

REGULATIONS OF THE ADMINISTRATOR

PART 400 — Effective March 26, 1951

Organization and Functions

AMENDMENT 26

Amdt. 26....Effective Oct. 15, 1953
(18 Federal Register 6571)

Section 43 (h) (4) is revised to read:

Sec. 43. Regions 1-6. * * *

(h) Aviation Safety Division. * * *

(4) Aviation Safety District Offices—

(1) Functions. Aviation Safety District Offices, each staffed with a supervisor and agents, and some with engineers, serve as contact points with the general public and the aviation industry. The offices are responsible for the initial handling of all matters dealing with: Aeronautical competency of airmen, air agencies, and air carriers; manufacture, repair, alteration, and maintenance of aircraft and components; compliance with rules and standards governing flight operations; investigation of accidents and violations; promotion of safe flying; and maintenance of close liaison with state and local enforcement agencies.

(2) Locations and specialties. In the following tables:

The specialty column includes all specialties found at a particular office location. Although engineers are assigned to a few district offices for the purpose of having administrative headquarters, the public can make initial

engineering contact at any Aviation Safety District Office.

"(G)" indicates that there is assigned to the office an agent who specializes in aviation safety activities relating to: Air agencies; general operators (operators of aircraft other than: Scheduled air carriers, irregular air carriers operating aircraft having a maximum certificated gross take-off weight of more than 12,500 pounds, and commercial operators certificated under Part 45 of the Civil Air Regulations); general aircraft in service (aircraft of general operators); general airmen (all persons who hold or are eligible for airman certificates other than: Airline transport pilot, airport control tower operator, dispatcher, or aircrewman); and other general aviation activities.

"(C)" indicates that there is assigned to the office an agent who specializes in aviation safety activities relating to: Air carrier operations (operations of: Scheduled air carriers, irregular air carriers operating aircraft having a maximum certificated gross take-off weight of more than 12,500 pounds, and commercial operators certificated under Part 45 of the Civil Air Regulations); air carrier aircraft in service (aircraft used in air

carrier operations described herein); air carrier airmen (persons who hold or are candidates for such certificates as airline transport pilot, airport control tower operator, dispatcher, or aircrewman); and other air carrier matters.

"(F)" indicates that there is assigned to the office an agent who specializes in manufacturing inspection, including matters pertaining to the type, production, and original airworthiness inspections of new or modified aircraft, engines, propellers, and components.

"(E)" indicates that there is assigned to the office an engineer and/or agent who specializes in rendering engineering assistance in the evaluation of aircraft and equipment designs and redesigns, and in the evaluation of aircraft repairs and alterations.

All agents are generally familiar with, and can furnish information and advice on, aviation safety matters outside their area of specialization.

Note: Mail should be addressed as in this example:

CAA Aviation Safety District Office,
Room 202, Old Administration Building,
Municipal Airport,
Newark, N. J.
