and the General Estimates System**

2000 National Statistics

Police-Reported Motor Vehicle Traffic Crashes

Fatal	37,409
Injury	2,070,000
Property Damage Only	4,286,000
Total	6,394,000

Traffic Crash Victims

	Killed	Injured
Occupants		
Drivers	25,492	2,063,000
Passengers	10,669	992,000
Unknown	88	—
Nonmotorists		
Pedestrians	4,739	78,000
Pedalcyclists	690	51,000
Other/Unknown	143	5,000
Total	41,821	3,189,000

Other National Statistics

Vehicle Miles Traveled	2,749,803,000,000
Resident Population	274,633,905
Registered Vehicles	217,028,324
Licensed Drivers	190,625,023
Economic Cost of Traffic Crashes (1994) (estimate for reported and unreported crashes).	\$150.5 billion

National Rates: Fatalities

Fatalities per 100 Million Vehicle Miles Traveled	1.5
Fatalities per 100,000 Population.	15.23
Fatalities per 100,000 Registered Vehicles	19.27
Fatalities per 100,000 Licensed Drivers.	21.94

National Rates: Injured Persons

Injured Persons per 100 Million Vehicle Miles Traveled	116
Injured Persons per 100,000 Population	1,161
Injured Persons per 100,000 Registered Vehicles.	1,469
Injured Persons per 100,000 Licensed Drivers	1,673

Sources: Crashes, Fatalities, Injuries, and Costs—National Highway Traffic Safety Administration.
Population—U.S. Bureau of the Census. Note: The population shown here is a projection based on the 1990 Census,
in order to remain consistent with the population data used for other tables in this report.
Vehicle Miles Traveled—Federal Highway Administration.
Registered Vehicles—R.L. Polk & Co. and Federal Highway Administration.

Cover Photo—This single-vehicle crash occurred in Fairfax County, Virginia. The juvenile driver, traveling at a high rate of speed, ran off the road and overturned. There were no fatalities in the crash. Photographer: Detective James D. Bean, Fairfax County Police Department, Accident Reconstruction Section.

ADMINISTRATOR'S MESSAGE

Dear Reader,

The National Highway Traffic Safety Administration is pleased to present its *Traffic Safety Facts 2000: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System*. This report combines data from two of our key crash databases, providing statistics on traffic crashes of all severities.

The mission of the National Highway Traffic Safety Administration is to reduce deaths, injuries, and economic losses from motor vehicle crashes. Fortunately, much progress has been made in reducing the number of deaths and serious injuries on our nation's highways. In 2000, the fatality rate per 100 million vehicle miles of travel fell to a new historic low of 1.5. However, nearly 6.4 million police-reported motor vehicle crashes still occurred on our highways in 2000—one every 5 seconds. On average, a person was injured in these crashes every 10 seconds, and someone was killed every 13 minutes.

Information about these crashes, such as the tables in this report, helps us better understand the highway safety problem and develop effective solutions. Reducing these numbers requires the continued and combined efforts of state, local, and federal organizations working toward this common goal.

The National Highway Traffic Safety Administration is committed to keeping highway safety high on the list of our national priorities.

I hope you find this publication useful.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey W. Runge", with a stylized flourish at the end.

Jeffrey W. Runge, MD

INTRODUCTION

In this annual report, *Traffic Safety Facts 2000: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System*, the National Highway Traffic Safety Administration (NHTSA) presents descriptive statistics about traffic crashes of all severities, from those that result in property damage to those that result in the loss of human life.

Information from two of NHTSA's primary data systems has been combined to create a single source for motor vehicle crash statistics. The first data system, the Fatality Analysis Reporting System (FARS), is probably the better known of the two sources. Established in 1975, FARS contains data on the most severe traffic crashes, those in which someone was killed. The second source is the National Automotive Sampling System General Estimates System (GES), which began operation in 1988. GES contains data from a nationally representative sample of police-reported crashes of all severities, including those that result in death, injury, or property damage. The next two sections provide a brief description of FARS and GES.

Both systems were designed and developed by NHTSA's National Center for Statistics and Analysis (NCSA) to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions, and to help provide an objective basis on which to evaluate the effectiveness of motor vehicle safety standards and highway safety initiatives. Data from these systems are used to answer requests for information from the international and national highway traffic safety communities, including state and local governments, the Congress, Federal agencies, research organizations, industry, the media, and private citizens.

FARS OPERATIONS

FARS, which became operational in 1975, contains data on a census of fatal traffic crashes within the 50 states, the District of Columbia, and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of an occupant of a vehicle or a nonmotorist within 30 days of the crash.

NHTSA has a cooperative agreement with an agency in each state's government to provide information on all qualifying fatal crashes in the state. These agreements are managed by Regional Contracting Officer's Technical Representatives located in the 10 NHTSA Regional Offices. Trained state employees, called "FARS Analysts," are responsible for gathering, translating, and transmitting their state's data to NCSA in a standard format. The number of analysts varies by state, depending on the number of fatal crashes and the ease of obtaining data.

FARS data are obtained solely from the state's existing documents:

Police Accident Reports	Death Certificates
State Vehicle Registration Files	Coroner/Medical Examiner Reports
State Driver Licensing Files	Hospital Medical Reports
State Highway Department Data	Emergency Medical Service Reports
Vital Statistics	Other State Records

From these documents, the analysts code more than 100 FARS data elements. (See Appendix A for a list of the FARS data elements.) The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The data collected within FARS do not include any personal identifying information, such as names, addresses, or social security numbers. Thus, any data kept in FARS files and made available to the public fully conform to the Privacy Act.

Each analyst enters data into a local microcomputer data file, and daily updates are sent to NHTSA's central computer database. Data are automatically checked when entered for acceptable range values and for consistency, enabling the analyst to make corrections immediately. Several programs continually monitor and improve the completeness and accuracy of the data. The 2000 FARS data file used for the statistics in this report was created in July 2001; however, the 2000 FARS file will *officially* close in February 2002. This additional time provides the opportunity for submission of important variable data requiring outside sources, which may lead to changes in the final counts. The updated final counts for 1999 are reflected in this report. The updated final counts for 2000 will be reflected in the 2001 annual report.

GES OPERATIONS

The National Automotive Sampling System - General Estimates System (NASS-GES) data are obtained from a nationally representative probability sample selected from all police-reported crashes. The system began operation in 1988. To be eligible for the GES sample, a police accident report (PAR) must be completed for the crash, and the crash must involve at least one motor vehicle traveling on a trafficway and result in property damage, injury, or death. Although various sources suggest that about half the motor vehicle crashes in the country are not reported to police, the majority of these unreported crashes involve only minor property damage and no significant personal injury. By restricting attention to police-reported crashes, the GES concentrates on those crashes of greatest concern to the highway safety community and the general public.

GES data collectors make weekly visits to approximately 410 police jurisdictions in 60 sites across the United States, where they randomly sample about 57,000 PARs per year. The collectors obtain copies of the PARs and send them to the NASS quality control centers for coding. No other data are collected beyond the selected PARs—no driver license, vehicle registration, or medical information is obtained.

Trained data entry personnel interpret and code data directly from the PARs into an electronic data file. Approximately 90 data elements are coded into a common format. (See Appendix B for a list of the GES data elements.) Some elements are modified every other year to meet the changing needs of the highway safety community. To protect individual privacy, no personal information (names, addresses, specific crash locations) is coded. During data coding, the data are checked electronically for validity and consistency. After the data file is created, further quality checks are performed on the data through computer processing and by the data coding supervisors. The 2000 file used for the statistics in this report was completed in July 2001.

ABOUT THIS REPORT

Fatal crash data from FARS and nonfatal crash data from GES are presented in this report in five chapters. Chapter 1, “Trends,” presents data from all years of FARS (1975 through 2000) and GES (1988 through 2000). The remaining chapters present data only from 2000. Chapter 2, “Crashes,” describes general characteristics of crashes, such as when and how often they occurred, where they occurred, and what happened during the crash. Chapter 3, “Vehicles,” concentrates on the types of vehicles involved in crashes and the damage to the vehicles. Chapter 4, “People,” is the largest chapter of this report, with statistics about drivers, passengers, pedestrians, and pedalcyclists. The last chapter of the report, “States,” contains information about crashes for each state, the District of Columbia, and Puerto Rico. Terms used throughout the report are defined in the Glossary.

About three-quarters of the tables in this report present data from both FARS and GES. The remaining tables contain FARS data only. Statistics describing fatal crashes or fatalities have been derived from FARS. Statistics describing injury crashes, property-damage-only crashes, or nonfatal injuries have been derived from GES. The reader should be aware that FARS numbers are actual counts of fatalities or fatal crashes, whereas GES numbers are estimates of counts of crashes and injuries and are subject to sampling and nonsampling errors. (See Appendix C for more information on these errors.) To emphasize this difference, FARS numbers are not rounded, while GES estimates have been rounded to the nearest thousand. As a result of the rounding, for some tables, the sum of the row or column entries may not equal the row or column total. In addition, percentages have been calculated prior to rounding.

The reader may also notice that many tables have rows or footnotes for unknowns for FARS data, but not for GES data. The reason for this difference is that almost all the GES unknown data have been assigned values through complex statistical procedures. FARS unknown data, on the other hand, are not assigned values, with the exception of blood alcohol concentration (BAC) test results. BAC values have been assigned to drivers and nonoccupants involved in fatal crashes when the alcohol test results are unknown. A complete description of the statistical procedures used for unknown data in GES and for unknown alcohol test results in FARS can be found in two technical reports: *Imputation in the General Estimates System* (DOT HS 807 985) and *A Method for Estimating Posterior BAC Distributions for Persons Involved in Fatal Traffic Accidents* (DOT HS 807 094). These reports are available from the National Center for Statistics and Analysis (NCSA) at the address given in the following section.

DATA AVAILABILITY

While this report presents a wide spectrum of information in more than 100 tables and figures, it contains only a fraction of the data available from FARS and GES. Additional data from FARS (1975 through 2000) or from GES (1988 through 2000) are available in four ways:

- Modest requests for specific data will be answered by NCSA at no charge. Response usually requires about 2 weeks, depending on the nature and complexity of the data requested.
- Computer tapes or compact disks can be purchased in one of several formats amenable to analysis. This will enable you to process the data using your own computer system. Information on acquiring the tapes is available by contacting the NCSA at the address below.
- FARS and GES data can be obtained by downloading any of the published files from the Internet, at <ftp://www.nhtsa.dot.gov>. The files are available in SAS, sequential ASCII, and SQL file formats. This will enable you to process the data using your own computer system.
- FARS data can also be accessed on the world wide web at www-fars.nhtsa.dot.gov. This web site provides instant access to the 1994 through 2000 FARS data via the Create-a-Query, Create-a-Map, and Reports features. The Create-a-Query feature will enable you to process the data using our interactive user interface. The Create-a-Map feature will enable you to create state-by-state and county-by-county map displays from an inventory of report selections. The Reports feature is an inventory of the fatality statistical reports found in this publication. These are national reports for current and past years that may be customized by selection of state; and for state reports, county tabulation may be selected.

Requests for more information from FARS or GES or for a copy of the data files, should be directed to:

National Highway Traffic Safety Administration
National Center for Statistics and Analysis
NRD-31
400 Seventh Street, S.W.
Washington, D.C. 20590
(202) 366-4198 or 1-800-934-8517
(202) 366-7078 (FAX)

Auto Safety Hotline

To report a safety-related problem or to inquire about motor vehicle safety information, contact the Auto Safety Hotline at 1-800-424-9393.

Additional information on all NHTSA's data files, including FARS and GES, can be found on the NCSA world wide web site: www-nrd.nhtsa.dot.gov/departments/nrd-30/ncsa. Current fact sheets, as well as recent NCSA research notes and abstracts of technical reports, can be downloaded in portable document format (.pdf). A traffic safety overview is also provided, with information from several fact sheets and data on lives saved by different types of passenger restraints. Comments and suggestions about the NCSA web site can be e-mailed to the following address: ncsaweb@nhtsa.dot.gov.

A grayscale photograph of a dense forest. Sunlight filters through the trees, creating a dappled light effect on the ground and foliage. The trees are tall and thin, with some showing signs of decay or being dead. The overall atmosphere is quiet and somewhat somber.

Chapter 1 ♦ Trends

1. TRENDS

The tables in this chapter present statistics about police-reported motor vehicle crashes over time. Trends for fatal crashes and fatalities generally are presented from 1975 (when FARS began operation) to 2000; however, tables with alcohol data from FARS show data only for the years these data are available—1982 to 2000. Trends for nonfatal crashes and injured are presented from 1988 (when GES began operation) to 2000. Care should be taken when comparing nonfatal crash and injury statistics from one year to the next. Since the statistics derived from GES data are estimates, year-to-year differences may be the result of the sampling process, not the result of an actual trend. The variability or sampling errors associated with the estimates must be considered when making any year-to-year comparisons using GES data. (For more information on sampling error, see Appendix C.) Below are some of the statistics you will find in this chapter:

- Fatal crashes increased slightly (0.7 percent) from 1999 to 2000, and the fatality rate dropped to a new historic low of 1.5 fatalities per 100 million vehicle miles of travel in 2000.
- The injury rate per 100 million vehicle miles of travel decreased by 3 percent from 1999 to 2000.
- The occupant fatality rate per 100,000 population, which declined by 23 percent from 1975 to 1992, increased by 2.4 percent from 1992 to 2000.
- The occupant injury rate per 100,000 population, which declined by 14 percent from 1988 to 1992, decreased by 2.5 percent from 1992 to 2000.
- The nonmotorist fatality rate per 100,000 population has declined by 49 percent from 1975 to 2000.
- The nonmotorist injury rate per 100,000 population has declined by 38 percent from 1988 to 2000.
- The percent of alcohol-related fatalities has declined from 57 percent in 1982 to 40 percent in 2000.

Figure 1
Fatal Crashes, 1975-2000

Table 1
Crashes by Crash Severity, 1988-2000

Year	Crash Severity						Total Crashes	
	Fatal		Injury		Property Damage Only			
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
1988	42,130	0.6	2,233,000	32.4	4,611,000	67.0	6,887,000	100.0

Note: Vehicle miles traveled (VMT) data in this table have been revised and are not based exclusively on Federal Highway Administration (FHWA) data as they have been in earlier reports. The change was made to reflect the different vehicle classification schemes used by FHWA and the National Highway Traffic Safety Administration (NHTSA).

Sources: Vehicle Miles Traveled—Federal Highway Administration, revised by NHTSA; Registered Passenger Cars and Light Trucks—R.L. Polk & Co; Registered Large Trucks and Motorcycles—Federal Highway Administration.

Table 4
Persons Killed or Injured by Person Type and Vehicle Type, 1975-2000

Year	Person Type											Total
	Occupants by Vehicle Type							Nonmotorists

*The number of whole days in the holiday period is shown in parentheses. The length of the holiday period depends on the day on which the legal holiday falls, as follows:

- If the holiday falls on *Monday*, the holiday period is from 6:00 pm Friday to 5:59 am Tuesday.
- If the holiday falls on *Tuesday*, the holiday period is from 6:00 pm Friday to 5:59 am Wednesday.
- If the holiday falls on *Wednesday*, the holiday period is from 6:00 pm Tuesday to 5:59 am Thursday.
- If the holiday falls on *Thursday*, the holiday period is from 6:00 pm Wednesday to 5:59 am Monday.
- If the holiday falls on *Friday*, the holiday period is from 6:00 pm Thursday to 5:59 am Monday.

**Blood alcohol concentration (BAC) of 0.01 grams per deciliter (g/dl) or greater. NHTSA estimates alcohol involvement when alcohol test results are unknown. For more information, see page 7 of this report.

***No data available.

Table 15
Drivers in Fatal Crashes by Blood Alcohol Concentration (BAC) and Time of Day, 1982-2000

Year	Day*			Night*			Total Drivers		
	Total	Percent		Total	Percent		Total	Percent	
		BAC = 0.01+	BAC = 0.10+		BAC = 0.01+	BAC = 0.10+		BAC = 0.01+	BAC = 0.10+
1982	23,725	17	12	32,085	55	43	56,029	39	30

Note: Restraint use is determined by police and may be overreported for survivors.

A grayscale photograph of a car crash scene. The image shows a large amount of debris scattered on the ground, including what appears to be a car's front end, a wheel, and various mechanical parts. The scene is dimly lit, with some areas of the debris highlighted by light. The overall tone is somber and chaotic.

Chapter 2 ♦ Crashes

2. CRASHES

This chapter presents statistics about police-reported motor vehicle crashes according to the most severe injury in the crash: **Fatal**, **Nonfatal Injury** (Injury), and **Property Damage**. The tables and figures are presented in four groups: Time, Location, Circumstances, and Alcohol. Below are some of the crash statistics you will find in this section:

- Nearly 6.4 million police-reported motor vehicle crashes occurred in the United States in 2000. Almost one-third of these crashes resulted in an injury, with less than 1 percent of total crashes (37,409) resulting in a death.
- Midnight to 3 a.m. on Saturdays and Sundays proved to be the deadliest 3-hour periods throughout 2000, with 1,271 and 1,218 fatal crashes, respectively.
- Fifty-six percent of fatal crashes involved only one vehicle, compared to 30 percent of both injury crashes and property-damage-only crashes.
- More than half of fatal crashes occurred on roads with posted speed limits of 55 mph or more, while only 22 percent of property-damage-only crashes occurred on these roads.
- Collision with another motor vehicle in transport was the most common first harmful event for fatal, injury, and property-damage-only crashes. Collisions with fixed objects and noncollisions accounted for only 18 percent of all crashes, but they accounted for 42 percent of fatal crashes.
- Forty percent of fatal crashes involved alcohol. For fatal crashes occurring from midnight to 3 a.m., 77 percent involved alcohol.

Table 23
Crashes and Crash Rates by Month and Crash Severity

Month	Crash Severity						Total Crashes	
	Fatal		Injury		Property Damage Only			
	Number	Rate*	Number	Rate*	Number	Rate*	Number	Rate*
January	2,886	1.4	170,000	85	388,000	195	561,000	282
February	2,532	1.3	148,000	76	324,000	166	474,000	243
March	2,842	1.2	163,000	72	327,000	144	493,000	216
April	3,026	1.4	174,000	78	321,000	144	498,000	223
May	3,169	1.3	182,000	77	349,000	147	534,000	225
June	3,239	1.4	180,000	75	344,000	145	527,000	221
July	3,504	1.5	171,000	71	324,000	135	499,000	207
August	3,443	1.4	174,000	72	332,000	137	509,000	210
September	3,367	1.5	181,000	81	349,000	156	534,000	238
October	3,322	1.4	180,000	78	369,000	159	552,000	238
November	2,986	1.4	168,000	77	403,000	184	574,000	263
December	3,093	1.4	178,000	83	457,000	213	638,000	298
Total	37,409	1.4	2,070,000	77	4,286,000	159	6,394,000	237

*Crashes per 100 million vehicle miles traveled.

*Blood alcohol concentration (BAC) of 0.01 grams per deciliter (g/dl) or greater.

**Police-reported alcohol involvement.

Figure 13
Percent of Crashes Alcohol Related, by Time of Day and Crash Severity

A grayscale photograph of a car accident scene. The image shows a large amount of debris scattered across a dark, textured surface, likely asphalt. In the upper left, there's a large, light-colored, irregularly shaped object that appears to be a piece of a vehicle's body or a large piece of debris. To its right, there's a smaller, more compact object. In the center, there's a large, light-colored, somewhat rectangular object. To the right of this, there's a smaller, more compact object. In the lower left, there's a large, light-colored, irregularly shaped object. To its right, there's a smaller, more compact object. In the lower right, there's a large, light-colored, irregularly shaped object. To its right, there's a smaller, more compact object. The overall scene is one of a major vehicle collision.

Chapter 3 ♦ Vehicles

3. VEHICLES

Statistics about the vehicles involved in police-reported motor vehicle crashes are presented in this chapter, according to six major vehicle types: Passenger Cars, Light Trucks (including pickups, vans, and utility vehicles with a gross vehicle weight rating of 10,000 pounds or less), Large Trucks (including single-unit trucks and truck tractors with a gross vehicle weight rating of more than 10,000 pounds), Motorcycles (including motorcycles, mopeds, and motorscooters), Buses (including school buses and transit buses), and Other Vehicles (including all-terrain vehicles, farm and construction equipment, and motorhomes). The tables and figures are presented for all vehicle types first, then by individual vehicle type. Below are some of the vehicle statistics you will find in this section:

- Ninety-five percent of the 11 million vehicles involved in motor vehicle crashes in 2000 were passenger cars or light trucks.
- Large trucks accounted for 9 percent of the vehicles in fatal crashes, but only 4 percent of the vehicles involved in injury and property-damage-only crashes. Of the 4,930 large trucks involved in fatal crashes, 75 percent were combination trucks.
- The proportion of vehicles that rolled over in fatal crashes (19.1 percent) was nearly 4 times as high as the proportion in injury crashes (4.9 percent) and nearly 14 times as high as the proportion in property-damage-only crashes (1.4 percent).
- Compared with other vehicle types, utility vehicles experienced the highest rollover rates: 36.3 percent in fatal crashes, 12.1 percent in injury crashes, and 2.9 percent in property-damage-only crashes.
- Fires occurred in 0.2 percent of the vehicles involved in all traffic crashes in 2000. For fatal crashes, however, fires occurred in nearly 3 percent of the vehicles involved.
- Regardless of crash severity, the majority of vehicles in single- and two-vehicle crashes were going straight prior to the crash. The next most common vehicle maneuver differed by crash severity: negotiating a curve for fatal crashes, turning left for injury crashes, and stopped in traffic lane for property-damage-only crashes.
- Motorcycles in fatal crashes had the highest proportion of collisions with fixed objects (27.3 percent), and buses in fatal crashes had the lowest proportion (2.9 percent).

Table 35
Vehicles Involved in Crashes by Vehicle Type and Crash Severity

Vehicle Type	Crash Severity						Total

A grayscale photograph of a dense forest. Tall, thin trees line a path that leads into the distance. The ground is covered in fallen leaves and branches. The overall mood is quiet and somewhat somber.

Chapter 4 ♦ People

4. PEOPLE

This chapter presents statistics about the Drivers , Passengers , Pedestrians , and Pedalcyclists involved in police-reported motor vehicle crashes in 2000. The tables and figures are presented in nine groups: all killed or injured persons, crash-involved drivers, occupants (drivers and passengers), alcohol, restraints, motorcycle related, school bus related, pedestrians, and pedalcyclists. Below are some of the statistics you will find in this section:

- A total of 41,821 people lost their lives in motor vehicle crashes in 2000. Another 3.2 million people were injured.
- The majority of persons killed or injured in traffic crashes were drivers (65 percent), followed by passengers (31 percent), pedestrians (3 percent), and pedalcyclists (2 percent).
- Persons 16 to 20 years old had the highest fatality and injury rates per 100,000 population. Children 5 to 9 years old had the lowest fatality rates, and children under 5 years old had the lowest injury rates.
- For every age group, the fatality rate per 100,000 population was lower for females than for males. The injury rate based on population was lower for females than for males for people under 5 years old, 21 to 24 years old, and over 74 years old.
- Forty percent of the persons who were killed in traffic crashes in 2000 died in alcohol-related crashes. Ten percent of the injured persons received their injuries in alcohol-related crashes.

Drivers with No Previous Convictions	28,683	58.6	2,690	43.2	31,373	56.9

Notes: Table does not include 1,934 drivers with unknown license status. FARS records prior driving records (convictions only, not violations) for events occurring within 3 years of the date of the crash. The same driver can have one or more of these convictions.

Table 65
Related Factors for Drivers Involved in Fatal Crashes

Factors	Number	Percent
Failure to keep in proper lane or running off road	17,771	31.1
Driving too fast for conditions or in excess of posted speed limit or racing	11,012	19.3
Failure to yield right of way	4,877	8.5
Inattentive (talking, eating, etc.)	3,946	6.9
Operating vehicle in erratic, reckless, careless, or negligent manner	3,265	5.7
Failure to obey traffic signs, signals, or officer	2,896	5.1
Swerving or avoiding due to wind, slippery surface, vehicle, object, nonmotorist in roadway, etc.	2,100	3.7
Overcorrecting/oversteering	1,958	3.4
Drowsy, asleep, fatigued, ill, or blackout	1,773	3.1
Making improper turn	1,359	2.4
Vision obscured (rain, snow, glare, lights, building, trees, etc.)	1,199	2.1
Driving wrong way on one-way trafficway or on wrong side of road	1,106	1.9
Other factors	8,833	15.5
None reported	20,960	36.7
Unknown	1,019	1.8
Total Drivers	57,090	100.0

Note: The sum of the numbers and percentages is greater than total drivers as more than one factor may be present for the same driver.

Table 103
Pedalcyclists Killed, by Related Factors

Factors	Number	Percent
Walking, playing, working, etc., in roadway	147	21.3
Failure to yield right of way	140	20.3
Improper crossing of roadway or intersection	102	14.8
Failure to obey (e.g., signs, control devices, officers)	55	8.0
Darting into road.	36	5.2
Not visible.	35	5.1
Operating without required equipment.	35	5.1
Failure to keep in proper lane or running off road	28	4.1
Inattentive (talking, eating, etc.)	26	3.8
Making improper turn	15	2.2
Riding on wrong side of road	13	1.9
Improper lane changing	9	1.3
Improper entry to or exit from trafficway.	8	1.2
Erratic, reckless, careless, or negligent operation	5	0.7
Failing to have lights on when required	4	0.6
Other	32	4.6
None Reported.	203	29.4
Unknown	19	2.8
Total Pedalcyclists.	690	100.0

Note: The sum of the numbers and percentages is greater than total pedalcyclists killed as more than one factor may be present for the same pedalcyclist.

A grayscale photograph of a dense forest. Sunlight filters through the trees, creating a dappled light effect on the ground and foliage. The trees are tall and thin, with some branches visible in the foreground. The overall atmosphere is serene and natural.

Chapter 5 ♦ States

5. STATES

Fatal crash and fatality statistics for each of the 50 states, the District of Columbia, and Puerto Rico are presented in this chapter. Several tables display state fatality rates based on population, licensed drivers, and registered vehicles. The last four tables describe each state's safety belt use laws, child passenger protection laws, motorcycle helmet use requirements, and impaired driving legislation. Below are some of the state statistics you will find in this chapter:

- Traffic fatalities increased slightly (by 0.2 percent) from 1999 to 2000 for the nation as a whole. Twenty-five states showed increases, ranging from less than 1 percent to as much as 30 percent.
- The pedestrian fatality rate per 100,000 population was 1.73 for the nation. The District of Columbia had the highest rate (3.44) and Idaho had the lowest (0.45).
- Nearly 2 percent of all traffic crash fatalities in 2000 were pedalcyclists. Vermont was the only state that reported no pedalcyclists killed.
- Forty-nine states, plus the District of Columbia and Puerto Rico, have safety belt use laws.
- All states, the District of Columbia, and Puerto Rico have laws requiring children of certain ages to be restrained in child safety seats.
- Motorcycle helmets are required for all riders in 20 states, the District of Columbia, and Puerto Rico. Twenty-seven states have helmet requirements with exceptions (age, rider type, roadway type), and three states do not require helmets at all.
- State laws in 30 states make it a criminal offense to operate a motor vehicle at a blood alcohol concentration (BAC) of 0.10 g/dl. Nineteen states and the District of Columbia have adopted 0.08 g/dl. One state and Puerto Rico do not have illegal per se BAC levels.

Note: The number shown for registered vehicles for the USA is approximately 4 percent lower than the sum of the registered vehicle numbers shown for the individual states, due to differing data sources.

Note: The population data shown here for the states and the USA total are projections based on the 1990 Census, in order to remain consistent with the population data used for other tables in this report.

Sources: Fatalities—Fatality Analysis Reporting System (FARS); Licensed Drivers (estimated)—Federal Highway Administration; Registered Vehicles by State (estimated)—Federal Highway Administration; Registered Vehicles for USA—R.L. Polk & Co. and Federal Highway Administration; Population—Bureau of the Census.

*Of the total number of speeding-related fatalities in 2000, 5,535 occurred on roads with posted speed limits between 55 and 65 mph, and 921 occurred on roads with speed limits above 65 mph.

Notes: Totals may not equal sum of components due to independent rounding. The total column for speeding-related fatalities includes fatalities that occurred on roads for which the speed limit was unknown. The total column for costs of speeding-related crashes includes costs for crashes that occurred on unknown road types. Costs are based on preliminary estimates.

⁽¹⁾Table covers laws applicable to children under 16 years old. ⁽²⁾All States have laws requiring front seat occupants under 16 years of age to be restrained by seat belts or child safety seats. ⁽³⁾Or less than 40 pounds. ⁽⁴⁾Second or subsequent offense. ⁽⁵⁾And less than 40 pounds. ⁽⁶⁾Third offense can result in 1 year imprisonment. ⁽⁷⁾Children under 12 years old and less than 66 inches tall may not occupy front seat if equipped with passenger-side airbag. ⁽⁸⁾Subsequent offenses can result in 30 days imprisonment. ⁽⁹⁾And less than or equal to 60 pounds. ⁽¹⁰⁾Children under age 6 must be transported in the back seat. ⁽¹¹⁾Can result in 30 days imprisonment. ⁽¹²⁾Seat belts can be substituted only if the size and weight of the child make the use of a seat belt practical and the use of a child restraint device impractical.

Table 124
Status of State Motorcycle Helmet Use Requirements

State	Original Law	Subsequent Action, Date(s) and Current Status
AL	11/06/67	Helmet use required for all riders.
AK	01/01/71	Repealed effective 7-1-76 except for persons under 18 years of age, and all passengers.
AZ	01/01/69	Repealed effective 5-27-76 except for persons under 18 years of age.
AR	07/10/67	Helmet use required for all riders. Repealed effective 8-1-97 except for riders under 21 years of age.
CA	01/01/85	Helmet use required by riders under 15 1/2 years of age. Effective 1-1-92 helmet use required for all riders.
CO	07/01/69	Repealed effective 5-20-77. No helmet use requirement.
CT	10/01/67	Not enforced until 2-1-74. Repealed effective 6-1-76. Effective 1-1-90 adopted requirement for helmet use by persons under 18.
DE	10/01/68	Repealed effective 6-10-78 except for persons under 19 years of age. Also requires that a helmet be carried on the motorcycle for persons 19 and older.
DC	10/12/70	Helmet use required for all riders.
FL	09/05/67	Repealed effective 7-1-2000 except for riders under 21 years old and those without \$10,000 medical insurance covering injuries resulting from a motorcycle crash.
GA	08/31/66	Helmet use required for all riders.
HI	05/01/68	Repealed effective 6-7-77 except for persons under 18 years of age.
ID	01/01/68	Repealed effective 3-29-78 except for persons under 18 years of age.
IL	01/01/68	Repealed effective 6-17-69 after being declared unconstitutional by the State Supreme Court on 5-28-69. No helmet use requirement.
IN	07/01/67	Repealed effective 9-1-77. Effective 6-1-85 adopted requirement for helmet use by persons under 18.
IA	09/01/75	Repealed effective 7-1-76. No helmet use requirement.
KS	07/01/67	7-1-67 to 3-17-70 for all cyclists. 3-17-70 to 7-1-72 only for cyclists under 21 years of age. 7-1-72 to 7-1-76 for all cyclists. 7-1-76 to 7-1-82 applied only to persons under 16 years of age. After 7-1-82 applies only to persons under 18 years of age.
KY	07/01/68	Repealed effective 7-15-98 except for riders under 21 years old, riders operating with instruction permit, riders with less than 1 year experience and/or riders not providing proof of health insurance. Insurance provision repealed effective 7-15-2000.
LA	07/31/68	Repealed effective 10-1-76 except for persons under 18 years of age. Readopted for all cyclists effective 1-1-82. Repealed effective 8-15-99 except for riders under age 18 and those without \$10,000 medical insurance; proof of insurance policy must be shown to law enforcement officer upon request.
ME	10/07/67	Repealed effective 10-24-77. Amended effective 7-3-80 to require use by riders under 15 years old, novices, and holders of learner's permits.
MD	09/01/68	Repealed effective 5-29-79 except for persons under 18 years of age. Effective 10-1-92 helmet use required for all riders.
MA	02/27/67	Helmet use required for all riders.
MI	03/10/67	Repealed effective 6-12-68. New law adopted effective 9-1-69. Helmet use required for all riders.
MN	05/01/68	Repealed effective 4-6-77 except for persons under 18 years of age.
MS	03/28/74	Helmet use required for all riders.
MO	10/13/67	Helmet use required for all riders.
MT	07/01/73	Repealed effective 7-1-77 except for persons under 18 years of age.
NE	05/29/67	Never enforced. Declared unconstitutional by State Supreme Court and repealed effective 9-1-77. Effective 1-1-89 helmet use required for all riders.
NV	01/01/72	Helmet use required for all riders.
NH	09/03/67	Repealed effective 8-7-77 except for persons under 18 years of age.
NJ	01/01/68	Helmet use required for all riders.
NM	05/01/67	Initial law applied only to cyclists under 18 years of age and to all passengers. Law requiring helmet use by all cyclists adopted effective 7-1-73. Repealed effective 6-17-77 except for persons under 18 years of age.
NY	01/01/67	Helmet use required for all riders.
NC	01/01/68	Helmet use required for all riders.
ND	07/01/67	Repealed effective 7-1-77 except for persons under 18 years of age.
OH	04/02/68	Repealed effective 7-1-78 except for persons under 18 years and first year novices.
OK	04/27/67	4-27-67 to 4-7-69 helmet use required for all motorcyclists. From 4-7-69 to 5-3-76 for cyclists under 21 years of age. 5-3-76 for cyclists under 18 years of age.
OR	01/01/68	Repealed effective 10-4-77, except for persons under 18 years of age. Effective 6-16-89 helmet use required for all riders.
PA	09/13/68	Helmet use required for all riders.
RI	06/30/67	Repealed effective 5-21-76 except for passengers on motorcycles. Effective 7-01-92 helmet use required for operators under 21 years of age, all passengers, and first year novices.
SC	07/01/67	Repealed for ages 21 and over effective 6-16-80. Required for riders under 18 years old.
SD	07/01/67	Repealed effective 7-1-77 except for persons under 18 years of age.
TN	06/05/67	Helmet use required for all riders.
TX	01/01/68	Repealed effective 9-1-77 except for persons under 18 years of age. Effective 9-1-89 helmet use required for all riders. Effective 9-1-97 helmets required for riders under 21, those who have not completed a rider training course, and those without \$10,000 medical insurance.
UT	05/13/69	Helmets required only on roads with speed limits of 35 mph or higher. Effective 5-8-77 law changed to require helmet use only by persons under 18 years of age.
VT	07/01/68	Helmet use required for all riders.
VA	01/01/71	Helmet use required for all riders.
WA	07/01/67	Repealed effective 7-1-77. 7-1-87 helmet use required for riders under 18. Effective 6-8-90 helmet use required for all riders.
WV	05/21/68	Helmet use required for all riders.
WI	07/01/68	Repealed effective 3-19-78 except for persons under 18 years of age, and for all holders of learner's permits.
WY	05/25/73	Repealed effective 5-27-83 except for persons under 18 years of age.
PR	07/20/60	Helmet use required for all riders.

- 20 states plus the District of Columbia and Puerto Rico require helmet use for all riders.
- 27 states require helmet use for certain riders.
- 3 states do not require helmet use for riders.

Notes: An "administrative per se law" refers to a statute that allows a state's driver licensing agency to either suspend or revoke a driver's license based either on a specific alcohol (or drug) concentration or on some other criterion related to alcohol or drug use and driving. Such action is completely independent of any licensing action related to a DWI criminal offense. The term "illegal per se" refers to state laws that make it a criminal offense to operate a motor vehicle at or above a specified alcohol (or drug) concentration in the blood, breath, or urine. In those columns showing mandatory sanctions, a "blank" space does not mean that a state does not have a sanction. It only means that the state does not have a mandatory sanction for that offense or violation.

Source: "Digest of State Alcohol-Highway Safety Related Legislation," U.S. Department of Transportation/ National Highway Traffic Administration, DOT HS 808 652.

Table 126
Key Provisions of Safety Belt Use Laws

State	Effective ⁽¹⁾	Enforcement	Fine	Seats	Vehicles Exempted ⁽²⁾
AL	07/18/92	Primary	\$25	Front	Designed for more than 10 passengers.
AK	09/12/90	Secondary	\$15	All	School bus.
AZ	01/01/91	Secondary	\$10	Front	Designed for more than 10 passengers; model year before 1972.

NY	12/01/84	Primary	\$50	Front	Bus, school bus, taxi.
NC	10/01/85	Primary	\$25	Front	Designed for more than 10 people.
ND	07/14/94	Secondary	\$20	Front	Designed for more than 10 people.
OH	05/06/86	Secondary	\$25	Front	None.
OK	02/01/87	Primary	\$20	Front	Farm vehicle, truck, truck tractor, RV.
OR	12/07/90	Primary	\$75	All	None.
PA	11/23/87	Secondary	\$10	Front	Truck over 7,000 lbs.
RI	06/18/91	Secondary	\$50	All	None.
SC	07/01/89	Secondary	\$10	All	School bus, public bus.
SD	01/01/95	Secondary	\$20	Front	Bus, school bus.
TN	04/21/86	Secondary	\$50 ⁽⁶⁾	Front	Vehicle over 8,500 lbs.
TX	09/01/85	Primary	\$50	Front	Designed for more than 10 people, truck over 15,000 lbs.
UT	04/28/86	Secondary	\$45	Front	Vehicle over 10,000 lbs., school/public bus, taxi.
VT	01/01/94	Secondary	\$10	All	Bus, taxi.
VA	01/01/88	Secondary	\$25	Front	Designed for more than 10 people, taxi.
WA	06/11/86	Secondary	\$35	All	Designed for more than 10 people.
WV	09/01/93	Secondary	\$25	Front	Designed for more than 10 people.
WI	12/01/87	Secondary	\$10	All	Taxi, farm truck.
WY	06/08/89	Secondary	\$25 ⁽⁷⁾	Front	Designed for more than 10 people, bus.
PR	01/19/75	Primary	\$10	Front	None.

⁽¹⁾Effective date of first belt law in the state. ⁽²⁾Most states exempt vehicles not manufactured with seat belts. ⁽³⁾Plus 3 points on license.

⁽⁴⁾Fine for first offense. ⁽⁵⁾Plus 2 points on license. ⁽⁶⁾Penalty could include 30 days in jail. ⁽⁷⁾Maximum for driver; maximum fine for a passenger is \$10.
Total states with safety belt use laws: 49 plus DC and Puerto Rico.

APPENDIX A ♦ FARS DATA ELEMENTS

2000 Fatality Analysis Reporting System Data Elements

Crash Level

Crash Date	Number of Travel Lanes
Atmospheric Condition	Number of Vehicle Forms Submitted
City	Rail Grade Crossing Identifier
Construction/Maintenance Zone	Related Factors—Crash Level
County	Relation to Junction
Day of Week	Relation to Roadway
Emergency Medical Services (EMS) Notification Time	Roadway Alignment
EMS Arrival Time at Hospital	Roadway Function Class
EMS Arrival Time at Scene	Roadway Profile
First Harmful Event	Roadway Surface Condition
Global Position	Roadway Surface Type
Hit and Run	Route Signing
Light Condition	School Bus Related
Manner of Collision	Special Jurisdiction
Milepoint	Speed Limit
National Highway System	State
Number of Drinking Drivers in Crash	Time
Number of Fatalities in Crash	Traffic Control Device
Number of Nonmotorist Forms Submitted	Traffic Control Device Functioning
Number of Person Forms Submitted	Trafficway Flow
	Trafficway Identifier

Vehicle Level

Body Type	Motor Carrier Identification Number
Bus Use	Motorcycle Displacement
Cargo Body Type	Number of Axles
Crash Avoidance Maneuver	Number of Deaths in Vehicle
Emergency Use	Number of Occupants in Vehicle
Extent of Deformation	Passenger Car Weight
Fire Occurrence	Passenger Car Wheelbase (Short and Long)
Gross Vehicle Weight Rating	Registered Vehicle Owner
Hazardous Cargo	Registration State
Impact Point—Initial	Related Factors—Vehicle Level
Impact Point—Principal	Rollover
Jackknife	Special Use
Manner of Leaving Scene	Travel Speed
Most Harmful Event	Truck Fuel Type

Vehicle Level (Continued)

Truck Gross Vehicle Weight Rating	Vehicle Model Year
Truck Series	Vehicle Number
Underride/Override	Vehicle Role
Vehicle Configuration	Vehicle Trailing
Vehicle Identification Number	VIN Body Type
Vehicle Make	VIN Length
Vehicle Maneuver	VIN Model
Vehicle Model	

Driver Level

Commercial Motor Vehicle License Status	Driver License Type Compliance
Compliance with License Endorsements	Driver Presence
Compliance with License Restrictions	Driver Weight
Date of First and Last Crash, Suspension, Conviction	Driver Zip Code
Driver Drinking	License State
Driver Height	Non-CDL License Status
Driver Level Counters	Related Factors—Driver Level
	Violations Charged

Person Level

Age	Nonmotorist Location
Air Bag Availability/Deployment	Nonmotorist Striking Vehicle Number
Alcohol Test Results	Person Number
Alcohol Test Type	Person Type
Death Date	Police-Reported Alcohol Involvement
Death Time	Police-Reported Other Drug Involvement
Drug Test Results	Race
Drug Test Type	Related Factors—Person Level
Ejection	Restraint System Use
Ejection Path	Seating Position
Extrication	Sex
Fatal Injury at Work	Taken to Hospital or Treatment Facility
Hispanic Origin	Time of Crash to Time of Death
Injury Severity	Vehicle Number
Method of Alcohol Determination	
Method of Other Drug Determination by Police	

APPENDIX B ♦ GES DATA ELEMENTS

2000 General Estimates System Data Elements

Crash Level

Alcohol Involved in Crash	Number of Vehicles
Atmospheric Condition	Pedestrian/Pedalcyclist Crash Type
Day of Week	Region of Country
First Harmful Event	Relation to Junction
Hour of Crash	Relation to Roadway
Interstate Highway	Roadway Alignment
Land Use	Roadway Profile
Light Condition	Roadway Surface Condition
Manner of Collision	School Bus Related
Maximum Injury Severity	Speed Limit
Minute of Crash	Traffic Control Device
Month of Crash	Trafficway Flow
Number Injured in Crash	Work Zone
Number of Nonmotorists	Year of Crash
Number of Travel Lanes	

Vehicle/Driver Level

Crash Type	Hit and Run
Body Type	Initial Point of Impact
Cargo Body Type	Jackknife
Carrier's Identification Number	Manner of Leaving Scene
Corrective Action Attempted	Maximum Injury Severity in Vehicle
Critical Event	Model Year
Damage Areas	Most Harmful Event
Damage Severity	Movement Prior to Critical Event
Driver Distracted By	Number Injured in Vehicle
Driver Drinking in Vehicle	Number of Axles, Including Trailer
Driver Maneuvered To Avoid	Number of Occupants
Driver Presence	Precrash Location
Driver's Vision Obscured By	Precrash Vehicle Control
Driver's Zip Code	Rollover Type
Emergency Use	Special Use
Fire Occurrence	Speed Related
Hazardous Materials Placard Number	Travel Speed
Hazardous Materials Placarded	Vehicle Contributing Factors
Hazardous Materials Release	Vehicle Identification Number

Nonmotorist Striking Vehicle Number
Person Number

Person Type
Person's Physical Impairment
Police-Reported Alcohol Involvement
Police-Reported Drug Involvement
Restraint System Use
Seating Position
Sex
Taken to Hospital or Treatment Facility
Vehicle Number

APPENDIX C ♦ GES TECHNICAL NOTES

Standard Errors

The national estimates produced from GES data may differ from the true values, because they are based on a probability sample of crashes and not a census of all crashes. The size of these differences may vary depending on which sample of crashes was selected. [For a complete description of the GES sampling design, see *National Accident Sampling System General Estimates System Technical Note* (DOT HS 807 796) available from NCSA.] The standard error of an estimate is a measure of the precision or reliability with which an estimate from this particular GES sample approximates the results of a census.

In a report of this size, it is impractical to provide standard errors for each estimate. Instead, generalized standard errors for estimates of totals are provided in the following table. Generalized errors were calculated separately for the crash, vehicle, and people characteristics. The values for the GES estimates and an estimate of one standard error are given in the following table. By adding and subtracting two standard errors, a 95 percent confidence interval can be created for the GES estimates in this report. For example, the estimated number of injury crashes that occurred in the month of February is given in Table 23 as 148,000. To calculate one standard error for this crash estimate, use the table on the following page. Since 148,000 does not appear in the Crash Estimate column, use linear interpolation from the standard error values for 100,000 (8,200) and 200,000 (14,600). One standard error would be approximately 11,300. The 95 percent confidence interval for this estimate would be $148,000 \pm 2 \times 11,300$ or 125,400 to 170,600.

2000 GES Estimates and Standard Errors

Crash Estimate (x)	Crash Standard Error (SE)*	Vehicle Estimate (x)	Vehicle Standard Error (SE)**	Person Estimate (x)	Person Standard Error (SE)***
1,000	400	1,000	400	1,000	400

Unknowns

GES data are obtained either directly from an item on the PAR or by interpreting the information provided in the report through reviewing the crash diagram, the Officer's written summary of the crash, or combinations of variables on the PAR. Because of this interpretation, and because the police officer may not have entered some item of information or provide complete information, data can be missing. Two different statistical procedures are used on GES data to complete values for unknown data. These procedures, univariate and hotdeck imputation, are described in a technical report available from NCSA, *Imputation in the General Estimates System* (DOT HS 807 985). The table below gives the reader the proportion of unknown values prior to imputation for variables with imputed values that were used in this report.

Percent of Unknowns for 2000 GES Data Elements

Crash Level			
Alcohol Involved in Crash	5.5%	Manner of Collision	0.2%
Atmospheric Condition	1.3%	Minute of Crash	0.6%
Crash Severity	6.9%	Relation to Junction	0.1%
Day of Week	0.0%	Relation to Roadway	0.2%
First Harmful Event	<0.1%	Roadway Surface Condition	1.3%
Hour of Crash	0.6%	Speed Limit	17.2%
Light Condition	1.3%	Traffic Control Device	1.8%
Vehicle/Driver Level			
Driver Drinking in Vehicle	8.8%	Most Harmful Event	<0.1%
Initial Point of Impact	1.8%	Vehicle Type	1.6%
Person Level			
Age	8.2%	Seating Position	0.9%
Injury Severity	3.7%	Sex	5.4%
Police-Reported Alcohol Involvement	3.8%		

GLOSSARY

Alcohol Involvement

NHTSA defines a fatal crash as alcohol-related or alcohol-involved if either a driver or a nonmotorist (usually a pedestrian) had a measurable or estimated blood alcohol concentration (BAC) of 0.01 grams per deciliter (g/dl) or above.

NHTSA defines a nonfatal crash as alcohol-related or alcohol-involved if police indicate on the police accident report that there is evidence of alcohol present. The code does not necessarily mean that a driver or nonoccupant was tested for alcohol.

Blood Alcohol Concentration

The BAC is measured as a percentage by weight of alcohol in the blood (grams/deciliter). A positive BAC level (0.01 g/dl and higher) indicates that alcohol was consumed by the person tested. A BAC level of 0.10 g/dl or more indicates that the person was intoxicated.

Body Type

Detailed type of motor vehicle within a vehicle type.

Bus

Large motor vehicles used to carry more than ten passengers, including school buses, inter-city buses, and transit buses.

Combination Truck

A truck tractor not pulling a trailer; a tractor pulling at least one full or semi-trailer; or a single-unit truck pulling at least one trailer.

Construction/Maintenance Zone

An area, usually marked by signs, barricades, or other devices indicating that highway construction or highway maintenance activities are ongoing.

Crash

An event that produces injury and/or property damage, involves a motor vehicle in transport, and occurs on a trafficway or while the vehicle is still in motion after running off the trafficway.

Crash Severity

1. **Fatal Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which at least one person dies within 30 days of the crash.
2. **Injury Crash.** A police-reported crash that involves a motor vehicle in transport on a trafficway in which no one died but at least one person was reported to have: (1) an incapacitating injury; (2) a visible but not incapacitating injury; (3) a possible, not visible injury; or (4) an injury of unknown severity.
3. **Property-Damage-Only Crash.** A police-reported crash involving a motor vehicle in transport on a trafficway in which no one involved in the crash suffered any injuries.

Crash Type

Single-vehicle or multiple-vehicle crash.

Day

From 6 a.m. to 5:59 p.m.

Driver

An occupant of a vehicle who is in physical control of a motor vehicle in transport, or for an out-of-control vehicle, an occupant who was in control until control was lost.

Ejection

Refers to occupants being totally or partially thrown from the vehicle as a result of an impact or rollover.

First Harmful Event

The first event during a crash that caused injury or property damage.

Fixed Object

Stationary structures or substantial vegetation attached to the terrain.

Gross Vehicle Weight Rating (GVWR)

The maximum rated capacity of a vehicle, including the weight of the base vehicle, all added equipment, driver and passengers, and all cargo loaded into or on the vehicle. Actual weight may be less than or greater than GVWR.

Initial Impact Point

The first impact point that produced personal injury or property damage, regardless of First or Most Harmful Event.

Injury Severity

The police-reported injury severity of the person (i.e., occupant, pedestrian, or pedalcyclist).

1. Killed (Fatal)
2. Injured (Incapacitating injury, evident injury but not incapacitating, complaint of injury, or injured, severity unknown).
3. No injury.

Jackknife

Jackknife can occur at any time during the crash sequence. In this report, jackknifing is restricted to truck tractors pulling a trailing unit in which the trailing unit and the pulling vehicle rotate with respect to each other.

Junction

Area formed by the connection of two roadways, including intersections, interchange areas, and entrance/exit ramps.

Land Use

The crash location (urban or rural).

Large Trucks

Trucks over 10,000 pounds gross vehicle weight rating, including single unit trucks and truck tractors.

Light Trucks

Trucks of 10,000 pounds gross vehicle weight rating or less, including pickups, vans, truck-based station wagons, and utility vehicles.

Manner of Collision

A classification for crashes in which the first harmful event was a collision between two motor vehicles in transport and is described as one of the following:

Angle. Collisions which are not head-on, rear-end, rear-to-rear, or sideswipe.

Head-on. Refers to a collision where the front end of one vehicle collides with the front-end of another vehicle while the two vehicles are traveling in opposite directions.

Rear-end. A collision in which one vehicle collides with the rear of another vehicle.

Sideswipe. A collision in which the sides of both vehicles sustain minimal engagements.

Most Harmful Event

The event during a crash for a particular vehicle that is judged to have produced the greatest personal injury or property damage.

Motorcycle

A two- or three-wheeled motor vehicle designed to transport one or two people, including motorscooters, minibikes, and mopeds.

Motor Vehicle in Transport

A motor vehicle in motion on the trafficway or any other motor vehicle on the roadway, including stalled, disabled, or abandoned vehicles.

Night

From 6 p.m. to 5:59 a.m.

Noncollision

A class of crash in which the first harmful event does not involve a collision with a fixed object, nonfixed object, or a motor vehicle. This includes overturn, fire/explosion, falls from a vehicle, and injuries in a vehicle.

Nonmotorist

Any person who is not an occupant of a motor vehicle in transport and includes the following:

1. Pedestrians
2. Pedalcyclists
3. Occupants of parked motor vehicles
4. Others such as joggers, skateboard riders, people riding on animals, and persons riding in animal-drawn conveyances.

Nonmotorist Location

The location of nonmotorists at time of impact. Intersection locations are coded only if nonmotorists were struck in the area formed by a junction of two or more trafficways. Non-intersection location may include nonmotorists struck on a junction of a driveway/alley access and a named trafficway. Nonmotorists who are occupants of motor vehicles not in transport are coded with respect to the location of the vehicle.

Objects Not Fixed

Objects that are movable or moving but are not motor vehicles. Includes pedestrians, pedalcyclists, animals, or trains (e.g., spilled cargo in roadway).

Occupant

Any person who is in or upon a motor vehicle in transport. Includes the driver, passengers, and persons riding on the exterior of a motor vehicle.

Other Vehicle

Consists of the following types of vehicles:

1. Large limousine (more than four side doors or stretched chassis)
2. Three-wheel automobile or automobile derivative
3. Van-based motorhome
4. Light-truck-based motorhome (chassis mounted)
5. Large-truck-based motorhome
6. ATV (all terrain vehicle, including dune/swamp buggy) and ATC (all terrain cycle)
7. Snowmobile
8. Farm equipment other than trucks
9. Construction equipment other than trucks (includes graders)
10. Other type vehicle (includes go-cart, fork lift, city streetsweeper).

Passenger

Any occupant of a motor vehicle who is not a driver.

Passenger Car

Motor vehicles used primarily for carrying passengers, including convertibles, sedans, and station wagons.

Pedalcyclist

A person on a vehicle that is powered solely by pedals.

Pedestrian

Any person not in or upon a motor vehicle or other vehicle.

Restraint Use

The occupant's use of available vehicle restraints including lap belt, shoulder belt, or automatic belt.

Roadway

That part of a trafficway designed, improved, and ordinarily used for motor vehicle travel.

Roadway Function Class

The classification describing the character of service the street or highway is intended to provide. Includes the following:

Interstates. Limited access divided facilities of at least four lanes designated by the Federal Highway Administration as part of the Interstate System.

Other Freeways and Expressways. All urban principal arterial with limited control of access not on the Interstate system.

Other Principal Arterials. Major streets or highways, many with multi-lane or freeway design, serving high-volume traffic corridor movements that connect major generators of travel.

Minor Arterials. Streets and highways linking cities and larger towns in rural areas in distributing trips to small geographic areas in urban areas (not penetrating identifiable neighborhoods).

Collectors. In rural areas, routes serving intra-county, rather than statewide travel. In urban areas, streets providing direct access to neighborhoods as well as direct access to arterials.

Local Streets and Roads. Streets whose primary purpose is feeding higher order systems, providing direct access with little or no through traffic.

Rollover

Rollover is defined as any vehicle rotation of 90 degrees or more about any true longitudinal or lateral axis. Includes rollovers occurring as a first harmful event or subsequent event.

Seating Position

The location of the occupants in the vehicle. More than one can be assigned the same seat position; however, this is allowed only when a person is sitting on someone's lap.

School Bus-Related Crash

Any crash in which a vehicle, regardless of body design, used as a school bus is directly or indirectly involved, such as a crash involving school children alighting from a vehicle.

Single-Unit Truck

A medium or heavy truck in which the engine, cab, drive train, and cargo area are all on one chassis.

Trafficway

Any road, street, or highway open to the public as a matter of right or custom for moving persons or property from one place to another.

Vehicle

See *Motor Vehicle in Transport*.

Vehicle Type

A series of motor vehicle body types that have been grouped together because of their design similarities. The principal vehicle types used in this report are passenger car, light truck, large truck, motorcycle, bus, and other vehicle. See the definition of each of the vehicle types elsewhere in this glossary.

Weekday

From 6 a.m. Monday to 5:59 p.m. Friday.

Weekend

From 6 p.m. Friday to 5:59 a.m. Monday.
