

THE THIRTY **LARGEST AGENCIES**

For the 1994 National Transit Database Report Year

CAUTION: Extensive efforts have been made to assure the quality of information contained in this report. It is impossible, however, to achieve complete accuracy and consistency of the reported data. In addition, the reported data do not include all relevant information generally necessary to explain apparent differences in performance (e.g., information related to work rules, topography, climate, and unusual events such as strikes and service start-ups). Users of this report, therefore, should be careful not to draw unwarranted conclusions based solely on the data contained herein.

Transit Profiles The Thirty Largest Agencies

For the 1994 National Transit Database Report Year

Gordon J. Linton
Administrator
Federal Transit Administration

December 1995

Introduction

This publication consists of consolidated profiles for the thirty (30) largest transit agencies in the United States. The criterion used to determine the thirty (30) largest transit agencies is operating funds expended for the 1994 Report Year. The data contained in each profile consists of general and summary reports, as well as modal, performance, and trend indicators for the 1994 Report Year. The 1994 Report Year includes transit agencies with their fiscal years ending on or between January 1 and December 31, 1994, inclusive.

In order to provide a more user-friendly and easily understood document, a unique publication name has been created for some transit agencies. Many transit agencies have similar names such as "Mass Transportation Authority" or "Regional Transit District." This publication places emphasis on urbanized areas to assist with geographical references and to show relationships with regional governing bodies and contractual relationships with purchased transportation providers. In addition, where contractual relationships exist with private providers that also file a separate report, information is provided to denote these providers.

The left page of each profile shows both general and financial information. General information includes the Size of the Urbanized Area, Service Area, Service Supplied, Service Consumed, and the Number of Vehicles Operated in Maximum Service. Financial information includes the Sources of Operating Funds Expended, Summary of Operating Expenses, Sources of Capital Funds Expended, and Uses of Capital Funds. For 1994, new and enhanced reporting requirements have provided additional information on Operating Funds Expended, which now include both Retained and Returned Fares as part of Passenger Fares, and the inclusion of subsidies from Other Sectors of Operations with Local Funds. Also, a new section has been added to report Reconciling Cash Expenditures such as interest expense, rentals, and leases.

Two pie charts at the bottom of the page depict the Sources of Operating Funds Expended and Sources of Capital Funds Expended. Pie charts that have a zero value or only one item equal to 100 percent are not depicted.

The right page of the profile portrays transit system characteristics by mode. If a transit agency has more than four modes, only the four modes with the largest operating expenses are included. If a transit agency operates Bus (MB) and/or Heavy Rail (HR) modes, their data will always appear in columns one and two, respectively. Two other columns are provided if additional modes are operated. These columns are arranged in descending order of their respective operating expense. Specific financial and service characteristics, as well as performance measures are listed for each mode. Performance measures have been derived from individual mode characteristic data. The performance measures represent service efficiency, cost effectiveness and service effectiveness for certain modes.

At the bottom of the right page are line graphs for selected performance measures. They are provided for the modes in columns one and two to indicate trend data from 1990 through 1994. Inconsistent patterns on the line graphs are due to certain anomalies in the reported data. Potential reasons for these anomalies include: (1) the transit agency commenced reporting after 1990; (2) a new mode and/or type of service was reported after 1990; (3) a report was not received for a given year between 1990 and 1994; (4) a waiver was granted for financial and/or operational data; (5) data that was determined to be questionable, was partially deleted, or was zeroed for a given year; and, (6) the elimination of joint expense reporting with the 1992 Report Year.

For transit agencies with purchased transportation relationships exceeding one hundred (100) vehicles operated in maximum service, the reports of both the transit agency and the purchased transportation provider(s) have been consolidated. This provides a more comprehensive summary of financial performance (reporting operating funds expended and reporting operating expenses) as well as the amount of transit service actually supplied and consumed. Where this consolidation has occurred, a notation of the purchased transportation providers and their National Transit Database Identification Numbers has been made in the general information section. Because the reported data has been adjusted, an asterisk has been placed next to the purchased transportation expense figure to indicate data manipulation from the agency's submission. Both revenues applied and operating expenses are adjusted to reflect the aggregate amount of transit services being provided through a single large agency.

Deleted (0/D), Partially Deleted (P/D), Questionable (Q), and Waiver (W) data items have been entered for affected Transit Profiles. The Data Tables for the 1994 National Transit Database provide additional information regarding this subject.

Appendix A provides an aggregate total for the thirty (30) largest agencies included in this publication. Each data item is the total for the thirty largest transit agencies. The Other category includes aggregate data for the following modes: automated guideway, cable car, ferryboat, inclined plane, trolleybus, and vanpool. Modal data have also been totaled for the primary modes reported (Bus, Heavy Rail, Commuter Rail, and Light Rail).

Appendix B provides a Cross Reference Table and indicates where each data item appearing in this Profile can be located in a National Transit Database report filed by an individual transit agency. For data items that were derived, the formula used to calculate each item is listed.

Location of Data Items from the National Transit Database Reports for the Transit Profile

Systemwide Information (page 1)

(All modes, directly operated service plus purchased service where the purchased transportation provider does not file a separate National Transit Database report.)

DATA ITEM

1. Agency Name, Acronym, and ID Number:

Location in the Report Submission

Transit System Identification Form (001), ID Number.

Data Item 1. Additional information obtained by telephone contact.

Some agency names are modified to include geographical reference when names are generic (i.e., Regional Transportation Authority).

2. Address, Phone, and Chief Executive Officer (name and title):

Location in the Report Submission

Transit System Identification Form (001).

Data Item 2.

3. (1990 Census) Urbanized Area (UZA) Statistics, Square Miles, Population, Rank, and Other UZA's Served:

Location in the Report Submission

Population, rank, and UZA are obtained from the Department of Commerce, Bureau of the Census, Qualifying Urbanized Areas for the 1990 Census, *Federal Register*, Volume 57, Number 46, March 9, 1992.

Other UZA's Served:

43. Average Weekday Unlinked Trips:

Location in the Report Submission Σ "mode" Transit System Service Form (406) ln 24, col f

44. Annual Vehicle Revenue Hours:

Location in the Report Submission Σ "mode" Transit System Service Form (406) ln 09, col i for each Non-Rail Mode and/or ln 23, col i for each Rail Mode

45. Fixed Guideway Directional Route Miles (FG):

| | Mode Code | Location in the Report Submission |
|---|-----------|--|
| - | CR | Σ Transit Way Mileage Form (403) ln 08, col b |
| | HR | Σ Transit Way Mileage Form (403) ln 16, col b |
| | LR | Σ Transit Way Mileage Form (403) ln 24, col b |
| | AG | Transit Way Mileage Form (403) ln 25, col b |
| | CC | Transit Way Mileage Form (403) In 26, col b |
| | IP | Transit Way Mileage Form (403) ln 27, col b |
| | MO | Transit Way Mileage Form (403) ln 28, col b |
| | MB | Σ Transit Way Mileage Form (403) ln 29, col b + col c |
| | TB | Σ Transit Way Mileage Form (403) ln 30, col b + col c |
| | FB | Σ Transit Way Mileage Form (403) ln 31, col b |
| | TR | Σ Transit Way Mileage Form (403) ln 32, col b |
| | OR | Σ Transit Way Mileage Form (403) ln 33, col b + col c |
| | | |

Note: Mode Codes—Demand Response (DR), Jitney (JT), Publico (PB), and Vanpool (VP)—are not reported as they are considered Non-Fixed Guideway Modes. Accordingly, an N/A is assigned. In addition, if a fixed guideway service is discontinued before the end of a transit agency's fiscal year, a zero is recorded. Also, if a transit agency operates on a fixed guideway segment and another provider operates on the same segment, the segment is counted for each provider.

46. Total Fleet (Vehicles Available for Maximum Service):

Location in the Report Submission Σ "mode" Transit System Service Form (406) In 02, col i

47. Average Fleet Age in Years:

Location in the Report Submission Revenue Vehicle Inventory Form (408)

Computed

For lines 01—24 with a vehicle entry,

 Σ [(1994 - (ln*, col d)) × (ln*, col g)] ÷ (ln 25, col g)

This is computed for each mode. No computation is made, however, for automobiles or when the year of manufacture is not reported.

48. Vehicles Operated in Maximum Service:

Location in the Report Submission Σ "mode" Transit System Service Form (406) ln 01, col i

49. Peak-to-Base Ratio:

Computed

Transit System Service Form (406)—Non-Rail Modes ln 05, the greater of col b or col d $\div \Sigma$ "mode" Transit System Service Form (406) ln 05, col c or Transit System Service Form (406)—Rail Modes ln 14, the greater of col b or col d $\div \Sigma$ "mode" Transit System Service Form (406) ln 14, col c

Note: Demand Response (DR) and Vanpool (VP) modes do not have peaks; therefore, no peak-to-base ratio is calculated. Accordingly, an N/A is assigned. An N/A is also assigned if data have not been reported on ln 05, cols b and d.

50. Percent Spares:

Computed

[(Total Fleet (Item 46) – Vehicles Operated in Maximum Service (Item 48)] \div Vehicles Operated in Maximum Service (Item 48) \times 100%
