15. Supplementary Notes This Directory supercedes all earlier editions.					
16. Abstract This is the 1987 edition of the Directory of Urban Public Transportation Service. This Directory lists transit information for 931 conventional and specialized local transit services in 316 urbanized areas (UZAs) of over 50,000 population. The UZAs shown in this Directory have been identified in a U.S. Department of Census Supplementary Report (Publication No.PC80-S1-14), entitled: Population and Land Area of Urbanized Areas for the United States and Puerto Rico: 1980 and 1970. This Directory is organized to meet a wide variety of informational needs for the user. Chart-type sheets in the Directory show a particular transit system name, its number of peak vehicles, the agency contact person, and the address and telephone number of the contact person. The following lists are provided in this Directory: Transit Agencies; UZAs Listed by Population; UZAs that Cross State Lines; Vehicle Summary Counts; and a Glossary of Terms. Update forms are included in the back of the Directory so that transit personnel may conveniently submit corrected information to be included in the next edition of the Directory.					
17. Key Words Buses; Demand Responsive; Directories; Fixed Route; Light Rail; Management; Peak Hour Vehicles; Private Transportation; Public Transportation; Rapid Rail; Transit System Personnel; Transit Systems; Urban Areas				18. Distribution Statement This report is available to the public through the National Technical Information Service in Springfield, Virginia 22161.	
19. Security Classif. (of this report) Unclassified		20. Security Classif. (of this page) Unclassified		21. No. of Pages 108

SEP 2 1987

Dear Colleague:

I am pleased to present you with the 1987 edition of "A Directory of Urban Public Transportation Service." The Directory was updated in 1986 for the first time in several years and we hope to continue to publish it annually.

I wish to thank you for your help in making this Directory a useful tool. Please continue to assist us in this effort by completing and sending in the update forms which are located at the end of the Directory. To include your information in our 1988 edition, we must adhere to a closing date of June 30, 1988, to receive the forms. Send them to:

Mr. Ronald J. Fisher
Director, Information Services Staff
Office of Technical Assistance
Urban Mass Transportation Administration
400 Seventh Street, S.W.
Washington, D.C. 20590

Perhaps you have some thoughts on how we can make the Directory more useful. Please include these comments in the information you send or drop me a note directly. I do appreciate the feedback on how our agency can be of more service to the industry.

Sincerely,

Alfred A. DelliBovi

Enclosure

11/11/11

1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that the study of history is essential for understanding the present and for shaping the future. The author points out that the United States has a long and rich history, and that the study of this history is essential for understanding the country and its people. The author also argues that the study of history is essential for understanding the world and for shaping the future. The author concludes that the study of history is essential for understanding the United States and for shaping the future.

2. The second part of the paper discusses the importance of the study of the history of the United States. It is argued that the study of history is essential for understanding the present and for shaping the future. The author points out that the United States has a long and rich history, and that the study of this history is essential for understanding the country and its people. The author also argues that the study of history is essential for understanding the world and for shaping the future. The author concludes that the study of history is essential for understanding the United States and for shaping the future.

3. The third part of the paper discusses the importance of the study of the history of the United States. It is argued that the study of history is essential for understanding the present and for shaping the future. The author points out that the United States has a long and rich history, and that the study of this history is essential for understanding the country and its people. The author also argues that the study of history is essential for understanding the world and for shaping the future. The author concludes that the study of history is essential for understanding the United States and for shaping the future.

- INTRODUCTION -

For purposes of this Directory compilation, two types of transit services are included: conventional and specialized. A conventional transit operation is a fixed route, regularly scheduled service available to the general public, offering rides wholly within, or commuter rides from outside, a particular urbanized area (UZA). Specialized transit services are largely demand-responsive and consist of various types of vehicles, such as buses, minibuses, vans, taxis, station wagons, etc. These services must operate at least 50 percent of the time in order to be included in this Directory. Information is provided for 931 conventional and specialized local public transit operations in 316 UZAs of over 50,000 population.

UZAs have been identified and maps showing UZA borders by state appear in a U.S. Census Bureau Supplementary Report--Publication No. PC80-S1-14, entitled Population and Land Area of Urbanized Areas for the United States and Puerto Rico: 1980 and 1970.

The Non-Urbanized Transportation Service Directory, which reports transit service available in communities of less than 50,000 population, is published under separate cover. It also includes specialized service transit operations. Used together, these two Directories are intended to represent the transit community within the United States. For more information pertaining to the Urban Directory, please contact:

U.S. Department of Transportation
Urban Mass Transportation Administration
Office of Information Services, URT-7
400 Seventh Street, SW, Room 6419
Washington, DC 20590
Telephone: (202) 366-0205

Information contained in this Directory originated from survey calls made to the various transit agencies between October 1985 and July 1986. Current changes were made from update forms that were sent in by the agencies from January 1987 through June 1987. The vehicle count shown by the agencies in this Directory reflects the number of vehicles used in their most recent peak season, which is normally in the Spring of the year. Consult the Glossary on page 95 for our definition of peak vehicles.

* * * * *

A special note of thanks is extended to all those who assisted us in updating this Directory.

- ORGANIZATION OF THE DIRECTORY -

This Directory is organized to meet a wide variety of informational needs and is structured to be both easy and flexible in the method of data access. For the informational needs of the user, the following lists are provided in this Directory: Transit Agencies; Urbanized Areas (UZAs) Listed by Population; UZAs that Cross State Lines; Vehicle Summary Counts; and a Glossary of Terms.

The chart-type sheets beginning on page 31 comprise the main part of the Directory. These sheets are known collectively as the Master List. Each sheet in the Master List provides the number of peak vehicles, agency contact person, address, and telephone number. The organizations are listed in alphabetical order by State, UZA, Section 9 Designated Recipient, Transit Agency, and Subdivision. In many cases, transit agencies receive their funding through another local agency termed a Section 9 Designated Recipient. These transit agencies are listed directly under the agency through which they receive funding. In other cases, the Designated Recipient and the transit agency are the same. These agencies are identified by a caret(>). Private transit operators are identified by an asterick (*) and either appear directly under the name of the transit agency with which they have a contract or at the top of the list for a particular UZA if they have no contract with a transit agency.

- HOW TO OBTAIN ADDITIONAL COPIES OF THE DIRECTORY -

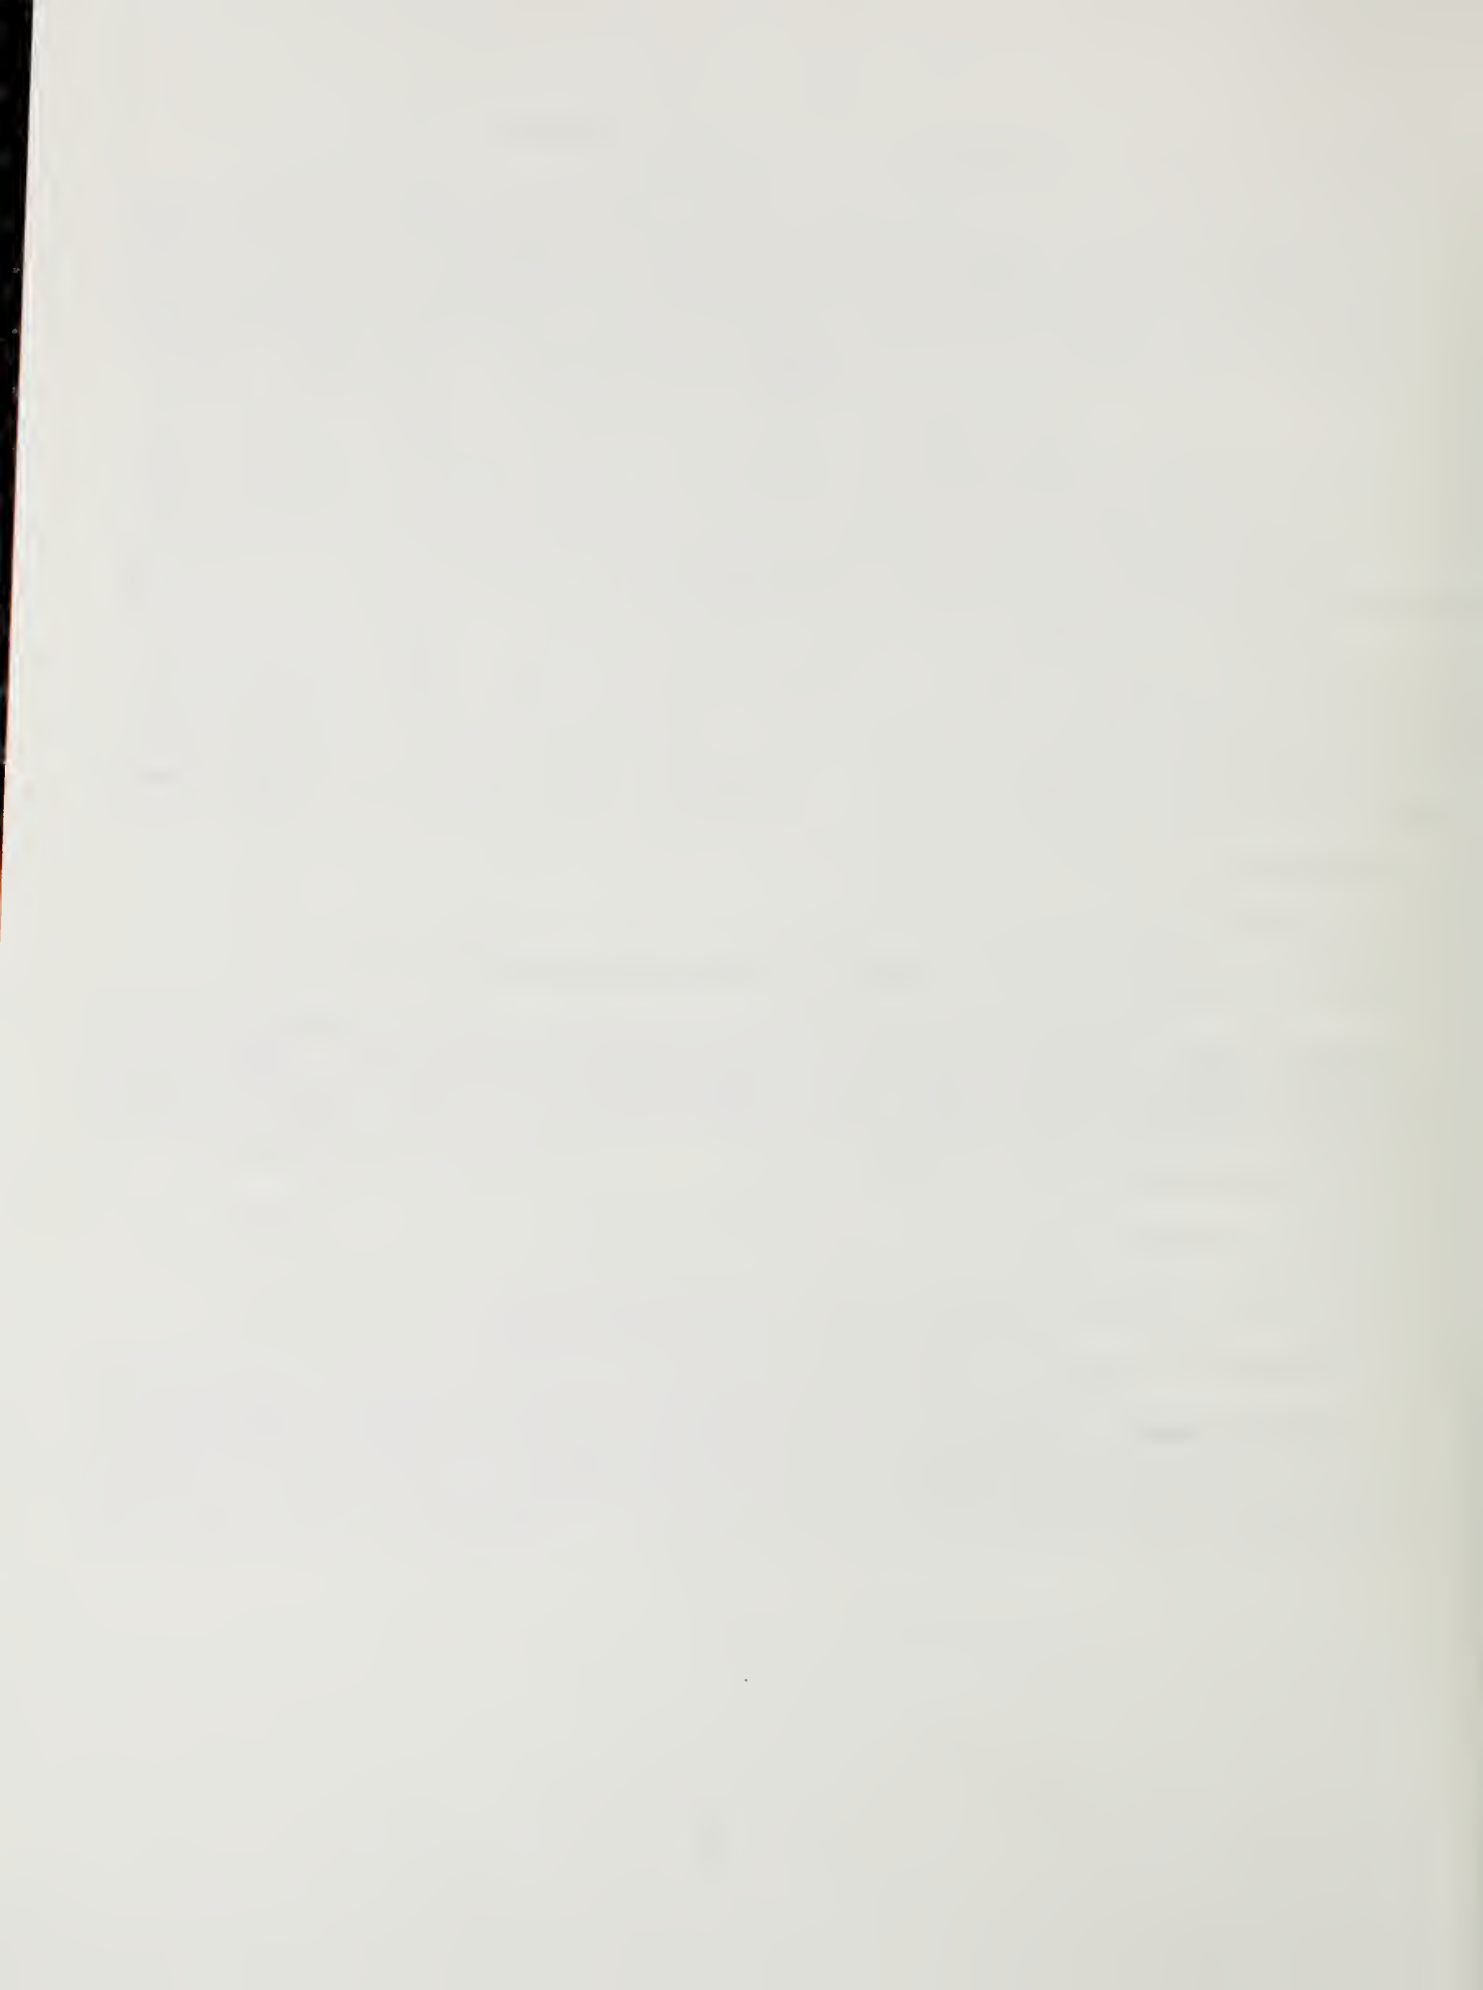

This Directory has been distributed to each agency listed herein as well as to those individuals and organizations which requested a copy. If you would like an additional copy or copies (up to 3), please call or send your request, along with a self addressed gummed label to the address shown in the Introduction on page I.

- DIRECTORY UPDATE INFORMATION -

Although care has been taken to compile reliable information, please realize that a project such as this is bound to contain errors or out-of-date information. In order to maintain an accurate Directory, it is important that we be notified in writing when errors or out-of-date information is found. Please fill out and send in the update forms found at the back of the Directory.

Trolley Bus	598

*The Specialized Services shown are largely demand-responsive and consist of various types of vehicles such as buses, minibuses, vans, taxis, station wagons, etc. The vehicles comprising the Specialized Services are an aggregate of these various vehicle types, as well as other types.

ARTICULATED BUS	High capacity motorbus capable of carrying approximately 50% more passengers than traditional buses. The vehicle consists of two rigid sections connected by a bending middle.
CABLE CAR	A streetcar type of vehicle which is propelled by means of an attachment to a moving cable buried in a street right-of-way.
COMMUTER RAIL	Typically characterized as urban passenger train service for local short distance travel between a central city and adjacent suburbs. It does not include rapid rail transit or light rail/streetcar service. Service of a predominately intercity nature is excluded, except where a local portion of it is operated under contract to a public agency for commuter purposes.
CONVENTIONAL TRANSIT	A fixed route, regularly-scheduled service, available to the general public, offering rides wholly within, or commuter rides from outside, a particular urbanized area.
DESIGNATED RECIPIENT	A designated public body in each urban area, which must have the legal authority to receive and dispense Federal funds.
FERRYBOAT	A vessel for carrying passengers and/or vehicles over a body of water. The vessels generally are steam or diesel-powered conventional ferry vessels. They may also be hovercraft, hydrofoils, and other high-speed vessels.
INCLINED PLANE	A special tramway type of vehicle modified so that its passenger seats remain horizontal while its undercarriage is angled parallel to the slope.
JITNEY	Passenger car or van (6 to 15 seat vehicle) which operates on rela-

- GLOSSARY OF TERMS -

JITNEY cont'd	tively fixed routes (sometimes with minor deviations), without fixed schedules or fixed stops. Jitneys are often privately-owned and operated.
LIGHT RAIL OR STREETCAR	A mode of urban transportation utilizing predominantly reserved, but not necessarily grade-separated rights-of-way. Utilizes electrically propelled rail vehicle, operated singly or in trains.
MOTORBUS	A passenger vehicle equipped with rubber tires and operated on roadways and city streets, propelled by some form of internal combustion.
PEAK VEHICLES	The maximum number of regularly scheduled, fixed-route revenue service vehicles operated during weekday rush hours in the peak season.
RAPID RAIL	Transit services using rail cars with motive capability, driven by electric power usually drawn from a third rail, configured for passenger traffic and usually operated on exclusive rights-of-way. Utilizes generally longer train consists and longer station spacing than light rail.
SPECIAL SERVICE	Service for a target market such as the elderly and handicapped, usually a demand-responsive type of service, and using smaller vehicles, such as buses, vans, and sedans, etc.
TRAMWAY	A system consisting of cabins which carry passengers and/or goods, suspended from flexible steel cables. Other cables are used to pull the cabins between stations.
TROLLEYBUS	Rubber-tired, electrically powered passenger vehicle, drawing power from overhead lines, and operated on city streets.
URBANIZED AREA (UZA)	Area designated by the US Bureau of the Census containing a central city or cities and surrounding closely settled urban fringe (suburbs), which together have a population of 50,000 or more. Urbanized areas used in this Directory are based on the 1980 Decennial Census.

UPDATE FORM FOR DESIGNATED RECIPIENTS

1. Name of Organization _____
2. Popular Abbreviation or Acronym (if any) _____
3. Address _____

4. _____

City	State	Zip	Telephone Number
------	-------	-----	------------------

5. Urbanized Area(s) Served _____
(Population 50,000 plus) _____ City _____ State _____

6. Name of Contact (High-ranking person who may be contacted to answer questions)

First Name	Middle Initial	Last Name
