TITLE 14-AERONAUTICS AND SPACE
CHAPTER I-FEDERAL AVIATION AGENCY
SUBCHAPTER E-AIRSPACE (NEW)

(Airspace Docket No. 62-WA-109)

PART 71-DESIGNATION OF FEDERAL AIRWAYS,
CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Positive Control Area

On November 15, 1962, a Notice of Proposed Rule Making was published in the Federal Register (27 F. R. 11288) stating that the Federal Aviation Agency (FAA) proposed to include the airspace from flight level 240 to and including flight level 600 which is under the jurisdiction of the Minneapolis air route traffic control center in the positive control area. This area abuts the existing Central and Southern U. S. positive control area to the northwest and west.

The Department of the Air Force recommended that until such time as the Minneapolis air route traffic control center has complete radar coverage of the entire restricted area (R-4305) for air traffic control purposes, the area positive control boundary as proposed in Airspace Docket No. 62-WA-109 be modified to exclude R-4305. The FAA concurs in this recommendation and action is taken herein to eliminate a small portion of the proposed positive control area east-northeast of Duluth, Minnesota, by substituting latitude $46^{\circ} 42' 00''$ N, for latitude $47^{\circ} 10' 00''$ N, in the description. No other comments were received.
