The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumer (CPI-U) and the Consumer Price Index for Wages Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$45 domestic, \$63 foreign. Single copy domestic, \$16; foreign, \$22.40. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address change to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI information an Analysis Office at (202) 691-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: 1-800-877-8339. Data on the CPI also can be accessed at <http://www.bls.gov/cpi/> through the CPI homepage. Periodicals postage paid at Washington, DC, and at additional mailing offices.

Price Movements

February 2002

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.4 percent in February, before seasonal adjustment, to a level of 177.8 (1982-84=100). For the 12-month period ended in February, the CPI-U increased 1.1 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 0.3 percent in February, prior to seasonal adjustment. The February level of 173.7 was 0.8 percent higher than the index in February 2001.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U increased 0.2 percent in February, the same as in January. The energy index, which advanced 0.9 percent in January, declined 0.8 percent in February. The index for petroleum-based energy decreased 0.1 percent, and the index for energy services fell 1.3 percent. The food index rose 0.2 percent in February, reflecting another large increase in the index for fruits and vegetables. Excluding food and energy, the CPI-U rose 0.3 percent in February, after increasing 0.2 percent in January. An upturn in the index for apparel, coupled with larger increases in the indexes for shelter and for tobacco and

smoking products, accounted for the larger advance in February.

The food and beverages index increased 0.2 percent in February. The index for food at home that increased 0.3 percent in January, rose 0.2 percent in February. Another sharp rise in the index for fruits and vegetables—up 2.5 percent in February after increasing 3.3 percent in January—was partially offset by declines in the indexes for meats, poultry, fish, and eggs; for nonalcoholic beverages; and for other food at home. Within the fruits and vegetables group, the index for fresh vegetables rose 7.5 percent, while the index for fresh fruits declined 1.5 percent. Prices for processed fruits and vegetables rose 0.4 percent. The indexes for cereal and bakery products and for dairy products also contributed to the advance in February, advancing 0.4 and 0.1 percent, respectively. On the other hand, the index for meats, poultry, fish, and eggs declined 0.2 percent. In February, declines in the indexes for pork, for other meats, and for fish and seafood more than offset increases in prices for beef and for poultry—each up 0.6 percent. The indexes for nonalcoholic beverages and for other food at home declined 0.4 and 0.5 percent, respectively. The other two components of the food and

beverages index—food away from home and alcoholic beverages—each increased 0.3 percent.

The index for housing rose 0.3 percent in February. Shelter costs advanced 0.5 percent in February, following a 0.3-percent increase in January. Within shelter, the indexes for rent and for owners' equivalent rent each increased 0.4 percent, and the index for lodging away from home rose 1.7 percent. The index for fuels and utilities declined 1.0 percent in February. Each of the three major household fuels—natural gas, electricity, and fuel oil—contributed to the February decrease, down 3.3, 0.7, and 0.9 percent, respectively. The index for household furnishings and operations declined 0.2 percent.

The transportation component turned back down in February, declining 0.2 percent after increasing 0.3 percent in January. The index for gasoline that rose 2.7 percent in January fell 0.4 percent in February. (Prior to seasonal adjustment, gasoline prices rose 0.4 percent in February.) The index for new vehicles declined 0.9 percent, following a 0.6-percent decrease in January. (As of February, about 95 percent of the new vehicle sample was represented by 2002 models. The 2002 models will continue to be phased in, with appropriate adjustments for quality change, as they replace old models at dealerships. For a report on quality changes for the 2002 vehicles represented in the Producer Price Index sample, see news release USDL-01-405, dated November 9, 2001.) The index for used cars and trucks declined 0.7 percent. During the last 12 months, the index for new vehicles has declined 1.5 percent; and the index for used cars and trucks has fallen 4.1 percent. Airline fares increased for the second consecutive month—up 1.0 percent in February—following declines in each of the last 6 months of 2001.

The index for apparel, which had declined in each of the 3 preceding months, turned up in February, advancing 0.5

percent. (Prior to seasonal adjustment, apparel prices rose 2.6 percent, reflecting the introduction of spring-summer wear.)

Medical care costs rose 0.3 percent in February. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—increased 0.4 percent. The index for medical care services rose 0.2 percent in February. Charges for professional services were unchanged, while the index for hospital and related services increased 0.7 percent.

The index for recreation rose 0.1 percent in February, following a 0.2-percent increase in January. A 1.0-percent decline in the index for admissions to movies, theaters, concerts, and sporting events was more than offset by small increases in the indexes for video and audio; pets, pet products and services; sporting goods; and photography.

The index for education and communication increased 0.2 percent in February. Education costs rose 0.8 percent, largely as a result of a 3.7-percent rise in the index for educational books and supplies. The index for communication costs declined 0.3 percent, reflecting a 3.3-percent decline in prices for personal computers and peripheral equipment.

The index for other goods and services that increased 0.3 percent in January, rose 1.0 percent in February. A 4.0-percent increase in the index for cigarettes accounted for about four-fifths of the February increase in this major group.

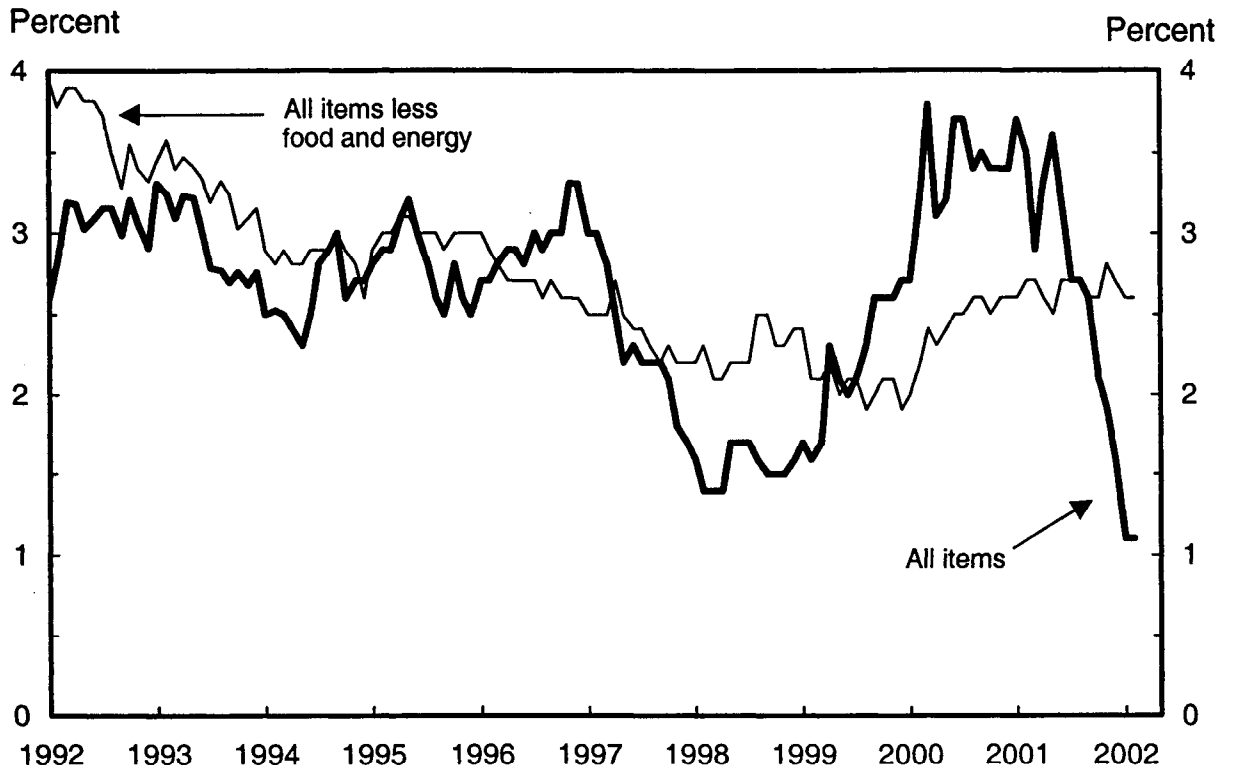

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.2 percent in February.

CPI-U 12-Month Changes, 1992 to Present

CPI (Old Weights)

For the first 6 months of 2002, BLS also will calculate an Old Weights CPI-U and an Old Weights CPI-W based on the 1993-95 expenditure pattern used in the CPI from 1998 through 2001. These Old Weight data are contained in

tables 1(OW) -4 (OW). From January to February 2002, the Old Weights CPI-U rose 0.4 percent and the Old Weights CPI-W rose 0.3 percent. Note that these series are not seasonally adjusted.

Changes in the Consumer Price Index in 2002

Expenditure weight update

As announced in December 1998, the Bureau of Labor Statistics (BLS) has updated the consumption expenditure weights in the Consumer Price Index for all Urban Consumers (CPI-U) and in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) to the 1999-2000 period, effective with release of data for January 2002. The newer weights replace the 1993-95 weights, which were first used in the index effective with January 1998 data. Additionally, CPI expenditure weights will be updated at 2-year intervals subsequent to the 2002 updating. Thus, for example, CPI expenditure weights will be updated to the 2001-02 period effective with release of CPI data for January 2004.

Historically, the introduction of a comprehensive new set of expenditure weights attached to the categories of goods and services in the CPI “market basket” has taken place in the context of the periodic major revisions of the index. Such major revisions have taken place approximately once each decade—in 1940, 1953, 1964, 1978, 1987, and, most recently, in 1998.

The goal in employing more current expenditure weights is to have the CPI reflect, as much as possible, the inflation currently experienced by consumers. More specifically, the use of more current weights will help to ensure that the relative importance of CPI item categories, such as food away from home, college tuition, or medical care services, more accurately reflects how consumers are allocating their spending.

Publication of overlap CPIs

For the first 6 months of 2002, BLS will continue to calcu-

late and publish selected CPI-U and CPI-W “overlap” indexes on a not seasonally adjusted basis. These indexes will be compiled, using the 1993-95 expenditure pattern that was introduced into the CPI in 1998. Comparison of these index series with the corresponding updated series will enable users of the CPI to observe effects of the expenditure weight change. Subsequent expenditure updates scheduled in 2004 and every 2 years thereafter also will be accompanied by the publication of overlap indexes for a 6-month period using the previous expenditure pattern.

Publication of CPI for the Phoenix area

Effective with release of the July 2002 Consumer Price Index (CPI), BLS will initiate publication of consumer price data specific to the Phoenix-Mesa, AZ, Metropolitan Statistical Area. As with the national CPI and other local area CPIs, data will be published for each of two population groups—consumers (CPI-U) and urban wage earners and clerical workers (CPI-W). The Phoenix-Mesa CPI will be published on a semiannual basis with a reference base of December 2001 = 100. The same amount of item detail will be available for Phoenix-Mesa, as is presently available for all other areas for which data are published on a semiannual basis.

Change to published item structure

Effective with release of the January 2002 CPI, BLS began publishing an item index for leased cars and trucks. This index series is available monthly at the U.S. City Average area level for both the CPI-U and CPI-W, with a December 2001 = 100 reference base.

Note on a New, Supplemental Index of Consumer Price Change

The Bureau of Labor Statistics (BLS) will begin publishing a Consumer Price Index (CPI) called the Chained Consumer Price Index for All Urban Consumers, effective with release of July data in August 2002. Designated the C-CPI-U, the index will supplement existing indexes already produced by BLS: the CPI for All Urban Consumers (CPI-U) and the CPI for Urban Wage Earners and Clerical Workers (CPI-W).

The C-CPI-U will employ a Tornqvist formula and utilize expenditure data in adjacent periods, in order to reflect the effect of any substitution that consumers make *across* item categories in response to changes in relative prices. This new measure, said to be a “superlative” index, is designed to be a closer approximation to a “cost-of-living” index than are the present measures. The use of expenditure data for both a base period and the current period, in order to average price change across item categories, distinguishes the C-CPI-U from the existing CPI measures, which use only a single expenditure base period to compute the price change over time. In 1999, BLS introduced a geometric mean estimator for averaging prices within most of the CPI item categories, in order to approximate the effect of consumers’ responses to changes in relative prices within these item categories. The geometric mean estimator will be used in the C-CPI-U in the same item categories in which it is now used in the CPI-U and CPI-W. (See *Monthly Labor Review*, October 1998, pp. 3-7.)

Expenditure data required for the calculation of the C-CPI-U are available only with a time lag. Thus, the C-CPI-U will be issued first in preliminary form, using the latest available expenditure data at the time, and will be subject to two subsequent revisions. Accordingly, at the time of its introduction in August, “final” values of the C-CPI-U will be issued for the 12 months of 2000, “interim” values will be issued for the 12 months of 2001, and “initial” values will be issued for January - July of 2002. In February 2003, with release of the January 2003 index, revised interim indexes for the 12 months of 2002 will be published, and the index values for 2001 will be revised and will become final. Then, in February 2004, when the monthly expenditure data from calendar year 2002 become available, C-CPI-U indexes for the 12 months of 2002 will be issued in final form, and values for the 12 months of 2003 will be revised and issued as interim. The C-CPI-U index revisions are expected to be small; but, in principle, each monthly index could be revised from its

previously published level.

BLS previously has calculated superlative indexes on an experimental basis, although these are not comparable to the C-CPI-U in all computational details. (See, for example, *Monthly Labor Review*, December 1993, pp. 25-33.) Based on BLS research, the C-CPI-U is estimated to increase at an average annual rate of 0.1 to 0.2 percentage point less than the CPI-U.

The C-CPI-U will be issued for national averages only and will not be seasonally adjusted. It will employ a December 1999 = 100 reference base. Data for periods prior to December 1999 will not be calculated. The component series that will be published are listed below:

All items

- Food and beverages
 - Food
 - Food at home
 - Food away from home
 - Alcoholic beverages
- Housing
 - Shelter
 - Fuels and utilities
 - Household furnishings and operations
- Apparel
- Transportation
 - Private transportation
 - Public transportation
- Medical care
 - Medical care commodities
 - Medical care services
- Recreation
- Education and communication
 - Education
 - Communication
- Other goods and services
- Services
- Commodities
 - Durables
 - Nondurables
- All items less food and energy
- Energy

These indexes will be published monthly in the CPI news release and the *CPI Detailed Report*, and the series will be

available electronically at the same site as other CPI data:
<http://www.bls.gov/cpi/>

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about population size classes.

² Indexes on a December 1986=100 base.

³ Indexes on a December 1997=100 base.

⁴ The 'All items' index size B/C is on a December 1996=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁶ Indexes on a December 1982=100 base.

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 1 (see Table 10) will appear next month.

² Index on a November 1977=100 base in Miami.

³ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

⁴ Indexes on a December 1982=100 base.

⁵ Special index based on a substantially smaller sample.

⁶ Indexes on a December 1993=100 base.

⁷ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about population size classes.

² Indexes on a December 1986=100 base.

³ Indexes on a December 1997=100 base.

⁴ The 'All items' index size B/C is on a December 1996=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁶ Indexes on a December 1984=100 base

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

All items less energy	194.0	3.5	.6	187.4	2.7	1.1
All items less food and energy	196.3	3.8	.6	187.8	2.6	.7

¹ Areas on pricing schedule 1 (see Table 10) will appear next month.

² Index on a November 1977=100 base in Miami.

³ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

⁴ Indexes on a December 1984=100 base

⁵ Special index based on a substantially smaller sample.

⁶ Indexes on a December 1993=100 base.

⁷ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Table 24. Historical Consumer Price Index for All Urban Consumers (CPI-U): U. S. city average, all items

(1982-84=100, unless otherwise noted)

1 Indexes on a December 1997=100 base.
 2 Special index based on a substantially smaller sample.
 3 This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.
 4 Indexes on a December 1982=100 base.
 5 Indexes on a December 1986=100 base.

6 Indexes on a December 1983=100 base.
 7 Indexes on a December 1990=100 base.
 8 Indexes on a December 1993=100 base.
 9 Indexes on a December 1996=100 base.
 10 Indexes on a December 1988=100 base.
 - Data not available.
 NOTE: Index applies to a month as a whole, not to any specific date.

¹ Indexes on a December 1997=100 base.

² This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

³ Indexes on a December 1984=100 base

⁴ Indexes on a December 1986=100 base.

⁵ Indexes on a December 1983=100 base.

⁶ Indexes on a December 1990=100 base.

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

⁹ Indexes on a December 1996=100 base.

¹⁰ Indexes on a December 1988=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a market basket of goods and services. The Bureau of Labor Statistics (BLS) publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) that covers approximately 87 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) that covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by BLS trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change also can be expressed in dollars as follows: the price of a base-period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details, visit the CPI homepage on the Internet at <http://www.bls.gov/cpi/> or contact our CPI Information and Analysis Section at (202) 691-7000.

Calculating index changes

Movements of the indexes from one month to another usually are expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by 100	0.040 x 100
Equals percent change	4.0

Energy prices

Prices usually are available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI not only are for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.* The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes

over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than 1 gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, miniservice, and self-service gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

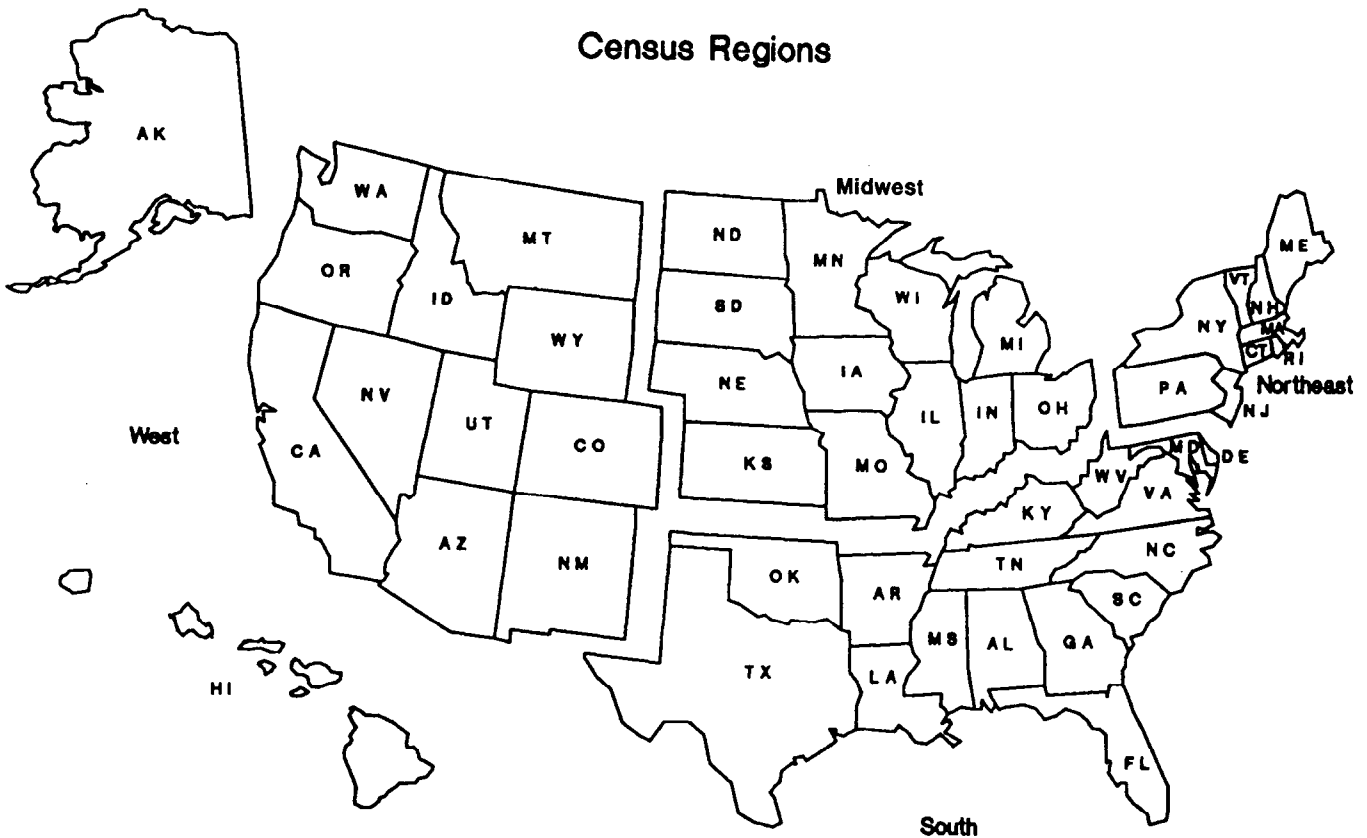

1 therm = 100,000 BTUs (U.S. Department of Energy)

1 kwh = 3,412 BTUs (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTUs (U.S. Department of Energy)

Food and beverage prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result

of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published, and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. Detailed specifications are available from BLS information offices or from the Washington office, upon request.

Seasonally adjusted and unadjusted data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month. For analyzing general price trends in the economy, seasonally adjusted changes usually are preferred because they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data—for example data from 1997 through 2001 were replaced at the end of 2001. In January 2002, dependently seasonally adjusted series were revised for January 1987-December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, see “Aggregation of Dependently Adjusted Seasonally Adjusted Series,” in the October 2001 issue of the *CPI Detailed Report*.

The seasonal movement of All items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of ev-

ery series is reevaluated based upon certain statistical criteria. If any of the 73 components changes its seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted index will be used before that period. (Note: 39 of the 73 components are seasonally adjusted for 2002.)

Seasonally adjusted data, including the All items index levels, are subject to revision for up to 5 years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, BLS has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements that might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

For the fuel oil, natural gas, motor fuels, and educational books and supplies indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For the nonalcoholic beverages index, the procedure was used to offset the effects of a large increase in coffee prices due to adverse weather. The procedure was used to account for unusual butterfat supply reductions and decreases in milk supply affecting the fats and oils series. For the water and sewerage maintenance index, the procedure was used to account for a data collection anomaly. It was used to offset an increase in summer demand in the Midwest and South for electricity. For new vehicles, new cars, and new trucks, the procedure was used to offset the effects of a model change-over combined with financing incentives.

A description of Intervention Analysis Seasonal Adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or by calling Daniel Chow on (202) 691-6968 or sending e-mail to chow_dan@bls.gov. If you have general questions about the CPI, please call our information staff at (202) 691-7000.

Metropolitan areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for an additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even

(February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even
Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

CPI information is available from BLS electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists also are available in the national and information offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT,

containing current and historical data for the CPI, is accessible.

World Wide Web. BLS maintains a Web site at <http://www.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://www.bls.gov/cpi/> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to information office homepages from the main BLS Web site listed above.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All items index data for each local area also are included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 2850, Washington, DC 20212-0001, or call (202) 691-5200 or any of the BLS information offices listed below.

CPI Detailed Report. This is the most comprehensive report on the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$45 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$43 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information may be obtained by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data also may be obtained by calling any one of the metropolitan area CPI hotlines listed below. These hotline summaries typically include data for the U.S. city average, as well as for the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(303) 844-1726
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2481
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2404/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
San Diego	(619) 557-6538
San Francisco	(415) 975-4350
Seattle	(206) 553-0645
St. Louis	(314) 539-3581
Washington, DC	(202) 691-6994

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 691-7000 or any of the information offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including the CPI, is available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release; selected national, regional, and metropolitan area historical summaries; and some technical information. The latest CPI information is posted during the morning of release day. Call (202) 691-6325, and follow instructions to have the latest *Ready Facts* catalog sent to you. All

information offices also have fax systems in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the information offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 331-3403	(404) 331-3415
Boston	(617) 565-9167	(617) 565-2327
Chicago	(312) 353-1880	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 597-4153	(215) 597-3282
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 691-6325	(202) 691-7000

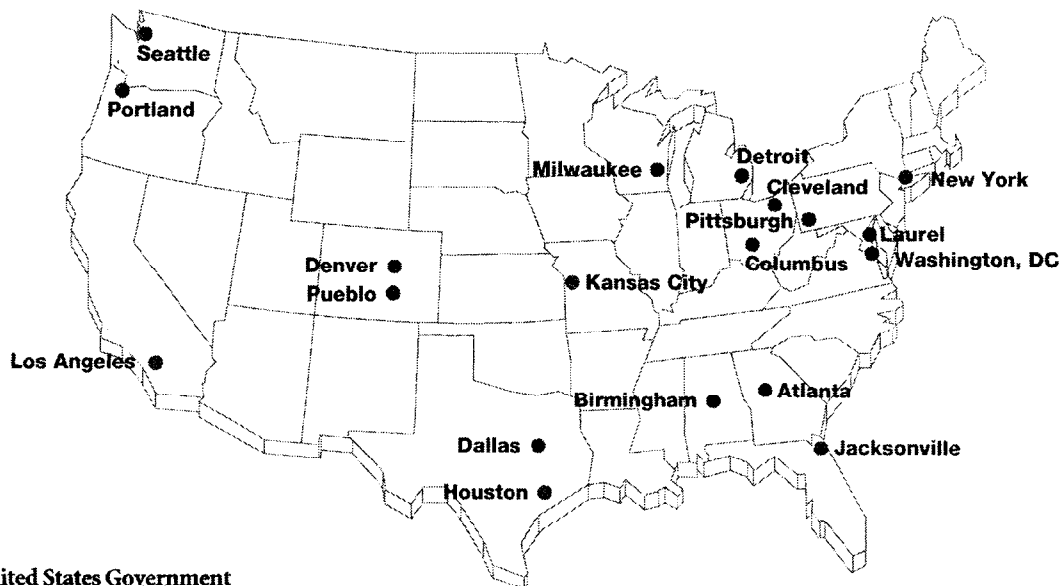

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple factsheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications may be obtained by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained by writing the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, or by calling any of the information offices listed above.

Visit a U.S. Government Bookstore

The Superintendent of Documents operates a network of *U.S. Government Bookstores* where you can browse through shelves of information products before purchasing. Naturally, the stores can't stock all 10,000-plus titles in our inventory. But they do carry the titles you're most likely to be looking for.

Our store personnel will be happy to arrange for your purchase to be sent directly to your home or office. All bookstores accept VISA, MasterCard, Discover/NOVUS, American Express, and Superintendent of Documents deposit account orders. For more information, contact the *U.S. Government Bookstore* nearest to you.
