Introduction

The purpose of this document is to provide a description of Oklahoma traffic crash, injury, and fatality data. This document is a resource for local transportation, law enforcement, health, and other agencies charged with the responsibility of coping with the increasing number and cost of traffic crashes.

The revision of the *Official Oklahoma Traffic Collision Report* in 2007 includes additional or modified data fields which collect additional data or improved data collection. The most noticeable changes include vehicles that roll, work zone collisions large truck crashes and driver contributing factors.

Reporting Year: 2008 calendar year.

Fatalities: On January 1, 2001, Oklahoma's reporting standards for fatalities were changed to meet national standards. Fatalities that occur within 30 days of a traffic crash are reported as fatalities.

Agency: Reporting agencies include: Oklahoma Highway Patrol, city police, sheriff departments, game or park rangers, campus police, or other agencies.

For the purpose of this document:

OHP = Oklahoma Highway Patrol

Non-OHP = all reporting agencies except OHP

Statewide = all reporting agencies

Alcohol-Related: Beginning with 2007 crash data, additional data relating to alcohol has been added to the crash data. This additional data accounts for improved reporting of alcohol-related fatalities and injuries. The additional information is from Officer's Affidavits and Medical Examiner Reports on fatalities.

Contributing Factor: Previously the "cause of crash" indicated the primary cause of the collision and it was not possible to determine individual driver actions and behaviors. With the 2007 revision of the *Official Oklahoma Traffic Collision Report* form, the cause was replaced with a contributing factor for each driver which allows more in depth analyses.

Crash Data: The Records Management Division of the Oklahoma Department of Public Safety maintains a database of crash records as reported by law enforcement agencies throughout Oklahoma. This database includes crashes resulting in injury, death or over \$500¹ property damage. Crashes occurring on private or public property are not included in this database. Data elements included relate to information on vehicles, roadways, crash circumstances, drivers, passengers, pedestrians, motorcyclists, and bicyclists involved in these crashes.

Exclusions: The Department of Public Safety database is used with one exclusion: non-traffic crashes. Non-traffic crashes are those occurring on private property, deliberate acts, heart attacks, legal interventions, suicides, industrial crashes, drownings, boat crashes, incidents, and others. These crash records are kept in the DPS database but are not used for statistical purposes.

¹ Title 47 § 40-102, 2008 Edition.

Introduction

Intersection	Beginning with 2003, intersection crash data is obtained from the Oklahoma Department of Transportation, Traffic Engineering Division.
KABCO Scale:	This scale is used for classifying injury severity. The letters in this scale indicate the following injury severities: K = Fatal injuries A = Incapacitating injuries B = Non-incapacitating injuries C = Possible injuries O = No injuries Every effort has been made to clearly document which injury severity classifications are included for each report.
Large Truck:	Large trucks include the following vehicle configurations as shown on the <i>Official Oklahoma Traffic Collision Report</i> . Single Unit Truck - 2 Axles, Single Unit Truck - 3 or More Axles, Truck/Trailer, Truck-Tractor/Semi-Trailer, Truck-Tractor/Double Trailers, Truck/Tractor/Triple Trailers and Truck more than 10,000 lbs. - Cannot Classify. This replaces the previous year's sections about commercial vehicles.
Persons:	It also should be noted that all drivers involved in a crash are entered into the DPS database, whether injured or not. However, only injured passengers are entered into the database.
Rollover Crashes:	The revision of the <i>Official Oklahoma Traffic Collision Report</i> in 2007 includes an additional field on the form to indicate which vehicle rolled in a collision. This accounts for the increased reporting of vehicles that rolled in collisions.
Unsafe Speed:	The revision of the <i>Official Oklahoma Traffic Collision Report</i> in 2007 allows reporting of a contributing factor for each vehicle involved in a crash instead of a single cause of the crash. This accounts for the increased reporting of crashes involving unsafe speed.
Work Zone Crashes:	The revision of the <i>Official Oklahoma Traffic Collision Report</i> in 2007 includes several additional fields on the form to collect information about collisions in a Work Zone. This accounts for the increased reporting of Work Zone collisions.
VMT:	Vehicle Miles Traveled.

Fatal Crash History

Sunday, March 9, was the deadliest day on Oklahoma roads in 2008. Eight people were killed in that 24-hour period. Five males and three females died in four crashes. Three were drivers and five were passengers. Alcohol use was not reported in any of the crashes. Failure to stop for a traffic signal was the cause of one crash that killed four people. Two crashes were caused by driving left of center and the cause of the other crash was driver inattention. Seat belts were in use by four of the occupants and one was not wearing a seat belt. Seat belt use for three occupants was unknown.

Friday, May 18, was the deadliest day on Oklahoma roads in 2007. Twelve people were killed in that 24-hour period. Ten males and two females died in five crashes. Four were drivers, seven were passengers and one was a pedestrian. Alcohol use was reported in one crash that killed two people. Driver fatigue was the cause of one crash, one was caused by unsafe speed, one by failure to stop for a stop sign, one by improper overtaking and one by operating an unsafe vehicle. Three vehicle occupants were wearing seat belts and eight were not.

Saturday, August 26, was the deadliest day on Oklahoma roads in 2006. Ten people were killed in that 24-hour period. Seven males and three females died in five crashes. Five were drivers and five were passengers. Alcohol use was reported in two collisions that killed two people. Speeding was the cause of two collisions, one was caused by an unsafe turn, one was caused by driver fatigue and one cause was unknown. Two of the fatality victims were not wearing a seat belt. One motorcyclist was not wearing a safety helmet. Seat belt use for seven victims was unknown.

Thursday, July 14, was one of the deadliest days on Oklahoma roads in 2005. Ten people were killed in that 24-hour period. Seven males and three females died in eight crashes. Four were drivers, five were passengers, and one was a pedestrian. Alcohol use was reported in three collisions that killed three people. Speeding was the cause of one collision, one was caused by failure to stop or yield, one by a pedestrian in the roadway, one by driver inattention, one by improper evasive action by the driver, two were classified under "other" causes, and the cause of one collision was unknown. A fatality count of ten was also recorded for Monday, July 18, 2005.

Sunday, May 9, was one of the deadliest days on Oklahoma roads in 2004. Nine people were killed in that 24-hour period. Seven males and two females died in seven crashes. Four were drivers and five were passengers. Alcohol use was reported in two collisions which killed two people. Speeding was the cause of three collisions, two were caused by failure to stop or yield, one was caused by an unsafe turn and two were classified under "other" causes. In crashes where seat belt use was applicable, six victims were not using seat belts and two victims were. One victim was a motorcyclist who was not wearing a safety helmet. A fatality count of nine was also recorded for Saturday, May 29, 2004.

Sunday, November 23, was the deadliest day on Oklahoma roads in 2003. Nine people were killed in that 24-hour period. Five males and four females died in six crashes. Three were drivers, five were passengers, and one was a pedestrian. Alcohol use was reported in three collisions in which four people died. Driving left of center caused two collisions, one involved an animal in the roadway, and the other three were classified under "other" causes. In crashes where seat belt use was applicable, there were six victims not using seat belts and two victims for whom seat belt use was unknown.

Sunday, October 6, was the deadliest day on Oklahoma roads in 2002. Nine people were killed in that 24-hour period. Four males and five females died in five crashes. Three were drivers, three were passengers, and three were pedestrians. Alcohol use was reported in two collisions that killed four people. Unsafe speed was cited in three collisions, and two collisions were due to failure to stop or yield the right of way. In the collisions in which seat belts were available, two victims were using seat belts, two victims were not using seat belts, and seat belt usage for two other victims was unknown.

Friday, August 3, was the deadliest day on Oklahoma roads in 2001. Nine people were killed in that 24-hour period. Four males and five females died in six crashes.
