The *CPI Detailed Report*—(ISSN 0161-7311) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or Mastercard accepted, FAX (202) 512-2233. Subscription price per year: \$25 domestic, \$31.25 foreign. Single copy domestic, \$11.00; foreign, \$13.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For Technical information call the CPI Information and Analysis Office at (202) 606-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, N.E., Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Information in this publication will be made available to sensory impaired individuals upon request. Voice phone: (202) 606-STAT; TDD phone: (202) 606-5897; TDD message referral phone: 1-800-326-2577. This material is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC and at additional mailing offices.

Price Movements September 1997

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.2 percent before seasonal adjustment in September to a level of 161.2 (1982-84=100). For the 12-month period ended in September, the CPI-U increased 2.2 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.3 percent in September, prior to seasonal adjustment. The September 1997 CPI-W level of 158.3 was 2.1 percent higher than the index in September 1996.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in September, the same as in each of the preceding two months. The food index increased 0.1 percent in September. Grocery store food prices, which rose 0.6 percent in August, declined 0.1 percent in September, reflecting decreases in the indexes for fruits and vegetables and for meats, poultry, fish, and eggs. The energy index, which increased 1.7 percent in August, rose 1.3 percent in September. The index for petroleum-based energy rose 1.5 percent and the index for energy services, 1.1 percent. Excluding food and energy, the CPI-U rose 0.2 percent, following an increase of 0.1 percent in August. The larger advance in September reflects an upturn in the indexes for apparel and upkeep and for airline fares.

Consumer prices rose at a seasonally adjusted annual rate (SAAR) of 2.5 percent in the third quarter. This follows increases of 1.8 and 1.0 percent at annual rates in the first and second quarters, respectively, and brings the year-to-date annual rate to 1.8 percent. This compares with an increase of 3.3 percent for all of 1996. The food and energy components, which had accelerated in 1996, after acting as moderating influences throughout most of the preceding five years, were largely responsible for the deceleration thus far in 1997. The food index has risen at a 1.7-percent SAAR thus far in 1997, following a 4.3 percent increase in 1996. All major grocery store food categories have shown marked deceleration thus far in 1997, relative to 1996, except for the other food at home group. The advance in this latter group is entirely due to the sharp acceleration in coffee prices that have increased at a 33.8 percent annual rate in the first nine months of 1997, after declining 6.7 percent in all of 1996. The energy index, which increased 8.6 percent in 1996, declined at a 2.5 percent SAAR in the first nine months of 1997. The index for petroleum-based energy fell at a 5.1 percent annual rate, while energy services rose at a 0.5 percent SAAR.

Excluding food and energy, the CPI-U advanced at a 1.7-percent SAAR in the third quarter, following increases of 2.4 percent in each of the first two quarters of 1997. The 2.2 percent SAAR in the first nine months of 1997 compares with a 2.6 percent rise for all of 1996. Within this category,

both commodities and services have advanced at a somewhat slower rate thus far in 1997, than for all of 1996. The index for commodities, less food and energy has advanced at a 0.4 percent rate in 1997, compared with a 1.1-percent rise for all of 1996. The index for services less energy, which increased 3.3 percent in 1996, has risen at a 2.9 percent rate thus far in 1997.

The food and beverage index rose 0.1 percent in September. The index for grocery store food prices, which rose 0.6 percent in August, declined 0.1 percent in September. The index for fruits and vegetables fell 0.3 percent, following a 2.8-percent increase in August. The indexes for fresh vegetables and for processed fruits and vegetables declined 0.9 and 0.3 percent, respectively, more than offsetting a 0.2 percent increase in the index for fresh fruits. The index for

meats, poultry, fish, and eggs also turned down in September, declining 0.2 percent. Within this group, the index for pork fell 0.4 percent, the index for beef was unchanged, and poultry prices rose 0.8 percent. The indexes for dairy products and for cereal and bakery products each rose at the same rate in September as in August—up 0.1 and 0.2 percent, respectively. The index for other food at home increased 0.2 percent in September. An upturn in prices for sugar and sweets was partially offset by a downturn in coffee prices, which fell 0.5 percent, following increases totaling 24.2 percent in the preceding six months. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—increased 0.3 and 0.2 percent, respectively.

The housing component rose 0.3 percent in September,

after increasing 0.1 percent in August. Shelter costs rose 0.2 percent. Within shelter, renters' costs increased 0.4 percent and homeowners' costs, 0.1 percent. The index for fuel and other utilities, which declined 0.5 percent in August, rose 0.6 percent in September. The index for household fuels increased 1.0 percent, largely as a result of a 2.2-percent rise in the index for natural gas. Charges for electricity increased 0.5 percent, while fuel oil prices fell 0.1 percent. The index for other utilities and public services, which declined 0.2 percent in August, rose 0.3 percent in September, in part reflecting a 0.6 percent rise in cable television charges. The index for household furnishings and operation advanced 0.1 percent—its first increase since May.

The transportation component advanced 0.4 percent in September, following an increase of 0.6 percent in August. The index for gasoline, which increased 5.4 percent in August after declining in each of the preceding five months, continued to advance in September, rising 1.8 percent. New vehicle purchase costs continued to show little upward movement; the index for new vehicle prices increased 0.1 percent, while automobile finance charges dropped 1.3 percent. (Prior to seasonal adjustment, new vehicle prices declined 0.2 percent.) The index for used cars declined 0.1 percent. Public transportation costs again turned upward in September, reflecting the behavior of airline fares. The movement in airline fares continued to vary between large declines and increases, reflecting the prevalence of "super-saver" discount fares. The advance of 2.1 percent in September follows a decline of 4.7 percent in August. During the past 12 months, airline fares have increased 1.0 percent.

The index for apparel and upkeep, which declined 1.0 percent in August, rose 0.3 percent in September. (Prior to seasonal adjustment, apparel commodity prices rose 2.6 percent, reflecting seasonal price increases for fall-winter wear.)

Medical care costs rose 0.2 percent in September to a level 2.6 percent above a year ago. The index for medical care commodities—prescription drugs, nonprescription

drugs, and medical supplies—increased 0.1 percent. The index for medical care services rose 0.2 percent. Charges for professional services and hospital and related services increased 0.1 and 0.4 percent, respectively.

Entertainment costs, which increased 0.2 percent in August, declined 0.2 percent in September. The index for admissions to movies, theaters, concerts, and sporting events declined 1.8 percent in September, following a 1.3-percent rise in August.

The index for other goods and services rose 0.3 percent in September, following an increase of 0.6 percent in August. The indexes for college tuition and for schoolbooks and supplies, which increased 0.6 and 0.7 percent, respectively in August, declined 0.9 and 0.1 percent, respectively, in September. (In September, prior to seasonal adjustment, college tuition costs rose 1.8 percent, and the index for school books and supplies increased 0.6 percent.) The index for tobacco and smoking products increased 1.4 percent in September.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.3 percent in September.

After seasonal adjustment, the level of the CPI-U for All Items was 161.3 in September; the seasonally adjusted CPI-W for All Items was 158.2.

Since January 1997 data, BLS reports the level of the seasonally adjusted U.S. City Average All Items CPI-U and CPI-W. Effective with the release of January 1998 data in February 1998, the seasonally adjusted All Items indexes will be fully integrated into the monthly reports.

Like other seasonally adjusted CPI data, the All Items index levels are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

CPI-U 12-month changes, 1987 to present

Upcoming CPI Revision User Briefings

The 1998 CPI Revision will result in several improvements to the index, effective with the release of data for January 1998. A new set of expenditure weights, using 1993-95 Consumer Expenditure Survey data, will replace the 1982-84 weights now used. The CPI will also employ a new geographic sample, a new item structure, and a new variance-based publication system. The Web site at <http://stats.bls.gov/cpihome.htm> includes articles on the 1998 CPI Revision from the Decem-

ber 1996 *Monthly Labor Review*. For more information on this CPI revision, BLS is offering free user conferences around the country to brief groups or individuals. The Bureau will post dates for these meetings on the CPI Web site. Information on the 1998 CPI Revision is also available by calling (202) 606-7000 or any of the regional office telephone numbers listed inside the back cover of this report.

Using a Hedonic Model in the Consumer Price Index to Adjust Personal Computer Prices for Changes in Quality

Effective with the release of data for January 1998, the Bureau of Labor Statistics (BLS) will introduce an improved quality adjustment technique in the new stratum of the Consumer Price Index (CPI) called personal computers and peripheral equipment.

Currently, personal computers are part of the information processing equipment stratum, which had a relative importance in December 1996 of 0.074 percent in the Consumer Price Index for all Urban Consumers (CPI-U) and 0.057 percent in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). As previously announced, beginning with the CPI for January 1998, information processing equipment will become an expenditure class called "information and information processing other than telephone services." Personal computers and peripheral equipment will be one of four strata in that expenditure class. At that time, due to the incorporation of more recent consumer expenditure weights in the CPI, the sample size and relative importance of personal computers will increase.

Analysts in the Producer Price Index (PPI) program have developed and implemented a regression procedure, called a hedonic model, that decomposes the price of personal computers into implicit prices for each important feature and compo-

ment of the computer.¹ This model provides a way to estimate the value of changes or improvements. Results from the model have been used in the PPI (since 1991) as well as in the Bureau's International Price Program (since 1993). The resulting indexes have been used in the National Income and Product Accounts produced by the Bureau of Economic Analysis, U.S. Department of Commerce. The CPI has used similar hedonic methods to adjust apparel prices for many years. An important distinction is that the PPI model uses data from secondary sources, rather than from internal pricing samples.

Starting with the CPI for January 1998, when a personal computer or selected item of peripheral equipment, such as a modem, in the CPI sample improves in some way, a regression-based quality adjustment will be made. The value of the improvement, as derived from the PPI regression estimates, will be deducted from the observed price change for the product. Conversely, if a specific model deteriorates in value in some way, the difference in value will be added to the price.

For additional information on these changes, telephone Joseph Chelena at (202) 606-6982, ext. 255 or write to:

Bureau of Labor Statistics
Division of Consumer Prices and Price Indexes
2 Massachusetts Ave., NE., Room 3260
Washington, DC 20212

¹The PPI analysts have not published results of their recent research in this area. The research builds on earlier work on an experimental PPI computer index: this index is described in James Sinclair and Brian Catron, "New Price Index for the Computer Industry," *Monthly Labor Review*, Vol. 113, No. 10, October 1990, pp. 16-24.

The Experimental CPI Using Geometric Means September 1997

The experimental CPI using geometric means for All Urban Consumers (CPI-U-XG) for September 1997 was 117.3 (on a December 1990=100 base). This is 2.0 percent higher than in August 1997. In comparison, the experimental "Test Laspeyres" CPI for all urban consumers (CPI-U-XL) was 119.8 in August 1997, 2.2 percent higher than one year ago.

On April 10, 1997, the Bureau of Labor Statistics (BLS) introduced an experimental Consumer Price Index (CPI) for All Urban Consumers, which uses a geometric mean formula to combine individual price quotations at the lower level of aggregation while keeping the current Laspeyres arithmetic mean formula for higher level aggregation. This experimental index, called *the experimental CPI using geometric means*, or CPI-U-XG, is a supplement to the price information available from BLS and does not replace the published CPI-U or CPI-W indexes. BLS currently is evaluating the full or partial adop-

tion of the geometric mean formula in the CPI-U and CPI-W.

These data will be published quarterly in the *CPI Detailed Report*. Table 1 shows the CPI-U-XG indexes for major CPI categories for the period for the last 13 months. Historical differences between the CPI-U and CPI-U-XG arise not only because of the different formulas used, but also because methodological changes made in the CPI-U over the years are reflected in the CPI-U-XG for the entire series. For historical comparison to the CPI-U-XG, therefore, BLS also has issued an experimental "Test Laspeyres" series called the CPI-U-XL, which differs from the CPI-U-XG only in the use of the Laspeyres formula for aggregation of price quotations. Table 2 shows the CPI-U-XL indexes over the same time period.

For a full explanation of these series, see "The Experimental CPI using Geometric Means (CPI-U-XG)" in the March 1997 *CPI Detailed Report*.

Planned CPI Publication Changes

Beginning in 1998, the Bureau of Labor Statistics (BLS) will introduce a new geographic area sample, a revised item structure and updated expenditure weights into the Consumer Price Index (CPI). Approximately every 10 years BLS undertakes this type of revision in order to keep the index up-to-date. Since World War II, revisions of the CPI have been introduced in 1953, 1964, 1978, and 1987.

Because the changes the CPI undergoes during each revision can have a major impact on our users, special steps are taken to ameliorate the effects of these changes. Beginning with the release of the January 1997 index, data series that will change or be dropped from publication are footnoted in BLS published tables. This provides an early warning to users to reconsider their use of CPI indexes and provides time for users to make changes in index use. The 1998 CPI Revision contains substantial revisions in both the items being presented and the frequency of local area index publication.

Changes to the item structure

Effective in 1998, there will be considerable changes to both the items being priced and the manner in which they are being aggregated in the CPI. The most notable modification in presentation is a reconstruction of several major groups with a resulting change from the currently available seven major groups to the new total of eight.

Currently the major groups are: Food and beverages, housing, apparel and upkeep, transportation, medical care, entertainment and other goods and services. Three of these groups—food and beverages, transportation, and medical care—will remain the same. The apparel group was modified to exclude apparel upkeep products and services. The entertainment group has been slightly redefined into a major group called *recreation*; and a new major group, *education and communication*, has been formed from past subelements of the housing, entertainment and other goods, and services groups.

Other important changes in the item structure at lower levels are an expansion of the food away from home index, a reorientation of the car and truck indexes to a vehicle index, and the expansion of the information processing equipment index.

For a complete listing of the new CPI publication structure, see table X.

Changes to the geographic structure

In each revision, the CPI geographic sample is selected to be representative of the current demographics of the

United States. The current revision uses the 1990 Census of Population. The CPI develops an updated area sample design, decides on new local area indexes, and changes the frequency of publication for local area indexes to better reflect these new demographics.

In addition to the national index, BLS currently publishes indexes for 29 metropolitan areas. In 1998, the Bureau will continue to publish indexes for all but two of these areas—Buffalo-Niagara Falls, NY, and New Orleans, LA. Due to the revised metropolitan area (MA) definitions issued by the Office of Management and Budget (OMB), two other areas, Washington, DC and Baltimore, MD, which BLS currently publishes separately, constitute a new consolidated metropolitan statistical area. A single index will be published for this consolidated area.

The new publication plan for local area indexes, to begin with the index for January 1998, is summarized below:

- Monthly indexes will be published for the three largest metropolitan areas. Because of sample design considerations, indexes for the Philadelphia and San Francisco areas, both currently published monthly, will be published every other month, following the release of the December, 1997 index.
- Bimonthly indexes will be published for the next 11 largest areas, including Atlanta and Seattle, which currently have semiannual average indexes.
- Semiannual average indexes will be published for 12 additional areas, including Pittsburgh and St. Louis, which currently have bimonthly indexes.
- BLS will continue to publish separate indexes for the four census regions of the United States. However, beginning in 1998, there will only be two area size classes for metropolitan areas, (instead of the current three): size A—areas with a population greater than 1.5 million; and size B/C—areas with less than 1.5 million population. This cutoff of 1.5 million in population reflects a rise from the current cutoff of 1.2 million and is important, because cities in size class A are those for which the Bureau publishes city level indexes. The B/C size class is a combination of the old size B and size C metropolitan areas. In addition to the two metropolitan area size indexes for each region, separate size D indexes for urban non-metropolitan areas will continue to be published for both the Midwest and the South. (Separate indexes for Northeast and West urban nonmetropolitan areas were discontinued in 1987.)

The following list shows the areas for which indexes will be published beginning in January, 1998:

• **Metropolitan areas for which a local index will be published monthly:**

New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA
Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA

• **Metropolitan areas for which a local index will be published bimonthly:**

In odd months (i.e., January, March, etc.)

Boston-Brockton-Nashua, MA-NH-ME-CT
Washington-Baltimore, DC-MD-VA-WV
Cleveland-Akron, OH
Atlanta, GA
Dallas-Fort Worth, TX

In even months (i.e., February, April, etc.)

Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD

New tables

Beginning with the release of the January 1997 index, a new transitional step has been taken: the publication of underlap indexes. Underlap indexes are indexes that are produced for new index areas using old weights and structures with a specially developed aggregation tree for a period before the introduction of these areas. These indexes will be developed to handle two specific situations occurring in the 1998 revision: the combination of Washington and Baltimore into a single MA and the com-

San Francisco-Oakland-San Jose, CA
Houston-Galveston-Brazoria, TX
Detroit-Ann Arbor-Flint, MI
Miami-Fort Lauderdale, FL
Seattle-Tacoma-Bremerton, WA

• **Metropolitan areas for which a local index will be published semiannually (In January and July):**

Pittsburgh, PA
Kansas City, MO-KS
Minneapolis-St. Paul, MN-WI
Tampa-St. Petersburg-Clearwater, FL
Denver-Boulder-Greeley, CO
Portland-Salem, OR-WA
Cincinnati-Hamilton, OH-KY-IN
Milwaukee-Racine, WI
St. Louis, MO-IL
Anchorage, AK
Honolulu, HI
San Diego, CA

ination of two separate population size classes for MA's. These underlap indexes will be published for all of 1997; they will allow the user to prepare for the change to these new geographic indexes, which will be completed with the release of January 1998 data.

See table NS1 for the underlap Washington-Baltimore indexes and table NS2 for the underlap B/C city size class All Items indexes.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Atlanta, GA; Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA.

The following metropolitan areas are published annually and appear in tables 16A and 23A of the January issue of the CPI Detailed Report: New

Orleans, LA and Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

⁷ Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

⁸ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

- Data not available.

NOTE: Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on table 10 for information about population size classes.

² Indexes on a December 1986=100 base.

³ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁴ This index series will no longer appear after December, 1997.

⁵ This index series will undergo a change in composition in January, 1998.

⁶ Indexes on a December 1982=100 base.

⁷ Indexes on a December 1993=100 base.

⁸ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

- Data not available.

¹ See region and area size on table 10 for information about cross classifications.

² Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

³ This index series will no longer appear after December, 1997.

⁴ This index series will undergo a change in composition in January, 1998.

⁵ Indexes on a December 1982 = 100 base.

⁶ Indexes on a December 1986 = 100 base.

⁷ Indexes on a December 1993 = 100 base.

⁸ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

⁹ Indexes on a June 1978 = 100 base in West size class C.

- Data not available.

¹ This index series will no longer appear after December, 1997 below the U.S. city average level.

² This index series will undergo a change in composition in January, 1998.

³ Regions defined as the four Census regions. See map in technical notes.

⁴ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁵ Indexes on a December 1986=100 base.

⁶ Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

⁷ Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

⁸ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

¹ Areas on pricing schedule 2 (see table 10) will appear next month.

² Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

³ This index series will no longer appear after December, 1997 below the U.S. city average level.

⁴ This index series will undergo a change in composition in January, 1998.

⁵ This index series will no longer appear after December, 1997.

⁶ Indexes are on a November 1982=100 base in Baltimore, Boston, Miami, St. Louis, Washington. Indexes are on a December 1982=100 base in the U.S., Chicago, Cleveland, Los Angeles, New York, Philadelphia, San Francisco.

⁷ This index series will no longer appear in its present form after December, 1997 for the U.S. city average. See Table X for a comparable index series.

⁸ Indexes on a November 1986=100 base in Baltimore, Boston, Cleveland, Miami, St. Louis, and Washington. Indexes on a December 1986=100 base in U.S., Chicago, Los Angeles, New York, Philadelphia, San Francisco.

⁹ Indexes on a December 1993=100 base.

¹⁰ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

¹¹ Index on a November 1977=100 base in Miami.

¹² Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

¹³ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

^{NA} Data not adequate for publication.

- Data not available.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated.

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁴ Indexes on a December 1986 = 100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Atlanta, GA; Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA.

The following metropolitan areas are published annually and appear in tables 16A and 23A of the January issue of the CPI Detailed Report: New

Orleans, LA and Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

⁷ Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

⁸ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

- Data not available.

NOTE: Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar.

Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on table 10 for information about population size classes.

² Indexes on a December 1986=100 base.

³ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁴ This index series will no longer appear after December, 1997.

⁵ This index series will undergo a change in composition in January, 1998.

⁶ Indexes on a December 1984=100 base.

⁷ Indexes on a December 1993=100 base.

⁸ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

- Data not available.

All items less food and energy	162.2	1.8	.2	173.1	2.6	.2
Energy	121.3	4.6	3.1	114.0	1.8	2.2
Commodities less food	131.4	.5	.8	135.8	.2	.7
Nondurables less food	135.2	1.7	1.4	143.6	1.5	1.5
Nondurables	147.2	2.2	.8	150.5	2.2	.9
Services less rent of shelter ⁵	169.9	2.2	.4	176.1	4.5	.0
Services less medical care services	169.8	2.7	.4	182.4	3.4	.1

¹ See region and area size on table 10 for information about cross classifications.

² Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

³ This index series will no longer appear after December, 1997.

⁴ This index series will undergo a change in composition in January, 1998.

⁵ Indexes on a December 1984=100 base.

⁶ Indexes on a December 1986=100 base.

⁷ Indexes on a December 1993=100 base.

⁸ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

⁹ Indexes on a June 1978=100 base in West size class C.

- Data not available.

¹ This index series will no longer appear after December, 1997 below the U.S. city average level.

² This index series will undergo a change in composition in January, 1998.

³ Regions defined as the four Census regions. See map in technical notes.

⁴ Starting in January, 1998, a new Size Class B/C will be introduced, composed of current Size Class B and Size Class C cities. There will be no individual Size Class B or Size Class C.

⁵ Indexes on a December 1986=100 base.

⁶ Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

⁷ Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

⁸ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

¹ Areas on pricing schedule 2 (see table 10) will appear next month.

² Indexes for the cities of Washington and Baltimore will no longer be published separately after December, 1997. Beginning in January, 1998 the two cities will be published as a Washington-Baltimore combined metropolitan area.

³ This index series will no longer appear after December, 1997 below the U.S. city average level.

⁴ This index series will undergo a change in composition in January, 1998.

⁵ This index series will no longer appear after December, 1997.

⁶ Indexes are on a November 1984=100 base in Baltimore, Boston, Miami, St. Louis, Washington. Indexes are on a December 1984=100 base in the U.S., Chicago, Cleveland, Los Angeles, New York, Philadelphia, San Francisco.

⁷ This index series will no longer appear in its present form after December, 1997 for the U.S. city average. See Table X for a comparable index series.

⁸ Indexes on a November 1986=100 base in Baltimore, Boston, Cleveland, Miami, St. Louis, and Washington. Indexes on a December 1986=100 base in U.S., Chicago, Los Angeles, New York, Philadelphia, San Francisco.

⁹ Indexes on a December 1993=100 base.

¹⁰ This index series will no longer appear in its present form after December, 1997. See Table X for a comparable index series.

¹¹ Index on a November 1977=100 base in Miami.

¹² Indexes for the cities of Philadelphia and San Francisco will no longer be published on a monthly basis starting in January, 1998. Beginning in February, 1998 they will be published on a bi-monthly basis.

¹³ Indexes for the cities of Pittsburgh and St. Louis will no longer be published on a bi-monthly basis after December, 1997. Beginning in July, 1998 they will be published semi-annually, each January and July.

^{NA} Data not adequate for publication.

- Data not available.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total population and (2), a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, medicine, and the other goods that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 57,000 housing units and approximately 19,000 retail establishments—department stores, supermarkets, hospitals, gasoline stations and other types of stores and services establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuel, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by either personal visits or telephone calls from the Bureau's trained representatives. Some data, such as used car prices, are obtained from secondary sources.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of country, for cross-classifications of regions and population-size classes, and for 29 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The indexes measure price change from a designated reference date, usually 1982-84, which equals 100.0. An increase of 7 percent, for example, is shown as 107.0. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$100 in 1982-84 to \$107.

For further details see *BLS Handbook of Methods*, BLS Bulletin 2414, September 1992.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	112.5
Less previous index	108.5
Equals index point change	4.0
<i>Percent change</i>	
Index point difference	4.0
Divided by the previous index	108.5
Equals	0.037
Results multiplied by one hundred	0.037 x 100
Equals percent change	3.7

Energy Prices

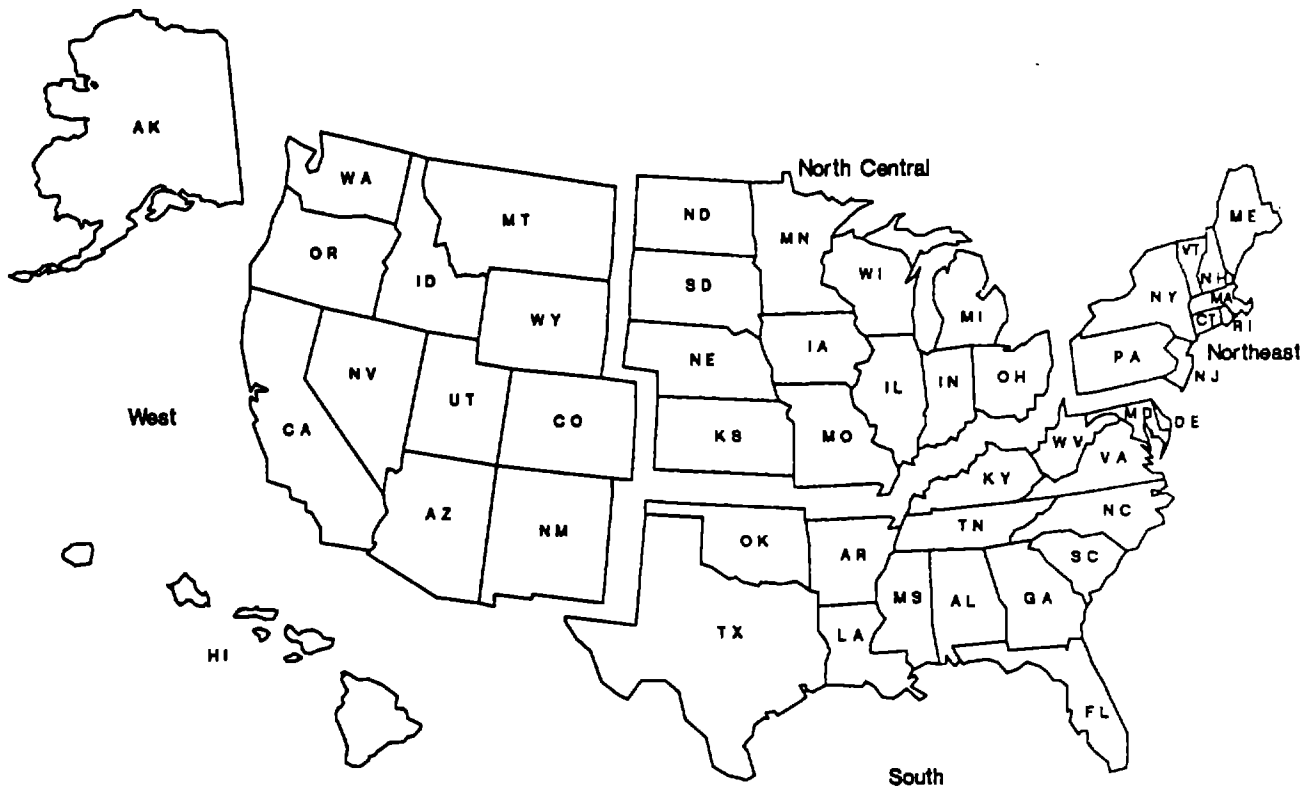

Prices are usually available for the U.S. city average, 15 large metropolitan areas, the four census regions, four size classifications, and 13 areas reflecting the four Census regions cross-classified by the four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas for 500 kilowatt hours of electricity (table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residen-

Census Regions

tial consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU's (U.S. Department of Energy).

1 kwh = 3,412 BTU'S (Edison Electric Institute).

1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, as estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from the BLS regional offices or from the Washington office upon request.

Adjustment of Shelter Indexes for Aging Effects

Beginning with January 1988 CPI, the Bureau of Labor Statistics adjusts the monthly CPI shelter indexes for the

change in quality resulting from the effect of aging on rental housing. In January 1987, the Bureau announced its intention to begin making such adjustments, assuming that further research substantiated the need to do so. The decision to implement the adjustment was based on extensive BLS research, in which alternative adjustment methods were explored and tested. Evaluation of the research indicates that an aging effect exists, and that the chosen method is operationally feasible.¹ The adjustment affect CPI shelter indexes, which would have been raised by 0.2 percent for the year 1987 had an aging adjustment been applied.

The quality of housing unit decreases as the unit ages. Existing BLS methods are used to correct for relatively easily measured quality changes such as the addition of an extra bedroom, but such methods are inadequate to correct for deterioration in the condition of housing unit.²

The aging adjustment method was specifically designed to correct for quality changes associated with this deterioration. The BLS used hedonic regression methods to estimate the aging effect.

The estimates were then used to correct the CPI rent and rental equivalence indexes. Hedonic regressions are statistical functions that relate the price of a good to its attributes or characteristics. For example, a hedonic regression relates a housing unit's rent to its size, age, location, etc. By using BLS housing survey data from 1987 and Census data from 1980, hedonic regression methods provided estimates of the relationship between a housing unit's rent and age while other housing unit characteristics were held constant. The estimated relationship was then used to construct the aging adjustment. Estimates will be recomputed annually by using the previous year's BLS housing survey data and the most recently available Census data.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month. For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

¹ A complete technical presentation of BLS research on this subject is available in William C. Randolph, "Housing Depreciation and Aging Bias in the Consumer Price Index," BLS Working Paper No. 166, April 1987, and *Journal of Business and Economic Statistics*, Vol. 6, No. 3, July 1988, pp. 359-71 and in William C. Randolph, "Estimation of Housing Depreciation: Short Term Quality Change and Long Term Vintage Effects," BLS Working Paper No. 160, April 1986, and *Journal of Urban Economics*, Vol. 23, March 1988, 162-78. These papers are available from the BLS on request.

² For detail on existing quality adjustment methods, see *BLS Handbook of Methods*, chapter 19 (BLS Bulletin 2414).

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

In most cases, seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, for example, data from 1987 through 1991 were replaced at the end of 1991. The seasonal movement of all items and 47 other aggregations is derived by combining the seasonal movement of 60 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Occasionally, a component changes its seasonal adjustment status from seasonally adjusted to not seasonally adjusted. When this occurs, not seasonally adjusted data are used for the last 5 years, but before that period the seasonally adjusted indexes remain in calculations of higher-level seasonally adjusted indexes.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called intervention analysis in conjunction with X-11-ARIMA for some CPI series. Intervention analysis allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are removed from the data prior to calculation of seasonal factors in X-11-ARIMA.

For the fuel oil and the motor fuels indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure was used to offset the effects of changes in pricing methodology; and for new cars, new trucks, and new vehicles, this procedure was used to offset the effects of changes in marketing strategies and the introduction of new models. For the tobacco and smoking products index, this procedure was used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention was used to offset the effects of excise tax increases.

An alternative to the intervention-adjusted X-11-ARIMA procedure is the state space model-based seasonal adjustment method. This method adjusts simultaneously for interventions and seasonal effects, rather than sequentially as in the X-11-ARIMA methodology, using structural statistical models with explanatory variables. The state space structural model-based method of seasonal adjustment was introduced in 1992 for the adjustment of January 1991-December 1991 indexes for three women's apparel series: Dresses, separates and sportswear, and suits.

A description of intervention analysis, including a list of

events treated as interventions and the seasonal factors for these items may be obtained by writing the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Room 3615, Washington, DC 20212-0001 or by calling Claire McAnaw at (202) 606-6968.

Metropolitan Areas

BLS publishes five major metropolitan areas monthly:

Chicago-Gary-Lake County, IL-IN-WI
 Los Angeles-Anaheim-Riverside, CA
 New York-Northern NJ-Long Island, NY-NJ-CT
 Philadelphia-Wilmington-Trenton PA-NJ-DE-MD
 San Francisco-Oakland-San Jose, CA

Data for additional 10 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April etc.) month schedule] for the following areas:

Baltimore, MD	-odd
Boston-Lawrence—Salem, MA-NH	-odd
Cleveland-Akron—Lorain, OH	-odd
Dallas-Fort Worth, TX	-even
Detroit-Ann Arbor, MI	-even
Houston, TX	-even
Miami-Port Lauderdale, FL	-odd
Pittsburgh-Beaver Valley, PA	-even
St. Louis-East St. Louis, MO-IL	-odd
Washington, DC-MD-VA	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks in to the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK	Kansas City, MO-KS
Atlanta, GA	Milwaukee, WI
Buffalo-Niagara Falls, NY	Minneapolis-St. Paul MN-WI
Cincinnati-Hamilton, OH-KY-IN	Portland-Vancouver, OR-WA
Denver-Boulder, CO	San Diego, CA
Honolulu, HI	Seattle-Tacoma, WA

Finally, BLS recently began publication of CPI's for two metropolitan areas on an annual basis. These indexes represent the arithmetic averages for the 12-monthly period from January through December of each year. They are published with the release of the CPI for January, i.e., in February. These areas are:

New Orleans, LA
 Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information can be obtained from the Bureau of Labor Statistics (BLS) electronically, through subscriptions to publications, and via telephone and fax through automated recordings. Information specialists are also available to provide help and to respond to questions.

Electronic access to CPI data

BLS on the internet. Through the internet, the BLS provides free, easy, and continuous access to all published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. A database, called LABSTAT, containing current and historical data for the CPI is accessible. Data and press releases from other BLS surveys are also available. The site is accessible via World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. For help using any of these systems, send e-mail to LABSTAT.HELPDESK@BLS.GOV

World Wide Web. BLS maintains a website at <http://stats.bls.gov> The BLS home page provides easy access to LABSTAT, as well as links to program specific home pages. The CPI home page provides other CPI information, including a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Using FTP or Gopher, connect to stats.bls.gov Logon as ANONYMOUS and use your complete internet e-mail address as the password.

Subscriptions to CPI publications

Summary Data. Free, monthly, two-page publication containing 1-month and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The all items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications and Special Studies, Bureau of Labor Statistics, 2 Massachusetts Ave., NE., Room 2860, Washington, DC, 20212-0001 or call (202) 606-7828 or any of the regional offices listed on the inside back cover.

CPI Detailed Report. Most comprehensive report of the Consumer Price Index. See inside front cover for details.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too ex-

tensive for inclusion in the *CPI Detailed Report*. The MLR costs \$29.00 per year or \$7.50 per issue. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided 24-hours a day on recorded messages. Detailed CPI information is available by calling (202) 606-7828. A touch-tone telephone is recommended as this system allows the user to select specific indexes from lists of available data.

Information about the *U.S. city average and the Washington, DC-MD-VA area all items index* and the next release date is available by calling (202) 606-6994. This recording is approximately 2.5 minutes in length, and a touch-tone telephone is not needed.

Other sources of CPI data

Technical information is available between 8:15 a.m. and 4:45 p.m. Eastern time, Monday through Friday, by calling (202) 606-7000 or any of the regional offices listed on the inside back cover.

FAXSTAT. A wide variety of BLS information and data, including the CPI, are available on this fax-on-demand service. It provides the monthly CPI press release, selected regional and metropolitan historical data, and some technical information. It is available 24-hours a day. The latest CPI information is posted during the morning of release day. Call (202) 606-6325. Then, follow the instructions to have the latest catalog sent to you. This catalog will show you the BLS information that is available on FAXSTAT. Each regional office also has the system in place and includes additional regional CPI information.

Historical tables. These tables include all of the published indexes for each of the detailed CPI components. They are available via the internet, or by calling (202) 606-7000 or any of the regional offices listed on the inside back cover.

Descriptive and special publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, nontechnical overview of the CPI in a question and answer format, and a quite technical and thorough description of the CPI and its methodology. The publications are available upon request by calling (202) 606-7000.

Special publications. Various special publications such as the *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data are available. For more information call (202) 606-7000.

Further information may be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC, 20212-0001, or by calling (202) 606-7000.
