Outside Washington State (206) 764-4131
Fax (206) 764-4001

Updated electronically March 1999.
Not available in print form.

Note

This directory lists airports that provide full-time or part-time communications and/or navigational aids via radio. At airports having no radio facilities, pilots should monitor and advise intentions on CTAF 122.9. A few airports having no radio facilities have been designated to use a CTAF frequency other than the standard 122.9. These airports and their non-standard CTAF frequencies are listed in this directory.

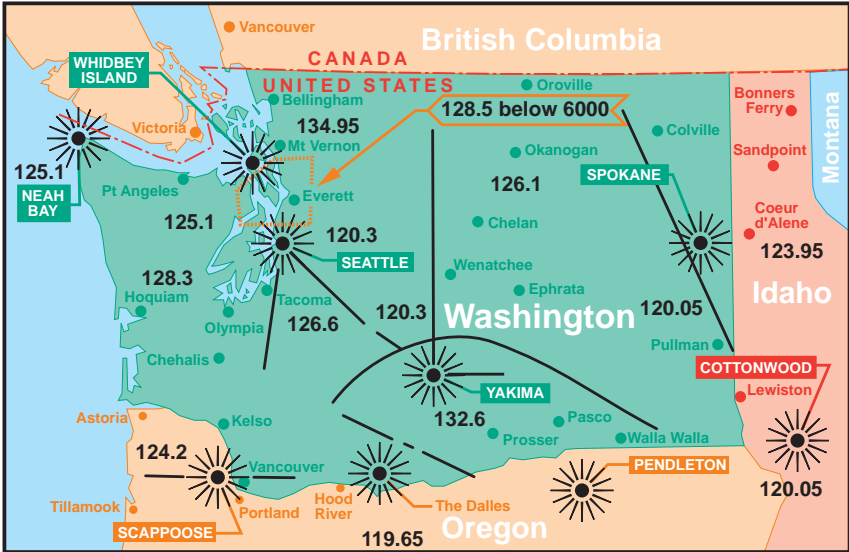

Flight Service Stations

All airports in Washington are handled by Seattle AFSS, Oregon by McMinnville FSS, and in Idaho by Boise AFSS. In your initial contact with FSS, be sure to give your full aircraft identification, the frequency you are using, and your location. See the center map for locations of all the Remote Communication Outlets (RCQs) and their discrete frequencies. When possible, contact FSS by phone 1-800-WX-BRIEF.

EFAS Enroute Flight Advisory or Flight Watch uses 122.0 nationwide.

Seattle ARTCC

Communication Frequency Chart for remote transceivers controlled by the Seattle Air Route Traffic Control Center

Note

Use of the ARTCC frequencies must be limited to communications pertaining to:

- IFR Flight
- VFR Radar Service
- Emergencies

Communications pertaining to Flight Plans, Weather, Terminal Status and Traffic, and requests to test transmissions, shall be directed to FSS, APC / DEP, or tower.

10/96

Abbreviations

The following abbreviations are used in this directory.

AAF	Army Air Force
AAS	Airport Advisory Service
AGL	Above Ground Level
APP	Approach Control
ARCAL	Pilot Controlled Lights (Canada)
ARTCC	Air Route Traffic Control Center
ASL	Above Sea Level
ATF	Aerodrome Traffic Frequency (Canada)
ATIS	Automatic Terminal Information Service
AWOS	Automatic Weather Observation System
CL DEL	Clearance Delivery
CTAF	Common Traffic Advisory Frequency (U.S.)
DEP	Departure Control
DME	Distance Measuring Equipment
EFAS	Enroute Flight Advisory Service...122.0
FSS	Flight Service Station
GRND	Ground Control
ILS	Instrument Landing System
LIRL	Low Intensity runway Lights
LOC	Localizer
LOM	Locator at Outer marker
MF	Mandatory Frequency (Canada)
NDB	Nondirectional Beacon
NM	Nautical Miles
PCL	Positive Controlled Lighting
RADR ADV	Radar Advisories
RCO	Remote Communications Outlet
REIL	Runway End Identifier Lights
RWY	Runway
SPB	Seaplane Base
VASI	Visual Approach Slope Indicator
VDF	VHF Direction Finding Equipment
VOR	VHF Omni Range
VOT	VOR Receiver Accuracy Test Facility
