#### **TOLL FACILITIES**

#### IN THE UNITED STATES

**Bridges - Roads - Tunnels - Ferries** 

**July 2011** 

**Publication No: FHWA-PL-11-032** 

Internet: http://www.fhwa.dot.gov/ohim/tollpage.htm

#### **Data Explanation**

This report contains selected information on toll facilities in the United States that has been provided to FHWA by the States and/or various toll authorities. The information is based on a survey of facilities in operation, financed, or under construction as of January 1, 2011. Differences and inconsistencies from previous editions may be due to corrections of known errors or the introduction of new ones, or a combination of both. Known reported ambiguities of rural/urban and functional system designations are assumed as urban in this report.

Tables T-1 and T-2 include, where known:

- -- The direction of toll collection.
- -- The type of electronic toll collection system, if available.
- -- Whether the facility is part of the National Highway System (NHS).
- -- Various financial and fee information.

Table T-1 contains information such as the name, financing or operating authority, location and termini, feature crossed, length, and road system for toll roads, bridges, tunnels, and ferries that connect highways.

- -- Parts 1 and 3 include the Interstate System route numbers for toll facilities located on the Dwight D. Eisenhower National System of Interstate and Defense Highways.
- -- Parts 2 and 4 include a functional system identification code for non-Interstate System toll bridges, roads, and tunnels.
- -- Part 5 includes vehicular toll ferries.

Table T-2 contains a list of those projects under serious consideration as toll facilities, awaiting completion of financing arrangements, or proposed as new toll facilities that are being studied for financial and operational feasibility.

Also included are links to tables containing data on receipts and disbursements of toll facilities. These tables are published in the annual *Highway Statistics*:

- -- Table SF-3B, Receipts of State-Administered Toll Road and Crossing Facilities
- -- Table SF-4B, Disbursements of State-Administered Toll Road and Crossing Facilities
- -- Tables LGF-3B, Receipts of Local Toll Facilities
- -- Tables LGF-4B. Disbursement of Local Toll Facilities

A section containing available names, addresses, and phone numbers of toll authorities is also provided; please note that not all toll authorities are included.

This report is not intended to be a complete reference on toll facilities nor is it intended to duplicate data published by other organizations. Nearly all of the publicly owned toll authorities publish reports that contain information such as width and clearance on bridges, type of structure, road

limits, year built or put in service, traffic volumes, cost, toll rates, etc.

Information on ferries such as seasonal or hourly operating schedules has been included when available. Complete information on schedules and on the number and capacity of boats in operation may be obtained directly from the operating authority.

<sup>1/</sup> The length of structures includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll bridges includes approach sections which may be used toll free by local residents. The length of such sections is identified as "nontoll" in the remarks column.

<sup>2/</sup> Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment).3/ The FHWA Office of Program Administration has no record of the Section 129 Toll Agreement.

1/ The length of structures includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll bridges includes approach sections which may be used toll free by local residents. The length of such sections is identified in the "nontoll" column. 2/ Functional Class Codes: 1 - Interstate, 2 - Other Freeways & Expressways, 3 - Principal Arterial, 4 - Minor Arterial, 5 - Major Collector, 6 - Minor Collector, 7 - Local;

3/ Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment). 4/ The FHWA Office of Program Administration has no record of the Section 129 Toll Agreement. Rural/Urban

The length of roads includes approaches and connecting links which were financed as an integral part of the toll project. The length of toll roads includes sections which may be used toll free by local residents.
 The length of such sections is identified in the "non-toll" column.

 Excludes toll transactions that require stopping (i.e., cash, ticket, or token payment).

<sup>3/</sup> Rural/urban split estimated by FHWA.4/ Facilities added by the FHWA Office of Operations; not submitted/updated by the States.

Automatic Vehicle ID (AVI) - E-ZPass	The minimum passenger vehicle toll is based on exiting the facility prior to the main line plaza. The minimum truck toll fee is based on a three-axle vehicle while the maximum is based on a six-axle vehicle.
Automatic Vehicle ID (AVI) - E-ZPass	The maximum truck toll is based on a five-axle vehicle; a four-axle vehicle would be \$ .90 and a three-axle vehicle would be \$ .80.
Automatic Vehicle ID (AVI) - E-ZPass	The maximum truck toll is based on a five-axle vehicle; a four-axle vehicle would be \$ .90 and a three-axle vehicle would be \$ .80.
Automatic Vehicle ID (AVI) - E-ZPass	The minimum passenger vehicle toll is based on exiting the facility prior to the main line plaza. The minimum truck toll fee is based on a three-axle vehicle on the main line; each additional axle is \$0.25 up to \$2.25.
	0.69 Non-toll Section
Automatic Vehicle ID (AVI) - E-ZPass	The toll is less at certain exits for those with E-ZPass. The toll is more during rush hour (congestion management toll). Maximum passenger toll based on last exit on this section during rush hour without E-ZPass; minimum based on first exit during non-rush hour with E-ZPass. Maximum truck toll based on a six-axle vehicle at last exit during rush hour without E-ZPass; the minimum truck toll based on a three-axle vehicle at the first exit during non-rush hour with E-ZPass.
Automatic Vehicle ID (AVI) - E-ZPass	The toll is less at certain exits for those with E-ZPass. The toll is more during rush hour (congestion management toll). Maximum passenger toll based on last exit on this section during rush hour without E-ZPass; minimum based on first exit during non-rush hour with E-ZPass. Maximum truck toll based on a six-axle vehicle at last exit during rush hour without E-ZPass; the minimum truck toll based on a three-axle vehicle at the first exit during non-rush hour with E-ZPass.

Automatic Vehicle ID (AVI) - E-ZPass	The maximum passenger toll is based on weekends during peak season (Memorial Day-Labor Day); minimum is based on off-peak. The maximum truck toll is based on weekends during peak season regadless of axles; minimum is based on off-peak. There is a discount for locals (\$2.00 off the peak rate and \$0.75 off the non-peak rate).
Automatic Vehicle ID (AVI) - E-ZPass	The maximum passenger toll ais based on rush hour on the main line while the minimum passenger toll is based on non-rush hour on the main-line. Early exits are \$1.25. The maximum truck toll fee is \$3.00 + \$1.00/axle over two axles regardless of time of day; the rate indicated is based on a six-axle vehicle; the minimum is based on 3 axles.

NEPA estimate	X	X
	X	
	1 1	L

			1
Cost for entire project including: Extending the southbound high occupancy toll (HOT) lane from its existing end point at 37th Street NW to Third Avenue SW. The project will include a new merge lane on southbound SR 167 near Third Avenue SW to the Eighth St E interchange. Ramp meters at the southbound on-ramps at 15th Street Ellingson Road and Eighth Street E, Bridge work at SR 18, Intersection improvements at the southbound off-ramps at Ellingson Road and Eighth St. E.	Х	S	
SR 520 Bridge replacement costs and currently include: Constructing a new, safer floating bridge and landings, Building a new pontoon construction facility in Grays Harbor, Building pontoons at that facility, Beginning construction on the Eastside Transit and HOV Project, Continuing to design the west side of the corridor, from I-5 to the floating bridge. \$4.65 bill is the program limit	х		Х
No more than \$400 million in tolls contributing to construction funding (To fund construction of the tunnel, the State of Washington would need to borrow against future toll revenues in order to bring funding into the construction period. This would be done by issuing bonds for which net toll revenues would be pledged toward the repayment of principal and interest.)	×	X (varies by time of day)	
undecided	Х		Х
Cost for tolling system only, (does not include gantries, lane striping, etc., done under different contract)	Х		X
Cost for implementing tolling	Χ		X
The Columbia River Crossing (CRC) project includes constructing a replacement I-5 bridge with light rail, widening the pedestrian and bicycle path and improving closely-spaced interchanges in the five-mile corridor. This includes the savings resulting from several design refinements. Estimates are based on year of expenditure dollars, or the projected year the money would be spent. The cost range does not include operating and maintenance costs.	Х		
Study of how variable tolling may reduce the demand, and consequently the number of new lanes needed within the corridor. Estimate of additional revenues needed to implement the project.	X		Х
Conceptual planning study currently underway to convert existing HOV lanes from Tacoma to Everett to HOT or Express Toll Lane use, including some dual-lane segments and active traffic management. Costs are still being developed.	Х		Х
