Energy Division

# TRANSPORTATION ENERGY DATA BOOK: EDITION 19 

Stacy C. Davis<br>Oak Ridge National Laboratory

September 1999

Prepared for
Office of Transportation Technologies
U.S. Department of Energy

Prepared by
OAK RIDGE NATIONAL LABORATORY
Oak Ridge, Tennessee 3783 1-6073
managed by
LOCKHEED MARTIN ENERGY RESEARCH CORP.
for the
U.S. DEPARTMENT OF ENERGY
under Contract No. DE-AC05-96OR22464

This report has been reproduced directly from the best available copy.
Available to DOE and DOE contractors from the Office of Scientific and Technical Information, P.O. Box 62, Oak Ridge, TN 37831; prices available from (423) 576-8401.

Available to the public from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22161.

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility of the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by, trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

Users of the Transportation Energy Data Book are encouraged to comment on errors, omissions, emphases, and organization of this report to one of the persons listed below. Requests for additional complementary copies of this report, additional data, or information on an existing table should be referred to Ms. Stacy Davis, Oak Ridge National Laboratory.

## FOREWORD

This edition continues to emphasize oil and its importance to the U.S. transportation system. The increase in oil prices that has taken place in the first half of 1999 is partly due to the reduction in production of oil by OPEC countries and four other countries that joined forces with OPEC. The prices that U.S. drivers pay for gasoline are still influenced by members of a cartel. Chapter 1 shows that world oil production grew by 5.3 million barrels per day in the three years between 1994 and 1997, whereas it took 21 years for it to grow that much prior to 1994. Even though projections are not contained in this document, most projections show large increases in future oil production and use.

Chapter 2 contains data on transportation energy use. One of the most dramatic changes we have witnessed over the past three decades is the reduction in the amount of energy it takes to move a person a mile in an automobile or in an airplane. On the other hand, rail and bus transit has become less efficient over that same period.

Chapter 3 deals with greenhouse gases. The full fuel-cycle greenhouse gases from many types of alternative fuel/engine combinations are provided.

Chapter 4 provides data on criteria emissions and the importance of transportation emissions is made clear.

Chapter 5 highlights the role of transportation in the U.S. economy. The taxes that the U.S. places on gasoline and diesel fuel are much lower than those in many developed countries.

Chapter 6 provides data on highway vehicles. Highway vehicle-miles-of-travel continues to grow at around $3 \%$ a year in spite of past projections that should be much lower by now. The average age of both cars and trucks on the road is quite a bit higher than it was 25 years ago.

Chapter 7 provides more detailed data on light vehicles (cars and light trucks). Light trucks continue to increase their share of new vehicle sales and of the vehicle stock. Both types of vehicles have not improved in fuel economy over the last 13 years.

Heavy vehicle data is presented in Chapter 8. Alternative fuel vehicle data makes up Chapter 9. Chapter 10 deals with fleet vehicles and their characteristics.

In Chapter 11, household vehicle data is presented. Since 1950, the number of vehicles per capita grew from 0.28 to 0.75 , the vehicle miles traveled per capita grew from 3.0 to 9.6 thousand, and the number of licensed drivers nearly tripled.

Data for the nonhighway modes are presented in Chapter 12. Appendix A provides the data sources and Appendix B gives conversion factors.

Take advantage of the websites listed throughout this document to find more detailed information and to update data where possible. Please send any comments and/or suggestions to me or to the author, Stacy Davis.

Crigio R. Ontanen

## ACKNOWLEDGMENTS

I would like to express my gratitude to the many individuals who assisted in the preparation of this document. First, I would like to thank Phil Patterson and the staff of the Office of Transportation Technologies (OTT) for their continued support of the Transportation Energy Data Book project. I would also like to thank Patricia Hu of Oak Ridge National Laboratory (ORNL) for her dedicated leadership of this project. This document benefits from the criticism and careful review of Phil Patterson, OTT, and John Maples, Trancon, Inc. I would also like to thank Robert Gibson, University of Tennessee, for compiling new emission standard tables; John Maples, Trancon, for the methodology for Class 2 b truck sales; Jamie Payne, ORNL, who designed the new cover; Sherry Campbell Gambrell, ORNL, who prepared the title index; and Bob Boundy, Q Systems, who assisted in a variety of ways. Finally, this book would not have been possible without the dedication of Debbie Bain, ORNL, who masterfully prepared the manuscript.

#### Abstract

The Transportation Energy Data Book: Edition 19 is a statistical compendium prepared and published by Oak Ridge National Laboratory (ORNL) under contract with the Office of Transportation Technologies in the Department of Energy (DOE). Designed for use as a desk-top reference, the data book represents an assembly and display of statistics and information that characterize transportation activity, and presents data on other factors that influence transportation energy use. The purpose of this document is to present relevant statistical data in the form of tables and graphs. The latest editions of the Data Book are available to a larger audience via the Internet (http://www-cta.ornl.gov/data/tedb.htm).

This edition of the Data Book has 12 chapters which focus on various aspects of the transportation industry. Chapter 1 focuses on petroleum; Chapter 2 - energy; Chapter 3 greenhouse gas emissions; Chapter 4 - criteria pollutant emissions; Chapter 5 - transportation and the economy; Chapter 6-highway vehicles; Chapter 7 -light vehicles; Chapter 8 - heavy vehicles; Chapter 9 - alternative fuel vehicles; Chapter 10 - fleet vehicles; Chapter 11 - household vehicles; and Chapter 12- nonhighway modes. The sources used represent the latest available data. There are also three appendices which include detailed source information for some tables, measures of conversion, and the definition of Census divisions and regions. A glossary of terms and a title index are also included for the readers convenience.

## INTRODUCTION

In January 1976, the Transportation Energy Conservation (TEC) Division of the Energy Research and Development Administration contracted with Oak Ridge National Laboratory (ORNL) to prepare a Transportation Energy Conservation Data Book to be used by TEC staff in their evaluation of current and proposed conservation strategies. The major purposes of the data book were to draw together, under one cover, transportation data from diverse sources, to resolve data conflicts and inconsistencies, and to produce a comprehensive document. The first edition of the TEC Data Book was published in October 1976. With the passage of the Department of Energy (DOE) Organization Act, the work being conducted by the former Transportation Energy Conservation Division fell under the purview of the DOE's Office of Transportation Programs (now the Office of Transportation Technologies). DOE, through the Office of Transportation Technologies, has supported the compilation of Editions 3 through 19.

Policymakers and analysts need to be well-informed about activity in the transportation sector. The organization and scope of the data book reflect the need for different kinds of information. For this reason, Edition 19 updates much of the same type of data that is found in previous editions.

In any attempt to compile a comprehensive set of statistics on transportation activity, numerous instances of inadequacies and inaccuracies in the basic data are encountered. Where such problems occur, estimates are developed by ORNL. To minimize the misuse of these statistics, an appendix (Appendix A) is included to document the estimation procedures. The attempt is to provide sufficient information for the conscientious user to evaluate the estimates and to form their own opinions as to their utility. Clearly, the accuracy of the estimates cannot exceed the accuracy of the primary data, an accuracy which in most instances is unknown. In cases where data accuracy is known or substantial errors are strongly suspected in the data, the reader is alerted. In all cases it should be recognized that the estimates are not precise.

The majority of the statistics contained in the data book are taken directly from published sources, although these data may be reformatted for presentation by ORNL. Consequently, neither ORNL nor DOE endorses the validity of these data.

## Chapter 1 <br> Petroleum

Summary Statistics from Tables/Figures in this Chapter

| Source |  |  |
| :---: | :---: | :---: |
| Figure 1.1 | World oil proved resources, 1993 (most recent survey) | billion barrels |
|  | Proved resources (USGS) | 1,092 |
|  | Ultimate resources (USGS) | 1,574 |
| Table 1.2 | World Oil Production, 1997 |  |
|  | U.S. Oil Production (million barrels per day) | 6.4 |
|  | U.S. Share | 9.7\% |
| Table 1.3 | World Oil Consumption, 1996 |  |
|  | U.S. Oil Consumption (million barrels per day) | 18.3 |
|  | U.S. Share | 25.6\% |
| Figure 1.6 | Refinery yield, 1997 OECD | North America |
|  | Gasoline 31.1\% | 41.7\% |
|  | Diesel fuel $28.1 \%$ | 22.3\% |
|  | Residual fuel 11.8\% | 5.5\% |
|  | Kerosene 8.9\% | 9.3\% |
|  | Other 20.2\% | 21.2\% |
| Table 1.8 | U.S. transportation oil use as a percent of U.S. oil production, 1998 | 196\% |
| Table 1.8 | Net imports as a percentage of U.S. oil consumption, 1998 | 51\% |
| Table 1.9 | Transportation share of oil consumption, 1998 | 66\% |

No one knows the exact amount of oil which is in the Earth. The U.S. Geological Survey (USGS) produces estimates of the ultimate world oil resources periodically - the latest done in 1993. Because of the evolving understanding of world recoverable resources, the USGS assessments are valid for the perceptions at that point in time. The surveys that produced the data shown in Table 1.1 were conducted using consistent methodologies and the same core group ofgeologists. The differences among the surveys are largely due to better understanding of world recoverable resources and technological change. As understanding of the subject grows, so may the estimates of world oil resources. A new study will be available in the year 2000 .

[^0]The United States has increased its petroleum stocks by 55\% from 1973 to 1984; there has been no significant change in the stocks since 1984. Petroleum demand, however, has increased $87 \%$ in that same time period (see Table 1.3). The Strategic Petroleum Reserve accountedfor $36 \%$ of total U.S. stocks at the end of 1997.

${ }^{\text {e }}$ Data are not available. The Energy Policy and Conservation Act, effective February 1976, authorized the establishment of the U.S. Strategic Petroleum Reserve.

Source: See Tables 1.3 and 1.4.

The United States had petroleum stocks of almost one quarter of U.S. petroleum consumption in 1996, which was slightly above the average for OECD countries. Germany and Japan held higher reserves relative to their consumption of petroleum.

July 1998, p. 149.

[^1]Estimates of 1996 military expenditures for defending oil supplies in the Middle East rangefrom $\$ 6$ to $\$ 60$ billion per year. This wide range in estimates reflects the difficulty in assigning a precise figure to the military cost of defending the U.S. interests in the Middle East. The two main reasons for the difficulty are 1) the Department of Defense does not divide the budget into regional defense sectors and 2) it is difficult to determine how much of the cost is attributable to defending Persian Gulf oil.

Table 1.6
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East

| Source | Original estimates <br> (billion dollars) | Year of <br> original estimate | 1996 estimate <br> (constant 1996 <br> billion dollars) |
| :--- | :---: | :---: | :---: |
| General Accounting Office [1] | $\$ 33$ | 1990 | $\$ 28^{\prime \prime}$ |
| Congressional Research Service [2] | $\$ 6.4$ | 1990 | $\$ 6^{\prime \prime}$ |
| Greene and Leiby [3] | $\$ 14.3$ | 1990 | $\$ 12^{\prime \prime}$ |
| Ravenal [4] | $\$ 50$ | 1992 | $\$ 60^{\mathrm{b}}$ |
| Kaufinann and Steinbruner [5] | $\$ 64.5$ | 1990 | $\$ 55^{\mathrm{b}}$ |
| Delucchi and Murphy"[6] | $\$ 20-40$ | 1996 | $\$ 20-\mathbf{4 0}$ |

Average estimate is $\$ 32$ billion, with a standard deviation of $\$ 22$ billion.

Source:
International Energy Agency, Monthly Oil Survey, January 1999, Paris, France, Table 7.

[^3]Oxygenate refinery input increased significantly in 1995, most certainly due to the Clean Air Act Amendments of 1990 which mandated the sale of reformulated gasoline in certain areas beginning in January 1995.

"Methyl tertiary butyl ether (MTBE).
${ }^{\text {b }}$ Includes ethyl tertiary butyl ether (ETBE), tertiary amyl methyl ether (TAME), tertiary butyl alcohol (TBA), and other aliphatic alcohols and ethers intended for motor gasoline blending.
'For 1987-92, includes other hydrocarbons/hydrogen/oxygenates. For 1993-on, includes other hydrocarbons/hydrogen.
"Reported in "Other hydrocarbons" category in this year.
${ }^{\text {e }}$ Data are not available.

When crude oil and other hydrocarbons are processed into products that are, on average, less dense than the input, a processing volume gain occurs. Due to this gain, the product yield from a barrel of crude oil is more than $100 \%$. The processing volume gain has been growing over the years.

World petroleum consumption - U.S. Department of Energy, Energy Information Administration, International Energy Annual 1997, April 1999, Table1.1.
(Additional resources: http://www.eia.doe.gov)
${ }^{2}$ Best estimate for U.S. petroleum consumption is the amount of petroleum products supplied to the U.S. in a given year. This is not the sum of crude oil production and net imports due to processing gain and stock changes.
${ }^{5}$ Transportation petroleum use can be found on Table 1.10. This column has been revised to include domestic production of crude oil, natural gas plant liquids, and other hydrocarbons/hydrogen/oxygenates as shown in the Monthly Energy Review, Table 3.1 a.

Data are not available.
${ }^{\mathrm{d}}$ Average annual percentage change is to the latest possible year.

"Includes supplemental gaseous fuels. Transportation sector includes pipeline fuel and natural gas vehicle use.
${ }^{\mathrm{b}}$ Includes electrical system energy losses.
c Energy generated from geothermal, wood, waste, wind, photovoltaic, and solar thermal energy sources.

As data about alternativefuel use come available, an attempt is made to incorporate it into this table. Sometimes assumptions must be made in order to use the data. Please see Appendix A for detailed methodology of all energy data.

Table 2.5

"Civilian consumption only. Totals may not include all possible uses of fuels for transportation (e.g., snowmobiles).
${ }^{\text {b }}$ Thousand barrels per day crude oil equivalents based average on the EIA weighted average of heat content of petroleum products used in transportation.
${ }^{\text {c }}$ Estimated using vehicle travel information.
dwo-axle, four-tire trucks.

O

The Federal Highway Administration produced revised estimates of auto, light truck, and other truck historical fuel use in order to produce a consistent trend. Light trucks include pickups, vans, and sport utility vehicles.

See Appendix A for Table 2.7.
${ }^{\text {a }}$ Beginning in 1992 data became available on alternative fuel use by transit buses.
${ }^{\mathrm{b}}$ Total transportation figures do not include military and off-highway energy use and may not include all possible uses of fuel for transportation (e.g. snowmobiles).

The Federal Highway Administration cautions that data from 1993-on may not be directly comparable to earlier years. Some states have improved reporting procedures in recent years, and the estimation procedures were revised in 1994. Prior to the Energy Policy Act of 1992, gasohol was defined as a blend of gasoline and at least 10\%, by volume, alcohol. Effective January 1,1993, three types of gasohol were defined: $10 \%$ gasohol-containing at least $10 \%$ alcohol; $7.7 \%$ gasohol-containing $7.7 \%$ alcohol but less than $10 \%$, and $5.7 \%$ gasohol-containing at least $5.7 \%$ alcohol but less than $7.7 \%$. See Table 2.9 for details on oxygenate usage.

${ }^{a}$ Liquified petroleum gas.

Global Warming Potentials (GWP) were developed to allow comparison of each greenhouse gas' ability to trap heat in the atmosphere relative to carbon dioxide. Extensive research has been performed and it has been discovered that the effects of various gases on global warming are too complex to be precisely summarized by a single number. Further understanding of the subject also causes frequent changes to estimates. Despite that, the scientific community has developed approximations, which are shown below. Most analysts use the 100-year time horizon.

Table 3.8
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide (kilogram of gas per kilogram of carbon dioxide)

| Gas | Lifetime (years) | Direct effect for time horizons of |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 20 years | 100 years | 500 years |
| Carbon Dioxide | Variable | 1 | 1 | 1 |
| Methane | $12 \pm 3$ | 56 | 21 | 7 |
| Nitrous Oxide | 120 | 280 | 310 | 170 |
| HFCs, PFCs, and other gases |  |  |  |  |
| HFC-23 | 264 | 9,200 | 12,100 | 9,900 |
| HFC-125 | 33 | 4,800 | 3,200 | 11 |
| HFC-134a | 15 | 3,300 | 1,300 | 420 |
| HFC-152a | 2 | 460 | 140 | 42 |
| HFC-227ea | 37 | 4,300 | 2,900 | 950 |
| Perfluoromethane | 50,000 | 4,400 | 6,500 | 10,000 |
| Perfluoroethane | 10,000 | 6,200 | 9,200 | 14,000 |
| Sulfur hexafluoride | 3,200 | 16,300 | 23,900 | 34,900 |

## Source:

U.S. Department of Energy, Energy Information Administration, Emissions of Greenhouse Gases in the United States 1997, Washington, DC, October 1998, p. 8. Original source: Intergovernmental Panel on Climate Change. (Additional resources: http://www.eia.doe.gov, http://www.ipcc.ch)

Note:
The typical uncertainty for global warming potentials is estimated by the Intergovernmental Panel on Climate Change at $\pm 35$ percent.

## The Greenhouse Gases, Regulated Emissions, and Energy Use in Transportation (GREET) Model

The energy in greenhouse gas estimates of the most recent version (Version 1.4) of the GREET model are displayed in the next. two tables. The model estimates the full fuel-cycle emissions and energy use associated with various transportation fuels and advanced transportation technologies for light-duty vehicles. It calculates fuel-cycle emissions of three GREENHOUSE GASES (carbon dioxide, methane, and nitrous oxide) and five criteria pollutants (volatile organic compounds, carbon monoxide, nitrogen oxides, sulfur oxides, and particulate matter measuring 10 microns or less). See Chapter 4 for the criteria pollutant data from GREET. The model also calculates the total fuel-cycle energy consumption, fossil fuel consumption, and petroleum consumption using various transportation fuels. The fuel cycles that are included in the GREET model are:

- petroleum to conventional gasoline, reformulated gasoline, conventional diesel, reformulated diesel, liquefied petroleum gas, and electricity via residual oil;
- natural gas to compressed natural gas, liquefied natural gas, liquefied petroleum gas, methanol, FischerTropsch diesel, dimethyl ether, hydrogen, and electricity;
- coal to electricity;
- uranium to electricity;
- renewable energy (hydropower, solar energy, and wind) to electricity;
- corn, woody biomass, and herbaceous biomass to ethanol;
- soybeans to biodiesel; and
- landfill gases to methanol.

Near-term technologies are ones which may be applied to 2000 model-year cars and Long-term technologies are ones which may be applied to 2010 model-year cars.

## Acronyms Used on Tables 3.9 and 3.10

| Emissions | acronyms |
| :---: | :---: |
| GHGs | greenhouse gases |
| CH4 | methane |
| N 2 O | nitrous oxide |
| co 2 | carbon dioxide |
| Technologies | acronyms |
| BD20 | mixture of $20 \%$ biodiesel and $80 \%$ conventional diesel (by volume) |
| CARFG2 | California Phase 2 reformulated gasoline |
| CD | conventional diesel |
| CIDI | compression ignition, direct injection |
| CNG | compressed natural gas |
| CNGV | compressed natural gas vehicle |
| Dedi. | dedicated |
| DME | dimethyl ether |
| E10 | mixture of 10\% ethanol and 90\% gasoline (by volume) |
| ES5 | mixture of $85 \%$ ethanol and $15 \%$ gasoline (by volume) |
| E90 | mixture of $90 \%$ ethanol and $10 \%$ gasoline (by volume) |
| ETBE | ethyl tertiary butyl ether |
| EtOH | ethanol |
| EtOHV | ethanol vehicle |
| EV | electric vehicle |
| FCV | fuel-cell vehicle |
| FFV | flexible fuel vehicle |
| FRFG2 | federal Phase 2 reformulated gasoline |
| FG | flared gas |
| FT50 | mixture of 50\% Fischer-Tropsch diesel and 50\% conventional diesel (by volume) |
| G C | grid-connected |
| GI | grid-independent |
| GHGs | greenhouse gases |
| GV | gasoline vehicle |
| $\mathrm{H}_{2}$ | hydrogen |
| HB | herbaceous biomass |
| HEV | hybrid electric vehicle |
| LFG | land-fill gas |
| LNG | liquefied natural gas |
| LNGV | liquefied natural gas vehicle |
| LPG | liquefied petroleum gas |
| LPGV | liquefied petroleum gas vehicle |
| M85 | mixture of $85 \%$ methanol and $15 \%$ gasoline by volume |
| M90 | mixture of $90 \%$ methanol and $10 \%$ gasoline by volume |
| MeOH | methanol |
| MeOHV | methanol vehicle |
| MTBE | methyl tertiary butyl ether |
| NE | northeast |
| NG | natural gas |
| RFD | reformulated diesel |
| SI | spark ignition |
| SIDI | spark-ignition, direct-injection |
| WB | woody biomass |

Note:
$\mathrm{CO}=$ Carbon monoxide. NO, $=$ Nitrogen oxides. PM-10 $=$ Particulate matter less than 10 microns.
PM-2.5 = Particulate matter less than 2.5 microns. SO, $=$ Sulfur dioxide. VOC $=$ Volatile organic compounds. NH , = Ammonia.

The transportation sector accountedfor two-thirds of the nation's carbon monoxide (CO) emissions in 1997. Highway vehicles are by far the source of the greatest amount of CO. For details on the highway emissions of CO, see Table 4.3.

${ }^{\text {a }}$ The sums of subcategories may not equal total due to rounding.
${ }^{\mathbf{b}}$ Less than 8,500 pounds.

Historically the transportation sector, highway vehicles in particular, have been a major source of lead emissions in the U.S. Regulatory action in 1978 required a gradual reduction of the lead content of all gasoline over a period of many years. The transportation sector accounts for only 13\% of lead emissions in 1997.

[^15]
# The Greenhouse Gases, Regulated Emissions, and Energy Use in Transportation (GREET) Model 

The energy and criteria pollutant estimates of the most recent version (Version 1.4) of the GREET model are displayed in the next two tables. The model estimates the full fuel-cycle emissions and energy use associated with various transportation fuels and advanced transportation technologies for light vehicles. It calculates fuel-cycle emissions of five criteria pollutants (volatile organic compounds, carbon monoxide, nitrogen oxides, sulfur oxides, and particulate matter measuring 10 microns or less) and three greenhouse gases (carbon dioxide, methane, and nitrous oxide). See Chapter 3 for the greenhouse gas data from GREET. The model also calculates the total fuel-cycle energy consumption, fossil fuel consumption, and petroleum consumption using various transportation fuels. The fuel cycles that are included in the GREET model are:

- petroleum to conventional gasoline, reformulated gasoline, conventional diesel, reformulated diesel, liquefied petroleum gas, and electricity via residual oil;
natural gas to compressed natural gas, liquefied natural gas, liquefied petroleum gas, methanol, Fischer-Tropsch diesel, dimethyl ether, hydrogen, and electricity; coal to electricity;
,. uranium to electricity;
- renewable energy (hydropower, solar energy, and wind) to electricity;
- corn, woody biomass, and herbaceous biomass to ethanol;
- soybeans to biodiesel; and
- landfill gases to methanol.

Near-term technologies are ones which may be applied to 2000 model-year cars andlong-term technologies are ones which may be applied to 2010 model-year cars.

Lisa Snapp, Office of Air and Radiation, Environmental Protection Agency, Personal communication.
${ }^{\text {a }}$ Light truck categories LDT1-LDT4 were not actually created until 1994. From 1968 to 1978 all trucks with a Gross Vehicle Weight Rating (GVWR) up to $6,000 \mathrm{lbs}$ were classified as light trucks and were required to meet the same standards. As of 1979 , the maximum weight was raised to 8,500 lbs GVWR. During 1988 through 1993 , light trucks were divided into two subcategories that coincide with the current LDT1 and LDT2/3/4 categories.
${ }^{\mathrm{b}}$ The test procedure for measuring exhaust emissions has changed several times over the course of vehicle emissions regulation. The 7-mode procedure was used through model year 1971 and was replaced by the CVS-72 procedure beginning in model year 1972. The CVS-75 became the test procedure as of model year 1975. While it may appear that the total hydrocarbon and carbon monoxide standards were relaxed in 1972-74, these standards were actually more stringent due to the more stringent nature of the CVS-72 test procedure. Additional standards for carbon monoxide and composite standards for non-methane hydrocarbons and nitrogen oxides tested over the new Supplemental Federal Test Procedure will be phased-in during model years 2000-02; these standards are not shown in this table.
'Emission standards had to be met for a useful life of 5 years $/ 50,000$ miles through model year 1983, and a full useful life of 11 years 120,000 miles was defined for 1985-93 (several useful life options were available for 1984). Beginning in model year 1994, emission standards were established for an intermediate useful life of 5 years/50,000 miles as well as a full useful life of 11 years $/ 120,000$ miles (these standards are shown in parentheses). Hydrocarbon standards, however, were established only for full useful life. Tier 1 exhaust standards, except PM standards, were phased-in during 1994-96 at a rate of 40,80 , and 100 percent, respectively. PM standards were phased-in at a rate of 40 , 80, and 100 percent during 1995-97.
${ }^{\mathrm{d}}$ In 1968-69, exhaust emission standards were issued in parts per million (ppm) rather than grams per mile and are, therefore, incompatible with this table.
${ }^{\mathrm{e}}$ Noestimate available.
${ }^{\mathrm{f}}$ No standard set.
${ }^{\mathrm{g}}$ The cold CO emission standard is measured at 20 degrees F (rather than 75 degrees F ) and is applicable for a 5 -year/ 50,000 -mile useful life.
${ }^{h}$ Gross vehicle weight rating (GVWR) is the maximum design loaded weight. Loaded vehicle weight (LVW) is the curb weight (nominal vehicle weight) plus 300 Ibs.

${ }^{\text {a }}$ Light truck categories LDT1-LDT4 were not actually created until 1994. From 1968 to 1978 all trucks with a Gross Vehicle Weight Rating (GVWR) up to $6,000 \mathrm{lbs}$ were classified as light trucks and were required to meet the same standards. As of 1979 , the maximum weight was raised to 8,500 lbs GVWR. During 1988-93, light trucks were divided into two subcategories that coincide with the current LDT1 and LDT2/3/4 categories.
${ }^{\mathrm{b}}$ The test procedure for measuring exhaust emissions has changed several times over the course of vehicle emissions regulation. The 7-mode procedure was used through model year 1971 and was replaced by the CVS-72 procedure beginning in model year 1972. The CVS-75 became the test procedure as of model year 1975. While it may appear that the total hydrocarbon and carbon monoxide standards were relaxed in 1972-74, these standards were actually more stringent due to the more stringent nature of the CVS-72 test procedure. Additional standards for carbon monoxide and composite standards for non-methane hydrocarbons and nitrogen oxides tested over the new Supplemental Federal Test Procedure will be phased-in during model years 2002-04; these standards are not shown in this table
'Emission standards had to be met for a full useful life of 5 years $/ 50,000$ miles through model year 1983, and a full useful life of 11 years 120,000 miles was defined for 1985-93 (several useful life options were available for 1984). Beginning in model year 1996, emission standards were established for an intermediate useful life of 5 years $/ 50,000$ miles as well as a full useful life of 11 years $/ 120,000$ miles (these standards are shown in parentheses). This applied to all pollutants except hydrocarbons and particulates for all LDT3s and NOx for diesel-powered LDT3s, which were only required to meet full useful life standards. Tier 1 exhaust standards were phased-in during 1996-97 at a rate of 50 and 100 percent, respectively.
${ }^{\text {d }}$ In 1968-69, exhaust emission standards were issued in parts per million (ppm) rather than grams per mile and are, therefore, incompatible with this table
${ }_{f}^{e}$ Noestimate available.
fo standard set.
${ }^{g}$ The cold CO emission standard is measured at 20 degrees F (rather than 75 degrees F ) and is applicable for a 5 -year $/ 50,000$-mile useful life.
${ }^{\text {h }}$ Gross vehicle weight rating (GVWR) is the maximum design loaded weight. Adjusted loaded vehicle weight (ALVW) is the numerical average of the GVWR and the curb weight.

Rob French, Office of Air and Radiation, Environmental Protection Agency, Personal communication, April 1999.
${ }^{\mathrm{a}}$ No standard set
${ }^{\mathrm{b}}$ Although emission standards for hydrocarbons and carbon monoxide were in effect for these years, they were not measured in grams/brake horsepower-hour and are, therefore, incompatible with this table.
'Vehicles can meet a composite non-methane hydrocarbons and nitrogen oxides standard of 2.5 , if they meet a non-methane hydrocarbon standard of no more than 0.5 .
${ }^{\mathrm{d}}$ Smoke opacity is expressed in percentage for acceleration, lugging, and peak modes (acceleration/lugging/peak). Lugging is when a vehicle is carrying a load.
${ }^{\text {e }}$ Gross vehicle weight rating (GVWR) is the maximum design loaded weight.
${ }^{f}$ Several testing procedures have been used during the course of exhaust emission control. A steady-state 9 -mode test procedure ( 13 -mode for diesel) was used for 197083 standards. For 1984, either the steady-state tests or the EPA transient test procedure could be used. For diesels, the EPA transient test was required from 1985 to the present. For gasoline-powered vehicles, either either the EPA or MVMA (Motor Vehicle Manufacturers Association) transient test procedure could be used during 1985-86, and the MVMA procedure was required thereafter.
${ }^{\mathrm{g}}$ Emissions standards apply to the useful life of the vehicle. Useful life was 5 years/50,000 miles through 1983, and 8 years/l 10,000 miles for model year 1985 and after. 1984 was a transitional year in which vehicles could meet the older standard (and test procedure) or the newer one. Useful life requirement for gasoline-powered trucks meeting NOx standards for 1998 and after is IO years/l 10,000 miles. The useful life requirements for heavy diesel truck standards are more complex and vary by vehicle weight, pollutant, test procedure, and year. Consult the U.S. Code of Federal Regulations for further information.

[^17]California's Low-Emission Vehicle regulationsprovidefor reduced emission vehicles to be available to consumers. Vehicles meeting these standards have even lower emissions than the basic standards for all new vehicles sold in California. Currently, there is a wide array of TLEVs and LEVs, and a few ULEVs and ZEVs on the market. For a listing of the available low emission vehicles, see the California Air Resources Board web site referenced below.

Table 4.24
California Vehicle Emission Reduction for Passenger Cars and Light Trucks

Note:
= indicates equivalent emissions to vehicles meeting the basic California standard.
${ }^{2}$ See Table 4.23.

The California Air Resources Board adopted requirements in 1991 for fleet mixture in order to meet the emission standards. By the year 2001, it is proposed that $90 \%$ of each vehicle manufacturer's fleet be low-emission vehicles. A March 1996 amendment to the plan allows the marketplace to determine the number of zero emission vehicles from 1998 to 2002.

Note:
Comparisons between prices and price trends in different countries require care. They are of limited validity because of fluctuations in exchange rates; differences in product quality, marketing practices, and market structures; and the extent to which the standard categories of sales are representative of total national sales for a given period.

Table 5.2 and International Energy Agency, Energy Prices and Taxes, Fourth Quarter 1998, Paris, France, 1999. (Additional resources: http://www.iea.org)

Though the cost of crude oil certainly influences the price of gasoline, it is not the only factor which determines the price at the pump. Processing cost, transportation cost, and taxes also play a major part of the cost of a gallon of gasoline. The average price of a barrel of crude oil (in constant 1997 dollars) declined by $55 \%$ from 1990 to 1998, while the average price of a gallon of gasoline declined $27 \%$ in this same time period.

'Collected from a survey of prices on January 1 of the current year.
${ }^{5}$ These prices were collected from a sample of service stations in 85 urban areas selected to represent all urban consumers. Urban consumers make up about $80 \%$ of the total U.S. population.
'Adjusted by the Consumer Price Inflation Index.
${ }^{d}$ Data are not available.
'Average annual percentage change is from the earliest year possible to 1998.

The fuel prices shown here are refiner sales prices of transportation fuels to end users, excluding tax. Sales to end users are those made directly to the ultimate consumer, including bulk consumers. Bulk sales to utility, industrial, and commercial accounts previously included in the wholesale catego y are now counted as sales to end users.

${ }^{\mathrm{a}}$ Annual flat fee.
${ }^{\mathrm{b}}$ Blends with gasoline only.
'November-February tax rate is $\$ 0.02$.
${ }^{\mathrm{d}}$ Per 1.25 therm.
${ }^{\text {e }}$ Per $100 \mathrm{ft}^{3}$.
${ }^{\mathrm{f}}$ CNG, LNG, and LPG are exempt from motor fuel taxes when used as vehicle fuel until July 1, 2001.
${ }^{\mathrm{g}}$ For County of Honolulu; for County of Maui LPG tax is $\$ 0.20 / \mathrm{gal}$. and all other fuels are taxed at $\$ 0.18 / \mathrm{gal}$;; other counties have all fuels taxed at $\$ 0.26 / \mathrm{gal}$.
${ }^{\mathrm{h}}$ Per therm.
'Optional: flat fee may be paid instead.
${ }^{j}$ Per cubic foot; LNG is taxed at $\$ 0.12 / \mathrm{gal}$.
${ }^{k}$ Per $120 \mathrm{ft}^{3}$.
'Plus a petroleum business tax; the amount varies but is usually in the ballpark of \$0.12-\$0.14.
${ }^{m}$ Plus 0.1035 oil franchise tax.

${ }^{\text {a }}$ Reduced diesel rates are specified for marine fleets, trains and certain intercity buses. Diesel rates are also reduced for diesel/alcohol blends. Diesel used exclusively in state and local government fleets, non-profit organization vehicles, school buses and qualified local buses is exempt from Federal taxes.
${ }^{\mathfrak{b}}$ Qualified - contains at least 85 percent methanol or ethanol or other alcohol produced from a substance other than petroleum or natural gas.
"Partially exempt ->85 percent alcohol and produced from natural gas.
${ }^{\mathrm{d}}$ Thousand cubic feet.

Table 5.9
States With Ethanol Tax Incentives

| State E | hanol tax incentives |
| :---: | :---: |
| AK | \$0.08/ethanol gallon (blender) |
| CA | E85 and M85 excise tax is half of the gasoline tax. Neat alcohol fuels are exempt from fuel taxes. |
| FL | County governments receive waste reduction credits for using yard trash, wood, or paper waste as feed stocks for fuel. |
| HI | 4\% ethanol sales tax exemption |
| ID | \$0.21 excise tax exemption for ethanol or biodiesel |
| IN | $10 \%$ gross income tax deduction for improvements to ethanol producing facilities. |
| IL | $2 \%$ sales tax exemption for $10 \%$ volume ethanol blends |
| IA | \$0.0 1 (blender) |
| MN | \$0.25 (producer), \$0.005 (blender) until Oct. 1, 1997 |
| MO | \$0.20 (producer) |
| MT | \$0.30 (producer) |
| NE | \$0.20 (producer), \$0.50 ETBE (producer) |
| NC | Individual income and corporate tax credit of $20 \%$ for the construction of an ethanol plant using agricultural or forestry products; an additional $10 \%$ if the distillery is powered with alternative fuels. |
| ND | \$0.40 (producer) |
| OH | \$0.01 (blender), income tax credit |
| SD | \$0.20 (blender), \$0.20 (producer) Alternative fuels are taxed at \$0.06/gal |
| WY | \$0.40 (producer) |

${ }^{\text {DA Adjusted by }}$ the Consumer Price Inflation Index.

The total cost of operating an automobile is the sum of the fixed cost (depreciation, insurance, finance charge, and license fee) and the variable cost, which is related to the amount of travel. The cost of operating a car in 1998 (constant 1990 cents) was approximately 44 cents per mile. Gas and oil accountedfor only 11.5\% of total cost per mile in 1998, which was the same as 1996 and is the lowest in the series history.

[^25]
## VEHICLES IN USE

Both the Federal Highway Administration (FHWA) and The Polk Company report figures on the automobile and truck population each year. The two estimates, however, differ by as much as $25.6 \%$ for trucks (1992). The differences can be attributed to several factors:

- The FHWA data include all vehicles which have been registered at any time throughout the calendar year. Therefore, the data include vehicles which were retired during the year and may double count vehicles which have been registered in different states or the same states to different owners. The Polk Company data include only those vehicles which are registered on July 1 of the given year.
- The classification of mini-vans, station wagons on truck chasses, and utility vehicles as passenger cars or trucks causes important differences in the two estimates. The Polk Company data included passenger vans in the automobile count until 1980; since 1980 all vans have been counted as trucks. Recently, the Federal Highway Administration adjusted their definition of automobiles and trucks. Starting in 1993, some minivans and sport utility vehicles that were previously included with automobiles were included with trucks. This change produced a dramatic change in the individual percentage differences of cars and trucks. The difference in total vehicles has been less than $5 \%$ each year since 1990 and does not appear to be significantly affected by the FHWA reclassifications.
- The FHWA data include all non-military Federal vehicles, while The Polk Company data include only those Federal vehicles which are registered within a state. Federal vehicles are not required to have State registrations, and, according to the General Services Administration, most Federal Vehicles are not registered.

According to The Polk Company statistics, the number of passenger cars in use in the U.S. declined from 1991 to 1992. This is the first decline in vehicle stock since the figures were first reported in 1924. However, the data should be viewed with caution. A redesign of Polk's approach in 1992 allowed a national check for duplicate registrations, which was not possible in earlier years. Polk estimates that, due to processing limitations, its vehicle population counts may have been inflated by as much as $11 / 2$ percent. Assuming that percentage is correct, the number of passenger cars in use would have declined from 1991 to 1992 under the previous Polk method. The growing popularity of light trucks being used as passenger vehicles could also have had an impact on these figures.

The Polk Company, Detroit, MI. FURTHER REPRODUCTION PROHIBITED.
Vehicle travel-The average annual vehicle-miles per truck by age were multiplied by the number of trucks in operation by age to estimate the vehicle travel. Average annual miles per truck by age were generated by ORNL from the 1992 Truck Inventory and Use Survey public use tape provided by U.S. Department of Commerce, Bureau of the Census, Washington, DC, 1995. (Additional resources: http://www.polk.com,http://www.census.gov)

[^29]The average age of automobiles was lower than the average age of trucks until 1995. Since then, the average automobile age continues to grow, while the average truck age has held about the same. The increasingpopularity of light trucks aspersonalpassenger vehicles may have had an influence on the average age of trucks.

a "Sales period" is October 1 of the current year through September 30 of the next year.
${ }^{\mathrm{b}}$ Interior volumes of two-seaters are not reported to EPA.

Figure 7.1. Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98

[^38]The average auto lost over 300 pounds from 1978 to 1985, but gained a few pounds back since then. Much of the weight reduction was due to the declining use of conventional steel and iron and the increasing use of aluminum and plastics. Conventional steel, however, remained the predominant component of automobiles in 1998 with a $43 \%$ share of total materials. As conventional steel use has been decreasing, use of high-strength steel has increased.

Table 7.7
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998

| Material | 1978 |  | 1985 |  | 1998 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

[^46]Consumers must pay the Gas Guzzler Tax when purchasing an automobile that has an Environmental Protection Agency(EPA)fue economy rating less than that stipulated in the table below. The Gas Guzzler Tax doubled in 1991 after remaining constant from 1986 to 1990. The tax has not changed since 1991.

## New Data by Vehicle Speed

ORNL has developed fuel consumption and emissions lookup tables for the Federal Highway Administration, for use in their TRAF series of traffic models (NETSIM, CORSIM, FRESIM), although more generic uses are also possible. To develop the data-based models, vehicles are tested both on-road and on a chassis dynamometer. Engine parameters are measured on-road under real-world driving conditions that cover the vehicle's entire operating envelope. Emissions and fuel consumption are then measured on the chassis dynamometer as functions of engine conditions. The two data sets are merged to produce the final three-dimensional maps as functions of vehicle speed and acceleration. Eight well-functioning, late-model vehicles, and one 1997 model vehicle, have been tested thus far in fully warmed-up conditions.

Similar continuing work is planned for the Department of Energy as well as FHWA, which will include more well-functioning, late-model vehicles, pre-control (1960's) vehicles, malfunctioning high-emitter vehicles, light-duty diesel vehicles (cars and pickup trucks), alternative fuel vehicles, and possibly heavy-duty diesel vehicles. ORNL will also be developing cold-start algorithms to enhance the existing models, since emissions and fuel economy generally improve as vehicles warm up to normal operating temperatures.

[^47]The two earlier studies by the Federal Highway Administration (FHWA) indicate maximum fuel efficiency was achieved at speeds of 35 to 40 mph . The recent FHWA study indicates greater fuel efficiency at higher speeds. Note that the 1973 study did not include light trucks.

## Note:

For specifications of the tested vehicles, please see page 7-20.

The Environmental Protection Agency (EPA) tests new vehicles to determine fuel economy ratings. The city and highway fuel economies that are posted on the windows of new vehicles are determined by testing the vehicle during these driving cycles. The driving cycles simulate the performance of an engine while driving in the city and on the highway. Once the urban cycle is completed, the engine is stopped, then started again for the 8.5 minute hot start cycle.

Code of Federal Regulations, 40CFR, "Subpart B - Fuel Economy Regulations for 1978 and Later Model Year Automobiles - Test Procedures," July 1, 1988 edition, p. 676.

The New York Test Cycle was developed in the 1970's in order to simulate driving in downtown congested areas. The Representative Number Five Test Cycle was developed recently to better represent actual on-road driving by combining modern urban and freeway driving.

(Additional resources: http://www.fhwa.dot.gov)
${ }^{\mathbf{a}}$ The Federal Highway Administration changed the combination truck travel methodology in 1993.
${ }^{\mathrm{b}}$ Other single-unit trucks are defined as all single-unit trucks with more than two axles or more than four tires.
${ }^{\mathbf{c}}$ The fuel economy for combination trucks is not the same as the fuel economy for Class 8 trucks. Fuel economy for Class 8 trucks is shown in Table 8.5.

Table 8.2
New Retail Truck Sales by Gross Vehicle Weight, 1970-97"

Source:
American Automobile Manufacturers Association, Motor Vehicle Facts and Figures 1998, Detroit, MI, 1998, p. 24, and annual.
(Additional resources: http://www.aama.com)

[^48]There are many different definitions of light trucks used in the transportation industry. When using gross vehicle weight (GVW) to define light trucks, some data sources use cutoffs of 8,500 lbs. GVW and others use 10,000 lbs. GVW. The sales data for Class $2 a$ and $2 b$ trucks are estimated by using data from different sources.

Table 8.3
New Retail Sales of Light Trucks by Gross Vehicle Weight, 1970-97

Methodology by John D. Maples, Trancon, Inc.
1970-85: Estimated using Tables 3.18 and 3.19, Transportation Energy Data Book Edition 15, ORNL-6856.
Assumes all imports and transplants are Class 1. Assumes Class 2a is $65 \%$ of Class 2 sales and Class 2 b is $35 \%$ (average of available data).
1986-97: American Automobile Manufacturers Association (AAMA), Motor Vehicle Facts and Figures 1998, U.S. Sales of Trucks by Gross Vehicle Weight Rating and Body Type, pg. 24, and annual. U.S. Department of Transportation, National Highway Traffic Safety Administration (NHTSA), "Summary of Fuel Economy Performance, 1999," and annual. NHTSA's sales for trucks $\leq 8,500 \mathrm{lbs}$. GVW were subtracted from AAMA sales for trucks $\leq 10,000 \mathrm{lbs}$. GVW to estimate Class 2 b sales.

## Truck Inventory and Use Survey

The Truck Inventory and Use Survey (TIUS) provides data on the physical and operational characteristics of the Nation's truck population. It is based on a probability sample of private and commercial trucks registered (or licensed) in each state. Data for 1992 have been released in a report, as well as on CD-ROM. Copies may be obtained by contacting the U.S. Bureau of the Census, Transportation Characteristics Surveys Branch (30 1)457-2797. Internet site http://www.census.gov/svsd/www/tiusview.html is the location of the TIUS on-line.

The 1987 and 1992 surveys, in addition to trucks, included minivans, vans, station wagons on truck chassis, and jeep-like vehicles. The 1977 and 1982 surveys did not include those vehicle types. The estimated number of trucks that were within the scope of the 1992 TIUS and registered in the U.S. as of July 1, 1992, was 59.2 million. These trucks were estimated to have been driven a total of 786.3 billion miles during 1992, an increase of $33.7 \%$ from 1987. The average annual miles traveled per truck was estimated at 11,900 miles.

In the 1992 TIUS, there are several ways to classify a truck by weight. The survey respondent was asked the average weight of the vehicle or vehicle-trailer combination when carrying a typical payload; the empty weight (truck minus cargo) of the vehicle as it was usually operated; and the maximum gross weight at which the vehicle or vehicle-trailer combination was operated. The Census Bureau also collected information on the Gross Vehicle Weight Class of the vehicles (decoded from the vehicle identification number) and the registered weight of the vehicles from the State registration files. Some of these weights are only provided in categories, while others are exact weights. Since all these weights could be quite different for a single truck, the tabulations by weight can be quite confusing. For illustration of this, see Tables 8.4 and 8.5. The first set of data are based on the Gross Vehicle Weight Class of the vehicle when it was manufactured; the data on Table 8.5 are based on the average weight as reported by the respondent. There is a $22.8 \%$ difference in the number of Class 1 trucks. In most tables, the Gross Vehicle Weight Class was used. However, on the tables comparing different survey estimates, average weight must be used, as the older surveys did not include data on the Gross Vehicle Weight rating.

The 1997 survey data are available on the web site for selected states; nationwide data are expected in late 1999. The name of the 1997 survey was changed to the Vehicle Inventory and Use Survey due to future possibilities of including additional vehicle types.

These tables illustrate the difference between two weight variables in the Truck Inventory and Use Survey. The manufacturer's gross vehicle weight class is likely to be a more accurate representation,

Though diesel engines are generally more efjcient than gasoline engines, variations in patterns of use and weight distributions within a weight category can cause the fuel economies to be more similar. Data in the Total row give a good indication that the gasoline trucks are mainly lighter vehicles and diesels are used in heavier applications.

## Commodity Flow Survey

The Commodity Flow Survey (CFS) is designed to provide data on the flow of goods and materials by mode of transport. The 1993 CFS is a continuation of statistics collected in the Commodity Transportation Survey from 1963 through 1977, and includes major improvements in methodology, sample size, and scope. A sample of 200,000 domestic establishments randomly selected from a universe of about 900,000 establishments engaged in mining, manufacturing, wholesale, auxiliary establishments (warehouses) of multi-establishment companies, and some selected activities in retail and service was used. Each selected establishment reported a sample of approximately 30 outbound shipments for a two-week period in each of the four calendar quarters of 1993. This produced a total sample of about 20 million shipments. For each sampled shipment, zip codes of origin and destination, 5-digit Standard Transportation Commodity Classification (STCC) code, weight, value, and modes of transport, were provided. Establishments were also asked to indicate whether the shipment was containerized, a hazardous material, or an export.

The 1993 CFS differs from previous surveys in its greatly expanded coverage of intermodalism. Earlier surveys reported only the principal mode. The 1993 survey reports all modes used for the shipment (for-hire truck, private truck, rail, inland water, deep sea water, pipeline, air, parcel delivery or U.S. Postal Service, other mode, unknown). Route distance for each mode for each shipment as imputed from a mode-distance table developed by Oak Ridge National Laboratory. Distance, in turn, was used to compute ton-mileage by mode of transport.

The CFS was conducted again in 1997, with few changes from the 1993 survey. These data are scheduled to be released in the Fall of 1999. For more information about the CFS, contact the Commodity Flow Survey Branch, Department of Commerce, Bureau of the Census, Services Division at (301) 457-2108, or visit the following Internet site: http://www.bts.gov/cfs .

|  | Heable alternative fuel vehicles, 1997 | 66,684 |
|  | LPG | 52,002 |
|  | CNG | 13,318 |
|  | LNG | 643 |
|  | M85/M100 | 178 |
|  | E95 | 347 |
|  | Electric | 196 |
|  | Number of alternative fuel refuel sites, 1998 | 7,271 |
|  | LPG | 5,318 |
|  | CNG | 1,268 |
|  | LNG | 66 |
|  | M85 | 91 |
|  | E85 | 40 |
|  | Electric | 486 |

Fuel type abbreviations are used throughout this chapter.
$L P G=$ liquified petroleum gas
CNG $=$ compressed natural gas
$M-85=85 \%$ methanol, $15 \%$ gasoline
E-85 = $85 \%$ ethanol, $15 \%$ gasoline
M-l $00=100 \%$ methanol
E-95 = 95\% ethanol, 5\% gasoline
LNG $=$ liquified natural gas

## THE ALTERNATIVE FUELS DATA CENTER

The Department of Energy (DOE) has established the Alternative Fuels Data Center (AFDC) in support of its work aimed at fulfilling the Alternative Motor Fuels Act (AMFA) directives. The AFDC is operated and managed by the National Renewable Energy Laboratory (NREL) in Golden, Colorado.

The purposes of the AFDC are:

- to gather and analyze information on the fuel consumption, emissions, operation, and durability of alternative fuel vehicles, and
- to provide unbiased, accurate information on alternative fuels and alternative fuel vehicles to government agencies, private industry, research institutions, and other interested organizations.

The data are collected for three specific vehicle types: (1) light vehicles, including automobiles, light trucks, and mini-vans; (2) heavy vehicles such as tractor-trailers and garbage trucks; and (3) urban transit buses. An Oracle Relational Database Management System is used to manage the data, along with a statistical software package capable of providing statistical, graphic, and textual information to users. Several tables and graphs in this chapter contain statistics which were generated by the AFDC. Future editions of the Transportation Energy Data Book will continue to present graphical and statistical information from the AFDC.

The Department of Energy is sponsoring the National Alternative Fuels Hotline for Transportation Technologies in order to assist the general public and interested organizations in improving their understanding of alternative transportation fuels. The Hotline can be reached by dialing 1-800-423-1DOE, or on the Internet at http://www.afdc.nrel.gov.

There are more $L P G$ vehicles in use than any other alternative fuel vehicle. The population of E85 vehicles, however,
has grown the most since 1992. For details on alternative fuel use by fuel type, see Table 2.10

Clean Cities is a locally-basedgovernment/industrypartnership, coordinated by the U.S. Department of Energy to expand the use of alternatives to gasoline and dieselfuel. By combining the decision-making with voluntary action by partners, the " $g$ rass-roots" approach of Clean Cities departs from traditional "top-down" Federal programs. It establishes a plan, carried out at the local level, for creating a sustainable, nationwide alternative fuels market.

Table 9.6
List of Clean Cities as of 9/1/99 by Designation

1. Atlanta, GA -9/8/93
2. Denver, CO- 9/13/93
3. Philadelphia, PA - 9/22/93
4. State of Deleware - 10/12/93
5. Las Vegas, NV $-10 / 18 / 93$
6. Washington, DC $-10 / 21 / 93$
7. Boston, MA $-3 / 18 / 94$
8. Austin, TX $-4 / 18 / 94$
9. Florida Gold Coast $-5 / 3 / 94$
10. Chicago, IL - 5/13/94
11. Albuquerque, $\mathrm{NM}-6 / 1 / 94$
12. Wisconsin - SE Area $-6 / 30 / 94$
13. Colorado Springs, CO - 7/13/94
14. Long Beach, CA - $8 / 31 / 94$
15. Lancaster, CA $-9 / 22 / 94$
16. Salt Lake City, UT $-10 / 3 / 94$
17. White Plains, NY - 10/4/94
18. Baltimore, MD - 10/7/94
19. State of WV - 10/18/94
20. Louisville, KY - 10/18/94
21. Rogue Valley, OR - $11 / 10 / 94$
22. San Francisco, CA - 10/21/94
23. Sacramento, CA - 10/2 1/94
24. South Bay (San Jose), CA -10/21/94
25. East Bay, CA - 10/21/94
26. San Joaquin Valley, CA -10/21/94
27. Western New York - 1 1/4/94
28. Portland, OR - 11/10/94
29. St. Louis, MO - $11 / 18 / 94$
30. Waterbury, CT - 1 1/21/94
31. Connecticut Southwestern Area, -1 1/21/94
32. Norwich, CT - $11 / 22 / 94$
33. New London, CT - 1 1/22/94
34. Peoria, IL - 11/22/94
35. Kansas - SW Area - 3/30/95
36. Central New York $-6 / 15 / 95$
37. Dallas/Ft. Worth, TX -7/25/95
38. Honolulu, HI - 8/29/95
39. Missoula, MT - $9 / 21 / 95$
40. New Haven, CT - 10/5/95
41. Central Arkansas - $10 / 25 / 95$
42. Paso Del Norte - 1 1/17/95
43. Pittsburgh, PA $-12 / 5 / 95$
44. S. California Assn. Gov. - 3/1/96
45. Los Angeles, CA - $3 / 22 / 96$
46. Coachella Valley, CA - 4/22/96
47. Weld/Larimer/Rocky Mountain

National Park - 5/2 1/96
48. Central Oklahoma - 5/29/96
49. Hampton Roads, VA -10/4/96
50. San Diego, CA $12 / 12 / 96$
51. Long Island, NY-1 O/l $8 / 96$
52. Detroit, MI/Toronto,ON -12/18/96
53. Cincinatti, $\mathrm{OH}-1 / 29 / 97$
54. Evansville, IN $-1 / 30 / 97$
55. Houston, TX - 9/4/97
56. Portland, ME - 9/4/97
57. Tulsa, OK -9/22/97
58. Maricopa Assn. of Govts. - 10/8/97
59. Riverside, CA - 10/24/97
60. North Jersey, NJ - 10/3 1/97
61. Corpus Christi, TX - 3/30/98
62. Genesee Region, Rochester, NY - 5/28/98
63. Red River Valley/Grand Forks, ND - 8/10/98
64. Puget Sound, WA $-8 / 13 / 98$
65. Providence, RI - 9/14/98
66. Omaha, NE - 9/18/98
67. Kansas City, KS/MO - 1 1/18/98
68. Central Indiana CC Aliance, IN - 3/4/99
69. Ann Arbor, MI - 4/19/99
70. Capital District (Albany), NY - 4/26/99
71. South Shore, IN - 6/15/99
72. Capital Clean Cities of CT - 6/2 1/99

## U.S. ADVANCED BATTERY CONSORTIUM

Electric and hybrid-electric vehicles are the subject of intense research and development because they are required to be sold in California ( $10 \%$ in 2003) under the California LowEmission Vehicle (LEV) program. Other states, such as New York and Massachusetts, have indicated that they will also enforce the LEV program. One of the greatest advantages in using electric vehicles is that there are no tailpipe emissions. The U.S. Advanced Battery Consortium (USABC) was established in January 1991 to concentrate efforts on battery development for future electric vehicles. The USABC consists of the Big Three U.S. auto manufacturers (Chrysler, Ford, General Motors), the Electric Power Research Institute, and the U.S. Department of Energy. Five major U.S. electric utilities are also direct participants in USABC.

The USABC has established research contracts with several companies for the development of advanced batteries. Also, a series of Cooperative Research and Development Agreements (CRADAs) with several DOE National Laboratories have been established.

U.S. Advanced Battery Consortium, February, 1999.

Today's lead acid batteries provide 30-40 watt hours per kilogram, cost between \$50-150 per kilowatt hour, and have a two- to three-year lifetime. However, the batteries currently used in electric vehicles do not provide the energy or performance sufficient to make these vehicles competitive with gasoline-fueled vehicles. When attained, the Advanced Battery Technology goals will effectively double the range and performance of electric vehicles compared to the range and performance possible with today's battery technology.

Table 9.8
U.S. Advanced Battery Consortium Goals for Electric Vehicle Batteries

| Primary criteria | Mid-term goals (1997) | $\begin{aligned} & \text { Long-term goals }{ }_{(2000)}^{\text {a }} \end{aligned}$ |
| :---: | :---: | :---: |
| Power density ${ }^{\text {b }}$ W/L | 250 | 460 |
| Specific power ${ }^{\text {b }} \mathrm{W} / \mathrm{kg}$ ( $80 \%$ DOD/30 sec) | 150 (200 desired) | 300 |
| Energy density ${ }^{\text {b }} \mathrm{Wh} / \mathrm{L}$ ( $\mathrm{C} / 3$ discharge rate) | 135 | 230 |
| Specific energy ${ }^{\text {b }}$ Whikg (C/3 discharge rate) | 80 (100 desired) | 150 |
| Life (years) | 5 | 10 |
| Cycle life ${ }^{\text {b }}$ (cycles) (80\% DOD) | 800 | $\begin{gathered} 1000 \\ 1800 \text { (@50\% DOD) } \\ 2670 \text { (@ } 30 \% \text { DOD) } \end{gathered}$ |
| Power and capacity degradation ${ }^{\text {b }}$ (\% of rated spec) | 20\% | 20\% |
| Ultimate price' (\$/kWh)(10,000 units @ 40 kWh ) | $<\$ 150$ | $<\$ 150$ (desired to75) |
| Operating environment | -30 to $65^{\circ} \mathrm{C}$ | -30 to $65^{\circ} \mathrm{C}$ |

# Chapter 10 Fleet Vehicles and Characteristics 

Summary Statistics from Tables/Figures in this Chapter

| Source |  |  |
| :---: | :--- | :---: |
| Figure 10.1 | Fleet automobiles, 1998 | $4,852,000$ |
| Figure 10.1 | Fleet Class 1-5 Trucks, 1998 | $4,224,000$ |
| Table 10.4 | Average annual miles per automobile |  |
|  | Business fleets | 29,200 |
|  | Utility fleets | 14,500 |
|  | Government fleets | 13,700 |
| Table 10.5 | Federal Government vehicles, FY 1996 | 550,373 |
|  | Automobiles | 113,366 |
|  | Buses | 6,376 |
|  | Light trucks | 381,525 |
|  | Medium trucks | 32,281 |
|  | Heavy trucks | 16,825 |

Significant changes have been made in recent years to fleet vehicle estimations. Newly available data improve the accuracy of fleet vehicle estimates but, at the same time, make it impossible to compare the data historically. Therefore, only the 1998 data arepresented here.

Figure 10.1. Fleet Vehicles in Service as of January 1, 1998

Source:
Bobit Publishing Company, Automotive Fleet Research Department, Automotive Fleet Factbook 1998, Redondo Beach, CA, 1998. (Additional resources: http://www.fleet-central.com)
Note:
Truck classes 1-5 are 19,500 lbs. and less.

These are the top ten states in terms of fleets andjleet vehicles, according to Dwight's Energydata, Denver, CO. Autos and light trucks make up the largest share of fleet vehicles in each of the states. The average number of vehicles per fleet is the highest in Florida and California.

Table 10.1
Top Ten States with Fleets of Ten Vehicles or More, 1999

| States | Fleets of ten vehicles or more | Fleet vehicles |  |  |  |  | Average vehicles per fleet ${ }^{\text {a }}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Trucks | Trucks | Trucks |  |  |
|  |  | Autos | (class 1-2) | (class 3-5) | (class 6-8) | Total |  |

${ }^{\text {a }}$ These data are reported under new requirements for FY 1997. Data for some agenciesmay be missing or incomplete.

The Energy Policy Act of 1992 (EPACT) set alternative fuel vehicle acquisition requirements for Federal and State Governments, fuel providers and the private sector. Additional rule making has adjusted the original purchase requirements. State government andfuelproviders requirements began in 1997.

Transportation (18.6\%) is second only to housing (30.6\%) as the largest expenditure for the average household. In 1996, approximately $17 \%$ of transportation expenditures were for purchasing gasoline and motor oil. There is an average of two vehicles per household.

[^58]Household vehicle ownership shows a dramatic increase from 1960 to 1990. In 1960, nearly $79 \%$ of households owned less than two vehicles; by 1990, it declined to 45\%. Census data prior to 1990 indicated that the majority of households owned one vehicle; in 1990 that changed to two vehicles.

[^59]
## 1995 Nationwide Personal Travel Survey

The 1995 Nationwide Personal Travel Survey (NPTS) is a national survey designed to collect data on the nature and characteristics of personal travel. The definition of a trip in the NPTS is "any one-way travel from one addressto another by private motor vehicle, public transportation, bicycle, or walking." Excluded from the survey are jogging and walking for exercise, as is all bicycling and walking for individuals under 5 years of age. The survey collects detailed data on household trips, their purposes and the transportation modes used. The NPTS is sponsored by several agencies of the U.S. Department of Transportation and is conducted approximately every seven years. Since each of the surveys differ somewhat in terminology, survey procedure, and target population, one should be cautious when comparing statistics from one survey to the next. Improved methodologies used in the collection of the trip information in the 1995 NPTS make it impossible to compare these data with past NPTS survey data. Thus, the 1990 NPTS trip data have been adjusted to make it comparable with the latest survey. Both the original 1990 data and the adjusted 1990 data are shown in tables comparing trip information. The 1995 trip data should only be compared to the adjusted 1990 trip data, and the original trip 1990 data should be compared with previous surveys. Additional analyses can be done on the 1995 NPTS data through the Internet site: http://www-cta.ornl.gov/npts.

Table 11.5

## Source:

U.S. Department of Transportation, Federal Highway Administration, 1990 Nationwide Personal Transportation Survey: Summary of Travel Trends, FHWA-PL-92-027, Washington, DC, March 1992, Table 2. Data for 1995 were generated from the Internet site http://www-cta.ornl.gov/npts.
(Additional resources: http://www.fhwa.dot.gov)

## Note:

Average vehicle trip length for 1990 and 1995 is calculated using only those records with trip mileage information present. The 1969 survey does not include pickups and other light trucks as household vehicles.

The 1995 NPTS data should be compared only to the 1990 adjusted data due to survey methodology improvements in collecting trip information. The original 1990 data are comparable to all previous surveys; however, comparisons should always be made with caution because of differing survey methodologies.

Data for 1995 were generated from the Internet site http://www-cta.ornl.gov/npts. 1990 adjusted data - Oak Ridge National Laboratory, Oak Ridge, TN, August 1998. (Additional resources: http://www.fhwa.dot.gov, http://www-cta.ornl.gov/npts)

## Note:

Average person trip length for 1990 and 1995 is calculated using only those records with trip mileage information present. "All purposes" includes unreported trip purposes.

[^60]Figure 11.1. Average Vehicle Occupancy by Vehicle Type, 1995 NPTS

The average vehicle occupancy, calculated as person-miles per vehicle-mile, was nearly identical in 1990 and 1995 for every trip purpose. The highest vehicle occupancy levels were in 1977. The increased number of vehicles per household and the decrease in average household size could have contributed to the decline since then.

(Additional resources: http://www.fhwa.dot.gov, http://www-cta.ornl.gov/npts)

Less than $27 \%$ of all household vehicle-miles are trips to or from work. Errands such as family and personal business and shopping (combined) make up a third of vehicle travel. One quarter of all trips 75 miles or longer (one way) were for the purpose of visiting friends or relatives.

[^61]As households owned more vehicles, the average annual miles for the most frequently driven vehicle increased. For example, the mostrequently driven vehicle in five-vehicle households was driven $26 \%$ more per year than the one in two-vehicle households ( 21,177 miles vs. 16,804 miles).

[^62]Historically, the data from the Nationwide Personal Transportation Study (NPTS) are based on estimates reported by survey respondents. For the 1995 survey, odometer data was also collected. The Residential Transportation Energy Consumption Survey (RTECS) data has always been collectedfrom odometer readings. These data indicate that respondents may overestimate the number of miles driven in a year.

Note:
Data include all household vehicles. Data have been rounded to the nearest hundred.

In 1995 the average journey-to-work speed was faster (miles per hour increased to 34.6), but the travel time still increased, due to an increase in the average travel distance. Journeys-towork using public transportation continued to take twice as long as private transportation, though there is only a slight difference in travel distance.

${ }^{\text {a }}$ It is believed that the methodology changes in the 1995 NPTS did not affect journey-to-work trips; therefore, no adjustment is necessary.
${ }^{b}$ Does not include time spent waiting for transportation.
${ }^{\text {c Does not include segmented trips. }}$

According to the U.S. Census data, the percentage of workers who car pooled has dropped from $19.7 \%$ in 1980 to 13.4\% in 1990. Thepercent ofworkers usingpublic transit declinedfrom $6.4 \%$ to $5.3 \%$ during the same time period. The average travel time increased by 0.7 minutes from 1980 to 1990.

## 1995 American Travel Survey

The American Travel Survey (ATS) was conducted by the Bureau of Transportation Statistics to obtain information about the long-distance travel of persons living in the United States. Approximately 80,000 randomly selected households were interviewed for the survey, which collected information about all trips of 100 miles or more, one-way, taken by household members in 1995. The ATS data provide detailed information on state-to-state travel, as well as travel to and from metropolitan areas by mode of transportation.

For additional information about the American Travel Survey, contact the Bureau of Transportation Statistics at (202) 366-3282 or visit the following Internet site: http://www.bts.gov/ats

Note:
Coastwise applies to domestic traffic receiving a carriage over the ocean or between the Great Lakes ports and seacoast ports when having a carriage over the ocean.
Lakewise applies to traffic between United States ports on the Great Lakes. Internal applies to traffic between ports or landings wherein the entire movement takes place
on inland waterways. Local applies to movements of freight within the confines of a port.
"Does not include intra-territory tons.
${ }^{\mathrm{b}}$ Calculated as ton-miles divided by tons shipped.
${ }^{\circ}$ Negligible.

The Interstate Commerce Commission designates Class I railroads on the basis of annual gross revenues. In 1997, nine railroads were given this classification.

Table 12.6
Class I Railroad Freight Systems in the United States
Ranked by Revenue Ton-Miles, 1997

| Railroad | Revenue ton-miles <br> (billions) | Percent |

[^66]The "other" category, which consists primarily of intermodal traffic, has grown $119 \%$ in carloads from 1974 to 1997. Coal now accounts for one quarter of all carloads.

The number of trailers and containers moved by railroads has increased more than four-fold from 1965 to 1997. Containerization has increased in recent years, evidenced by the $128 \%$ increase in the number of containersfrom 1988 to 1997. According to the 1993 Commodity Flow Survey, $4.5 \%$ of all freight ton-miles are rail intermodal shipments (truck/rail or rail/water). See Table 8.1 1 for details.

## APPENDIX A

## SOURCES

This appendix contains documentation of the estimation procedures used by ORNL. The reader can examine the methodology behind the estimates and form an opinion as to their utility.

The appendix is arranged by table number and subject heading. Only tables which contain ORNL estimations are documented in Appendix A; all other tables have sources listed at the bottom of the table. Since abbreviations are used throughout the appendix, a list of abbreviations is also included.

## List of Abbreviations Used in Appendix A

| AAMA | American Automobile Manufacturers Association |
| :--- | :--- |
| AAR | Association of American Railroads |
| APTA | American Public Transit Association |
| Amtrak | National Railroad Passenger Corporation |
| Btu | British thermal unit |
| DOC | Department of Commerce |
| DOE | Department of Energy |
| DOT | Department of Transportation |
| EIA | Energy Information Administration |
| EPA | Environmental Protection Agency |
| FAA | Federal Aviation Administration |
| FHWA | Federal Highway Administration |
| gvw | gross vehicle weight |
| lpg | liquefied petroleum gas |
| mpg | miles per gallon |
| NHTSA | National Highway Traffic Safety Administration |
| NPTS | Nationwide Personal Transportation Study |
| ORNL | Oak Ridge National Laboratory |
| pmt | passenger-miles traveled |
| RECS | Residential Energy Consumption Survey |
| RTECS | Residential Transportation Energy Consumption Survey |
| TIUS | Truck Inventory and Use Survey |
| TSC | Transportation Systems Center |
| vmt | vehicle-miles traveled |

Table 2.5
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997

Most of the source data were given in gallons. It was converted to Btu by using the conversion factors in Appendix B.

## Highway

## Automobiles

Total gallons of fuel taken from DOT, FHWA, Highway Statistics 1997, Table VM- 1. These were distributed as follows: 97.\% gasoline, $1.0 \%$ gasohol, and $1.3 \%$ diesel. Percentages were derived from the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumptiqn 1994, August 1997, p. 46. Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Automobiles were assumed to use $25 \%$ of light vehicle natural gas use. Methanol use was estimated using data from DOE, EIA, Alternatives to Traditional Transportation Fuels 1997, Washington, DC, 1998, Table 12.

## Motorcycles

DOT, FHWA, Highway Statistics 1997, Table VM-1. For conversion purposes, fuel for all motorcycles was assumed to be gasoline.

## Buses

## Transit:

APTA, 1999 Transit Fact Book, 1999, Washington, DC.
Non-diesel fossil fuel consumption was assumed to be used by motor buses,

## Intercity:

Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for all intercity buses was assumed to be diesel fuel. (1997 data were estimated using vehicle travel information.)

## School:

Gasoline and Diesel - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for school buses was assumed to be $60 \%$ diesel fuel and $40 \%$ gasoline.
Methanol - Methanol use was estimated using data from DOE, EIA, Alternatives to Traditional Transportation Fuels 1997, Washington DC, 1998.

## Trucks

## Total:

Sum of light trucks and other trucks.

## Light Trucks:

DOT, FHWA, Highway Statistics 1997, Table VM-1, for single-unit, 2-axle, 4-tire trucks. $96.2 \%$ of fuel assumed to be gasoline, $3.3 \%$ diesel, $0.3 \%$ lpg; percentages were generated from the 1992 TIUS Public Use Tape. Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Light trucks were assumed to use $75 \%$ of light vehicle natural gas use.

## Other Trucks:

DOT, FHWA, Highway Statistics 1997, Table VM-1. Total gallons for other trucks was the difference between total and 2 -axle, 4 -tire trucks. These gallons were distributed as follows based on data from the 1992 TIUS Public Use Tape: 16.2\% of fuel assumed to be gasoline, $83.3 \%$ diesel, and $0.5 \% \mathrm{lpg}$.

## Off Highway

## Diesel:

Data supplied by Marianne Mintz, Argonne National Laboratory, from the Public Use Data Base, National Energy Accounts, DOC, OBA-NEA- 10, August 1988.

Gasoline:
dot, FHWA, Highway Statistics 1997, Table MF-24. Agriculture and Construction totals.

## Nonhighway

Air

## General Aviation:

DOT, FAA, General Aviation Activity and Avionics Survey: Annual Summary Report Calendar Year 1997, Table 5.1. Jet fuel was converted from gallons to Btu using 135,000 Btu/gallon (kerosene-type jet fuel).

## Domestic and International Air Carrier:

DOT, Bureau of Transportation Statistics, "Fuel Cost and Consumption Tables;" annual figures were obtained by summing monthly totals. Because the data for international included fuel purchased abroad, the international total was divided in half to estimate domestic fuel use for international flights.

## Water

## Freight:

Total - DOE, EIA, Fuel Oil and Kerosene Sales 1997, Table 23. Adjusted sales of distillate and residual fuel oil for vessel bunkering. (This may include some amounts of bunker fuels used for recreational purposes.)

## Recreational Boating:

Fuel use by recreational boating was calculated using the methodology developed by D. L. Greene in the report, Off-Highway Use of Gasoline in the United States (DOT, FHWA, July 1986, p. 3-22). Results from Model 1 in the report indicated an average annual consumption of 205 gallons per boat. Total consumption in gallons was then calculated using the following equation: Total $=0.95$ (Gal/boat) (number ofboats). An estimate of number of recreational boats in operation is from the U.S. Coast Guard (numbered boats).

## Pipeline

The sum of natural gas, crude petroleum and petroleum product, and coal slurry and water.
Natural Gas:
The amount of natural gas used to transport natural gas was defined as "pipeline fuel" as reported in DOE, EIA, Natural Gas Annual 1997, Table 1. Cubic feet were converted to Btu using $1,031 \mathrm{Btu} / \mathrm{ft}^{3}$. Electricity use was estimated using the following procedure as reported on p. 5-110 of J. N. Hooker et al., End Use Energy Consumption DataBase: Transportation Sector. The energy consumption of a natural gas pipeline 'was taken to be the energy content of the fuel used to drive the pumps. Some $94 \%$ of the installed pumping horsepower was supplied by natural gas. The remaining $6 \%$ of the horse power was generated more efficiently, mostly by electric motors. The energy consumed by natural gas pipeline pumps that were electrically powered was not known. In order to estimate the electricity consumed, the Btu of natural gas pipeline fuel consumed was multiplied by a factor of 0.015 . From this computed value, electricity efficiency and generation loss must be taken into account. The electricity energy use in Btu must be converted to kWhr , using the conversion factor $29.305 \times 10^{-5} \mathrm{kWhr} / \mathrm{Btu}$. Electricity generation and distribution efficiency was $29 \%$. When generation and distribution efficiency are taken into account, 1 kWhr equals $11,765 \mathrm{Btu}$.

Crude petroleum and petroleum product:
J. N. Hooker, Oil Pipeline Energy Consumption and Efficiency, ORNL-5697, ORNL, Oak Ridge, TN, 198 1. (Latest available data.)

Coal slurry and water:
W. F. Banks, Systems, Science and Software, Energy Consumption in the Pipeline Industry, LaJolla, CA, October 1977. (Latest available data.)

Rail
Total:
Sum of freight and passenger rail.

## Freight:

AAR, Railroad Facts, 1998 Edition, Washington, DC, 1998, p. 60.

## Passenger:

Transit and Commuter - APTA, 1999 Transit Fact Book, Washington, DC, 1999, p. 106-108. Transit was defined as the sum of "heavy rail," "light rail," and "other."
Intercity - Personal communication with Amtrak, Washington, DC. (1997 data were estimated using train-mile information.)

Table 2.7
Transportation Energy Consumption by Mode, 1970-97

## Highway

## Automobiles

Total gallons of fuel for automobiles was taken from DOT, FHWA, Highway Statistics Summary to 199.5, Table VM-20 1A; and Table VM- 1 in the 1996 annual edition. Fuel for automobiles was distributed between fuel types for conversion into Btu's as follows:

1970-80-94.7\% gasoline, 5.3\% diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Energy Consumption Survey: Consumption Patterns of Household Vehicles, June 1979 to December 1980, p. 10.
198 1-82-94.1\% gasoline, 5.9\% diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Energy Consumption Survey: Consumption Patterns of Household Vehicles, Supplement: January 1981 to September 1981, pp. 11, 13.
1983-84-97.5\% gasoline, 2.5\% diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Residential Transportation Energy Consumption Survey: Consumption Patterns of Household Vehicles, 1983, Jan., 1985, pp. 7, 9.
1985-87-98.5\% gasoline, 1.5\% diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Transportation Energy Consumption Survey: Consumption Patterns of Household Vehicles 1985, April 1987, pp. 25, 27.
1988-90-98.8\% gasoline and $1.2 \%$ diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumption 1988, March 1990, p. 65.
199 1-93-97.8\% gasoline, $1.0 \%$ gasohol, and $1.2 \%$ diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumption 1991, December 1993, p. 46.
1994-97-97.7\% gasoline, 1. O\% gasohol, $1.3 \%$ diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Household Vehicles Energy Consumption, 1994, Washington, DC, August 1997, p. 46.
1993-97 - Methanol use was estimated using data from DOE, EIA, Alternatives to Traditional Transportation Fuels 1997, Washington, DC, 1998, Table 12.
1993-97 - Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Automobiles were assumed to use $25 \%$ of light vehicle natural gas use.

## Motorcycles

Department of Transportation, Federal Highway Administration,Highway Statistics Summary to 1995, Table VM-201A; and Table VM-1 in the 1996 and 1997 annual editions. For conversion purposes, fuel for all motorcycles was assumed to be gasoline.

## Buses

Sum of transit, intercity and school.

## Transit:

APTA, 1999 Transit Fact Book, January 1999, Washington, DC, pp. 106-108, and annual.
Non-diesel fossil fuel consumption was assumed to be used by motor buses. For the years 1988-92, motor bus gasoline use wasestimated as $5 \%$ of "other" fuels, based on personal communication with the APTA Research and Statistics Department.

## Intercity:

1970-84 - American Bus Association, Annual Report, Washington, DC, annual.
1985-97- Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for all intercity buses was assumed to be diesel fuel. (1997 data were estimated using vehicle travel information.)

## School:

1970-84 - DOT, FHWA, Highway Statistics 1984, Washington, DC, Table VM-1, and annual.
1985-86 - DOT, Research and Special Programs Administration, National Transportation Statistics, Figure 2, p. 5, and annual.
1987-97- Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for school buses was assumed to be $60 \%$ diesel fuel and $40 \%$ gasoline. (1996 data were estimated using vehicle travel information.)

## Trucks

## Light Trucks:

Defined as 2-axle, 4-tire trucks. Total gallons of fuel was taken from DOT, FHWA, Highway Statistics Summary to 1995, Table VM-201A, and Table VM-1 of the 1996 and 1997 annual editions. Based on data from the 1982 TIUS Public Use Tape, fuel use for 1970-87 was distributed among fuel types as follows: $95.3 \%$ gasoline; $3.5 \%$ diesel; and $1.2 \% \mathrm{lpg}$. Fuel use for $1988-93$ was distributed based on the 1987 TIUS: $96.6 \%$ gasoline; $3.3 \%$ diesel; and $0.1 \% \mathrm{lpg}$. Fuel use for $1994-97$ was distributed based on the 1992 TIUS: $96.4 \%$ gasoline; $3.3 \%$ diesel; $0.3 \%$ Ipg. Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Light trucks were assumed to use $75 \%$ of light vehicle natural gas use.

## Other Trucks:

Defined as the difference between total trucks and 2-axle, 4-tire trucks. Total gallons of fuel was taken from DOT, FHWA, Highway Statistics Summary to 1995, Table VM201A, and Table VM-1 of the 1996 and 1997 annual editions. Based on data from the 1982 TIUS Public Use Tape, fuel use for 1970-87 was distributed among fuel types as follows: $39.6 \%$ gasoline; $59.4 \%$ diesel; and $1.0 \%$ Ipg. Fuel use for 1988-93 was distributed based on the 1987 TIUS: $19.4 \%$ gasoline; $80.4 \%$ diesel; and $0.2 \% \mathrm{lpg}$. Fuel use for $1994-97$ was distributed based on the 1992 TIUS: $16.2 \%$ gasoline; $83.3 \%$ diesel; and $0.5 \%$ Ipg.

## Total Highway

Sum of autos, motorcycles, buses, light trucks, and other trucks.

## Nonhighway

## Air

Sum of fuel use by General Aviation and Certificated Route Air Carrier.

## General Aviation:

1970-74 - DOT, TSC, National Transportation Statistics, Cambridge, MA, 1981.
1975-85- DOT, FAA, FAA Aviation Forecasts, Washington, DC, annual.
1985-97-DOT, FAA, General Aviation Activity and Avionics Survey: Annual Summary Report, Calendar Year 1997, Table 5.1. Jet fuel was converted from gallons to Btu using $135,000 \mathrm{Btu} /$ gallon (kerosene-type jet fuel).

## Certificated Route Air Carrier:

1970-81- DOT, Civil Aeronautics Board, Fuel Cost and Consumption, Washington, DC, annual.
1982-97- DOT, Bureau of Transportation Statistics, "Fuel Cost and Consumption Tables;" annual figures were obtained by summing monthly totals. These data are for domestic carriers, but include the international operations of those domestic carriers. The international operations total was divided in half to estimate domestic fuel use for international flights.

## Water

Sum of vessel bunkering fuel (i.e., freight) and fuel used by recreational boats.

## Freight:

Total - DOE, EIA, Fuel Oil and Kerosene Sales 1997, Table 23. Adjusted sales of distillate and residual fuel oil for vessel bunkering.(This may include some amounts of bunker fuels used for recreational purposes.)

## Recreational Boating:

1970-84 - DOT, FHWA, Highway Statistics, Washington, DC, Table MF-24, annual.

1985-97 - Fuel use by recreational boating was calculated using the methodology developed by D. L. Greene in the report, Off-Highway Use of Gasoline in the United States (DOT, FHWA, July 1986, p. 3-22). Results from Model 1 in the report indicated an average annual consumption of 205 gallons per boat. Total consumption in gallons was then calculated using the following equation: Total $=$ 0.95 (Gal/boat) (number of boats). An estimate of number of recreational boats in operation is from the U.S. Coast Guard (numbered boats).

## Pipeline

The sum of natural gas, crude petroleum and petroleum product, and coal slurry and water.

## Natural Gas:

The amount of natural gas used to transport natural gas was defined as "pipeline fuel" as reported in DOE, EIA, Natural Gas Annual 1997, Table 1. Cubic feet were converted to Btu using $1,031 \mathrm{Btu} / \mathrm{ft}^{3}$. Electricity use was estimated using the following procedure as reported on p. 5-110 of J. N. Hooker et al., End Use Energy Consumption DataBase: Transportation Sector. The energy consumption of a natural gas pipeline was taken to be the energy content of the fuel used to drive the pumps. Some $94 \%$ of the installed pumping horsepower was supplied by natural gas. The remaining $6 \%$ of the horse power was generated more efficiently, mostly by electric motors. The energy consumed by natural gas pipeline pumps that were electrically powered was not known. In order to estimate the electricity consumed, the Btu of natural gas pipeline fuel consumed was multiplied by a factor of 0.015 . From this computed value, electricity efficiency and generation loss must be taken into account. The electricity energy use in Btu must be converted to kWhr , using the conversion factor $29.305 \times 10^{-5} \mathrm{kWhr} / \mathrm{Btu}$. Electricity generation and distribution efficiency was $29 \%$. When generation and distribution efficiency are taken into account, 1 kWhr equals $11,765 \mathrm{Btu}$.

Crude petroleum and petroleum product.
J. N. Hooker, Oil Pipeline Energy Consumption andEfficiency, ORNL-5697, ORNL, Oak Ridge, Tennessee, 198 1. (Latest available data.)

Coal slurry and water:
W. F. Banks, Systems, Science and Software, Energy Consumption in the Pipeline Industry, LaJolla, California, October 1977. (Latest available data.)

## Rail

Total:
Sum of freight and passenger rail.

## Freight:

AAR, Railroad Facts, 1998 Edition, Washington, DC, p. 60.

## Passenger:

Transit and Commuter - APTA, 1999 Transit Fact Book, 1999, Washington, DC, p. 106-108, annual. Transit was defined as the sum of "heavy rail," "light rail," and "other."
Intercity - Personal communication with Amtrak, Washington, DC. (1995, 1996, and 1997 data were estimated using train-mile information.)

Table 2.11
Passenger Travel and Energy Use in the United States, 1997

## Highway

## Automobiles

Number of Vehicles - DOT, FHWA, Highway Statistics 1997 Table VM- 1.
Vmt - DOT, FHWA, Highway Statistics 1997, Table VM-1.
Pmt - Calculated by ORNL (load factor times vmt).
Load Factor - DOT, FHWA, Office of Highway Information Management, 1995 NPTS, Public Use Tape, 1997.
Energy Use - Total gallons of fuel taken from DOT, FHWA, Highway Statistics 1997, Table VM-1. These were distributed as follows: $97.8 \%$ gasoline, $1.0 \%$ gasohol, and $1.2 \%$ diesel. Percentages were derived from the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumption 1991, December 1993, p. 46. Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1 ; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Automobiles were assumed to use $25 \%$ of light vehicle natural gas use. Methanol use was estimated using data from DOE, EIA, Alternatives to Traditional Transportation Fuels 1997 ,Washington, DC, 1998, Table 12.

## Personal Trucks

Number of Vehicles - Based on the 1992 TIUS, $73.9 \%$ of total 2-axle, 4-tire trucks and $15.5 \%$ of total other trucks were for personal use. Therefore, $73.9 \%$ of total 2 -axle, 4 -tire trucks (as reported by DOT, FHWA in Highway Statistics 1997, Table VM-1) and 15.5\% of total other trucks were estimated to be for personal use.
Vmt $-68.8 \%$ of total vehicle miles traveled by 2 -axle, 4 -tire trucks (as reported by DOT, FHWA in Highway Statistics 1997, Table VM-1) and $7.1 \%$ of total vehicle miles traveled by other trucks were for personal use. The percentages were derived by ORNL from the 1992 TIUS Micro Data File on CD.
Pmt - Calculated by ORNL as vmt multiplied by load factor.
Load Factor - DOT, FHWA, Office of Highway Information Management, 1995 NPTS, Public Use Tape, 1997.
Energy Use- Assuming that there is no difference in fuel economy (measured in miles per gallon) between personal-use trucks and non-personal use trucks, $66.0 \%$ of total fuel consumption by 2 -axle, 4 -tire trucks (as reported by DOT, FHWA in Highway Statistics 1996, Table VM-1) and $3.5 \%$ of total other truck fuel consumption was for personal use. These percentages were derived by ORNL from the 1992 TIUS Public Use tape. Total truck energy use was the sum of light truck and other truck energy use.
Light Trucks: DOT, FHWA, Highway Statistics 1997, Table VM-1, for single-unit, 2axle, 4 -tire trucks. $96.4 \%$ of fuel assumed to be gasoline, $3.3 \%$ diesel, $0.3 \% \mathrm{lpg}$; percentages were generated from the 1992 TIUS Micro Data File on CD. Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus
natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Light trucks were assumed to use $75 \%$ of light vehicle natural gas use.
Other Trucks: DOT, FHWA, Highway Statistics 1997, Table VM-1. Total gallons for other trucks was the difference between total and 2-axle, 4-tire trucks. These values were distributed based on data from the 1992 TIUS Public Use Tape: $16.2 \%$ of fuel assumed to be gasoline, $83.3 \%$ diesel, and $0.5 \% \mathrm{lpg}$.

## Motorcycles

Number of Vehicles and Vmt - DOT, FHWA, Highway Statistics 1997, Table VM- 1.
Pmt - Calculated by ORNL as vmt multiplied by load factor.
Load Factor - DOT, FHWA, Office of Highway Information Management, 1995 NPTS, Public Use Tape, 1997.
Energy Use - DOT, FHWA, Highway Statistics 1997, Table VM-1. For conversion purposes, fuel for all motorcycles was assumed to be gasoline.

## Buses

## Transit:

Number of Vehicles, Vmt, Pmt, and Energy Use - Motor bus only. APTA, 1999 Transit Fact Book, 1999, Washington, DC, pp. 122.
Load Factor - Calculated by ORNL as pmt/vmt.

## Intercity:

Number of Vehicles - Estimated by ORNL as $18 \%$ of commercial bus registrations, DOT, FHWA, Highway Statistics 1997, Table MV- 10.
Pmt - Eno Transportation Foundation, Transportation in America, 1998, Sixteenth Edition, Lansdowne, VA, 1998, p. 47.
Vmt - Estimated using passenger travel and an average load factor of 23.2 persons/vehicle.
Load Factor -Estimated as 23.2 based on historical data.
Energy Use - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for all intercity buses was assumed to be diesel fuel. (1997 data were estimated using vehicle travel information.)

## School:

Number of Vehicles - School and other nonrevenue as reported in DOT, FHWA, Highway Statistics 1997, Table MV- 10.
Vmt, Pmt - National Safety Council, Accident Facts, 1998 Edition, Chicago, IL, pp. 94-95.
Load Factor - Calculated by ORNL as pmt/vmt.
Energy Use - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, 1998, Lansdowne, VA, p. 56. For conversion purposes, fuel for school buses was assumed to be $60 \%$ diesel fuel and $40 \%$ gasoline. (1997 data were estimated using vehicle travel information.)

## Nonhighway

Air
Large Certified Route Air Carriers:
Vmt, Pmt - DOT, Bureau of Transportation Statistics, Air Carrier Traffic Statistics Monthly, December 19970996, Washington, DC, p.2.
Load Factor - Calculated by ORNL as pmt/vmt.
Energy Use - DOT, Bureau of Transportation Statistics, "Fuel Cost and Consumption Tables;" annual figures were obtained by summing monthly totals for domestic only.

## General Aviation:

Number of Vehicles, Vmt, Energy Use - DOT, FAA, General Aviation Activity and Avionics, Survey: Calendar Year 1997, pp. 1-7, 3-1 1, 5-3.
Pmt - Eno Transportation Foundation, Transportation in America 1998, SixteenthEdition, Lansdowne, VA, 1998, p. 47.
Load Factor - Calculated by ORNL as pmt/vmt.

## Recreational Boating

Number of Vehicles - U.S. Coast Guard, Office of Boating Safety, Washington, DC, May 1999.

Energy Use - Fuel use by recreational boating was calculated using the methodology developed by D. L. Greene in the report, Off-Highway Use of Gasoline in the United States (DOT, FHWA, July 1986, p. 3-22). Results from Model 1 in the report indicated an average annual consumption of 205 gallons per boat. Total consumption in gallons was then calculated using the following equation: Total $=$ $0.95(\mathrm{Gal} / \mathrm{boat})$ (number of boats). An estimate of number of recreational boats in operation is from the U.S. Coast Guard (numbered boats).

## Rail

## Intercity:

Number of Vehicles, Vmt and Pmt-AAR, Railroad Facts, 1998 Edition, Washington, DC, p. 78.

Load Factor - Calculated by ORNL as pmt/vmt.
Energy Use - Personal communication with Amtrak, Washington, DC. (1997 data estimated using train-mile information.)

## Transit and Commuter:

Number of Vehicles, Vmt and Pmt - APTA, 1999 Transit Fact Book, Washington, DC, 1998, pp. 124, 130, 132.
Load Factor - Calculated by ORNL as pmt/vmt.
Energy Use - APTA, 1999 Transit Fact Book, 1999 Washington, DC, pp. 106-108. Transit was defined as the sum of "heavy rail," "light rail," and "other."

Table 2.13
Intercity Freight Movement and Energy Use in the
United States, 1997 United States, 1997

## Highway

## Trucks

Vehicles $-0.3 \%$ of total 2-axle, 4-tire trucks (as reported by DOT, FHWA inHighway Statistics 1997, Table VM-1) and $24 \%$ of total other trucks were engaged in intercity freight movement. These percentages were derived by ORNL from the 1992 TIUS Micro Data File on CD. Intercity freight trucks were defined as any truck whose:

- greatest share of miles were traveled more than 50 miles away from the vehicle's home base; and
- principal use was not personal or passenger transportation; and
- body type was not pickup, minivan, or utility vehicle.

Vmt $-0.6 \%$ of total vehicle miles traveled by 2-axle, 4-tire trucks (as reported by DOT, FHWA in Highway Statistics 1997, Table VM-1) and $59.5 \%$ of total vehicle miles traveled by other trucks were used in intercity freight movement. These percentages were derived by ORNL from the 1992 TIUS Micro Data File on CD.
Ton Miles, Tons Shipped and Average Length of Haul - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, Lansdowne, VA, 1997, pp. 44, 46, 71.

Energy Intensity - Energy use divided by ton-miles.
Energy Use $=0.9 \%$ of total fuel consumption by 2-axle, 4-tire trucks (as reported by DOT, FHWA in Highway Statistics 1997, Table VM-1) and. $67.2 \%$ of total other truck fuel consumption were used in intercity freight movement. These percentages were derived by ORNL from the 1992 TIUS Micro Data File on CD.

## Nonhighway

## Waterborne Commerce

Vehicles - U.S. Department of the Army, Army Corps of Engineers, "Summary of U.S. Flag Passenger and Cargo Vessels, 1996," New Orleans, LA, 1998.
Ton Miles, Tons Shipped, and Average Length of Haul - U.S. Department of the Army, Corps of Engineers, Waterborne Commerce of the United States, Calendar Year 1997, Part 5: National Summaries, New Orleans, LA, 1999, pp. 1-6, 1-7.
Energy Intensity - Energy use divided by ton miles.
Energy Use - DOE, EIA, Fuel Oil and Kerosene Sales 1997, Table 23. Adjusted sales of distillate and residual fuel oil for vessel bunkering. (This may include some amounts of bunker fuels used for recreational purposes.)
Domestic freight energy use was calculated as:
Distillate fuel - $77.5 \%$ domestic
Residual fuel - $9.3 \%$ domestic.
Percentages were derived from the DOC, U.S. Foreign Trade, Bunker Fuels, "Oil and Coal Laden in the U.S. on Vessels Engaged in Foreign Trade," 1988.

## Pipeline

## Natural Gas:

Tons shipped - DOE, EIA, Natural Gas Annual 1997, Washington, DC, 1998, Table 1. Total natural gas disposition divided by $44,870 \mathrm{ft}^{3} /$ ton.
Energy use - The amount of natural gas used to transport natural gas was defined as "pipeline fuel" as reported in DOE, EIA, Natural Gas Annual 1997, Table 1. Cubic feet were converted to Btu using $1,031 \mathrm{Btu} / \mathrm{ft}^{3}$. Electricity use was estimated using the following procedure as reported on p. 5-1 10 of J. N. Hooker et al., End Use Energy Consumption DataBase: Transportation Sector. The energy consumption of a natural gas pipeline was taken to be the energy content of the fuel used to drive the pumps. Some $94 \%$ of the installed pumping horsepower was supplied by natural gas. The remaining $6 \%$ of the horse power was generated more efficiently, mostly by electric motors. The energy consumed by natural gas pipeline pumps that were electrically powered was not known. In order to estimate the electricity consumed, the Btu of natural gas pipeline fuel consumed was multiplied by a factor of 0.015 . From this computed value, electricity efficiency and generation loss must be taken into account. The electricity energy use in Btu must be converted to kWhr , using the conversion factor $29.305 \times 10^{-5} \mathrm{kWhr} / \mathrm{Btu}$. Electricity generation and distribution efficiency was $29 \%$. When generation and distribution efficiency are taken into account, 1 kWhr equals $11,765 \mathrm{Btu}$.

Crude Oil and Petroleum Product:<br>Ton Miles and Tons Shipped - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, Lansdowne, VA, 1998 pp. 44, 46.<br>Energy Use - W. F. Banks, Systems, Science, and Software, Inc., Energy Consumption in the Pipeline Industry, LaJolla, CA, 1977.

## Rail

Vehicles, Vmt, Ton Miles, Average Length of Haul - AAR, Railroad Facts, 1998 Edition, Washington, DC, 1998, pp. 27, 34, 36, 50.
Tons shipped - AAR, Analysis of Class I Railroads 1997, 1998, p. 31.
Energy Use -AAR, Railroad Facts, 1998 Edition, Washington, DC, 1997, p. 60.

Table 2.12
Energy Intensities of Passenger Modes, 1970-97
In reference to transportation, the energy intensity of a mode is the ratio of the energy inputs to a process to a measure of the useful outputs from that process; for example, Btu per pmt or Btu per ton-mile. The energy intensity ratios were calculated for each passenger mode using the following data sources:

## Highway

## Automobiles

Vmt - DOT, FHWA, Highway Statistics Summary to 1995, Table VM-201A, and Table VM-1 of the 1996 and 1997 editions.
Pmt-vmt multiplied by the load factor.
Energy Use - Total gallons of fuel for automobiles was taken from DOT, FHWA, Highway Statistics Summary to 1995, Table VM-20 1 A; and Table VM- 1 in the 1996 and 1997 annual editions. Fuel for automobiles was distributed between fuel types for conversion into Btu's as follows:

1970-80-94.7\% gasoline, $5.3 \%$ diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Energy Consumption Survey: Consumption Patterns of Household Vehicles, June 1979 to December 1980, p. 10.
1981-82-94.1\% gasoline, $5.9 \%$ diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Energy Consumption Survey: Consumption Patterns of Household Vehicles, Supplement: January 1981 to September 1981, pp. 11, 13.
1983-84-97.5\% gasoline, $2.5 \%$ diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Residential Transportation Energy Consumption Survey: Consumption Patterns of Household Vehicles, 1983, Jan., 1985, pp. 7, 9.
1985-87-98.5\% gasoline, $1.5 \%$ diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Residential Transportation Energy Consumption Survey: Consumption Patterns of Household Vehicles 198.5, April 1987, pp. 25, 27.
1988-90-98.8\% gasoline and $1.2 \%$ diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumption 1988, March 1990, p. 65.
1991-93-97.8\% gasoline, $1.0 \%$ gasohol, and $1.2 \%$ diesel as reported in the DOE, EIA, Office of Markets and End Use, Energy End Use Division, Household Vehicles Energy Consumption 1991, December 1993, p. 46.
1994-96-97.7\% gasoline, $1.0 \%$ gasohol, $1.3 \%$ diesel as reported in the DOE, EIA, Office of Energy Markets and End Use, Household Vehicles Energy Consumption 1994, Washington, DC, August 1997, p. 46.
1993-97 - Methanol use was estimated using data from DOE, EIA, Alternatives to Traditional Transportation Fuels 1997, Washington, DC, 1998, Table 12.
1993-97 - Natural gas data are from the DOE, EIA Natural Gas Annual 1997, Table 1; transit bus natural gas was subtracted from the total and the remainder was assumed to be light vehicle use. Automobiles were assumed to use $25 \%$ of light vehicle natural gas use.

## Light Trucks

Vmt - DOT, FHWA, Highway Statistics Summary to 1995, Table VM-20 1 A, and Table VM-1 of the 1996 and 1997 editions. Light trucks were defined as 2 -axle, 4 -tire trucks.
Energy Use - Light trucks were defined as 2-axle, 4-tire trucks. Total gallons of fuel was taken from DOT, FHWA, Highway Statistics Summary to 1995, Table VM-201A, and Table VM-1 of the 1996 and 1997 annual edition. Based on data from the 1982 TIUS Public Use Tape, fuel use for 1970-87 was distributed among fuel types as follows: $95.3 \%$ gasoline; $3.5 \%$ diesel; and $1.2 \%$ Ipg. Fuel use for 1988-93 was distributed based on the 1987 TIUS: $96.6 \%$ gasoline; $3.3 \%$ diesel; and $0.1 \% \mathrm{lpg}$. Fuel use for $1994-95$ was distributed based on the 1992 TIUS: $96.2 \%$ gasoline; $3.3 \%$ diesel; $0.3 \% \mathrm{Ipg}$; and $0.2 \%$ cng.

## Buses

## Transit:

Vmt, Pmt, Energy Use - APTA, 1999 Transit Fact Book, Washington, DC,1998, pp. 122, 106-108, and annual.
Non-diesel fossil fuel consumption was assumed to be used by motor buses. For the years 1988-94, motor bus gasoline use was estimated as $5 \%$ of "other" fuels, based on personal communication with the APTA Research and Statistics Department.

## Intercity:

Pmt - 1970-84 - American Bus Association, Annual Report, Washington, DC, annual.
1985-95 - Eno Transportation Foundation, Transportation in America 1997, Fifteenth Edition, Lansdowne, VA, 1997, p. 47.
Energy Use - 1970-84 - American Bus Association, Annual Report, Washington, DC, annual.
1985-97 - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, Lansdowne, VA, p. 56, and annual. For conversion purposes, fuel for all intercity buses was assumed to be diesel fuel. (1995, 1996, and 1997 data were estimated using vehicle travel information.)

## School:

Vmt - 1970-84 - DOT, FHWA, Highway Statistics 1984, Washington, DC, Table VM-1, p. 175, and annual.
1985-87 - DOT, TSC, National Transportation Statistics, 1989, Figure 2, p. 7, and annual.
1988-97 - National Safety Council, Accident Facts, 1997 Edition , Chicago, IL, p. 95, and annual.

Energy Use - 1970-84 - DOT, FHWA, Highway Statistics 1984, Washington, DC, Table VM- 1, and annual.
1985-86 - DOT, TSC, National Transportation Statistics, Figure 2, p. 5, and annual. 1987-96 - Eno Transportation Foundation, Transportation in America 1998, Sixteenth Edition, Lansdowne, VA, p. 56, and annual. For conversion purposes, fuel for school buses was assumed to be $60 \%$ diesel fuel and $40 \%$ gasoline. ( 1995,1996 , and 1997 data were estimated using vehicle travel information.)

## Nonhighway

## Air

## Certificated Air Carriers:

Pmt - DOT, Bureau of Transportation Statistics,\&- Carrier Traffic Statistics Monthly, December 1997/96, Washington, DC, p. 2.
Energy Use - 1970-81 - DOT, Civil Aeronautics Board, Fuel Cost and Consumption, Washington, DC, annual.
1982-97 - DOT, Bureau of Transportation Statistics, "Fuel Cost and Consumption Tables;" annual figures were obtained by summing monthly totals for domestic only.

## General Aviation:

Pmt - Eno Transportation Foundation, Transportation In America 1998, Sixteenth Edition, Washington, DC, 1998, p. 47.
Energy Use - 1970-74 - DOT, TSC, National Transportation Statistics, Cambridge, MA, 1981.
1975-85 - DOT, FAA, FAA Aviation Forecasts, Washington, DC, annual. 1985-97-DOT, FAA, General Aviation Activity and Avionics Survey: Calendar Year 1997, Table 5.1. Jet fuel was converted from gallons to Btu using 135,000 Btu/gallon (kerosene-type jet fuel).

## Rail

Passenger (Amtrak) :
Pmt - 1971-83-AAR, Statistics of Class I Railroads, Washington, DC, annual. 1984-88, 1995-96 - AAR, Railroad Facts, 1987 Edition, Washington, DC, December 1987, p. 78, and annual.
1989-94 - Personal communication with Amtrak.
Energy Use - Personal communication with Amtrak. (1995, 1996, and 1997 data were estimated using train-mile information.)

Transit:
Pmt and Energy Use - APTA, 1999 Transit Fact Book, February 1998, Washington, DC, pp. 12, 106-108. Transit was defined as the sum of "heavy rail," "light rail."

Table 2.14
Energy Intensities of Freight Modes, 1970-97
In reference to transportation, the energy intensity of a mode is the ratio of the energy inputs to a process to a measure of the useful outputs from that process; for example, Btu per pmt or Btu per ton-mile. The energy intensity ratios were calculated for each freight mode using the following data sources:

## Highway

## Heavy Single-Unit and Combination Trucks

Vmt - DOT, FHWA, Highway Statistics Summary to 1995, Table VM-20 1 A, and Table VM- 1 of the 1996 and 1997 editions. Heavy single-unit and combination trucks were defined as the difference between total trucks and 2-axle, 4-tire trucks.
Energy Use - Heavy single-unit and combination trucks were defined as the difference between total trucks and 2-axle, 4-tire trucks. Total gallons of fuel was taken from DOT, FHWA, Highway Statistics Summary to 199.5, Table VM-201A, and Table VM-1 of the 1996 and 1997 annual editions. Based on data from the 1982 TIUS Public Use Tape, fuel use for 1970-87 was distributed among fuel types as follows: $39.6 \%$ gasoline; $59.4 \%$ diesel; and $1.0 \%$ lpg. Fuel use for $1988-93$ was distributed based on the 1987 TIUS: $19.4 \%$ gasoline; $80.4 \%$ diesel; and $0.2 \% \mathrm{lpg}$. Fuel use for $1994-97$ was distributed based on the 1992 TIUS: $16.2 \%$ gasoline; $83.3 \%$ diesel; and $0.5 \% \mathrm{lpg}$.

## Nonhighway

## Water

Ton Miles - U.S. Department of the Army, Corps of Engineers, Waterborne Commerce of the United States, Calendar Year 1997, Part 5: National Summaries, New Orleans, LA, 1998, p. 1-6, and annual.

Energy Use - Calculated as the difference between total water freight energy use and foreign water freight energy use.
Total - DOE, EIA, Fuel Oil and Kerosene Sales 1997, Table 23. Adjusted sales of distillate and residual fuel oil for vessel bunkering.(This may include some amounts of bunker fuels used for recreational purposes.)

## Rail

Freight Car Miles, Ton Miles and Energy Use - AAR, Railroad Facts, 1998 Edition, Washington, DC, 1998, pp. 27, 36, 60, and annual.

Table 6.4
Vehicle Stock and New Sales in the United States, 1997 Calendar Year

## Highway

## Automobiles

Stock -The number of vehicles in use by EPA size class were derived as follows: Market Shares by EPA size class for new car sales from 1970-75 were taken from the DOT, NHTSA, Automotive Characteristics Historical DataBase, Washington, DC. Market shares for the years 1976-90 were found in Linda S. Williams and Patricia S. Hu, Highway Vehicle MPG and Market Shares Report: Model Year 1990, ORNL-6672, April 1991, and Table 7 and the ORNL MPG and Market Shares Database, thereafter. These data were assumed to represent the number of cars registered in each size class for each year. These percentages were applied to the automobiles in operation for that year as reported by R. L. Polk and Company (FURTHER REPRODUCTION PROHIBITED) and summed to calculate the total mix. This method assumed that all vehicles, large and small, were scrapped at the same rate.

Sales - Domestic, import, and total sales were from AAMA, Facts and Figures 1997, p. 19. The domestic sales were distributed by size class according to the following percentages: Two seater, $0.5 \%$; Minicompact, $0 \%$; Subcompact, 17.6\%; Compact 35.6\%; Midsize, $30.0 \%$; and Large, $16.3 \%$. The import sales were distributed by size class according to the following percentages: Two-seater, 3.3\%; Minicompact, 3 . O\%; Subcompact, $21.9 \%$; Compact, $35.3 \%$; Midsize, $34.2 \%$; and Large, $2.3 \%$. These percentages were derived from the ORNL MPG and Market Shares Database. Domestic-sponsored imports (captive imports) were included in the import figure only.

Business fleet autos - Bobit Publishing Company, Automotive Fleet Research Department, Automotive Fleet Factbook 1998, Redondo Beach, CA, 1998.

Personal autos - Difference between total vehicle stock and business fleet autos.
See Glossary for definition of Automobile Size Classifications.

## Motorcycles

Stock - DOT, FHWA, Highway Statistics 1997, Table VM-1, 1998.

## Recreational Vehicles

Sales - Ward's Automotive Yearbook 1998, U.S. Recreation Vehicle Shipments by Type, "Total," p. 215.

## Trucks

Stock - Vehicles in use by weight class were determined by applying the percentage in use by weight class as reported in DOC, Bureau of the Census, 1992 TIUS, (O-10,000 lbs, $93.3 \% ; 10,001-19,500 \mathrm{lbs}, 2.1 \% ; 19,501-26,000 \mathrm{lbs}, 1.2 \% ; 26,001 \mathrm{lbs}$ and over, $3.4 \%$ ) to the total number of trucks in use as reported by R. L. Polk and Company (FURTHER REPRODUCTION PROHIBITED).
Sales - AAMA, Facts and Figures 1998, p. 24.
Business fleet trucks - Bobit Publishing Company, Automotive Fleet Research Department, Automotive Fleet Factbook 1998, Redondo Beach, CA, 1998.

Personal trucks - Difference between total stock and business fleet trucks.

Table 8.14
Summary Statistics on Buses by Type, 1970-97

## Number in Operation

## Transit buses:

American Public Transit Association, 1999 Transit Fact Book, Washington, DC, 1999, p. 122, and annual.

## Intercity buses:

1970-80 - American Bus Association, 1984 Annual Report, Washington, DC, and annual. 1985 - U.S. Department of Transportation, Transportation Systems Center, National Transportation Statistics, Cambridge, MA, August 1990, Figure 5, p. 8, and annual.
1990-97 - Estimated as $38 \%$ of commercial buses (less transit motor buses). Commercial bus total found in Highway Statistics 1997, Table MV-10, and annual.

School buses:
U.S. Department of Transportation, Federal Highway Administration,Highway Statistics 1997, Washington, DC, 1998, Table MV-1,O and annual.

Vehicle-miles and Passenger-miles
Transit buses:
American Public Transit Association, 1999 Transit Fact Book, Washington, DC, 1999, pp. 122, and annual.

## Intercity buses:

1970-80 - American Bus Association, Annual Report, Washington, DC, annual.
198.5-97 - Eno Transportation Foundation, Transportation in America 1998, Sixteenth edition, Lansdowne, VA, 1997, p. 47.
1990-97 vehicle travel - Estimated using passenger travel and an average load factor of 23.2.

School buses:
1970-80 - U.S. Department of Transportation, Federal Highway Administration, Highway Statistics 1984, Washington, DC, Table VM-1, p. 175, and annual.
1985 - U.S. Department of Transportation, Research and Special Programs Administration, National Transportation Statistics, 1989, Figure 2, p. 7, and annual.
1990-97 - National Safety Council, Accident Facts, 1998 Edition, Chicago, IL, pp. 94-95, and annual.

## Energy Use

## Transit buses:

American Public Transit Association, 1999 Transit Fact Book, Washington, DC, 1999, pp. 106-108. Non-diesel fossil fuel consumption was assumed to be used by motor buses. For the years 1988-92, motor bus gasoline use was estimated as $5 \%$ of "other" fuels, based on personal communication with the APTA Research and Statistics Department.

## Intercity buses:

1970-80 - American Bus Association, Annual Report, Washington, DC, annual.
1985-97 - Eno Transportation Foundation, Transportation in America 1998, Sixteenth edition, Lansdowne, VA, p. 56. For conversion purposes, fuel for all intercity buses was assumed to be diesel fuel. (1995, 1996, and 1997 data were estimated using vehicle travel information.)

School buses:
1970-80 - DOT, FHWA, Highway Statistics 1984, Washington, DC, Table VM-1, and annual.
1985-86-DOT, Research and Special Programs Administration,National Transportation Statistics, Figure 2, p. 5, and annual.
1987-97- Eno Transportation Foundation, Transportation in America 1998,Sixteenth edition, Lansdowne, VA, p. 56. For conversion purposes, fuel for school was assumed to be $60 \%$ diesel fuel and $40 \%$ gasoline. (1995, 1996, and 1997 data were estimated using vehicle travel information.)

# APPENDIX B <br> CONVERSIONS 

## A Note About Heating Values

The heat content of a fuel is the quantity of energy released by burning a unit amount of that fuel. However, this value is not absolute and can vary according to several factors. For example, empirical formulae for determining the heating value of liquid fuels depend on the fuels' American Petroleum Institute (API) gravity. 'The API gravity varies depending on the percent by weight of the chemical constituents and impurities in the fuel, both of which are affected by the combination of raw materials used to produce the fuel and by the type of manufacturing process. Temperature and climatic conditions are also factors.

Because of these variations, the heating values in Table B. 1 may differ from values in other publications. The figures in this report are representative or average values, not absolute ones. The gross heating values used here agree with those used by the Energy Information Administration (EIA).

Heating values fall into two categories, gross and net. If the products of fuel combustion are cooled back to the initial fuel-air or fuel-oxidizer mixture temperature and the water formed during combustion is condensed, the energy released by the process is the higher (gross) heating value. If the products of combustion are cooled to the initial fuel-air temperature, but the water is considered to remain as a vapor, the energy released by the process is lower (net) heating value. Usually the difference between the gross and net heating values for fuels used in transportation is around 5 to 8 percent; however, it is important to be consistent in their use.

Table B.I

## Approximate Heat Content for Various Fuels

| Automotive gasoline | 125,000 Btu/gal(gross) $=115,400 \mathrm{Btu} / \mathrm{gal}$ (net) |
| :---: | :---: |
| Diesel motor fuel | $138,700 \mathrm{Btu} / \mathrm{gal}($ gross $)=128,700 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Methanol | $64,600 \mathrm{Btu} / \mathrm{gal}($ gross $)=56,560 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Ethanol | 84,600 Btu/gal (gross) $=75,670 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Gasohol | $120,900 \mathrm{Btu} / \mathrm{gal}($ gross $)=112,417 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Aviation gasoline | $120,200 \mathrm{Btu} / \mathrm{gal}($ gross $)=112,000 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Propane | $91,300 \mathrm{Btu} / \mathrm{gal}($ gross $)=83,500 \mathrm{Btu} / \mathrm{gal}$ ( net) |
| Butane | 103,000 Btu/gal (gross) $=93,000 \mathrm{Btu} / \mathrm{gal}$ (net) |
| Jet fuel (naphtha) | $127,500 \mathrm{Btu} / \mathrm{gal}($ gross $)=118,700 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Jet fuel (kerosene) | 135,000 Btu/gal (gross) $=128,100 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Lubricants | $144,400 \mathrm{Btu} / \mathrm{gal}($ gross $)=130,900 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Waxes | $131,800 \mathrm{Btu} / \mathrm{gal}($ gross $)=120,200 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Asphalt and road oil | $158,000 \mathrm{Btu} / \mathrm{gal}($ gross $)=157,700 \mathrm{Btu} / \mathrm{gal}($ (net $)$ |
| Petroleum coke | $143,400 \mathrm{Btu} / \mathrm{gal}($ gross $)=168,300 \mathrm{Btu} / \mathrm{gal}$ (net) |
| Natural gas |  |
| Wet | 1,109 Btu/ft ${ }^{3}$ |
| Dry | $1,027 \mathrm{Btu} / \mathrm{ft}^{3}$ |
| Compressed | 20,551 Btu/pound $960 \mathrm{Btu} / \mathrm{cubic}$ foot |
| Liquid | $90,800 \mathrm{Btu} / \mathrm{gal}($ gross $)=87,600 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Crude petroleum | $138,100 \mathrm{Btu} / \mathrm{gal}($ gross $)=131,800 \mathrm{Btu} / \mathrm{gal}($ net $)$ |
| Fuel Oils |  |
| Residual | $149,700 \mathrm{Btu} / \mathrm{gal}($ gross $)=138,400 \mathrm{Btu} / \mathrm{gal}$ (net) |
| Distillate | $138,700 \mathrm{Btu} / \mathrm{gal}$ (gross) $=131,800 \mathrm{Btu} / \mathrm{gal}$ (net) |
| Coal |  |
| Anthracite - Consumption <br> Bituminous and lignite - Consumption <br> Production average <br> Consumption average | $21.711 \times 10^{6} \mathrm{Btu} /$ short ton $21.012 \times 10^{6} \mathrm{Btu} /$ short ton $21.352 \times 10^{6} \mathrm{Btu} /$ short ton $21.015 \times 10^{6} \mathrm{Btu} /$ short ton |

| 140 | 36.98 | 59.51 | 1.68 |
| 145 | 38.30 | 61.64 | 1.62 |
| 150 | 39.62 | 63.76 | 1.57 |

${ }^{a}$ To convert fuel efficiency from miles per gallon (mpg) to liters per hundred kilometers, divide mpg into 235.24.

Table B. 10

## SI Prefixes and Their Values

|  |  |  |  |
| :--- | :--- | :--- | :--- |
|  | Value | Prefix | Symbol |
|  |  |  |  |
| One million million millionth | $10^{-18}$ | atto | a |
| One thousand million millionth | $10^{-15}$ | femto | f |
| One million millionth | $10^{-12}$ | pico | P |
| One thousand millionth | $10^{-9}$ | nano | n |
| One millionth | $10^{-6}$ | micro | $\mu$ |
| One thousandth | $10^{-3}$ | milli | m |
| One hundredth | $10^{-2}$ | centi | c |
| One tenth | $10^{-1}$ | deci |  |
| One | $10^{0}$ |  |  |
| Ten | $10^{\prime}$ | deca |  |
| One hundred | $10^{2}$ | hecto |  |
| One thousand | $10^{3}$ | kilo | k |
| One million | $10^{6}$ | mega | M |
| One billion" | $10^{9}$ | giga | G |
| One trillion" | $10^{12}$ | tera | T |
| One quadrillion" | $10^{15}$ | peta | P |
| One quintillion" | $10^{18}$ | exa | E |

${ }^{a}$ Care should be exercised in the use of this nomenclature, especially in foreign correspondence, as it is either unknown or carries a different value in other countries. A "billion," for example, signifies a value of $10^{12}$ in most other countries.

Table B. 11
Metric Units and Abbreviations

| Quantity | Unit name | Symbol |
| :---: | :---: | :---: |
| Energy | joule | J |
| Specific energy | joule/kilogram | J/kg |
| Specific energy consumption | joule/kilogram•kilometer | $\mathrm{J} /(\mathrm{kg} \cdot \mathrm{km})$ |
| Energy consumption | joule/kilometer | J/km |
| Energy economy | kilometer/kilojoule | km/kJ |
| Power | kilowatt | K w |
| Specific power | watt/kilogram | W/kg |
| Power density | watt/mete? | $\mathrm{W} / \mathrm{m}^{3}$ |
| Speed | kilometer/hour | $\mathrm{km} / \mathrm{h}$ |
| Acceleration | meter/second ${ }^{2}$ | $\mathrm{m} / \mathrm{s}^{2}$ |
| Range (distance) | kilometer | km |
| Weight | kilogram | kg |
| Torque | newton•meter | $\mathrm{N} \cdot \mathrm{m}$ |
| Volume | meter ${ }^{3}$ | $\mathrm{m}^{3}$ |
| Mass; payload | kilogram | kg |
| Length; width | meter | m |
| Brake specific fuel consumption | kilogram/joule | kg/J |
| Fuel economy (heat engine) | liters/100 km | $\mathrm{L} / 100 \mathrm{~km}$ |

## Conversion of Constant Dollar Values

Many types of information in this data book are expressed in dollars. Generally, constant dollars are used--that is, dollars of a fixed value for a specific year, such as 1990 dollars. Converting current dollars to constant dollars, or converting constant dollars for one year to constant dollars for another year, requires conversion factors (Table B. 12 and B. 13). Table B. 12 shows conversion factors for the Consumer Price Index inflation factors. Table B. 13 shows conversion factors using the Gross National Product inflation factors.

Due to the size of the tables, the data in Tables B. 12 and B. 13 were changed to two decimal places starting with Edition 17. However, three decimal places were used to calculate all constant dollar values.

## Table B. 12

Consumer Price Inflation (CPI) Index

 | 1970 | 1.00 | 1.04 | 1.08 | 1.14 | 1.27 | 1.39 | 1.47 | 1.56 | 1.68 | 1.87 | 2.12 | 2.34 | 2.49 | 2.57 | 2.68 | 2.77 | 2.82 | 2.93 | 3.05 | 3.19 | 3.37 | 3.51 | 3.61 | 3.72 | 3.82 | 3.93 | 4.04 | 4.13 | 4.20 |

## GLOSSARY

Acceleration power - Measured in kilowatts. Pulse power obtainable from a battery used to accelerate a vehicle. This is based on a constant current pulse for 30 seconds at no less than $2 / 3$ of the maximum open-circuit-voltage, at $80 \%$ depth-of-discharge relative to the battery's rated capacity and at 20 " C ambient temperature.

Air Carrier - The commercial system of air transportation consisting of certificated air carriers, air taxis (including commuters), supplemental air carriers, commercial operators of large aircraft, and air travel clubs.

Certificated route air carrier: An air carrier holding a Certificate of Public Convenience and Necessity issued by the Department of Transportation to conduct scheduled interstate services. Nonscheduled or charter operations may also be conducted by these carriers. These carriers operate large aircraft ( 30 seats or more, or a maximum payload capacity of 7,500 pounds or more) in accordance with Federal Aviation Regulation part 121.

Domestic air operator: Commercial air transportation within and between the 50 States and the District of Columbia. Includes operations of certificated route air carriers, Pan American, local service, helicopter, intra-Alaska, intra-Hawaii, all-cargo carriers and other carriers. Also included are transborder operations conducted on the domestic route segments of U.S. air carriers. Domestic operators are classified based on their operating revenue as follows:

Majors - over $\$ 1$ billion
Nationals - \$100-1 ,000 million
Large Regionals - \$10-99.9 million
Medium Regionals - $\$ 0-9.99$ million

International air operator: Commercial air transportation outside the territory of the United States, including operations between the U.S. and foreign countries and between the U.S. and its territories and possessions.

Supplemental air carrier: A class of air carriers which hold certificates authorizing them to perform passenger and cargo charter services supplementing the scheduled service of the certificated route air carriers. Supplemental air carriers are often referred to as nonscheduled air carriers or "nonskeds".

Alcohol - The family name of a group of organic chemical compounds composed of carbon, hydrogen, and oxygen. The molecules in the series vary in chain length and are composed of a hydrocarbon plus a hydroxyl group. Alcohol includes methanol and ethanol.

## Amtrak - See Rail.

, Anthropogenic - Human made. Usually used in the context of emissions that are produced as the result of human activities.

Automobile size classifications - Size classifications of automobiles are established by the Environmental Protection Agency (EPA) as follows:

Minicompact - less than 85 cubic feet of passenger and luggage volume. Subcompact - between 85 to 100 cubic feet of passenger and luggage volume. Compact - between 100 to 110 cubic feet of passenger and luggage volume. Midsize - between 110 to 120 cubic feet of passenger and luggage volume. Large - more than 120 cubic feet of passenger and luggage volume. Two seater - automobiles designed primarily to seat only two adults. Station wagons are included with the size class for the sedan of the same name.

## Aviation - See General aviation.

Aviation gasoline - All special grades of gasoline for use in aviation reciprocating engines, as given in the American Society for Testing and Materials (ASTM) Specification D 910. Includes all refinery products within the gasoline range that are to be marketed straight or in blends as aviation gasoline without further processing (any refinery operation except mechanical blending). Also included are finished components in the gasoline range which will be used for blending or compounding into aviation gasoline.

Barges - Shallow, nonself-propelled vessels used to carry bulk commodities on the rivers and the Great Lakes.

Battery efficiency - Measured in percentage. Net DC energy delivered on discharge, as a percentage of the total DC energy required to restore the initial state-of-charge. The efficiency value must include energy losses resulting from self-discharge, cell equalization, thermal loss compensation, and all battery-specific auxiliary equipment.

Btu - The amount of energy required to raise the temperature of 1 pound of water 1 degree Fahrenheit at or near 39.2 degrees Fahrenheit. An average Btu content of fuel is the heat value per quantity of fuel as determined from tests of fuel samples.

Bunker - A storage tank.

Bunkering fuels - Fuels stored in ship bunkers.
Bus -
Intercity bus: A standard size bus equipped with front doors only, high backed seats, luggage compartments separate from the passenger compartment and usually with restroom facilities, for high-speed long distance service.

Motor bus: Rubber-tired, self-propelled, manually-steered bus with fuel supply on board the vehicle. Motor bus types include intercity, school, and transit.

School and other nonrevenue bus: Bus services for which passengers are not directly charged for transportation, either on a per passenger or per vehicle basis.

Transit bus: A bus designed for frequent stop service with front and center doors, normally with a rear-mounted diesel engine, low-back seating, and without luggage storage compartments or restroom facilities. Includes motor bus and trolley coach.

Trolley coach: Rubber-tired electric transit vehicle, manually-steered, propelled by a motor drawing current, normally through overhead wires, from a central power source not on board the vehicle.

Calendar year - The period of time between January 1 and December 31 of any given year.

Captive imports - Products produced overseas specifically for domestic manufacturers.

Carbon dioxide (CO,) - A colorless, odorless, non-poisonous gas that is a normal part of the ambient air. Carbon dioxide is a product of fossil fuel combustion.

Carbon monoxide (CO) - A colorless, odorless, highly toxic gas that is a normal by-product of incomplete fossil fuel combustion. Carbon monoxide, one of the major air pollutants, can be harmful in small amounts if breathed over a certain period of time.

Car-mile (railroad) - A single railroad car moved a distance of one mile.

## Cargo ton-mile - See Ton-mile.

## Certificated route air carriers - See Air carriers.

## Class I freight railroad - See Rail.

Clean Fuel Vehicle - Vehicle meeting the clean fuel vehicle exhaust emissions standards with no restriction on fuel type.

Coal slurry - Finely crushed coal mixed with sufficient water to form a fluid.

Combination trucks - Consist of a power unit (a truck tractor) and one or more trailing units (a semi-trailer or trailer). The most frequently used combination is popularly referred to as a "tractor-semitrailer" or "tractor trailer".

## Commercial sector - See Residential and Commercial sector.

## Commuter railroad - See Rail.

## Compact car - See Automobile size classifications.

Constant dollars - A series of figures is expressed in constant dollars when the effect of change in the purchasing power of the dollar has been removed. Usually the data are expressed in terms of dollars of a selected year or the average of a set of years.

Consumer Price Index (CPI) - An index issued by the U.S. Department of Labor, Bureau of Labor Statistics. The CPI is designed to measure changes in the prices of goods and services bought by wage earners and clerical workers in urban areas. It represents the cost of a typical consumption bundle at current prices as a ratio to its cost at a base year.

Continuous discharge capacity - Measured as percent of rated energy capacity. Energy delivered in a constant power discharge required by an electric vehicle for hill climbing and/or highspeed cruise, specified as the percent of its rated energy capacity delivered in a one hour constant-power discharge.

Corporate Average Fuel Economy (CAFE) standards - CAFE standards were originally established by Congress for new automobiles, and later for light trucks, in Title V of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901, et seq.) with subsequent amendments. Under CAFE, automobile manufacturers are required by law to produce vehicle fleets with a composite sales-weighted fuel economy which cannot be lower than the CAFE standards in a given year, or for every vehicle which does not meet the standard, a fine of $\$ 5.00$ is paid for every one-tenth of a mpg below the standard.

Crude oil - A mixture of hydrocarbons that exists in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface
separating facilities. Crude oil production is measured at the wellhead and includes lease condensate.

Crude oil imports - The volume of crude oil imported into the 50 States and the District of Columbia, including imports from U.S. territories, but excluding imports of crude oil into the Hawaiian Foreign Trade Zone.

Curb weight - The weight of a vehicle including all standard equipment, spare tire and wheel, all fluids and lubricants to capacity, full tank of fuel, and the weight of major optional accessories normally found on the vehicle.

Current dollars - Represents dollars current at the time designated or at the time of the transaction. In most contexts, the same meaning would be conveyed by the use of the term "dollars".

## Disposable personal income - See Income.

Distillate fuel oil - The lighter fuel oils distilled off during the refining process. Included are products known as ASTM grades numbers 1 and 2 heating oils, diesel fuels, and number 4 fuel oil. The major uses of distillate fuel oils include heating, fuel for on-and offhighway diesel engines, and railroad diesel fuel.

## Domestic air operator - See Air carrier.

## Domestic water transportation - See Internal water transportation.

Electric utilities sector - Consists of privately and publicly owned establishments which generate electricity primarily for resale.

Emission standards - Standards for the levels of pollutants emitted from automobiles and trucks. Congress established the first standards in the Clean Air Act of 1963. Currently, standards are set for four vehicle classes - automobiles, light trucks, heavy-duty gasoline trucks, and heavy-duty diesel trucks.

Energy capacity - Measured in kilowatt hours. The energy delivered by the battery, when tested at $\mathrm{C} / 3$ discharge rate, up to termination of discharge specified by the battery manufacturer. The required acceleration power must be delivered by the battery at any point up to $80 \%$ of the battery's energy capacity rating.
Energy efficiency - In reference to transportation, the inverse of energy intensiveness: the ratio of outputs from a process to the energy inputs; for example, miles traveled per gallon of fuel (mpg).

Energy intensity - In reference to transportation, the ratio of energy inputs to a process to the useful outputs from that process; for example, gallons of fuel per passenger-mile or Btu per ton-mile.

Ethanol ( $\mathbf{C}_{2} \mathbf{H}_{5} \mathbf{O H}$ ) - Otherwise known as ethyl alcohol, alcohol, or grain-spirit. A clear, colorless, flammable oxygenated hydrocarbon with a boiling point of 78.5 degrees Celsius in the anhydrous state. In transportation, ethanol is used as a vehicle fuel by itself (E100), blended with gasoline (E85), or as a gaoline octane enhancer and oxygenate ( $10 \%$ 'concentration).

## Fixed operating cost - See $\mathbf{O}$ perating cost.

## Fleet vehicles -

Private fleet vehicles: Ideally, a vehicle could be classified as a member of a fleet if it is:
a) operated in mass by a corporation or institution,
b) operated under unified control, or
c) used for non-personal activities.

However, the definition of a fleet is not consistent throughout the fleet industry. Some companies make a distinction between cars that were bought in bulk rather than singularly, or whether they are operated in bulk, as well as the minimum number of vehicles that constitute a fleet (i.e. 4 or 10).

Government fleet vehicles: Includes vehicles owned by all federal (GSA), state, county, city, and metro units of government, including toll road operations.

Foreign freight - Movements between the United States and foreign countries and between Puerto Rico, the Virgin Islands, and foreign countries. Trade between U.S. territories and possessions (e.g. Guam, Wake, American Samoa) and foreign countries is excluded. Traffic to or from the Panama Canal Zone is included.

Gas Guzzler Tax - Originates from the 1978 Energy Tax Act (Public Law 95-618). A new car purchaser is required to pay the tax if the car purchased has a combined city/highway fuel economy rating that is below the standard for that year. For model years 1986 and later, the standard is 22.5 mpg .

Gasohol - A mixture of $10 \%$ anhydrous ethanol and $90 \%$ gasoline by volume. There are other fuels that contain methanol and gasoline, but these fuels are not referred to as gasohol.

## Gasoline - See M otor gasoline.

General aviation - That portion of civil aviation which encompasses all facets of aviation except air carriers. It includes any air taxis, commuter air carriers, and air travel clubs which do not hold Certificates of Public Convenience and Necessity.

Gross National Product - A measure of monetary value of the goods and services becoming available to the nation from economic activity. Total value at market prices of all goods and services produced by the nation's economy. Calculated quarterly by the Department of Commerce, the Gross National Product is the broadest available measure of the level of economic activity.

Gross vehicle weight (gvw) - The weight of the empty vehicle plus the maximum anticipated load weight.

## Heavy-heavy truck - See Truck size classifications.

Household - Consists of all persons who occupy a housing unit, including the related family members and all unrelated persons, if any, who share the housing unit.

Housing unit - A house, apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hallway intended to be used by the occupants of another unit or by the general public, or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

Hydrocarbon (HC) - A compound that contains only hydrogen and carbon. The simplest and lightest forms of hydrocarbon are gaseous. With greater molecular weights they are liquid, while the heaviest are solids.

## Income -

Disposable personal income: Personal income less personal tax and non-tax payments.

National income - The aggregate earnings of labor and property which arise in the current production of goods and services by the nation's economy.

Personal income: The current income received by persons from all sources, net of contributions for social insurance.

Industrial sector - Construction, manufacturing, agricultural and mining establishments.

Inertia weight - The curb weight of a vehicle plus 300 pounds.

## Intercity bus - See Bus.

Internal water transportation - Includes all local (intraport) traffic and traffic between ports or landings wherein the entire movement takes place on inland waterways. Also termed internal are movements involving carriage on both inland waterways and the water of the Great Lakes, and inland movements that cross short stretches of open water that link inland systems.

## International air operator - See Air carrier.

## International freight - See Foreign freight.

Jet fuel - Includes both naphtha-type and kerosene-type fuels meeting standards for use in aircraft turbine engines. Although most jet fuel is used in aircraft, some is used for other purposes such as generating electricity in gas turbines.

Kerosene-type jet fuel: A quality kerosene product with an average gravity of 40.7 degrees API and $10 \%$ to $90 \%$ distillation temperatures of 217 to 261 degrees centigrade. Used primarily as fuel for commercial turbojet and turboprop aircraft engines. It is a relatively low freezing point distillate of the kerosene type.

Naphtha-type jet fuel: A fuel in the heavy naphtha boiling range with an average gravity of 52.8 degrees API and $10 \%$ to $90 \%$ distillation temperatures of 117 to 233 degrees centigrade used for turbojet and turboprop aircraft engines, primarily by the military. Excludes ramjet and petroleum.

Kerosene - A petroleum distillate in the 300 to 500 degrees Fahrenheit boiling range and generally having a flash point higher than 100 degrees Fahrenheit by the American Society of Testing and Material (ASTM) Method D56, a gravity range from 40 to 46 degrees API, and a burning point in the range of 150 to 175 degrees Fahrenheit. It is a clean-burning product suitable for use as an illuminant when burned in wick lamps. Includes grades of kerosene called range oil having properties similar to Number 1 fuel oil, but with a gravity of about 43 degrees API and an end point of 625 degrees Fahrenheit. Used in space heaters, cooking stoves, and water heaters.

## Kerosene-type jet fuel - See Jet fuel.

## Large car - See Automobile size classifications.

Lease Condensate - A liquid recovered from natural gas at the well or at small gas/oil separators in the field. Consists primarily of pentanes and heavier hydrocarbons (also called field condensate).

Light duty vehicles - Automobiles and light trucks combined.

Light truck - Unless otherwise noted, light trucks are defined in this publication as two-axle, fourtire trucks. The U.S. Bureau of Census classifies all trucks with a gross vehicle weight less than 10,000 pounds as light trucks (See Truck size classifications).

## Light-heavy truck - See Truck size classifications.

Liquified petroleum gas (lpg) - Consists of propane and butane and is usually derived from natural gas. In locations where there is no natural gas and the gasoline consumption is low, naphtha is converted to Ipg by catalytic reforming.

Load factor - A term relating the potential capacity of a system relative to its actual performance. Is often calculated as total passenger miles divided by total vehicle miles.

Low-emission vehicle - A clean fuel vehicle meeting the low-emission vehicle standards.

## Medium truck - See Truck size classifications.

Methanol $\left(\mathbf{C H}_{3} \mathbf{O H}\right)$ - A colorless poisonous liquid with essentially no odor and very little taste. It is the simplest alcohol and boils at 64.7 degrees Celsius. In transportation, methanol is used as a vehicle fuel by itself (M100), or blended with gasoline (M85).

## Midsize car - See Automobile size classifications.

## Minicompact car - See Automobile size classifications.

Model year - In this publication, model year is referring to the "sales" model year, the period from October 1 to the next September 31.

## Motor bus - See Bus.

Motor Gasoline - A mixture of volatile hydrocarbons suitable for operation of an internal combustion engine whose major components are hydrocarbons with boiling points ranging from 78 to 217 degrees centigrade and whose source is distillation of petroleum and cracking, polymerization, and other chemical reactions by which the naturally occurring petroleum hydrocarbons are converted into those that have superior fuel properties.

## Naphtha-type jet fuel - See Jet fuel.

## National income - See Income.

Nationwide Personal Transportation Study (NPTS) - A nationwide home interview survey of households that provides information on the characteristics and personal travel patterns of the U.S. population. Surveys were conducted in 1969, 1977, 1983 and 1990 by the U.S. Bureau of Census for the U.S. Department of Transportation.

Natural gas - A mixture of hydrocarbon compounds and small quantities of various nonhydrocarbons existing in the gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions.

Natural Gas Plant Liquids - Products obtained from processing natural gas at natural gas processing plants, including natural gasoline plants, cycling plants, and fractionators. Products obtained include ethane, liquefied petroleum gases, (propanes, butane, propanebutane mixtures, and ethane-propane mixtures), isopentane, natural gasoline, unfractionated streams, plant condensate, and other minor quantities of finished products, such as motor gasoline, special naphthas, jet fuel, kerosene, and distillate fuel oil.

Nitrogen Oxides ( $\mathbf{N O}_{\mathbf{x}}$ ) - A product of combustion of fossil fuels whose production increases with the temperature of the process. It can become an air pollutant if concentrations are excessive.

Oil Stocks - Oil stocks include crude oil (including strategic reserves), unfinished oils, natural gas plant liquids, and refined petroleum products.

## Operating cost -

Fixed operating cost: In reference to passenger car operating cost, refers to those expenditures that are independent of the amount of use of the car, such as insurance costs, fees for license and registration, depreciation and finance charges.

Variable operating cost: In reference to passenger car operating cost, expenditures which are dependent on the amount of use of the car, such as the cost of gas and oil, tires, and other maintenance.

Organization for Economic Cooperation and Development (OECD) - Consists of Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, South Korea, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. Total OECD includes the United States Territories (Guam, Puerto Rico, and the U.S. Virgin Islands). Total OECD excludes data for Czech Republic, Hungary, Mexico, Poland, and South Korea which are not yet available.

OECD Europe: Consists of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, and United Kingdom. OECD Europe excludes data for Czech Republic, Hungary, and Poland which are not yet available.

OECD Pacific: Consists of Australia, Japan, and New Zealand.

Organization for Petroleum Exporting Countries (OPEC) - Includes Saudi Arabia, Iran, Venezuela, Libya, Indonesia, United Arab Emirates, Algeria, Nigeria, Ecuador, Gabon, Iraq, Kuwait, and Qatar. Data for Saudi Arabia and Kuwait include their shares from the Partitioned Zone (formerly the Neutral Zone).

Arab OPEC - Consists of Algeria, Iraq, Kuwait, Libya, Qatar, Saudi Arabia and the United Arab Emirates.

## Other single-unit truck - See Single-unit truck.

Oxygenate - A substance which, when added to gasoline, increases the amount of oxygen in that gasoline blend. Includes fuel ethanol, methanol, and methyl tertiary butyl ether (MTBE).

Particulates - Carbon particles formed by partial oxidation and reduction of the hydrocarbon fuel. Also included are trace quantities of metal oxides and nitrides, originating from engine wear, component degradation, and inorganic fuel additives. In the transportation sector, particulates are emitted mainly from diesel engines.

Passenger-miles traveled (PMT) - One person traveling the distance of one mile. Total passenger-miles traveled, thus, give the total mileage traveled by all persons.

## Passenger rail - See Rail, "Amtrak" and "Transit Railroad".

Persian Gulf countries: Consists of Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and the United Emirates.

Personal Consumption Expenditures (PCE) - As used in the national accounts, the market value of purchases of goods and services by individuals and nonprofit institutions and the value of food, clothing, housing, and financial services received by them as income in kind. It includes the rental value of owner-occupied houses but excludes purchases of dwellings, which are classified as capital goods (investment).

## Personal income - See Income.

Petroleum - A generic term applied to oil and oil products in all forms, such as crude oil, lease condensate, unfinished oil, refined petroleum products, natural gas plant liquids, and nonhydrocarbon compounds blended into finished petroleum products.

Petroleum consumption: A calculated demand for petroleum products obtained by summing domestic production, imports of crude petroleum and natural gas liquids, imports of petroleum products, and the primary stocks at the beginning of the period and then subtracting the exports and the primary stocks at the end of the period.

Petroleum exports: Shipments of petroleum products from the 50 States and the District of Columbia to foreign countries, Puerto Rico, the Virgin Islands, and other U.S. possessions and territories.

Petroleum imports: All imports of crude petroleum, natural gas liquids, and petroleum products from foreign countries and receipts from Guam, Puerto Rico, the Virgin Islands, and the Hawaiian Trade Zone. The commodities included are crude oil, unfinished oils, plant condensate, and refined petroleum products.

Petroleum inventories: The amounts of crude oil, unfinished oil, petroleum products, and natural gas liquids held at refineries, at natural gas processing plants, in pipelines, at bulk terminals operated by refining and pipeline companies, and at independent bulk terminals. Crude oil held in storage on leases is also included; these stocks are know as primary stocks. Secondary stocks - those held by jobbers dealers, service station operators, and consumers -are excluded. Prior to 1975, stock held at independent bulk terminals were classified as secondary stocks.

Petroleum products supplied: For each petroleum product, the amount supplied is calculated by summing production, crude oil burned directly, imports, and net withdrawals from primary stocks and subtracting exports.

Processing Gain - The amount by which the total volume of refinery output is greater than the volume of input for given period of time. The processing gain arises when crude oil and other hydrocarbons are processed into products that are, on average, less dense than the input.

Processing Loss - The amount by which the total volume of refinery output is less than the volume of input for given period of time. The processing loss arises when crude oil and other hydrocarbons are processed into products that are, on average, more dense than the input.

Proved Reserves of Crude Oil - The estimated quantities of all liquids defined as crude oil, which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Quad - Quadrillion, $10^{15}$. In this publication, a Quad refers to Quadrillion Btu.

## Rail -

Amtrak (American Railroad Tracks): Operated by the National Railroad Passenger Corporation of Washington, DC. This rail system was created by President Nixon in 1970, and was given the responsibility for the operation of intercity, as distinct from suburban, passenger trains between points designated by the Secretary of Transportation.

Class I freight railroad: Defined by the Interstate Commerce Commission each year based on annual operating revenue. A railroad is dropped from the Class I list if it fails to meet the annual earnings threshold for three consecutive years.

Commuter railroad: Those portions of mainline railroad (not electric railway) transportation operations which encompass urban passenger train service for local travel between a central city and adjacent suburbs. Commuter railroad service - using both locomotive-hauled and self-propelled railroad passenger cars - is characterized by multitrip tickets, specific station-to-station fares, and usually only one or two stations in the central business district. Also known as suburban railroad.

Transit railroad: Includes "heavy" and "light" transit rail. Heavy transit rail is characterized by exclusive rights-of-way, multi-car trains, high speed rapid acceleration, sophisticated signaling, and high platform loading. Also known as subway, elevated railway, or metropolitan railway (metro). Light transit rail may be on exclusive or shared rights-of-way, high or low platform loading, multi-car trains or single cars, automated or manually operated. In generic usage, light rail includes streetcars, trolley cars, and tramways.

Residential and Commercial sector - Consists of housing units, non-manufacturing business establishments (e.g., wholesale and retail businesses), health and educational institutions, and government offices.

Residential Transportation Energy Consumption Survey (RTECS) - This survey was designed by the Energy Information Administration of the Department of Energy to provide information on how energy is used by households for personal vehicles. It has been conducted five times since 1979, the most recent being 1991.

Residual fuel oil - The heavier oils that remain after the distillate fuel oils and lighter hydrocarbons are boiled off in refinery operations. Included are products know as ASTM grade numbers 5 and 6 oil, heavy diesel oil, Navy Special Fuel Oil, Bunker C oil, and acid sludge and pitch used as refinery fuels. Residual fuel oil is used for the production of electric power, for heating, and for various industrial purposes.

Rural - Usually refers to areas with population less than 5,000 .

Sales period - October 1 of the previous year to September 30 of the given year. Approximately the same as a model year.

Sales-weighted miles per gallon (mpg) - Calculation of a composite vehicle fuel economy based on the distribution of vehicle sales.

Scrappage rate - As applied to motor vehicles, it is usually expressed as the percentage of vehicles of a certain type in a given age class that are retired from use (lacking registration) in a given year.

## School and other nonrevenue bus - See Bus.

Single unit truck - Includes two-axle, four-tire trucks and other single unit trucks.

Two-axle, four tire truck: A motor vehicle consisting primarily of a single motorized device with two axles and four tires.

Other single-unit truck: A motor vehicle consisting primarily of a single motorized device with more than two axles or more than four tires.

Special fuels - Consist primarily of diesel fuel with small amount of liquified petroleum gas, as defined by the Federal Highway Administration.

Specific acceleration power - Measured in watts per kilogram. Acceleration power divided by the battery system weight. Weight must include the total battery system.

Specific energy - Measured in watt hours per kilogram. The rated energy capacity of the battery divided by the total battery system weight.

## Subcompact car - See Automobile size classifications.

## Supplemental air carrier - See Air carrier.

Test weight - The weight setting at which a vehicle is tested on a dynomometer by the U.S. Environmental Protection Agency (EPA). This weight is determined by the EPA using the inertia weight of the vehicle.

Ton-mile - The movement of one ton of freight the distance'of one mile. Ton-miles are computed by multiplying the weight in tons of each shipment transported by the distance hauled.

## Transmission types -

A3 - Automatic three speed
A4 - Automatic four speed
A5 - Automatic five speed
L4 - Automatic lockup four speed
M5 - Manual five speed

## Transit bus - See Bus.

Transit railroad - See R ail.

Transportation sector - Consists of both private and public passenger and freight transportation, as well as government transportation, including military operations.

Truck Inventory and Use Survey (TIUS) - Survey designed to collect data on the characteristics and operational use of the nation's truck population. It is conducted every five years by the U.S. Bureau of the Census. Surveys were conducted in 1963, 1967, 1972, 1977, 1982, 1987, and 1992. The 1992 data have not yet been released.

## Trolley coach - See Bus.

Truck size classifications - U.S. Bureau of the Census has categorized trucks by gross vehicle weight (gvw) as follows:

Light - Less than 10,000 pounds gvw (Also see Light Truck.)
Medium - 10,001 to 20,000 pounds gvw
Light-heavy - 20,001 to 26,000 pounds gvw
Heavy-heavy - 26,001 pounds gvw or more.

## Two-axle, four-tire truck - See Single-unit truck.

## Two seater car - Se Automobile size classifications.

Ultra-low emission vehicle - A clean fuel vehicle meeting the more stringent Ultra-low emission standards.

Urban - Usually refers to areas with population of 5,000 or greater.

## Variable operating cost - See 0 perating cost.

Vehicle-miles traveled (vmt) - One vehicle traveling the distance of one mile. Total vehicle miles, thus, is the total mileage traveled by all vehicles.

Zero-emission vehicle - A clean fuel vehicle meeting even more stringent zero-emission vehicle standards.

## TITLE INDEX

Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles. ..... 10-8
Advanced
U.S. Advanced Battery Consortium Research Agreements, Phase II ..... 9-10
U.S. Advanced Battery Consortium Goals for Electric Vehicle Batteries ..... 9-11
Age
Automobiles in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-8
Trucks in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-9
Average Age of Automobiles and Trucks in Use, 1970-97 ..... 6-10
Average Age of Vehicles by Household Vehicle Ownership, 1995 NPTS ..... 1-12
Average Annual Miles per Household Vehicle by Vehicle Age ..... 1 1-1 3
Agency
Federal Government Vehicles by Agency, Fiscal Year 1997 ..... 10-6
Air
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Alternative
Alternative Vehicle Fuel Consumption, 1992-99 ..... 2-1 1
Estimates of Alternative Fuel Vehicles in Use, 1992-99 ..... 9-3
Estimates of Light Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-4
Estimates of Heavy Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-5
Alternative Fuel Vehicles Available by Manufacturer, Model Year 1999 ..... 9-6
Number of Alternative Refuel Sites by State and Fuel Type, 1998 ..... 9-7
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles. ..... 10-8
Amtrak
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Annual
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... 10-4
Average Annual Expenditures of Households by Income, 1997 ..... 1 1-3
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Average Annual Miles per Household Vehicle by Vehicle Age ..... 1 1-1 3
Area
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 1 1-1 6
Assessments
Summary of Recent World Oil Assessments ..... 1-2
Automobile
Automobile Operating Cost per Mile, 1975-98 ..... 5-14
Fixed Automobile Operating Costs per Year, 1975-98 ..... 5-15
Automobile Registrations for Selected Countries, 1950-96 ..... 6-2
Automobiles and Trucks in Use, 1970-97 ..... 6-5
Automobiles in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-8
Average Age of Automobiles and Trucks in Use, 1970-97 ..... 6-1 0
Scrappage and Survival Rates for Automobiles 1970, 1980 and 1990 Model Years ..... 6-1 1
New Retail Automobile Sales in the United States, 1970-97 ..... 7-3
Period Sales, Market Shares, and Sales-Weighted Fuel Economics of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998 ..... 7-9
Sales-Weighted Wheelbase of New Automobiles and Light Trucks, Sales Period 1976-98 ..... 7-11
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-1 7
Available
Alternative Fuel Vehicles Available by Manufacturer, Model Year 1999 ..... 9-6
Average
Average Price of a New Car, 1970-97 ..... 5-13
Average Age of Automobiles and Trucks in Use, 1970-97 ..... 6-10
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998 ..... 7-9
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98. ..... 7-17
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... 10-4
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... 10-4
Average Miles per Federal Vehicle by Vehicle Type, 1997 ..... $10-5$
Average Annual Expenditures of Households by Income, 1997 ..... 11-3
Average Number of Vehicles and Vehicle Travel per Household, 1991 and 1994 RTECS ..... 1 1-4
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household. 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average (continued)
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Average Vehicle Occupancy by Vehicle Type, 1995 NPTS ..... 1 1-9
Average Vehicle Occupancy by Trip Purpose, 1977, 1983, 1990, and 1995 NPTS ..... 1 1-10
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Average Age of Vehicles by Household Vehicle Ownership, 1995 NPTS ..... 1 1-1 2
Average Annual Miles per Household Vehicle by Vehicle Age ..... 1 1-1 3
Aviation
Summary Statistics for General Aviation, 1970-97 ..... 12-3
Axle
Summary Statistics for Two-Axle, Four-Tire Trucks, 1970-97 ..... 7-1 2
Barrel
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97. ..... 1-14
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
Battery
U.S. Advanced Battery Consortium Research Agreements, Phase II ..... 9-1 0
U.S. Advanced Battery Consortium Goals for Electric Vehicle Batteries ..... 9-1 1
Board
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Breakdown
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Bus
Truck and Bus Registrations for Selected Countries, 1950-96. ..... 6-3
Buses
Summary Statistics on Buses by Type, 1970-97 ..... 8-15
CAFE
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-17
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Calendar
Vehicle Stock and New Sales in United States, 1997 Calendar Year ..... 6-6
California
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Car
Average Price of a New Car, 1970-97 ..... 5-13
Carbon
International Man-Made Emissions of Carbon Dioxide, 1990-96 ..... 3-3
International Man-Made Emissions of Carbon Dioxide by Source Category, 1990 and 1996 ..... 3-4
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
Carbon (continued)
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
Total National Emissions of Carbon Monoxide, 1970-97 ..... 4-3
Emissions of Carbon Monoxide from Highway Vehicles, 1970-97 ..... 4-4
Cargo
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Carloads
Railroad Revenue Carloads by Commodity Group, 1974 and 1997 ..... 12-9
Carriers
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Cars
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-17
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
Summary Statistics for Passenger Cars, 1970-97 ..... 7-2
The Gas Guzzler Tax on New Cars ..... 7-19
Census
Household Vehicle Ownership, 1960-90 Census ..... 11-5
Means of Transportation to Work, 1980 and 1990 Census ..... 11-15
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 11-16
Certificated
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Certification
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and
Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Certification (continued)Federal Exhaust Emission Certification Standards for Gasoline- andDiesel-Powered Light Trucks (Category LDT4)4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
Cities
List of Clean Cities as of $9 / 1 / 99$ by Designation. ..... 9-8
Map of Clean Cities as of $9 / 1 / 99$ ..... 9-9
City
New York City Driving Cycle ..... 7-26
Class
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Light Vehicle Market Shares by Size Class, Sales Period 1976-98 ..... 7-10
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
Truck Statistics by Gross Vehicle Weight Class, 1992 ..... 8-6
Percentage of Trucks by Size Class, 1977, 1982, 1987, and 1992 ..... 8-6
Truck Fuel Economy by Size Class, 1977, 1982, 1987, and 1992 ..... 8-7
Truck Fuel Economy by Fuel Type and Size Class, 1992 ..... 8-8
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Class I Railroad Freight Systems in the United StatesRanked by Revenue Ton-Miles, 1997 ..... 12-7
Summary Statistics for Class I Freight Railroads, 1970-97 ..... 12-8
Clean
List of Clean Cities as of $9 / 1 / 99$ by Designation. ..... 9-8
Map of Clean Cities as of $9 / 1 / 99$ ..... 9-9
Collected
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Commerce
Tonnage Statistics for Domestic and International Waterborne Commerce, 1970-97 ..... 12-4 ${ }^{6}$
Summary Statistics for Domestic Waterborne Commerce, 1970-97 ..... 12-5
Commodity
1993 Commodity Flow Survey: Shipment Characteristics by Mode of Transportation ..... 8-13
Value, Tons, and Ton-Miles of Commodity Shipments, 1993 ..... 8-14
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Railroad Revenue Carloads by Commodity Group, 1974 and 1997 ..... 12-9
Composition
Fleet Vehicle Composition by Vehicle Type, 1991 ..... $10-4$
Compounds
Total National Emissions of Volatile Organic Compounds, 1970-97 ..... 4-7
Emissions of Volatile Organic Compounds from Highway Vehicles, 1970-97 ..... 4-8
Consortium
U.S. Advanced Battery Consortium Research Agreements, Phase II ..... 9-10
U.S. Advanced Battery Consortium Goals for Electric Vehicle Batteries ..... 9-11
Consumer
Consumer Price Indices, 1970-98 ..... 5-16
Consumption
World Oil Consumption, 1960-96 ..... 1-5
Share of OECD Petroleum Stocks to OECD Petroleum Consumption, 1973-96. ..... 1-7
Share of Petroleum Stocks to Petroleum Consumption by Country, 1996 ..... 1-8
United States Petroleum Production and Consumption, 1973-98 ..... 1-1 5
United States Petroleum Production and Consumption, 1973-98 ..... 1-16
Import Share of U.S. Petroleum Consumption, 1973-98 ..... 1-17
Consumption by Petroleum by End-Use Sector, 1973-98 ..... 1-1 8
World Consumption of Primary Energy by Selected Country Groups, 1988-97 ..... 2-3
U. S. Consumption of Total Energy by End-Use Sector, 1970-98 ..... 2-4
Distribution of Energy Consumption by Source, 1973, 1980, and 1998 ..... 2-5
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Transportation Energy Consumption by Mode, 1970-97 ..... 2-8
Alternative Vehicle Fuel Consumption, 1992-99 ..... 2-1 1
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998 ..... 7-9
CorporateCorporate Average Fuel Economy (CAFE) Standards versus Sales-WeightedFuel Economy Estimates for Automobiles and Light Trucks, 1978-987-17
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Corporation
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
cost
Automobile Operating Cost per Mile, 1975-98 ..... 5-14
costs
Fixed Automobile Operating Costs per Year, 1975-98 ..... 5-15
Countries
Petroleum Stocks in OECD Countries, End of Year 1973-97 ..... 1-6
Gasoline Prices for Selected Countries, 1978-98 ..... 5-2
Diesel Fuel Prices for Selected Countries, 1978-98 ..... 5-4
Automobile Registrations for Selected Countries, 1950-96 ..... 6-2
Truck and Bus Registrations for Selected Countries, 1950-96 ..... 6-3
Country
Share of Petroleum Stocks to Petroleum Consumption by Country, 1996 ..... 1-8
World Production of Primary Energy by Selected Country Groups, 1988-97 ..... 2-2
World Consumption of Primary Energy by Selected Country Groups, 1988-97 ..... 2-3
Criteria
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
State-level Emissions for Criteria Pollutants, 1997. ..... 4-14
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Crude
World Crude Oil Production, 1960-97 ..... 1-3
Crude Oil Prices, 1870-98 ..... 1-9
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97. ..... 1-14
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
Curb
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Daily
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... $10-4$
Defending
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-1 1
Demographic
Demographic Statistics, 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-6
Destination
Long-Distance Trips by Destination, 1995 ..... 11-17
Diesel
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Diesel (continued)
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
Diesel Fuel Prices for Selected Countries, 1978-98 ..... 5-4
Dioxide
International Man-Made Emissions of Carbon Dioxide, 1990-96 ..... 3-3
International Man-Made Emissions of Carbon Dioxide by Source Category, 1990 and 1996 ..... 3-4
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
Distance
Long-Distance Trips by Destination, 1995 ..... 11-17
Long-Distance Trips by Mode and Purpose, 1995 ..... 11-18
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 11-19
Shares of Long-Distance Person Trips by Mode and Household Income, 1995 ..... 1 1-20
Distribution
Distribution of Energy Consumption by Source, 1973, 1980, and 1998 ..... 2-5
Domestic
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Period Sales, Market Shares, and Sales-Weighted Fuel Economics of New
Domestic and Import Automobiles, Selected Sales Periods 1976-98. ..... 7-4
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998 ..... 7-9
Period Sales, Market Shares, and Sales-Weighted Fuel Economics of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
Domestic (continued)
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Tonnage Statistics for Domestic and International Waterborne Commerce, 1970-97 ..... 12-4
Summary Statistics for Domestic Waterborne Commerce, 1970-97 ..... 12-5
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Driving
Urban Driving Cycle ..... 7-25
Highway Driving Cycle ..... 7-25
New York City Driving Cycle ..... 7-26
Representative Number Five Driving Cycle ..... 7-26
US06 Driving Cycle ..... 7-27
Economic
Economic Indicators, 1970-98 ..... 5-16
Economies
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Economy
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted
Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-17
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Fuel Economy by Speed, 1973, 1984 and 1997 ..... 7-22
Steady Speed Fuel Economy for Tested Vehicles ..... 7-24
Truck Fuel Economy by Size Class, 1977, 1982, 1987, and 1992 ..... 8-7
Truck Fuel Economy by Fuel Type and Size Class, 1992 ..... 8-8
Emission
National Lead Emission Estimates, 1970-97 ..... 4-13
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Emission (continued)
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Emissions
International Man-Made Emissions of All Greenhouse Gases, 1990-96 ..... 3-2
International Man-Made Emissions of Carbon Dioxide, 1990-96 ..... 3-3
International Man-Made Emissions of Carbon Dioxide by Source Category, 1990 and 1996 ..... 3-4
International Man-Made Emissions of Nitrous Oxide, 1990-96 ..... 3-5
Estimated U.S. Emissions of Greenhouse Gases, 1990-97 ..... 3-6
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-1 3
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
Total National Emissions of Carbon Monoxide, 1970-97 ..... 4-3
Emissions of Carbon Monoxide from Highway Vehicles, 1970-97 ..... 4-4
Total National Emissions of Nitrogen Oxides, 1970-97 ..... 4-5
Emissions of Nitrogen Oxides from Highway Vehicles, 1970-97 ..... 4-6
Total National Emissions of Volatile Organic Compounds, 1970-97 ..... 4-7
Emissions of Volatile Organic Compounds from Highway Vehicles, 1970-97 ..... 4-8
Total National Emissions of Particulate Matter (PM-lo), 1970-97 ..... 4-9
Emissions of Particulate Matter (PM-1 0) from Highway Vehicles, 1970-97 ..... 4-1 0
Total National Emissions of Particulate Matter (PM-2.5) 1990-97 ..... 4-1 1
Emissions of Particulate Matter (PM-2.5) from Highway Vehicles, 1990-97 ..... 4-12
State-level Emissions for Criteria Pollutants, 1997 ..... 4-14
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-17
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria.Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-1 9
Employees
Employees of Motor Vehicle and Related Industries, 1990 and 1995 ..... 5-1 8
Employment
Motor Vehicle Manufacturing Employment Statistics, 1972-97 ..... 5-17
Employment in Transportation and Related Industries, 1960-97 ..... 5-19
Energy
World Production of Primary Energy by Selected Country Groups, 1988-97 ..... 2-2
World Consumption of Primary Energy by Selected Country Groups, 1988-97 ..... 2-3
U. S. Consumption of Total Energy by End-Use Sector, 1970-98 ..... 2-4
Distribution of Energy Consumption by Source, 1973, 1980, and 1998 ..... 2-5
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Transportation Energy Use by Mode, 1996-97 ..... 2-7
Transportation Energy Consumption by Mode, 1970-97 ..... 2-8
Passenger Travel and Energy Use in the United States, 1997 ..... 2-13
Energy Intensities of Passenger Modes, 1970-97 ..... 2-14
Energy Intensity for Transit in the U.S., 1997 ..... 2-15
Intercity Freight Movement and Energy Use in the United States, 1997 ..... 2-16
Energy Intensities of Freight Modes, 1970-97 ..... 2-17
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles. ..... 10-8
Engine
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
Estimated
Estimated U.S. Emissions of Greenhouse Gases, 1990-97 ..... 3-6
Estimates
USGS World Oil Resource Estimates, 1993 ..... 1-2
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
National Lead Emission Estimates, 1970-97 ..... 4-13
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98. ..... 7-17
Estimates of Alternative Fuel Vehicles in Use, 1992-99 ..... 9-3
Estimates of Light Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-4
Estimates of Heavy Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-5
Ethanol
U.S. Production and Imports of MTBE and Fuel Ethanol, 1978-98 ..... 2-12
States With Ethanol Tax Incentives ..... 5-12
Excise
Federal Excise Taxes on Motor Fuels ..... 5-1 1
Exemptions
State Tax Exemptions for Gasohol, November 1998 ..... 5-1 1
Exhaust
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
Expenditures
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-11
Average Annual Expenditures of Households by Income, 1997 ..... 11-3
Facility
Percentage of Trucks by Fleet Size and Primary Refueling Facility, 1992. ..... 8-7
Percentage of Trucks by Major Use and Primary Refueling Facility, 1992 ..... 8-10
Federal
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal (continued)
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
Federal Excise Taxes on Motor Fuels ..... 5-1 1
Worldwide Federal Inventory, 1992-97 ..... $10-5$
Average Miles per Federal Vehicle by Vehicle Type, 1997 ..... $10-5$
Federal Government Vehicles by Agency, Fiscal Year 1997 ..... 10-6
Federal Fleet Vehicle Acquisitions by Fuel Type, FY 1997 ..... 10-7
Fuel Consumed by Federal Government Fleets, FY 1997 ..... 10-7
Fines
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Fiscal
Federal Government Vehicles by Agency, Fiscal Year 1997 ..... 10-6
Fixed
Fixed Automobile Operating Costs per Year, 1975-98 ..... 5-15
Fleet
Percentage of Trucks by Fleet Size and Primary Refueling Facility, 1992. ..... 8-7
Fleet Vehicles in Service as of January 1, 1998 ..... 10-2
Fleet Vehicle Composition by Vehicle Type, 1991 ..... 10-4
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... 10-4
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... 10-4
Federal Fleet Vehicle Acquisitions by Fuel Type, FY 1997 ..... $10-7$
Fleets
Top Ten States with Fleets of Ten Vehicles or More, 1999 ..... 10-3
Fuel Consumed by Federal Government Fleets, FY 1997 ..... 10-7
Fossil
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
Freight
Intercity Freight Movement and Energy Use in the United States, 1997 ..... 2-1 6
Energy Intensities of Freight Modes, 1970-97 ..... 2-1 7
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Summary Statistics for Class I Freight Railroads, 1970-97 ..... 12-8
Fuel
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Highway Usage of Gasoline and Special Fuels, 1973-97 ..... 2-9
Alternative Vehicle Fuel Consumption, 1992-99 ..... 2-1 1
U.S. Production and Imports of MTBE and Fuel Ethanol, 1978-98 ..... 2-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Fuel (continued)
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Diesel Fuel Prices for Selected Countries, 1978-98 ..... 5-4
Retail Prices for Motor Fuel, 1978-98 ..... 5-7
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-1 7
Corporate Average Fuel Economy (CAFE) Fines Collected, 1983-97 ..... 7-18
Fuel Economy by Speed, 1973, 1984 and 1997 ..... 7-22
Steady Speed Fuel Economy for Tested Vehicles ..... 7-24
Truck Fuel Economy by Size Class, 1977, 1982, 1987, and 1992 ..... 8-7
Truck Fuel Economy by Fuel Type and Size Class, 1992 ..... 8-8
Estimates of Alternative Fuel Vehicles in Use, 1992-99 ..... 9-3
Estimates of Light Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-4
Estimates of Heavy Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-5
Alternative Fuel Vehicles Available by Manufacturer, Model Year 1999 ..... 9-6
Number of Alternative Refuel Sites by State and Fuel Type, 1998 ..... 9-7
Federal Fleet Vehicle Acquisitions by Fuel Type, FY 1997 ..... 10-7
Fuel Consumed by Federal Government Fleets, FY 1997 ..... 10-7
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles. ..... 10-8
Fuels
Highway Usage of Gasoline and Special Fuels, 1973-97 ..... 2-9
Prices for Selected Transportation Fuels, 1978-98 ..... 5-8
State Taxes on Motor Fuels, 1999 ..... 5-9
Federal Excise Taxes on Motor Fuels ..... 5-1 1
Gallon
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
Gas
Changes. in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-1 3
Tax Receipts from the Sale of Gas Guzzlers, 1980-97 ..... 7-18
The Gas Guzzler Tax on New Cars ..... 7-19
Gases
International Man-Made Emissions of All Greenhouse Gases, 1990-96 ..... 3-2
Estimated U.S. Emissions of Greenhouse Gases, 1990-97 ..... 3-6
Gasohol
State Tax Exemptions for Gasohol, November 1998 ..... 5-11
Gasoline
Highway Usage of Gasoline and Special Fuels, 1973-97 ..... 2-9
Motor Gasoline Quantities by Type, 1981 and 1997 ..... 2-10
Federal Exhaust Emission Certification Standảrds for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
Gasoline Prices for Selected Countries, 1978-98 ..... 5-2
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
Global
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
Goals
U.S. Advanced Battery Consortium Goals for Electric Vehicle Batteries ..... 9-11
Government
Federal Government Vehicles by Agency, Fiscal Year 1997 ..... 1 0-6
Fuel Consumed by Federal Government Fleets, FY 1997 ..... 10-7
Greenhouse
International Man-Made Emissions of All Greenhouse Gases, 1990-96 ..... 3-2
Estimated U.S. Emissions of Greenhouse Gases, 1990-97 ..... 3-6
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Gross
Refinery Gross Output by World Region, 1998 ..... 1-12
New Retail Truck Sales by Gross Vehicle Weight, 1970-97 ..... 8-3
New Retail Sales of Light Trucks by Gross Vehicle Weight, 1970-97 ..... 8-4
Truck Statistics by Gross Vehicle Weight Class, 1992 ..... 8-6
Guzzler
The Gas Guzzler Tax on New Cars ..... 7-19
Guzzlers
Tax Receipts from the Sale of Gas Guzzlers, 1980-97 ..... 7-18
GVW
New Retail Sales of Trucks 10,000 pounds GVW and Less in the United States, 1970-97. ..... 7-13
Heavy
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
Estimates of Heavy Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-5
Highway
Highway Usage of Gasoline and Special Fuels, 1973-97 ..... 2-9
Emissions of Carbon Monoxide from Highway Vehicles, 1970-97 ..... 4-4
Emissions of Nitrogen Oxides from Highway Vehicles, 1970-97 ..... 4-6
Emissions of Volatile Organic Compounds from Highway Vehicles, 1970-97 ..... 4-8
Emissions of Particulate Matter (PM-1 0) from Highway Vehicles, 1970-97 ..... 4-10
Emissions of Particulate Matter (PM-2.5) from Highway Vehicles, 1990-97 ..... 4-12
Highway Vehicle Miles Traveled by Vehicle Type, 1970-97 ..... 6-7
Highway Driving Cycle ..... 7-25
Household
Average Number of Vehicles and Vehicle Travel per Household, 1991 and 1994 RTECS ..... 1 1-4
Household Vehicle Ownership, 1960-90 Census ..... 1 1-5
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Average Annual Miles per Household Vehicle by Vehicle Age ..... 11-13
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 11-19
Shares of Long-Distance Person Trips by Mode and Household Income, 1995 ..... 1-20
Households
Average Annual Expenditures of Households by Income, 1997 ..... 1 1-3
Import
Import Share of U.S. Petroleum Consumption, 1973-98 ..... 1-17
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98. ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
Imports
U.S. Petroleum Net Imports by World Region of Origin, 1960-97 ..... 1-10
U.S. Production and Imports of MTBE and Fuel Ethanol, 1978-98 ..... 2-12
Incentives
States With Ethanol Tax Incentives ..... 5-12
Income
Average Annual Expenditures of Households by Income, 1997 ..... $11-3$
Shares of Long-Distance Person Trips by Mode and Household Income, 1995 ..... 1 1-20
Indicators
Economic Indicators, 1970-98 ..... 5-16
Indices
Consumer Price Indices, 1970-98 ..... 5-16
Industries
Employees of Motor Vehicle and Related Industries, 1990 and 1995 ..... 5-18
Employment in Transportation and Related Industries, 1960-97 ..... 5-1 9
Input
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Intensities
Energy Intensities of Passenger Modes, 1970-97 ..... 2-14
Energy Intensities of Freight Modes, 1970-97 ..... 2-1 7
Intercity
Intercity Freight Movement and Energy Use in the United States, 1997 ..... 2-1 6
Interior
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Intermodal
Intermodal Rail Traffic, 1965-97 ..... 12-10
International
International Man-Made Emissions of All Greenhouse Gases, 1990-96 ..... 3-2
International Man-Made Emissions of Carbon Dioxide, 1990-96 ..... 3-3
International Man-Made Emissions of Carbon Dioxide by Source Category, 1990 and 1996 ..... 3-4
International Man-Made Emissions of Nitrous Oxide, 1990-96 ..... 3-5
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Tonnage Statistics for Domestic and International Waterborne Commerce, 1970-97 ..... 12-4
Inventory
Worldwide Federal Inventory, 1992-97 ..... 10-5
January
Fleet Vehicles in Service as of January 1, 1998 ..... $10-2$
Journey
Journey-to-Work Statistics, 1983, 1990, and 1995 NPTS ..... 11-14
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 11-16
Lead
National Lead Emission Estimates, 1970-97 ..... 4-13
Length
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... 10-4
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Light
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-31
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Light (continued)
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
Light Vehicle Market Shares by Size Class, Sales Period 1976-98 ..... 7-10
Sales-Weighted Wheelbase of New Automobiles and Light Trucks, Sales Period 1976-98 ..... 7-1 1
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
New Light Vehicle Dealerships and Sales, 1970-97 ..... 7-16
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98. ..... 7-17
New Retail Sales of Light Trucks by Gross Vehicle Weight, 1970-97 ..... 8-4
Estimates of Light Alternative Fuel Vehicles, 1995, 1997, and 1999 ..... 9-4
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles ..... 10-8
Long
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Long-Distance Trips by Destination, 1995 ..... 11-1 7
Long-Distance Trips by Mode and Purpose, 1995 ..... 11-18
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 11-19
Man-Made
International Man-Made Emissions of All Greenhouse Gases, 1990-96 ..... 3-2
International Man-Made Emissions of Carbon Dioxide, 1990-96 ..... 3-3
International Man-Made Emissions of Carbon Dioxide by Source Category, 1990 and 1996 ..... 3-4
International Man-Made Emissions of Nitrous Oxide, 1990-96 ..... 3-5
Manufacturer
Alternative Fuel Vehicles Available by Manufacturer, Model Year 1999 ..... 9-6
Manufacturing
Motor Vehicle Manufacturing Employment Statistics, 1972-97 ..... 5-17
Map
Map of Clean Cities as of $9 / 1 / 99$ ..... 9-9
Marine
Breakdown of Domestic Marine Cargo by Commodity Class, 1997 ..... 12-6
Market
OPEC Market Share, 1960-97 ..... 1-4
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Light Vehicle Market Shares by Size Class, Sales Period 1976-98 ..... 7-10
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Material
Average Material Consumption for a Domestic Automobile, 1978, 1985, and 1998 ..... 7-9
Matter
Total National Emissions of Particulate Matter (PM-10), 1970-97 ..... 4-9
Emissions of Particulate Matter (PM-10) from Highway Vehicles, 1970-97 ..... 4-10
Total National Emissions of Particulate Matter (PM-2.5), 1990-97. ..... 4-1 1
Emissions of Particulate Matter (PM-2.5) from Highway Vehicles, 1990-97 ..... 4-12
Meeting
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Metropolitan
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 11-16
Mile
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-1 3
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Automobile Operating Cost per Mile, 1975-98 ..... 5-14
Miles
Highway Vehicle Miles Traveled by Vehicle Type, 1970-97 ..... 6-7
Value, Tons, and Ton-Miles of Commodity Shipments, 1993 ..... 8-14
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... $10-4$
Average Miles per Federal Vehicle by Vehicle Type, 1997 ..... 10-5
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Vehicle-Miles by Trip Purpose, 1995 NPTS ..... 1 1-1 1
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Average Annual Miles per Household Vehicle by Vehicle Age ..... 1 1-1 3
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Mode
Transportation of Petroleum and Petroleum Products in the U.S. by Mode, 1975-97 ..... 1-19
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Transportation Energy Use by Mode, 1996-97 ..... 2-7
Transportation Energy Consumption by Mode, 1970-97 ..... 2-8
1993 Commodity Flow Survey: Shipment Characteristics by Mode of Transportation ..... 8-13
Long-Distance Trips by Mode and Purpose, 1995 ..... 11-18
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 1-1 9
Shares of Long-Distance Person Trips by Mode and Household Income, 1995 ..... 1 1-20
Middle East
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-11
MilitarySummary of 1996 Military Expenditures for Defending Oil Suppliesfrom the Middle East1-11
Model
Scrappage and Survival Rates for Automobiles 1970, 1980 and 1990 Model Years ..... 6-1 1
Alternative Fuel Vehicles Available by Manufacturer, Model Year 1999 ..... 9-6
Modes
Energy Intensities of Passenger Modes, 1970-97 ..... 2-14
Energy Intensities of Freight Modes, 1970-97 ..... 2-17
Monoxide
Total National Emissions of Carbon Monoxide, 1970-97 ..... 4-3
Emissions of Carbon Monoxide from Highway Vehicles, 1970-97 ..... 4-4
Motor
Motor Gasoline Quantities by Type, 1981 and 1997 ..... 2-10
Retail Prices for Motor Fuel, 1978-98 ..... 5-7
State Taxes on Motor Fuels, 1999 ..... 5-9
Federal Excise Taxes on Motor Fuels ..... 5-1 1
Motor Vehicle Manufacturing Employment Statistics, 1972-97 ..... 5-17
Employees of Motor Vehicle and Related Industries, 1990 and 1995 ..... 5-1 8
Movement
Intercity Freight Movement and Energy Use in the United States, 1997 ..... 2-16
MTBE
U.S. Production and Imports of MTBE and Fuel Ethanol, 1978-98 ..... 2-12
National
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
Total National Emissions of Carbon Monoxide, 1970-97 ..... 4-3
Total National Emissions of Nitrogen Oxides, 1970-97 ..... 4-5
Total National Emissions of Volatile Organic Compounds, 1970-97 ..... 4-7
Total National Emissions of Particulate Matter (PM-lo), 1970-97 ..... 4-9
National (continued)
Total National Emissions of Particulate Matter (PM-2.5), 1990-97 ..... 4-1 1
National Lead Emission Estimates, 1970-97 ..... 4-13
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 11-16
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Near
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
New York
New York City Driving Cycle ..... 7-26
Nitrogen
Total National Emissions of Nitrogen Oxides, 1970-97. ..... 4-5
Emissions of Nitrogen Oxides from Highway Vehicles, 1970-97 ..... 4-6
Nitrous
International Man-Made Emissions of Nitrous Oxide, 1990-96 ..... 3-5
NPTS
Demographic Statistics, 1969, 1977, 1983, 1990, and 1995 NPTS ..... 1 1-6
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Average Vehicle Occupancy by Vehicle Type, 1995 NPTS ..... 1 1-9
Average Vehicle Occupancy by Trip Purpose, 1977, 1983, 1990, and 1995 NPTS ..... 1 1-10
Vehicle-Miles by Trip Purpose, 1995 NPTS ..... 1 1-1 1
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Average Age of Vehicles by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Journey-to-Work Statistics, 1983, 1990, and 1995 NPTS ..... 11-14
Numerical
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
Occupancy
Average Vehicle Occupancy by Vehicle Type, 1995 NPTS ..... 1 1-9
Average Vehicle Occupancy by Trip Purpose, 1977, 1983, 1990, and 1995 NPTS ..... 1 1-10
OECD
Petroleum Stocks in OECD Countries, End of Year 1973-97 ..... 1-6
Share of OECD Petroleum Stocks to OECD Petroleum Consumption, 1973-96 ..... 1-7
Oil
World Oil Consumption, 1960-96 ..... 1-5
Crude Oil Prices, 1870-98 ..... 1-9
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-11
Oil (continued)
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97. ..... 1-14
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
OPEC
OPEC Market Share, 1960-97 ..... 1-4
Operating
Automobile Operating Cost per Mile, 1975-98 ..... 5-14
Fixed Automobile Operating Costs per Year, 1975-98 ..... 5-15
Operation
Automobiles in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-8
Trucks in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-9
Operations
Summary Statistics for Rail Transit Operations, 1970-97 ..... 12-12
Organic
Total National Emissions of Volatile Organic Compounds, 1970-97 ..... 4-7
Emissions of Volatile Organic Compounds from Highway Vehicles, 1970-97 ..... 4-8
Origin
U.S. Petroleum Net Imports by World Region of Origin, 1960-97 ..... 1-10
Others
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... $10-4$
Output
Refinery Gross Output by World Region, 1998 ..... 1-12
Ownership
Household Vehicle Ownership, 1960-90 Census ..... 1 1-5
Average Annual Miles per Vehicle by Household Vehicle Ownership, 1995 NPTS ..... 11-12
Oxide
International Man-Made Emissions of Nitrous Oxide, 1990-96 ..... 3-5
Oxides
Total National Emissions of Nitrogen Oxides, 1970-97 ..... 4-5
Emissions of Nitrogen Oxides from Highway Vehicles, 1970-97 ..... 4-6
Particulate
Total National Emissions of Particulate Matter (PM-1 0), 1970-97 ..... 4-9
Emissions of Particulate Matter (PM- 10) from Highway Vehicles, 1970-97 ..... 4-10
Total National Emissions of Particulate Matter (PM-2.5), 1990-97 ..... 4-1 1
Emissions of Particulate Matter (PM-2.5) from Highway Vehicles, 1990-97 ..... 4-1 2
Passenger
Passenger Travel and Energy Use in the United States, 1997 ..... 2-13
Energy Intensities of Passenger Modes, 1970-97 ..... 2-14
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Passenger (continued)
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-17
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
Summary Statistics for Passenger Cars, 1970-97 ..... 7-2
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Percentage
Percentage of Trucks by Size Class, 1977, 1982, 1987, and 1992 ..... 8-6
Percentage of Trucks by Fleet Size and Primary Refueling Facility, 1992. ..... 8-7
Percentage of Trucks by Major Use and Primary Refueling Facility, 1992 ..... 8-10
Percentage of Trucks by Size Ranked by Major Use, 1992 ..... 8-1 1
Periods
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98. ..... 7-7
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
Person
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Shares of Long-Distance Person Trips by Mode and Household Income, 1995 ..... 1 1-20
Petroleum
Petroleum Stocks in OECD Countries, End of Year 1973-97 ..... 1-6
Share of OECD Petroleum Stocks to OECD Petroleum Consumption, 1973-96 ..... 1-7
Share of Petroleum Stocks to Petroleum Consumption by Country, 1996 ..... 1-8
U.S. Petroleum Net Imports by World Region of Origin, 1960-97 ..... 1-1 0
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97 ..... 1-14
United States Petroleum Production and Consumption, 1973-98 ..... 1-1 5
Import Share of U.S. Petroleum Consumption, 1973-98 ..... 1-17
Consumption by Petroleum by End-Use Sector, 1973-98 ..... 1-18
Transportation of Petroleum and Petroleum Products in the U.S. by Mode, 1975-97 ..... 1-19
Phase
U.S. Advanced Battery Consortium Research Agreements, Phase II ..... 9-10
PM
Total National Emissions of Particulate Matter (PM-1 0), 1970-97 ..... 4-9
Emissions of Particulate Matter (PM- 10) from Highway Vehicles, 1970-97 ..... 4-10
Total National Emissions of Particulate Matter (PM-2.5), 1990-97 ..... 4-1 1
Emissions of Particulate Matter (PM-2.5) from Highway Vehicles, 1990-97 ..... 4-12
PMT
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... $11-8$
Policy
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles ..... 10-8
Pollutants
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
State-level Emissions for Criteria Pollutants, 1997 ..... 4-14
Population
Population and Vehicle Profile, 1950-97 ..... 1 1-2
Potentials
Numerical Estimates of Global Warming Potentials Compared With Carbon Dioxide ..... 3-9
Pounds
New Retail Sales of Trucks 10,000 pounds GVW and Less in the United States, 1970-97 ..... 7-13
Price
Average Price of a New Car, 1970-97 ..... 5-13
Consumer Price Indices, 1970-98 ..... 5-16
Prices
Crude Oil Prices, 1870-98 ..... 1-9
Gasoline Prices for Selected Countries, 1978-98 ..... 5-2
Diesel Fuel Prices for Selected Countries, 1978-98 ..... 5-4
Prices for a Barrel of Crude Oil and a Gallon of Gasoline, 1978-98 ..... 5-6
Retail Prices for Motor Fuel, 1978-98 ..... 5-7
Prices for Selected Transportation Fuels, 1978-98 ..... 5-8
Primary
World Production of Primary Energy by Selected Country Groups, 1988-97 ..... 2-2
World Consumption of Primary Energy by Selected Country Groups, 1988-97 ..... 2-3
Percentage of Trucks by Fleet Size and Primary Refueling Facility, 1992 ..... 8-7
Percentage of Trucks by Major Use and Primary Refueling Facility, 1992 ..... 8-10
Products
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97 ..... 1-14
Transportation of Petroleum and Petroleum Products in the U.S. by Mode, 1975-97 ..... 1-19
Profile
Population and Vehicle Profile, 1950-97 ..... 1 1-2
Purchase
Energy Policy Act Purchase Requirements of Light Alternative Fuel Vehicles. ..... 10-8
Purpose
Average Vehicle Occupancy by Trip Purpose, 1977, 1983, 1990, and 1995 NPTS ..... 1-10
Vehicle-Miles by Trip Purpose, 1995 NPTS ..... $11-11$
Long-Distance Trips by Mode and Purpose, 1995 ..... 1 1-1 8
Purposes
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Rail
Intermodal Rail Traffic, 1965-97 ..... 12-10
Summary Statistics for Rail Transit Operations, 1970-97 ..... 12-12
Railroad
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Railroad Revenue Carloads by Commodity Group, 1974 and 1997 ..... 12-9
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Railroads
Summary Statistics for Class I Freight Railroads, 1970-97 ..... 12-8
Ranked
Percentage of Trucks by Size Ranked by Major Use, 1992 ..... 8-1 1
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Rates
Scrappage and Survival Rates for Automobiles 1970, 1980 and 1990 Model Years ..... 6-1 1
Scrappage and Survival Rates for Trucks ..... 6-12
Receipts
Tax Receipts from the Sale of Gas Guzzlers, 1980-97 ..... 7-18
Reduction
California Vehicle Emission Reduction for Passenger Cars and Light Trucks. ..... 4-36
Refinery
Refinery Gross Output by World Region, 1998 ..... 1-12
U.S. Refinery Input of Crude Oil and Petroleum Products, 1987-97 ..... 1-13
Refinery Yield of Petroleum Products from a Barrel of Crude Oil, 1978-97. ..... 1-14
Refuel
Number of Alternative Refuel Sites by State and Fuel Type, 1998 ..... 9-7
Refueling
Percentage of Trucks by Fleet Size and Primary Refueling Facility, 1992. ..... 8-7
Percentage of Trucks by Major Use and Primary Refueling Facility, 1992 ..... 8-10
Region
U.S. Petroleum Net Imports by World Region of Origin, 1960-97 ..... 1-10
Refinery Gross Output by World Region, 1998 ..... 1-12
Registrations
Automobile Registrations for Selected Countries, 1950-96 ..... 6-2
Truck and Bus Registrations for Selected Countries, 1950-96. ..... 6-3
Representative
Representative Number Five Driving Cycle ..... 7-26
Research
U.S. Advanced Battery Consortium Research Agreements, Phase II ..... 9-10
Resource
USGS World Oil Resource Estimates, 1993 ..... 1-2
Resources
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Retail
Retail Prices for Motor Fuel, 1978-98 ..... 5-7
New Retail Automobile Sales in the United States, 1970-97 ..... 7-3
New Retail Sales of Trucks 10,000 pounds GVW and Less in the United States, 1970-97. ..... 7-13
New Retail Truck Sales by Gross Vehicle Weight, 1970-97 ..... 8-3
New Retail Sales of Light Trucks by Gross Vehicle Weight, 1970-97 ..... 8-4
Revenue
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Railroad Revenue Carloads by Commodity Group, 1974 and 1997 ..... 12-9
Route
Summary Statistics for U.S. Domestic and International Certificated
Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
RTECS
Average Number of Vehicles and Vehicle Travel per Household, 1991 and 1994 RTECS ..... 11-4
SaleTax Receipts from the Sale of Gas Guzzlers, 1980-97.7-18
Sales
Vehicle Stock and New Sales in United States, 1997 Calendar Year ..... 6-6
New Retail Automobile Sales in the United States, 1970-97 ..... 7-3
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Sales-Weighted Engine Size of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-5
Sales-Weighted Curb Weight of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-6
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Light Vehicle Market Shares by Size Class, Sales Period 1976-98 ..... 7-10
Sales-Weighted Wheelbase of New Automobiles and Light Trucks, Sales Period 1976-98 ..... 7-1 1
New Retail Sales of Trucks 10,000 pounds GVW and Less in the United States, 1970-97. ..... 7-13
Sales (continued)Period Sales, Market Shares, and Sales-Weighted Fuel Economies of NewDomestic and Import Light Trucks, Selected Sales Period 1976-987-14
Sales-Weighted Engine Size of New Domestic and Import Light Trucks by Size Class Sales Periods 1976-98 ..... 7-15
New Light Vehicle Dealerships and Sales, 1970-97 ..... 7-16
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-17
New Retail Truck Sales by Gross Vehicle Weight, 1970-97 ..... 8-3
New Retail Sales of Light Trucks by Gross Vehicle Weight, 1970-97 ..... 8-4
Scrappage
Scrappage and Survival Rates for Automobiles 1970, 1980 and 1990 Model Years ..... 6-1 1
Scrappage and Survival Rates for Trucks ..... 6-12
Sector
Consumption by Petroleum by End-Use Sector, 1973-98 ..... 1-1 8
U. S. Consumption of Total Energy by End-Use Sector, 1970-98 ..... 2-4
U.S. Carbon Dioxide Emissions from Fossil Energy Consumption by End-Use Sector, 1984-97 ..... 3-7
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Total National Emissions of the Criteria Air Pollutants by Sector, 1997 ..... 4-2
Selected
World Production of Primary Energy by Selected Country Groups, 1988-97 ..... 2-2
World Consumption of Primary Energy by Selected Country Groups, 1988-97 ..... 2-3
Gasoline Prices for Selected Countries, 1978-98 ..... 5-2
Diesel Fuel Prices for Selected Countries, 1978-98 ..... 5-4
Prices for Selected Transportation Fuels, 1978-98 ..... 5-8
Automobile Registrations for Selected Countries, 1950-96 ..... 6-2
Truck and Bus Registrations for Selected Countries, 1950-96. ..... 6-3
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... $11-8$
Service
Fleet Vehicles in Service as of January 1, 1998 ..... $10-2$
Share
OPEC Market Share, 1960-97 ..... 1-4
Share of OECD Petroleum Stocks to OECD Petroleum Consumption, 1973-96 ..... 1-7
Share of Petroleum Stocks to Petroleum Consumption by Country, 1996 ..... 1-8
Import Share of U.S. Petroleum Consumption, 1973-98 ..... 1-17
Shares
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Automobiles, Selected Sales Periods 1976-98 ..... 7-4
Light Vehicle Market Shares by Size Class, Sales Period 1976-98 ..... 7-10
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Period Sales, Market Shares, and Sales-Weighted Fuel Economies of New
Domestic and Import Light Trucks, Selected Sales Period 1976-98 ..... 7-14
Shipment
1993 Commodity Flow Survey: Shipment Characteristics by Mode of Transportation ..... 8-13
Shipments
Value, Tons, and Ton-Miles of Commodity Shipments, 1993 ..... 8-14
Single-Unit
Summary Statistics for Other Single-Unit and Combination Trucks, 1970-97 ..... 8-2
Sites
Number of Alternative Refuel Sites by State and Fuel Type, 1998 ..... 9-7
Sold
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... $10-4$
Source
Distribution of Energy Consumption by Source, 1973, 1980, and 1998 ..... 2-5
International Man-Made Emissions of Carbon Dioxide by Source Category,. 1990 and 1996 ..... 3-4
Space
Sales-Weighted Interior Space of New Domestic and Import Automobiles by Size Class, Sales Periods 1976-98 ..... 7-7
Engine Size, Curb Weight, and Interior Space of New Domestic and Import Automobiles, 1976-98 ..... 7-8
Specifications
Vehicle Specifications for Tested Vehicles ..... 7-21
Speed
Fuel Economy by Speed, 1973, 1984 and 1997 ..... 7-22
Fuel Economy by Speed, 1973, 1984 and 1997 ..... 7-23
Steady Speed Fuel Economy for Tested Vehicles. ..... 7-24
Standards
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Vehicles ..... 4-28
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT1) ..... 4-29
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT2) ..... 4-30
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT3) ..... 4-3 1
Standards (continued)
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Trucks (Category LDT4) ..... 4-32
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Light Heavy Trucks ..... 4-33
Federal Exhaust Emission Certification Standards for Gasoline- and Diesel-Powered Heavy Heavy Trucks ..... 4-34
California Passenger Cars and Light Trucks Emission Certification Standards ..... 4-35
California Air Resources Board Requirements for Meeting Emission Standards ..... 4-37
Corporate Average Fuel Economy (CAFE) Standards versus Sales-Weighted Fuel Economy Estimates for Automobiles and Light Trucks, 1978-98 ..... 7-17
Statistics
Motor Vehicle Manufacturing Employment Statistics, 1972-97 ..... 5-17
Summary Statistics for Passenger Cars, 1970-97 ..... 7-2
Summary Statistics for Two-Axle, Four-Tire Trucks, 1970-97 ..... 7-12
Summary Statistics for Other Single-Unit and Combination Trucks, 1970-97 ..... 8-2
Truck Statistics by Gross Vehicle Weight Class, 1992 ..... 8-6
Truck Statistics by Size, 1992 ..... 8-9
Summary Statistics on Buses by Type, 1970-97 ..... 8-15
Demographic Statistics, 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-6
Journey-to-Work Statistics, 1983, 1990, and 1995 NPTS ..... 11-14
National and Metropolitan Area Comparisons of Journey-to-Work Statistics, 1990 Census ..... 1 1-1 6
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Summary Statistics for General Aviation, 1970-97 ..... 12-3
Tonnage Statistics for Domestic and International Waterborne Commerce, 1970-97 ..... 12-4
Summary Statistics for Domestic Waterborne Commerce, 1970-97 ..... 12-5
Summary Statistics for Class I Freight Railroads, 1970-97 ..... 12-8
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Summary Statistics for Rail Transit Operations, 1970-97 ..... 12-12
State
State-level Emissions for Criteria Pollutants, 1997. ..... 4-14
State Taxes on Motor Fuels, 1999 ..... 5-9
State Tax Exemptions for Gasohol, November 1998 ..... 5-1 1
Number of Alternative Refuel Sites by State and Fuel Type, 1998 ..... 9-7
States
States With Ethanol Tax Incentives ..... 5-12
Top Ten States with Fleets of Ten Vehicles or More, 1999 ..... 10-3
Steady
Steady Speed Fuel Economy for Tested Vehicles ..... 7-24
StockVehicle Stock and New Sales in United States, 1997 Calendar Year6-6
Stocks
Petroleum Stocks in OECD Countries, End of Year 1973-97 ..... 1-6
Share of OECD Petroleum Stocks to OECD Petroleum Consumption, 1973-96 ..... 1-7
Share of Petroleum Stocks to Petroleum Consumption by Country, 1996 ..... 1-8
Summary
Summary of Recent World Oil Assessments ..... 1-2
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-1 1
Summary Statistics for Passenger Cars, 1970-97 ..... 7-2
Summary Statistics for Two-Axle, Four-Tire Trucks, 1970-97 ..... 7-12
Summary Statistics for Other Single-Unit and Combination Trucks, 1970-97 ..... 8-2
Summary Statistics on Buses by Type, 1970-97 ..... 8-15
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Summary Statistics for General Aviation, 1970-97 ..... 12-3
Summary Statistics for Domestic Waterborne Commerce, 1970-97 ..... 12-5
Summary Statistics for Class I Freight Railroads, 1970-97 ..... 12-8
Summary Statistics for the National Railroad Passenger Corporation (Amtrak), 1971-97 ..... 12-11
Summary Statistics for Rail Transit Operations, 1970-97 ..... 12-12
Supplies
Summary of 1996 Military Expenditures for Defending Oil Supplies from the Middle East ..... 1-1 1
Survival
Scrappage and Survival Rates for Automobiles 1970, 1980 and 1990 Model Years ..... 6-1 1
Scrappage and Survival Rates for Trucks ..... 6-12
Systems
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Tax
State Tax Exemptions for Gasohol, November 1998 ..... 5-1 1
States With Ethanol Tax Incentives ..... 5-12
Tax Receipts from the Sale of Gas Guzzlers, 1980-97 ..... 7-1 8
The Gas Guzzler Tax on New Cars ..... 7-19
Taxes
State Taxes on Motor Fuels, 1999 ..... 5-9
Federal Excise Taxes on Motor Fuels ..... 5-11
Technologies
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Near-Term Technologies ..... 3-12
Changes in Per-Mile, Fuel-Cycle Energy Use and Greenhouse Gas Emissions for Passenger Cars using Long-Term Technologies ..... 3-13
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Near-Term Technologies ..... 4-1 7
Technologies (continued)
Changes in Per-Mile, Fuel-Cycle Energy Use and Criteria Pollutant Emissions for Passenger Cars using Long-Term Technologies ..... 4-19
Tested
Vehicle Specifications for Tested Vehicles ..... 7-2 1
Steady Speed Fuel Economy for Tested Vehicles ..... 7-24
Time
Average Length of Time Fleet Vehicles are Kept Before Sold to Others, 1991 ..... 10-4
Tire
Summary Statistics for Two-Axle, Four-Tire Trucks, 1970-97 ..... 7-12
Ton
Value, Tons, and Ton-Miles of Commodity Shipments, 1993 ..... 8-14
Class I Railroad Freight Systems in the United States Ranked by Revenue Ton-Miles, 1997 ..... 12-7
Tonnage
Tonnage Statistics for Domestic and International Waterborne Commerce, 1970-97 ..... 12-4
Totals
Summary Statistics for U.S. Domestic and International Certificated Route Air Carriers (Combined Totals), 1970-97 ..... 12-2
Traffic
Intermodal Rail Traffic, 1965-97 ..... 12-10
Transit
Energy Intensity for Transit in the U.S., 1997 ..... 2-15
Summary Statistics for Rail Transit Operations, 1970-97 ..... 12-12
Transportation
Transportation of Petroleum and Petroleum Products in the U.S. by Mode, 1975-97 ..... 1-19
Domestic Consumption of Transportation Energy by Mode and Fuel Type, 1997 ..... 2-6
Transportation Energy Use by Mode, 1996-97 ..... 2-7
Transportation Energy Consumption by Mode, 1970-97 ..... 2-8
U.S. Carbon Dioxide Emissions from Energy Use in the Transportation Sector, 1980-97 ..... 3-8
Prices for Selected Transportation Fuels, 1978-98 ..... 5-8
Employment in Transportation and Related Industries, 1960-97 ..... 5-19
1993 Commodity Flow Survey: Shipment Characteristics by Mode of Transportation ..... 8-13
Means of Transportation to Work, 1980 and 1990 Census ..... 11-15
Travel
Passenger Travel and Energy Use in the United States, 1997 ..... 2-13
Automobiles in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-8
Trucks in Operation and Vehicle Travel by Age, 1970 and 1997 ..... 6-9
Average Annual and Daily Vehicle-Miles of Travel for Fleet Vehicles, 1991 ..... 10-4
Average Number of Vehicles and Vehicle Travel per Household, 1991 and 1994 RTECS ..... 1 1-4
Traveled
Highway Vehicle Miles Traveled by Vehicle Type, 1970-97 ..... 6-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 1 1-8
Trip
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 11-8
Average Vehicle Occupancy by Trip Purpose, 1977, 1983, 1990, and 1995 NPTS ..... 1 1-10
Vehicle-Miles by Trip Purpose, 1995 NPTS ..... 1 1-1 1
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 11-19
Trips
Average Annual Vehicle-Miles, Vehicle Trips and Trip Length per Household 1969, 1977, 1983, 1990, and 1995 NPTS ..... 11-7
Average Annual Person-Miles Traveled (PMT), Person Trips and Trip Length per Household by Selected Trip Purposes, 1983, 1990, and 1995 NPTS ..... 11-8
Long-Distance Trips by Destination, 1995 ..... 11-17
Long-Distance Trips by Mode and Purpose, 1995 ..... 11-18
Long-Distance Household Trips by Mode and Trip Distance, 1995 ..... 1-1 9
Truck
Truck and Bus Registrations for Selected Countries, 1950-96. ..... 6-3

    ${ }^{6}$ Includes gasohol.
    ${ }^{\text {c }}$ Estimated using vehicle travel information.
    ${ }^{d}$ Two-axle, four-tire trucks.
    e 1985 data.
    ${ }^{\mathbf{f}}$ One half of fuel used by domestic carriers in international operation.

[^9]:    2 Estimated for 1980-92 as $10 \%$ of gasohol consumption.
    ${ }^{\mathbf{b}}$ Special fuels consist primarily of diesel fuel, with small quantities of liquified petroleum gas.
    ${ }^{\mathbf{c}}$ Data for gasoline and gasohol. cannot be separated in this year.
    ${ }^{d}$ Data are not available.

[^10]:    'Estimated using vehicle travel data.
    ${ }^{6}$ Data are not available.
    ${ }^{\circ}$ Nautical miles.
    ${ }^{\text {d Amtrak only. }}$
    'Sum of passenger train cars and locomotiveunits.
    passenger train car-miles.
    ${ }^{8}$ Revenue passenger miles.
    ${ }^{\text {h }}$ Light and heavy rail.

[^11]:    "All two-axle, four-tire trucks.
    ${ }^{\mathrm{b}}$ Series not continuous between 1983 and 1984 because of a change in data source by the American Public Transit Association (APTA).
    'Data are not available.
    'Average annual percentage change is from earliest year possible.

[^12]:    ${ }^{\text {a }}$ As estimates for 1990-1995 were not provided in the inventory submission, data from the second national communication are used in this table.
    ${ }^{\mathrm{b}}$ As estimates for 1990-1994 were not provided in the inventory submission, data from the second national communication are used in this table.
    "Data are not available.
    ${ }^{\text {d }}$ The trend in emissions is not shown here as estimates reported were approximately zero from 1990 to 1996.

[^13]:    "The sums of subcategories may not equal total due to rounding.
    ${ }^{\mathrm{b}}$ Less than 8,500 pounds.
    'Data are not available.

[^14]:    ${ }^{2}$ The sums of subcategories may not equal due to rounding.

[^15]:    ${ }^{\mathbf{a}}$ Excluding biogenics.

[^16]:    ${ }^{\mathrm{a}}$ No standard set.
    ${ }^{\mathrm{b}}$ Although emission standards for hydrocarbons and carbon monoxide were in effect for these years, they were not measured in grams/brake horsepower-hour and are, therefore, incompatible with this table.
    'Vehicles can meet a composite non-methane hydrocarbon and nitrogen oxide standard of 2.5 , if they meet a non-methane hydrocarbon standard of no more than 0.5 .
    ${ }^{\mathrm{d}}$ Smoke opacity is expressed in percentage for acceleration, lugging, and peak modes (acceleration/lugging/peak). Lugging is when a vehicle is carrying a load.
    ${ }^{\mathrm{e}}$ Gross vehicle weight rating (GVWR) is the maximum design loaded weight.
    ${ }^{\mathrm{f}}$ Several testing procedures have been used during the course of exhaust emission control. A steady-state 9-mode test procedure (13-mode for diesel) was used for 197083 standards. For 1984, either the steady-state tests or the EPA transient test procedure could be used. For diesels, the EPA transient test was required from 1985 to the present. For gasoline-powered vehicles, either the EPA or MVMA (Motor Vehicle Manufacturers Association) transient test procedure could be used during 1985-86, and the MVMA procedure was required thereafter.
    ${ }^{\mathrm{g}}$ Emissions standards apply to the useful life of the vehicle. Useful life was 5 years $/ 50,000$ miles through 1983 , and 8 years/l 10,000 miles for model year 1985 and after. 1984 was a transitional year in which vehicles could meet the older standard (and test procedure) or the newer one. Useful life requirement for gasoline-powered trucks meeting NOx standards for 1998 and after is 10 years $/ 10,000$ miles. The useful life requirements for heavy diesel truck standards are more complex and vary by vehicle weight, pollutant, test procedure, and year. Consult the U.S. Code of Federal Regulations for further information.

[^17]:    ${ }^{\text {a }}$ THCE for methanol vehicles. Does not apply to CNG vehicles.
    ${ }^{\mathrm{b}}$ THCE for Tier 0 methanol vehicles. NMHCE for other alcohol vehicles.
    ${ }^{\mathbf{c}}$ NMHC for diesel-fueled vehicles.
    ${ }^{\mathrm{d}}$ Diesel-fueled vehicles only.
    ${ }^{\mathbf{e}}$ Ethanol- and methanol-fueled vehicles only.

[^58]:    "Residential Transportation Energy Consumption Survey.

[^59]:    "Compiled by the Census Bureau, these data on the total number of vehicles do not match the figures on Table 4.1. The figures on Table 4.1, from R.L. Polk and Company, are the preferred data.

[^60]:    "It is believed that the methodology changes in the 1995 NPTS did not affect journey-to-work trips; therefore, no adjustment is necessary.
    ${ }^{\text {b }}$ Includes trip purposes not shown on this table.

[^61]:    ${ }^{\text {a }}$ Defined as a trip which is 75 miles or longer one way.

[^62]:    "Vehicles are ranked by descending annual miles driven.

[^63]:    "This category was "Bus or streetcar" in 1980.
    ${ }^{\mathrm{b}}$ Data are not available.

[^64]:    ${ }^{\text {a }}$ Metropolitan areas over 1 million population. There were 39 such areas in the 1990 Census.

[^65]:    "Active fixed-wing general aviation aircraft only.
    ${ }^{\text {b }}$ Include rotocraft.

[^66]:    ${ }^{2}$ Does not include self-powered units. From 1972 to 1979, the number of locomotives used in Amtrak passenger operations are subtracted from the total locomotives used in passenger and freight service to calculate the number of Class I locomotives in service.
    ${ }^{\mathrm{b}}$ Does not include private or shipper-owned cars.
    ${ }^{c}$ Tons originated is a more accurate representation of total tonnage than revenue tons. Revenue tons often produces double-counting of loads switched between rail companies.
    ${ }^{d}$ Data represent total locomotives used in freight and passenger service. Separate estimates are not available.

[^67]:    ${ }^{\mathbf{a}}$ Data are not available.
    ${ }^{\boldsymbol{b}}$ The Grand Trunk Western Railroad and the Soo Line Railroad Company data are excluded.

[^68]:    ${ }^{\text {a }}$ Data are not available.
    ${ }^{\text {b }}$ Energy use for 1994 on is not directly comparable to earlier years. Some commuter rail energy use may have been inadvertently included in earlier years.
    ${ }^{\text {c }}$ Estimated using train-miles.
    d Average annual percentage change is from earliest year available to 1997.

[^69]:    "Heavy rail and light rail. Series not continuous between 1983 and 1984 because of a change in data source by the American Public Transit Association (APTA). Beginning in 1984, data provided by APTA are taken from mandatory reports filed with the Urban Mass Transit Administration (UMTA). Data for prior years were provided on a voluntary basis by APTA members and expanded statistically.
    ${ }^{\text {b }} 1970-79$ data represents total passenger rides; after 1979, data represents unlinked pasenger trips.
    'Estimated for years 1970-76 based on an average trip length of 5.8 miles.
    ${ }^{\text {d }}$ Calculated as the ratio of passenger-miles to passenger trips.
    'Large system-to-system variations exist within this category.
    'Data are not available.
    ${ }^{8}$ Average annual percentage change is calculated for years 1977-97.
