from Fires

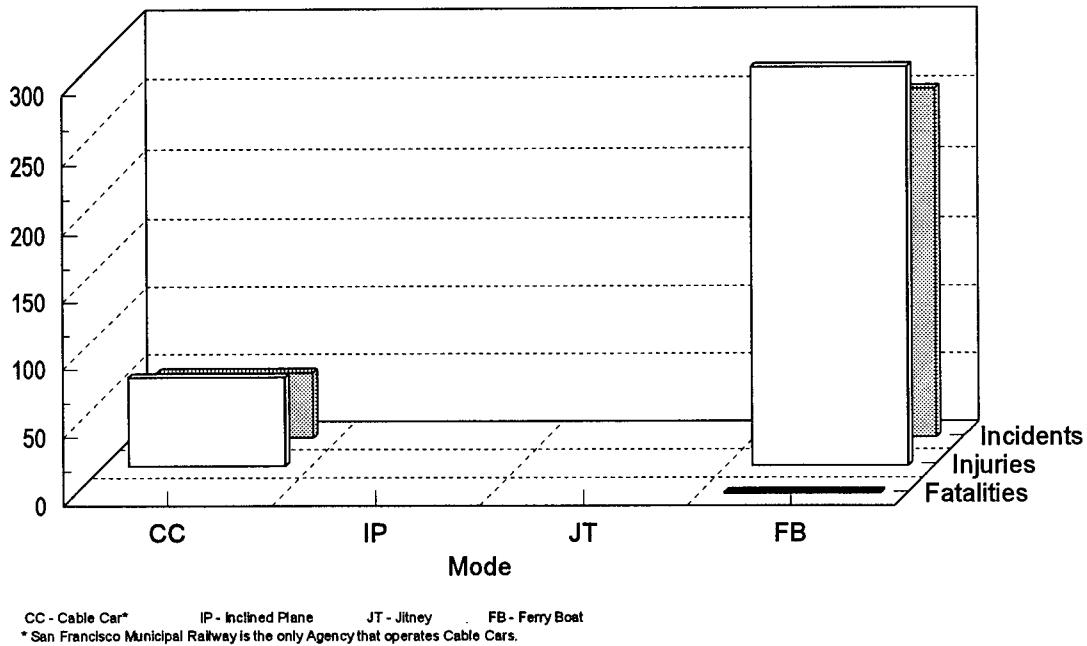

These graphs break down by type the *incidents*, and the resulting *fatalities and injuries*, from Fires (in vehicles, in stations, and on right of way/road and others).

While there were relatively few incidents of Fires, the graph clearly shows that the vast majority of such incidents occurred in heavy rail stations and rights of way.

Other Transit Modes

Incidents, Fatalities, Injuries

from all causes
