The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$45 domestic, \$56.25 foreign. Single copy domestic, \$15; foreign, \$18.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 691-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory impaired individuals upon request. Voice phone: (202) 691-STAT; Federal Relay Service: 1-800-877-8339. Data on the CPI can also be accessed at <http://stats.bls.gov/cpihome.htm> through the CPI homepage. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements

February 2001

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.4 percent in February, before seasonal adjustment, to a level of 175.8 (1982-84=100). For the 12-month period ended in February, the CPI-U increased 3.5 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also rose 0.4 percent in February, prior to seasonal adjustment. The February level of 172.4 was 3.5 percent higher than the index in February 2000.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U increased 0.3 percent in February, following a 0.6-percent rise in January. The energy index, which rose 3.9 percent in January and accounted for over one-half of the overall January CPI-U increase, declined 0.2 percent in February. The index for energy services fell 1.0 percent, largely as a result of a downturn in the index for utility natural gas—down 2.4 percent, after increasing 17.4 percent in January. The index for petroleum-based energy rose 0.7 percent in February. The food index, which rose 0.3 percent in January,

increased 0.5 percent in February, reflecting a sharp turnaround in the index for fruits and vegetables. Excluding food and energy, the CPI-U rose 0.3 percent in February, the same as in January. (See page 4 for a note on planned changes in the CPI in 2002.)

The food and beverages index rose 0.5 percent in February. The index for food at home, which rose 0.2 percent in January, advanced 0.6 percent in February. A sharp turnaround in the index for fruits and vegetables more than offset smaller increases in most other food at home groups. The index for fruits and vegetables, which declined 2.7 percent in January, increased 2.6 percent in February. Within the fruits and vegetables group, the index for fresh vegetables increased 8.0 percent, while the indexes for fresh fruits and for processed fruits and vegetables declined 0.9 and 0.3 percent, respectively. (Prior to seasonal adjustment, prices for fresh vegetables rose 2.0 percent, while prices for fresh fruits declined 3.2 percent.) The index for cereal and bakery products, which rose 0.1 percent in January, advanced 0.4 percent in February. The index for meats, poultry, fish, and eggs increased substantially for the third consecutive month—up 0.9 percent in February.

Beef prices rose an additional 2.5 percent in February, following a 2.6-percent increase in January. As of February, beef prices are 9.9 percent higher than a year ago. Prices for lamb and organ meats and for pork also increased in February—up 2.0 and 0.7 percent, respectively—and have risen 8.1 and 4.8 percent over the past 12 months. Poultry prices increased 0.6 percent in February and are 2.5 percent higher than in February 2000. The indexes for dairy products and for other food at home were unchanged in February, and the index for nonalcoholic beverages declined 0.3 percent. The other two components of the food and beverages index—food away from home and alcoholic beverages—increased 0.2 and 0.1 percent, respectively.

The housing index rose 0.2 percent in February, following an increase of 1.0 percent in January. The index for fuels and utilities, which rose 5.9 percent in January, declined 1.0 percent in February. Charges for natural gas and for electricity declined 2.4 and 0.3 percent, respectively, after advancing 17.4 and 2.6 percent in January. Fuel oil prices, which turned down in January, declined 2.9 percent in February. Shelter costs, which increased 0.3 percent in January, advanced 0.4 percent in February. Within shelter, the indexes for rent and for owners' equivalent rent each rose 0.3 percent and the index for lodging away from home rose 0.8 percent. (Prior to seasonal adjustment, charges for lodging away from home rose 4.4 percent.) The index for household furnishings and operations increased 0.1 percent in February, after declining 0.1 percent in both December and January.

The transportation component rose 0.4 percent in February, after increasing 0.3 percent in January. Gasoline prices turned up in February, registering their first increase since September. The index for gasoline increased 1.2 per-

cent and accounted for over three-fifths of the overall February transportation increase. The index for new vehicles declined 0.3 percent in February. (As of February, about 85 percent of the new vehicle sample was represented by 2001 models. The 2001 models will continue to be phased in, with appropriate adjustments for quality change, over the next several months as they replace old models at dealerships. For a report on quality changes for the 2001 vehicles represented in the Producer Price Index sample, see news release USDL-00-331, dated November 9, 2000.)

The index for used cars and trucks increased for the sixth consecutive month—up 0.5 percent in February. Among motor vehicle accessories, the index for motor oil, coolant, and fluids rose 1.7 percent. Within public transportation, the index for airline fares rose 1.3 percent.

The index for apparel increased 0.8 percent in February, following declines in each of the preceding 3 months. (Prior to seasonal adjustment, apparel prices rose 2.4 percent, reflecting the introduction of higher-priced spring-summer wear.)

Medical care costs rose 0.5 percent in February to a level 4.6 percent higher than a year ago. In February, the index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—increased 0.7 percent. The index for medical care services rose 0.5 percent in February. Charges for physicians' services and hospital services increased 0.2 and 0.8 percent, respectively.

The index for recreation costs, which increased 0.3 percent in January, rose 0.1 percent in February. Increases in the indexes for cable television and for admissions to sporting events more than offset price declines in the indexes for toys, for sporting goods, and for photography.

Table B. Percent changes in CPI for Urban Wage Earners and Clerical Workers (CPI-W)

Food3	.2	.1	.0	.5	.2	.5	5.1	3.1
All items less food and energy2	.2	.1	.3	.1	.3	.3	3.2	2.6

The index for education and communication increased 0.1 percent in February. Educational costs rose 0.3 percent, while the index for communication declined 0.1 percent. Within the latter category, a 1.2-percent increase in the index for postage and delivery services was more than offset by declines in the indexes for telephone services and personal computers and peripheral equipment—down 0.1 and 3.1 percent, respectively.

The index for other goods and services advanced 0.5 percent in February, following a 0.7-percent rise in Janu-

ary. The index for cigarettes, which rose 2.0 percent in January, advanced 1.1 percent in February, accounting for about three-fifths of the February advance in this major group.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.3 percent in February.

Planned Changes in the Consumer Price Index in 2002

Expenditure weight update

As announced in December 1998, the Bureau of Labor Statistics (BLS) will update the consumption expenditure weights in the Consumer Price Index for all Urban Consumers (CPI-U) and in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) to the 1999-2000 period, effective with release of data for January 2002. These new weights will replace the 1993-95 weights, which were first used in the index effective with January 1998 data. Additionally, CPI expenditure weights will be updated at 2-year intervals subsequent to the 2002 updating. Thus, for example, CPI expenditure weights will be updated to the 2001-02 period, effective with release of CPI data for January 2004.

Historically, the introduction of a comprehensive new set of expenditure weights attached to the categories of goods and services in the CPI *market basket* has taken place in the context of the periodic major revisions of the index. Such major revisions have taken place approximately once each decade—in 1940, 1953, 1964, 1978, 1987 and, most recently, in 1998.

The goal in employing current expenditure weights is to have the CPI reflect, as much as possible, the inflation currently experienced by consumers. More specifically, the use of current weights will help to ensure that the relative importance of CPI item categories, such as food away from home, college tuition, and medical care services, more accurately reflects how consumers are allocating their spending.

Publication of overlap CPIs

For the first 6 months of 2002, BLS will continue to calcu-

late and publish selected CPI-U and CPI-W *overlap* indexes on a not seasonally adjusted basis. These indexes will be compiled, using the 1993-95 expenditure pattern that was introduced into the CPI in 1998. Comparison of these index series to the corresponding updated series will enable users of the CPI to observe the effects of the expenditure weight change. The subsequent expenditure updates scheduled in 2004 and every 2 years thereafter also will be accompanied by the publication of overlap indexes for a 6-month period using the previous expenditure pattern.

Publication of CPI for the Phoenix area

Effective with release of the July 2002 Consumer Price Index (CPI), BLS will initiate publication of consumer price data specific to the Phoenix-Mesa, Arizona, Metropolitan Statistical Area. As with the national CPI and other local area CPIs, data will be published for each of two population groups, that for all urban consumers (CPI-U) and that for urban wage earners and clerical workers (CPI-W). The Phoenix-Mesa CPI will be published on a semi-annual basis with a reference base of December 2001 = 100. The same amount of item detail will be available for Phoenix-Mesa as is presently available for all other areas published on a semi-annual basis.

Change to published item structure

Effective with release of the January 2002 CPI, BLS will begin publishing an item index for leased cars and trucks. This index series will be available monthly at the U.S. City Average area level for both the CPI-U and CPI-W with a December 2001 = 100 reference base.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about cross classifications.

² Indexes on a December 1997=100 base.

³ The 'All items' index size B/C is on a December 1996=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁵ Indexes on a December 1982=100 base.

⁶ Special index based on a substantially smaller sample.

⁷ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1997=100 base.

⁴ Indexes on a December 1986=100 base.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about cross classifications.

² Indexes on a December 1997=100 base.

³ The 'All items' index size B/C is on a December 1996=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁵ Indexes on a December 1984=100 base

⁶ Special index based on a substantially smaller sample.

⁷ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1997=100 base.

⁴ Indexes on a December 1986=100 base.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 1 (see Table 10) will appear next month.
² Index on a November 1977=100 base in Miami.
³ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.
⁴ Indexes on a December 1984=100 base

⁵ Special index based on a substantially smaller sample.
⁶ Indexes on a December 1993=100 base.
⁷ Indexes on a December 1997=100 base.
 - Data not available.
 NOTE: Index applies to a month as a whole, not to any specific date.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) that covers approximately 87 percent of the total population, and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) that covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees, and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls from the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes also are published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period.

The index measures price change from a designated reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change also can be expressed in dollars as follows: the price of a base-period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details see *BLS Handbook of Methods*, chapter 17, "the Consumer Price Index," Bulletin 2490, April 1997.

Calculating Index Changes

Movements of the indexes from one month to another usually are expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by 100	0.040x100
Equals percent change	4.0

Energy Prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in

the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI not only are for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of con-

sumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than 1 gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

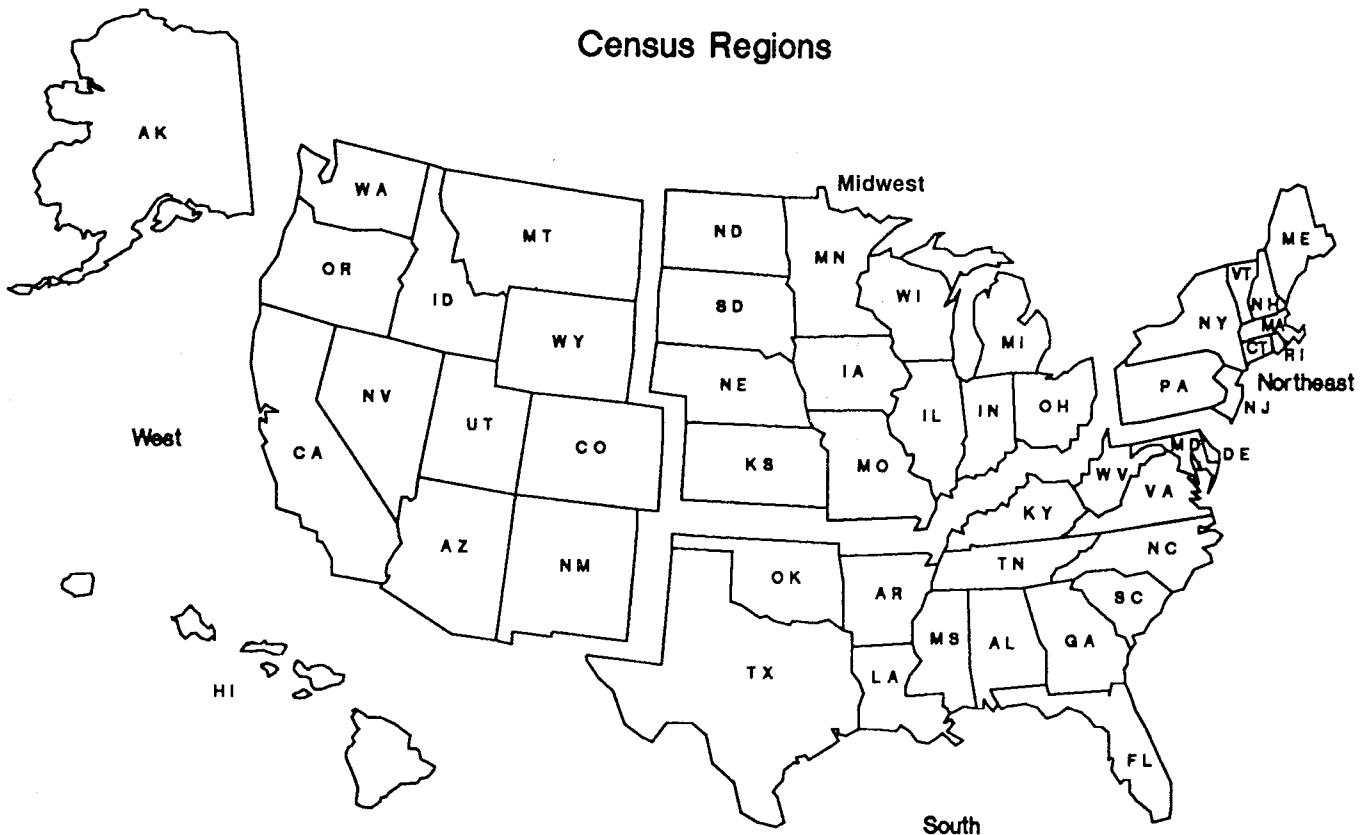

1 therm = 100,000 BTUs (U.S. Department of Energy)

1 kwh = 3,412 BTUs (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTUs (U.S. Department of Energy)

Food and Beverage Prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample

sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published, and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. Detailed specifications are available from BLS information offices or from the Washington office, upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes usually are preferred, because they eliminate the effect of changes—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales—that normally occur at the same time and in about the same magnitude every year.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1996 through 2000 were replaced at the end of 2000. The seasonal movement of All items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is re-evaluated, based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period. (Note: Thirty-eight of the 73 com-

ponents are seasonally adjusted for 2001.)

Seasonally adjusted data, including the All items index levels, are subject to revision for up to 5 years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values or sharp movements that might distort the seasonal pattern are estimated and removed from the data, prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

For the fuel oil, natural gas, motor fuels, and educational books and supplies indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For the nonalcoholic beverages index, the procedure was used to offset the effects of a large increase in coffee prices due to adverse weather. The procedure was used to account for unusual butter fat supply reductions affecting the fats and oils series. For the water and sewerage maintenance index, the procedure was used to account for a data collection anomaly.

A description of Intervention Analysis Seasonal Adjustment, as well as a list of unusual events modeled and seasonal factors for these items may be obtained by writing to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212, by calling Daniel Chow on (202) 691-6968, or by sending e-mail to Chow_Dan@bls.gov. If you have general questions about the CPI, call our information staff at (202) 691-7000.

Metropolitan Areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
 Los Angeles-Riverside-Orange County, CA
 New York-Northern New Jersey-Long Island,
 NY-NJ-CT-PA

Data for an additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even

Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists also are available in the national and information offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI, is accessible. Data and press releases from other BLS surveys also are available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help in using any of these systems.

World Wide Web. BLS maintains a website <http://stats.bls.gov> on the Internet. This BLS homepage provides access to

LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/cpihome.htm> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to information office homepages from the main BLS website listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as *anonymous*, and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All items index data for each local area also are included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 2850, Washington, DC 20212-0001, or call (202) 691-5200 or any of the BLS information offices listed below.

CPI Detailed Report. This is the most comprehensive report on the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$27 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$27 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data also may be obtained by

calling any one of the metropolitan area CPI hot lines listed below. These hotline summaries typically include data for the U.S. city average, as well as for the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(303) 844-1726
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2481
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2404/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
San Diego	(619) 557-6538
San Francisco	(415) 975-4350
Seattle	(206) 553-0645
St. Louis	(314) 539-3581
Washington, DC	(202) 691-6994

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 691-7000 or any of the information offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including the CPI, is available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release; selected national, regional, and metropolitan area historical summaries; and some technical information. The latest CPI information is posted during the

morning of release day. Call (202) 691-6325, and follow instructions to have the latest *Ready Facts* catalog sent to you. All information offices also have fax systems in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the information offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 331-3403	(404) 331-3415
Boston	(617) 565-9167	(617) 565-2327
Chicago	(312) 353-1880	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 597-4153	(215) 597-3282
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 691-6325	(202) 691-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications may be obtained by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained by writing the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, or by calling any of the information offices listed above.

The Industry Reference You've Been Waiting For!

North American Industry Classification System United States, 1997

Replaces the U.S. Standard Industrial Classification (SIC) System (1987), the Standard Industrial Classification System of Canada (1980), and the Mexican Classification of Activities and Products (1994).

The new, official NAICS system provides common industry definitions that cover the economies of the three North American Free Trade Agreement (NAFTA) countries: the United States, Canada and Mexico. Organized in a hierarchical structure much like the existing SIC, the new NAICS groups establishments with similar production processes:

- First two digits designate a major economic sector such as agriculture or manufacturing.
- Third digit designates an economic subsector.
- Fourth digit designates an industry group, such as grain and oil seed farming or fiber, yarn and thread mills.
- Fifth digit designates the NAICS industry such as wheat farming or broadwoven fabric mills.
- Optionally, each country may add additional detailed industries below the 5-digit level so long as the additional detail aggregates to a 5-digit level of NAICS.

Includes 350 new industries, definitions for each industry, tables showing the correspondence between NAICS and 1987 SIC codes, and alphabetized list of more than 18,000 businesses and their corresponding NAICS code. Follows the production-oriented economic concept.

Examples of the new classification system—

- New subsector for computers and electronic product manufacturing.
- New industry group for root, tuber, and peanut farming
- New industry for apiculture
- 8 new industries for fabricated metal products
- New structure for transportation equipment manufacture to classify industries producing equipment for transporting people and goods
- 2 new categories for chocolate and confectionery products
- Redefines support activities
- . . . and much more
