## Introduction

The annual revision of the *Waterborne Transportation Lines of the United States (WTLUS)* contains summary information of the vessel companies and their American flag vessels operating or available for operation on 31 December 1996 (with updates through the publication date) in the transportation of freight and passengers. General ferries<sup>1</sup> and floating equipment used in construction work, such as dredges, piledrivers, and flats; fishing vessels; and recreational craft are not included. The **WTLUS** is prepared under authority contained in the Rivers and Harbors Appropriations Act approved 22 September 1922, (42 Stat. 1043), as amended, and codified in 33 U.S.C. 555.

The **Vessel Company Summary, Volume 2**, is one of three publications for the annual revision of the **WTLUS**, which provides a summary of the vessel companies detailed in the **WTLUS, Vessel Characteristics, Volume 3**. The names of the vessel companies are listed alphabetically with their business address and telephone number, the Engineer District number, the TSOoperator number (for usage in querying computer data), principal commodities carried, the points or localities and waterways between which or on which operated and the number of vessels reported by vessel type.

The **National Summaries, Volume 1**, provides a condensation of the vessel data detailed in the **WTLUS**. Summarized vessel characteristics are represented in both tabular and graphic format.

The **Vessel Characteristics, Volume 3**, lists the vessel companies in alphabetical sequence and describes each vessel surveyed by indicating its name and number, Coast Guard number, net tonnage, type by VTCC code (Vessel Type, Construction and Characteristics) and ICST code (International Classification of Ships by Type; see Terminology for VTCC and ICST), register and overall length and breadth, loaded and light draft, horsepower, carrying capacity in short tons or units of cargo and number of passengers, height of fixed superstructures, cargo handling equipment, operating headquarters, and year built or rebuilt. Detail vessel characteristics may not be available for all vessels included in the total **WTLUS** vessel inventory.

The detail vessel data is available upon request on diskettes or CD-ROM. Ordering information is available from the Waterborne Commerce Statistics Center, P.O. Box 61280, New Orleans, LA 70161-1280. (Telephone 504/862-1424 or FAX 504/862-1423).

The **WTLUS** publication is a by-product of the WCSC Master Vessel File. The annual survey would be done even if there were no **WTLUS** publication because the survey is a necessary and integral part of the WCSC enforcement and collection program. Tracking vessel owners and operators is the primary means of identifying non-reporting carriers and new vessel operating companies.

<sup>1</sup> A general ferry is one which conveys passengers and vehicles (driven on and off the vessel) across a river or other narrow body of water (strait, inlet, etc.). General ferries will not be included in the "Waterborne Transportation Lines" unless they transport cargo and submit vessel operation reports.

## Terminology

**TOperator:** a Transportation Lines vessel company surveyed and assigned a seven digit code by the Waterborne Commerce Statistics Center (WCSC). The vessel inventory for each TOperator is reported annually to WCSC and is contained in the Master Vessel File. The first two digits of the TOperator code denotes the Engineer Division / District code with the last five digits forming a unique number assigned to a particular TOperator. There are 2,505 TOperators listed in the WTLUS publication for calendar year 1996.

**Engineer Division / District:** WCSC two digit code for the U.S. Army Corps of Engineer Division / District. Its usage in the TOperator code is to identify where the vessel company is domiciled.

**Principal Commodities:** Commodity descriptions are supplied by the vessel company on the annual transportation survey and are entered as a text field.

**Points or Localities and Waterways:** Geographic locations are supplied by the vessel company on the annual transportation survey and are entered as a text field.

**Vessel Descriptions:** Vessel categories are based on the WCSC Vessel Type, Construction and Characteristics (VTCC) codes and the International Classification of Ships by Type (ICST) codes. The VTCC and ICST codes and descriptions, as well as the cross reference list between VTCC and ICST codes, are provided on pages iii and iv.

**International Classification of Ships by Type (ICST):** ICST was developed by an ad hoc international advisory group on Maritime Statistics and completed in 1994. The classification is based on the construction characteristics of the marine structure and not upon its particular use or cargo carried at a point in time.
