CAUTION: Extensive efforts have been made to assure the quality of information contained in this report. It is impossible, however, to achieve complete accuracy and consistency of the reported data. In addition, the reported data do not include all relevant information generally necessary to explain apparent differences in performance (e.g., information related to work rules, topography, climate, and unusual events such as strikes and service start-ups). Users of this report, therefore, should be careful not to draw unwarranted conclusions based solely on the data contained herein.

1993 Data Tables Supplement National Transit Database

Introduction

The *Data Tables Supplement For the 1993 National Transit Database Section 15 Report Year* provides additional information that assists in documenting the 1993 Report Year for the National Transit Database. The information contained in this publication was formally part of the Appendices to the Annual Report.

The *Data Tables Supplement* publication is compiled from information received during the processing and validation of reports. The Supplement reflects a number of circumstances that occurred during the report year and provides an accurate accounting of the reporters and the data received and the impact the data has on reporting modifications. Collectively, the Supplement provides complimentary and supportive information for the *Data Tables* publication and documentation of the 1993 National Transit Database. The Supplement is broken out into four sections.

- Section 1 Transit Agency Identification
(Listed Alphabetically by State and Transit ID Number)

- Section 2 1990 U. S. Urbanized Area (UZAs) Transit Agencies
(Listed Numerically by UZA Code and Transit ID Number)

- Section 3 1990 U. S. Urbanized Areas (UZAs) Codes, Populations, Square
Miles and Densities
(Listed Alphabetically by State and UZA Name)

- Section 4 1993 Report Year Exception Listings

Each section is unique and provides detailed information to the user regarding the 523 transit agencies included in the 1993 National Transit Database, the urbanized areas that report transit service, and the reporting exceptions for the 1993 Report Year created by a number of factors such as reporting rule changes.

Section 1 provides additional information regarding modes operated by a reporter and identifies a point of contact for additional information.

Section 2 lists the urbanized area served in numerical order from the largest to the smallest. It also lists the reporters who provide transit service within each urbanized area by size of fleet. In larger urbanized areas, there is more than one reporter, while in smaller urbanized areas there generally tends to be only one reporter. Transit agencies that reported but were not included in the database; received a reporting exemption; received a reporting waiver; or failed to report, are included in the assigned urbanized area with a notation.

1993 Data Tables Supplement National Transit Database

Section 3 provides data with regards to population, square miles, and densities by urbanized area. Data is arrayed alphabetically by State and alphabetically by urbanized area within the State.

Section 4 consists of the reporting exceptions denoted during the report year. It is organized into 22 tables that provide information on reporting status (Tables 1 through 14), Urbanized Area Formula exceptions (Tables 15 through 20), Urbanized Area data (Table 21), and Questionable Data, Discrepancies and Declaration Issues (Table 22).
