## Bureau of Transportation Statistics

Our vision for the future. Data and information of high quality will support every significant transportation policy decision, thus advancing the quality of life and the economic well-being of all Americans.

Our mission is to lead in developing transportation data and information of high quality, and to advance their effective use in public and private transportation decisionmaking.

## BTS99-06R

December 1999

America's transportation system has changed along with the nation's society and economy. The following table puts those changes in perspective:

| Characteristic | 1970 | 1998 |
| :---: | :---: | :---: |
| Resident population (thous.) | 203,984 | 270,299 |
| Total area (thous. sq. mi.) | 3,619 | a3,718 (1990) |
| Total civilian labor force (thous.) | 82,771 | 137,673 |
| Gross Domestic Product ${ }^{\text {b }}$ | \$3.4 trillion | \$7.6 trillion |
| Median household income ${ }^{\text {b }}$ | \$29,600 | 34,500 (1997) |
| Average household expenditures ${ }^{\text {b }}$ | N | 31,100 (1997) |
| Number of households (thous.) | 63,401 | 102,528 |
| Average life expectancy (years) | 70.8 | 76.5 (1997) |
| Labor force participation by women | 46\% | 60\% |
| ${ }^{2} 1990$ data reflect the inclusion of the Great Lakes, inland water, and coastal water. 1970 data include inland water only. The Census Bureau tabulates area (square miles) data for the decennial census years only. <br> ${ }^{b}$ Converted from current dollars to 1992 chained dollars using implicit deflators constructed from the Bureau of Labor Statistics' Consumer Price Index and the Bureau of Economic Analysis' chained-type price index. |  |  |
| Sources: U.S. Department of Commerce, Census Bureau, Statistical Abstract of the United States: 1998 (Washington, DC: 1998); and www. census.gov. U.S. Department of Labor, Bureau of Labor Statistics, Consumer Expenditure Survey, 1997, unpublished detailed table I 100, Oct. 7, 1998. Centers for Disease Control and Prevention, www.cdc.gov/nchs/fastats/fastats.htm. |  |  |

The Bureau of Transportation Statistics compiled the data in this guide from multiple sources. The guide is divided into five sections:
Transportation System Extent
Transportation and Safety ..... 4
Mobility ..... 10
Transportation and the Economy ..... 25
Transportation, Energy, and the Environment ..... 32

The U.S. transportation system is an extensive, interrelated network of public and private roads, airports, railroads, transit routes, waterways, terminals, ports, and pipelines. Millions of people and businesses rely on this ever-expanding system to get to work, take vacation trips, conduct business, and ship goods here and abroad. It links regions and connects small and large cities and urban and rural areas.

## Table I

The Transportation Network

| Mode | Components |
| :---: | :---: |
| Highway | Public roads |
| (1998) | 46,334 miles of Interstate highway |
|  | I I 3,757 miles of other National Highway System roads |
|  | $3,760,876$ miles of other roads |
| Air | Public-use airports |
| (1998) | 5,352 airports |

Airports serving large certificated carriers
29 large hubs ( 77 airports), 442 million enplaned passengers
31 medium hubs ( 53 airports), 92 million enplaned passengers
56 small hubs ( 73 airports), 38 million enplaned passengers
584 nonhubs (613 airports), 17 million enplaned passengers

## Rail

(1998) $\quad 119,813$ miles by Class I freight railroads ${ }^{2}$

21,356 miles by regional freight railroads
28,629 miles by local freight railroads
24,500 miles by Amtrak (passenger, FY98)

| Mode | Components |
| :---: | :---: |
| Urban transit (1997) | Directional route-miles serviced ${ }^{\text {b }}$ |
|  | Bus: 155,8I7 |
|  | Trolley bus: 420 |
|  | Commuter rail: 4,417 |
|  | Heavy rail: I,527 |
|  | Light rail: 659 |
|  | Stations |
|  | Commuter rail: 864 |
|  | Heavy rail: 997 |
|  | Light rail: 530 |
| Water (1997) | 26,000 miles of navigable waterways |
|  | 276 locks |
|  | 328 miles of ferry service ${ }^{\text {b }}$ |
|  | Ports handling more than 10 million tons |
|  | Great Lakes: $\begin{aligned} & 340 \text { terminals } \\ & 483 \text { berths }\end{aligned}$ |
|  | Inland: $\quad 1,812$ terminals |
|  |  |
| Pipeline | Oil |
|  | Crude lines: II 4,000 miles of pipe (1996) |
|  | Product lines: 86,500 miles of pipe (1996) |
|  | Gas |
|  | Transmission: 256,500 miles of pipe (1997) |
|  | Distribution: 955,300 miles of pipe (1997) |
| ${ }^{\text {a }}$ Includes 574 miles of road operated by U.S. Class I freight railroads in Canada. <br> ${ }^{\mathrm{b}}$ Directly operated service. Does not include contracted service. |  |
| Sources: U.S. Department of Transportation (USDOT), Bureau of Transportation Statistics (BTS), Transportation Statistics Annual Report 1999 (Washington, DC: 1999), table I-I; USDOT, BTS, National Transportation Statistics 1999 (Washington DC: 1999), various tables; Association of American Railroads, Railroad Facts, 1999 edition (Washington, DC: 1999); and USDOT, Federal Highway Administration, Highway Statistics 1998 (Washington, DC: 1999). |  |

> The highest priority of the U.S. Department of Transportation is to promote safety. Although progress has been made in reducing fatalities, transportation remains the leading cause of accidental deaths and injuries in the United States. In 1998, about 95 percent of transportation fatalities and an even higher percentage of injuries occurred on the nation's roadways.

Table 2
Fatalities by Transportation Mode

| Mode | $\mathbf{1 9 7 0}$ | $\mathbf{1 9 8 0}$ | $\mathbf{1 9 9 0}$ | $\mathbf{1 9 9 5}$ | $\mathbf{1 9 9 8}$ |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Large air carrier | 146 | I | 39 | 168 | l |
| Commuter air | N | 37 | 7 | 9 | 0 |
| On-demand air taxi | N | 105 | 50 | 52 | 45 |
| General aviation | 1,310 | 1,239 | 765 | 734 | 621 |
| Highway | 52,627 | 51,091 | 44,599 | 41,817 | 41,171 |
| Rai roadb | 785 | 584 | 599 | 567 | 577 |
| Transit | N | N | 339 | 274 | U |
| Waterborne <br> Vessel casualties | 178 | 206 | 85 | 46 | 31 |
| Nonvessel casualties | 420 | 281 | 101 | 137 | 76 |
| Recreational boating | 1,418 | 1,360 | 865 | 829 | 813 |
| Gas and hazardous <br> liquid pipeline | 30 | 19 | 9 | 21 | 18 |

${ }^{\text {a }}$ Includes occupants, nonoccupants, and motor vehicle fatalities at railroad crossings.
${ }^{\text {b }}$ Includes fatalities from nontrain incidents, as well as train incidents and accidents. Also includes train occupants and nonoccupants, except motor vehicle occupants at grade crossings.
${ }^{\text {c Fatalities resulting from all reportable incidents, not just accidents. Includes }}$ commuter rail, heavy rail, light rail, motor bus, demand responsive, van pool, and automated guideway.
Key: $\mathrm{N}=$ data do not exist or are not cited because of reporting changes; $\mathrm{P}=$ preliminary; $\mathrm{U}=$ unavailable.

[^0]Table 3
Distribution of Transportation Fatalities: 1997

| Category | Number | Percent |
| :---: | :---: | :---: |
| Total | 44,38I | 100.0 |
| Passenger car occupants | 22,199 | 50.0 |
| Light-truck occupants | 10,249 | 23.1 |
| Pedestrians struck by motor vehicles | 5,321 | 12.0 |
| Motorcyclists | 2,116 | 4.8 |
| Recreational boaters | 821 | 1.8 |
| Pedalcyclists struck by motor vehicles | 814 | 1.8 |
| Large-truck occupants | 723 | 1.6 |
| General aviation | 660 | 1.5 |
| Railroads ${ }^{3}$ | 602 | 1.4 |
| Other and unknown motor vehicle occupants | 420 | 0.9 |
| Other nonoccupants struck by motor vehicles ${ }^{\text {b }}$ | 153 | 0.3 |
| Heary-rail transit | 77 | 0.1 |
| Commuter air | 46 | 0.1 |
| Waterborne transportation | 46 | 0.1 |
| Grade crossings (not involving motor vehicles) | 42 | 0.1 |
| Air taxis | 39 | 0.1 |
| Bus occupants (school, intercity, transit) | 18 | 0.04 |
| Transit buses (not related to accidents)c | 9 | 0.02 |
| Gas distribution pipelines | 9 | 0.02 |
| Air carriers | 8 | 0.02 |
| Demand responsive transit (not related to accidents) | 5 | 0.01 |
| Gas transmission pipelines | 1 | $<0.01$ |
| Light-rail transit | 3 | <0.01 |
| Redundant with above: |  |  |
| Grade crossings, with motor vehicles | 419 | NA |
| Transit bus, accident-related | 100 | NA |
| Commuter rail | 79 | NA |
| Passengers on railroad trains | 6 | NA |
| Demand responsive, accident-related | 2 | NA |

${ }^{\text {a }}$ Includes fatalities on and outside trains, except at grade crossings.
${ }^{\mathrm{b}}$ Excludes pedalcyclists and pedestrians.
c Not included under highway submodes.
Key: NA = not applicable.

Motorcycles

## (Al)

Other/unknown
(Al)
Notes: Alcohol involvement pertains to either or both drivers in two-vehicle crashes and in the case of pedestrians or pedalcyclists killed in singlevehicle crashes, either the motor vehicle driver and/or the pedestrian or pedalcyclist. Alcohol results are determined from positive blood alcohol concentration (BAC) tests and police-reported AI.

Table 4b
Total Fatalities in Traffic Crashes: 1998

## Figure 2

## Fatality Rates for Selected Modes

## Light-truck occupants

## Motorcycle riders

Air carriers (5-year moving averages)

## General aviation

Note: For Part I2I air carriers, a 5-year moving average was used to track fatality rates because of the year-to-year fluctuation in fatalities. The departure data and hence the denominator of the rates are not strictly comparable between pre- and post-1977 eras, but the difference is small.

[^2]

| Highway ${ }^{\text {b }}$ | N | N | 3,231,000 | 3,465,000 | 3,192,000 |
| Railroad ${ }^{\text {c }}$ | 17,934 | 58,696 | 22,736 | 12,546 | 10,156 |
| Transit ${ }^{\text {d }}$ | N | N | 54,556 | 57,196 | U |
| Waterborne |  |  |  |  |  |
| Vessel casualties | 105 | 180 | 175 | 145 | 83 |
| Nonvessel casualties | U | U | U | 1,916 | 357 |
| Recreational boating | 780 | 2,650 | 3,822 | 4,14\| | 4,613 |
| Gas and liquid pipeline | 254 | 192 | 76 | 64 | 75 |

a Injuries classified as serious. See glossary.
b Includes passenger car occupants, motorcyclists, light-duty and large trucks, bus occupants, pedestrians, pedalcyclists, occupants of unknown vehicle types, and other nonmotorists.
c Injuries resulting from train accidents, train and nontrain incidents, and occupational illness. Includes Amtrak.
${ }^{\text {d }}$ Injuries resulting from all reportable incidents, not just from accidents.
Includes commuter rail, heavy rail, light rail, motor bus, demand responsive, van pool, and automated guideway.

Key: $\mathrm{N}=$ data do not exist; $\mathrm{R}=$ revised; $\mathrm{U}=$ unavailable.
Source: U.S. Department of Transportation, Bureau of Transportation Statistics, National Transportation Statistics 1999 (Washington, DC: 1999).

## 3 Mobility

> he U.S. transportation network provides a high degree of personal mobility and freight activity. In 1997, the transportation network supported 4.6 trillion passenger-miles and about 4 trillion ton-miles. The data in this section confirm that local and long-distance travel and freight shipments continue to grow. Several factors influence this growth: greater vehicle availability, reduced travel costs, population increases, an expanding economy, and higher consumer incomes.

Table 6
Per Capita Passenger Travel and Freight Transportation

## Number

| Passenger travel (1995) |  |
| :--- | ---: |
| Local trips per person, ${ }^{2}$ annual | $\mathrm{I}, 568$ |
| Local trips per person, ${ }^{2}$ daily | 4.3 |
| Long-distance trips ${ }^{\text {b }}$ per person, annual | 3.9 |
| Local miles per person, ${ }^{2}$ annual | $14, \mathrm{II5}$ |
| Local miles per person, ${ }^{2}$ daily | 39 |
| Long-distance miles per person, annual domestic only | 3,129 |
| Freight transportation (1997) |  |
| Tons per person, annual | 52 |
| Ton-miles per person, annual | 14,958 |

${ }^{\text {a }}$ Persons aged 5 and over. ${ }^{\text {b }}$ Each time a person goes to a destination at least 100 miles away from home and returns.
Notes: Data used for local travel are from the Nationwide Personal Transportation Survey travel-day file and include trips of all lengths made by respondents on a single day; about $95 \%$ of these daily trips were 30 miles or less. Per capita calculations are based on population estimates within each survey, not from the Census Bureau estimate reported in the table.

[^3]Table 7
Number of Aircraft, Vehicles, and Vessels

| Mode | 1970 | 1980 | 1990 | 1995 | 1997 |

| Other ${ }^{\text {c }}$ | N | 390 | 841 | I,140 | P1,627 |
| Rail: |  |  |  |  |  |
| Transit ${ }^{\text {d }}$ | N | 10,981 | 12,071 | 11,460 | ${ }^{\text {P } 13,139}$ |
| Commuter | 4,600 | 6,500 | 7,100 | 8,200 | P8,000 |
| Intercity/Amtrak ${ }^{\text {e }}$ | 6,200 | 4,500 | 6,100 | 5,500 | 5,200 |

${ }^{\text {a }}$ In July 1997, the U.S. Department of Transportation, Federal Highway Administration issued revised passenger-miles data, reassigning some vehicles from "passenger car" to "other 2-axle, 4-tire."
${ }^{\mathrm{b}}$ Includes municipally owned transit, federal, commercial, and school buses.
${ }^{\text {c }}$ Includes demand responsive, ferry boat, and other transit not specified; 1980 data include ferry boat and "other transit" only.
${ }^{\mathrm{d}}$ Includes light and heavy rail.
${ }^{\text {e }}$ Amtrak began operations in 1971.
Key: $\mathrm{N}=$ data do not exist; $\mathrm{P}=$ preliminary; $\mathrm{R}=$ revised.
Note:The numbers for "Passenger cars" and "Other 2-axle 4-tire vehicles" have been rounded to the nearest billion; the numbers for motorcycles, trucks, and buses have been rounded to the nearest 100 million.

[^13]
## 4 Transportation and the Economy

ransportation is a major sector of the U.S. economy. It moves people and goods, employs millions of workers, generates revenue, and consumes resources and services produced by other sectors of the economy. In 1998, transportation-related goods and services contributed $\$ 950$ billion to a $\$ 8.5$ I trillion U.S. Gross Domestic Product.

Figure 7

## U.S. Gross Domestic Product by Major Societal Function: 1998

alncludes all other categories, such as entertainment, products and services, personal care, premiums for personal insurance, and payments to pension plans.

| 5 Port of Los Angeles, CA (w) | 16.1 | 57.3 | 73.4 |
| 6 Los Angeles International Airport, CA (a) | 36.5 | 32.3 | 68.8 |
| 7 Port of New York, NY and NJ ( w ) | 20.6 | 47.4 | 68.0 |
| 8 Port of Buffalo-Niagara Falls, NY (I) | (I) 37.0 | 26.9 | 63.9 |
| 9 Port of Laredo,TX (1) | 25.8 | 24.1 | 49.9 |
| 10 Port of Huron, Ml (1) | 12.1 | 26.1 | 38.2 |
| II Port of Houston, TX ( w ) | 20.8 | 16.3 | 37.1 |
| 12 Chicago, IL (a) | 18.5 | 17.9 | 36.4 |
| 13 Port of Seattle,WA (w) | 10.3 | 23.3 | 33.6 |
| 14 Port of Charleston, SC (w) | 12.1 | 15.2 | 27.3 |
| 15 Port of Oakland, CA (w) | 9.9 | 15.5 | 25.4 |
| 16 Port of Norfolk,VA (w) | 13.6 | 11.4 | 25.0 |
| 17 Port of El Paso,TX (1) | 10.0 | 13.8 | 23.8 |
| 18 Miami International Airport, FL (a) | 14.6 | 6.8 | 21.4 |
| 19 Port of Tacoma, WA (w) | 4.5 | 15.1 | 19.6 |
| 20 Port of Baltimore, MD (w) | 7.1 | 11.7 | 18.8 |

Key: a = air; I = land; w = water.
Notes: Trade excludes low-value shipments (imports valued at less than $\$ 1,250$ and exports valued at less than $\$ 2,500$.) Air: Includes a low level (generally less than $2 \%-3 \%$ of the total value) of small user-fee airports located in the same region. Air gateways not identified by airport name (e.g., Chicago, IL) include the major airport(s) in that geographic area in addition to small regional airports. Due to Census Bureau confidentiality regulations, courier operations are included in the airport totals for JFK International Airport, Los Angeles, Chicago, and Miami.

[^14]Table I8a
Value of U.S. International Merchandise Trade by Mode of Transportation: 1997
(Millions of current U.S. dollars)

|  | Imports | Modal <br> $\%$ | Exports | Modal <br> $\%$ | Total <br> trade | Total, <br> modal $\%$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Total | 869,874 | 100.0 | 687,598 | 100.0 | $1,557,472$ | 100.0 |
| Water | 400,859 | 46.1 | 224,717 | 32.7 | 625,576 | 40.2 |
| Air | 212,753 | 24.5 | 219,751 | 32.0 | 432,504 | 27.8 |
| Truck | 156,531 | 18.0 | 166,766 | 24.3 | 323,297 | 20.8 |
| Rail | 50,940 | 5.9 | 18,904 | 2.7 | 69,844 | 4.5 |
| Pipeline | 13,883 | 1.6 | 249 | 0.04 | 14,132 | 0.9 |

Notes: Modal numbers and percentages will not sum to overall trade totals, which include other miscellaneous and unknown modes not separately listed. In 1997, other miscellaneous and unknown modes accounted for approximately $5.9 \%$ of the value of U.S. international merchandise trade. Water: Excludes in-transit data (i.e., merchandise shipped from one foreign country to another via a U.S. water port).
Imports: Excludes imports valued at less than $\$ 1,250$. Import value is based on U.S. general imports, customs value basis.
Exports: Excludes exports valued at less than $\$ 2,500$. Export value is FAS (free alongside ship) and represents the value of exports at the port of export, including the transaction price and inland freight, insurance, and other charges.

| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Total | 958,462 | 100.0 | 526,997 | 100.0 | $\mathbf{I , 4 8 5 , 4 5 9}$ | 100.0 |
| Water | 736,289 | 76.8 | 407,634 | 77.4 | $1,143,923$ | 77.0 |
| Air | 3,185 | 0.3 | 2,863 | 0.5 | 6,048 | 0.4 |
| Truck | 84,604 | 8.8 | 91,852 | 17.4 | 176,456 | 11.9 |
| Rail | 62,224 | 6.5 | 22,104 | 4.2 | 84,328 | 5.7 |
| Pipeline | 72,160 | 7.5 | 2,544 | 0.5 | 74,704 | 5.0 |

Notes: Modal numbers and percentages will not sum to overall trade totals, which include other miscellaneous and unknown modes not separately listed. In 1997, other miscellaneous and unknown modes accounted for approximately $5 \%$ of the weight of U.S. international merchandise trade. Water: Excludes in-transit data (i.e., merchandise shipped from one foreign country to another via a U.S. water port).
Imports: Excludes imports valued at less than $\$ 1,250$ and is based on U.S. general imports, customs value basis.

Exports: Excludes exports valued at less than $\$ 2,500$. Export value is FAS (free alongside ship) and represents the value of exports at the port of export, including the transaction price, and inland freight, insurance, and other charges.
Short ton: Unit of weight equal to 2,000 pounds.

## Federal, State, and Local Transportation Revenues and Expenditures

(Millions)

|  | 1985 | 1990 | 1995 |
| :---: | :---: | :---: | :---: |
| Current dollars |  |  |  |
| Revenues: |  |  |  |
| Total | 52,038 | 69,901 | 93,716 |
| Federal | 18,388 | 21,532 | 30,223 |
| State | 24,355 | 34,629 | 44,846 |
| Local | 9,294 | 13,740 | 18,647 |
| Expenditures: |  |  |  |
| Total | 74,515 | 99,869 | 129,289 |
| Federal (including grants) | 27,705 | 30,166 | 39,930 |
| Federal grants to states \& localities | 18,227 | 19,786 | 25,034 |
| State and local (less grants) | 46,810 | 69,703 | 89,359 |
| Constant 1992 dollars |  |  |  |
| Revenues: |  |  |  |
| Total | 65,545 | 74,136 | 86,681 |
| Federal | 22,224 | 23,173 | 27,94 |
| State | 30,632 | 36,486 | 41,489 |
| Local | 11,689 | 14,476 | 17,251 |
| Expenditures: |  |  |  |
| Total | 92,357 | 105,906 | 119,585 |
| Federal (including grants) | 33,484 | 32,465 | 36,914 |
| Federal grants to states \& localities | 22,029 | 21,293 | 23,144 |
| State and local (less grants) | 58,873 | 73,441 | 82,671 |

Note: Statistics in this table are based on data from the U.S. Department of Commerce, Census Bureau, which uses different definitions and accounting methods from those used by some modal administrations of the U.S. Department of Transportation (USDOT). For example, revenues in this table are limited to gasoline taxes, tolls, and other sources that are collected directly from transportation users. Revenue statistics published by the USDOT, Federal Highway Administration, also include other items such as investment income and other taxes and fees. Numbers may not add to totals due to rounding.

[^18]
## 5 Transportation, Energy, and the Environment

> - erious energy and environmental issues are associated with transportation. The U.S. transportation sector remains almost entirely dependent on petroleum as an energy source and more than 50 percent of the petroleum used in the United States must now be imported. Petroleum use is responsible for most of the environmental problems resulting from transportation, including carbon dioxide emissions that may contribute to global climate change.

Figure 9
U.S. Petroleum Production and Consumption: 1970-98

[^19]Figure 10
Transportation's Share of U.S. Petroleum Use: 1950-98

Note: 1997 and 1998 data are estimates.
Source: U.S. Department of Energy, Energy Information Administration, Annual Energy Review 1998, DOE/EIA-0384(98) (Washington, DC: July 1999), table 5.I2.

Figure II

## Carbon Dioxide Emissions from Energy Consumption: 1980-98

Note: Tons of carbon can be converted to tons of carbon dioxide gas by multiplying by 3.667 . One ton of carbon equals 3.667 tons of carbon dioxide gas. Electric utility emissions are spread across end-user sections.

Source: U.S. Department of Energy, Energy Information Administration,
Emissions of Greenhouse Gases in the United States, 1998, DOE/EIA-0573(98) (Washington, DC: October 1999).

Figure 12
National Transportation Emissions
Trends Index: 1970-97
Index: $1970=1.0,1990=1.0$ for PM-2.5

Key: $\mathrm{NO}_{\mathrm{x}}=$ oxides of nitrogen; PM-IO and PM-2.5 = airborne particulates of less than 10 microns or 2.5 microns, respectively; $\mathrm{CO}=$ carbon monoxide; VOC = volatile organic compounds.
Note: Transportation emissions include all onroad mobile sources and the following nonroad mobile sources: recreational vehicles and boats, airport service equipment, aircraft, commercial marine vessels, and railroads. Other nonroad sources, such as lawnmowers and farming equipment, are not included. Lead estimates include onroad mobile sources only.

[^20]
## Glossary

Air carrier-Certificated provider of scheduled and nonscheduled services.
Class I railroad-A freight railroad with an annual gross operating revenue in excess of $\$ 250$ million (based on 1991 dollars).
Commuter rail-Urban passenger train service for short-distance travel between a central city and adjacent suburbs. Does not include rapid-rail transit or light-rail service.
Directional route-miles-The sum of the mileage in each direction over which transit vehicles travel while in revenue service.
Fatality-For purposes of compiling DOT safety statistics, any injury that results in death within 30 days of a transportation crash, accident, or incident.
General aviation-All civil aviation operations other than those air carriers holding a Certificate of Public Convenience and Necessity. Types of aircraft used in general aviation range from corporate multi-engine jets piloted by a professional crew to amateur-built single-engine piston-driven acrobatic planes.
Hub-A geographic area based on the percentage of total enplaned passengers in that area. A hub may have more than one airport in it. This definition should not be confused with the definition used by airlines in describing their "hub and spoke" route structures.
Nonself-propelled vessels-Includes dry cargo and tank barges and railroad car floats that operate on the Atlantic, Gulf, Pacific Coast, Mississippi River Systems, Gulf Intracoastal Waterway, and Great Lakes System.
Other 2-axle, 4-tire vehicles-Includes vans, pickup trucks, and sport utility vehicles. Does not include passenger cars.
Passenger-mile-One passenger transported one mile. One vehicle traveling 3 miles carrying 5 passengers generates 15 passenger-miles.
Personal-use vehicles-Cars, pickup trucks, or vans; other small trucks; rental cars, trucks, or vans; recreational vehicles or motor homes; or motorcycles or mopeds.
Self-propelled vessels-Includes dry cargo vessels, tankers, and offshore supply vessels, tugboats, pushboats, and passenger vessels, such as excursion/sightseeing boats, combination passenger and dry cargo vessels, and ferries.

Serious injury (Air)—An injury that: I) requires hospitalization for more than 48 hours, commencing within 7 days from the date when the injury occurred; 2) results in a bone fracture (except simple fracture of fingers, toes, or nose); 3) involves lacerations that cause severe hemorrhages, and nerve, muscle, or tendon damage; 4) involves injury to any internal organ; or 5) involves second- or third-degree burns, or any burns affecting more than 5 percent of the body surface.
Ton-miles-A unit of measure equal to the movement of one ton over one mile.

Truck:
Single unit-A large truck on a single frame with at least 2 axles and 6 tires. Excludes "other 2-axle, 4-tire vehicles" noted above.
Combination-A power unit (truck or truck tractor) and one or more trailing units.
Vehicle-mile-One vehicle traveling one mile.

Statistics published in this Pocket Guide to Transportation come from many different sources. Some statistics are based on samples and are subject to sampling variability. Statistics may also be subject to omissions and errors in reporting, recording, and processing. For more information about the accuracy of statistics in this publication, refer to the sources listed.
