The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$25 domestic, \$31.25 foreign. Single copy domestic, \$11.00; foreign, \$13.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 606-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Information in this publication will be made available to sensory impaired individuals upon request. Voice phone: (202) 606-STAT; TDD phone: (202) 606-5897; TDD message referral phone: 1-800-326-2577. Data on the CPI can also be accessed through the CPI homepage (<http://stats.bls.gov/cpihome.htm>). This material is in the public domain and, with appropriate credit, may be reproduced without permission. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements

May 1998

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.2 percent in May, before seasonal adjustment, to a level of 162.8 (1982-84=100). For the 12-month period ended in May, the CPI-U has increased 1.7 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.3 percent in May, prior to seasonal adjustment. The May 1998 CPI-W level of 159.5 was 1.5 percent higher than the index in May 1997.

Beginning with release of the data for January 1999, the BLS will introduce a new formula for calculating the basic components of the CPI. (See page 3 for more details.)

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.3 percent in May after increasing 0.2 percent in April. The food index increased 0.6 percent. Grocery store food prices advanced 0.8 percent in May, following declines of 0.1 percent in each of the 3 preceding months, largely as a result of sharp increases in prices for fruits and vegetables. The energy index registered its first increase since last September—up 0.3 percent in May. The index for petroleum-based energy increased 0.8 percent, while the index for energy services was unchanged. Excluding food and energy, the CPI-U, which rose 0.3 percent in April, increased 0.2 percent in May. A small increase in cigarette prices and a large decline in airline fares, coupled with a

downturn in the index for household furnishings and operations, were responsible for the moderation.

During the first 5 months of 1998, the CPI-U rose at a 1.5-percent seasonally adjusted annual rate (SAAR). This compares with an increase of 1.7 percent for all of 1997. Declines in energy costs have continued to act as a moderating influence on overall consumer price index movements thus far in 1998, decreasing at a 12.9-percent annual rate, after declining 3.4 percent in all of 1997. Food costs, which rose 1.5 percent in 1997, have risen at a 2.3-percent SAAR in the first 5 months of 1998. Excluding food and energy, The CPI-U has advanced at a 2.7-percent rate thus far in 1998, compared with a 2.2-percent rise for all of 1997. The larger rate of advance this year is primarily due to a sharp rise in the index for tobacco and smoking products—up at a SAAR of 16.2 percent.

The food and beverages index rose 0.5 percent in May. The index for grocery store food prices rose 0.8 percent, following declines of 0.1 percent in each of the preceding 3 months. About 95 percent of the May advance was the result of a 5.3-percent rise in the index for fruits and vegetables. The index for fresh fruits and for fresh vegetables increased 1.4 and 11.9 percent, respectively; processed fruits and vegetables rose 1.4 percent. The index for meats, poultry, fish, and eggs registered its first increase since November, advancing 0.3 percent in May. The indexes for beef, for pork, and for poultry increased 0.4, 0.5, and 0.8

- Data not available.

percent, respectively. Despite the May increases, prices for each of these items were lower than a year earlier. The index for cereal and bakery products increased 0.4 percent. Each of the three other major grocery store food groups recorded declines in May. The index for nonalcoholic beverages registered its third consecutive decrease—down 0.5 percent in May—reflecting declines in prices for coffee and carbonated drinks. The index for dairy products fell 0.3 percent, and the index for other food at home declined 0.1 percent. The other two components of the food and beverage index—food away from home and alcoholic beverages—rose 0.2 percent and remained unchanged, respectively.

The housing component rose 0.3 percent in May. Shelter costs rose 0.4 percent, the same as in April. Within shelter, the index for rent rose 0.4 percent; owners' equivalent rent, 0.3 percent; and the cost of lodging away from home, 1.0 percent. (Prior to seasonal adjustment, the latter index declined 1.4 percent.) The index for fuels and utilities increased 0.1 percent in May. The index for household fuels was unchanged, the index for electricity rose 0.1 percent, the index for natural gas was unchanged; and the index for fuel oil declined 0.5 percent. The index for household furnishings and operations, which increased 0.4 percent in April, decreased 0.2 percent in May, reflecting price declines for most housefurnishings.

The transportation component, which declined in each of the preceding 6 months, rose 0.1 percent in May. The upturn was largely due to the turnaround in the index for gasoline, which registered its first increase since

September—up 0.8 in May. (Prior to seasonal adjustment, gasoline prices rose 3.4 percent.) The index for new and used vehicle prices was unchanged in May; the index for new vehicles declined 0.3 percent, while the index for used car and truck prices advanced 1.2 percent. Public transportation costs declined 0.8 percent in May. The index for airline fares, which increased 8.2 percent during the first 3 months of 1998, declined for the second consecutive month—down 2.4 percent in May.

The index for apparel increased 0.4 percent in May, following declines in each of the preceding 2 months. (Prior to seasonal adjustment, apparel prices fell 0.4 percent.)

Medical care costs rose 0.3 percent in May to a level 3.1 percent above a year ago. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—increased 0.7 percent. The index for medical care services rose 0.2 percent. Charges for professional services and for hospital and related services increased 0.2 and 0.1 percent, respectively.

The index for recreation costs was unchanged for the second consecutive month. Declines in the prices for sporting goods, video and audio equipment, and toys were largely offset by an increase in charges for cable television.

The index for education and communication increased 0.3 percent in May, the same as in April. In May, education costs rose 0.5 percent, reflecting an increase in charges for child care and nursery school. The index for communication costs rose 0.1 percent. Within the com-

- Data not available.

munication category, an increase in long distance telephone charges—up 1.2 percent—was partially offset by declines in the indexes for personal computers and peripheral equipment and for cellular telephone services—down 4.5 and 0.2 percent, respectively.

The index for other goods and services rose 0.7 percent in May. Over half of the increase was attributable to a 1.7-percent increase in the index for tobacco and smoking products. Prices for cigarettes rose 2.6 percent in May and have risen 7.7 percent through the first five months of 1998.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.3 percent in May.

CPI (old series)

For the first 6 months of 1998, BLS also will calculate old series CPI-U and old series CPI-W based on the 1982-84 expenditure pattern used in the CPI from 1987 through 1997. These old series data are contained in tables 1(OS)-4(OS). From April to May, the old series CPI-U and the old series CPI-W rose 0.2 and 0.3 percent, respectively. These series are not seasonally adjusted.

Planned change in the Consumer Price Index formula

On April 16, the Bureau of Labor Statistics announced its decision to use a new formula for calculating the basic components of the Consumer Price Index for all Urban Consumers (CPI-U) and the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). This change will become effective with data for January 1999.

The new formula, the geometric mean estimator, will be used in index categories that comprise approximately 61 percent of total consumer spending represented by the CPI-U. The remaining index categories, which are shown in the accompanying list to be calculated as they are currently. Based upon BLS research, it is expected that planned use of the new formula will reduce the annual rate of increase in the CPI by approximately 0.2 percentage point per year.

The geometric mean estimator will be introduced in both the CPI-U and the CPI-W effective with data for January 1999, in accord with the past practice of introducing methodological changes at the beginning of a calendar year. BLS will continue to publish “overlap” CPI-U and CPI-W series using the current calculation method for the first 6 months of 1999. These indexes will not be published regularly for months subsequent to June 1999, but will be available upon request.

Additional information on this change has been published in the April 1998 *CPI Detailed Report* and is available on the Internet (<http://stats.bls.gov/cpihome.htm>). This information may also be obtained by writing to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, 2 Massachusetts Ave. NE, Room 3615 Washington, DC 20212 or by calling (202) 606-7000.

Arithmetic Mean (Laspeyres) formula

1. Selected shelter services:

- A) Rent of primary residence
- B) Owners' equivalent rent of primary residence
- C) Housing at school, excluding board

2. Selected utilities and government charges:

- A) Electricity
- B) Utility natural gas service
- C) Residential water and sewerage maintenance
- D) State and local registration, license, and motor vehicle property tax
- E) Telephone services, local charges
- F) Cable television

3. Selected medical care services:

- A) Physicians' services
- B) Dental services
- C) Eyeglasses and eye care
- D) Services by other medical professionals
- E) Hospital services
- F) Nursing homes and adult daycare

Overview of publication changes

Beginning in 1998, the Bureau of Labor Statistics introduced a new geographic area sample, a revised item structure and updated expenditure weights into the Consumer Price Index (CPI). Approximately every 10 years the CPI undertakes this type of revision in order to keep the index up-to-date. Since World War II, revisions of the CPI have been introduced in 1953, 1964, 1978, and 1987.

Because the changes the CPI undergoes during each revision can have a major impact on our users, special steps were taken in order to ameliorate the effects of these changes. Beginning with the release of the January 1997 index, data series that were to be changed or dropped from publication have been footnoted in all BLS published tables. This provided an early warning for users to reconsider their use of those indexes and provided time for them to make changes in their use. The 1998 CPI Revision contains substantial changes in both the items being presented and the frequency of local area index publication.

Changes to the item structure

Effective in 1998, there are considerable changes to both the items being priced and the manner in which they are being aggregated in the CPI. The most notable change in presentation is a reconstruction of several major groups with a resulting change from the formerly available seven major groups to the new total of eight.

Formerly the major groups were: Food and beverages, housing, apparel and upkeep, transportation, medical care, entertainment and other goods and services. Three of these groups— food and beverages, transportation, and medical care— remained the same. The apparel group was modified to exclude apparel upkeep products and services. The entertainment group has been slightly redefined into a major group called recreation and a new major group, education and communication, has been formed from past subelements of the housing, entertainment, and other goods and services groups.

Other important changes in the item structure at lower levels are an expansion of the food away from home index, a reorientation of the car and truck indexes to a vehicle index, and the expansion of the information processing equipment index.

For a complete listing of the new CPI publication structure see table X.

Changes to the geographic structure

In each revision, the CPI geographic sample is selected to be representative of the current demographics of the United States. The 1998 revision uses the 1990 Census of Population. The CPI developed an updated area sample design, decided on new local area indexes, and changed the frequency of publication for local area indexes to better reflect these new demographics.

In addition to the national index, BLS formerly published indexes for 29 metropolitan areas. In 1998, it continues to publish indexes for all but two of these areas—Buffalo-Niagara Falls, NY, and New Orleans, LA. Due to the revised metropolitan area definitions issued by the Office of Management and Budget (OMB), two other areas, Washington, DC, and Baltimore, MD, which BLS formerly published separately, constitute a new Consolidated Metropolitan Statistical Area. A single index is now published for this consolidated area.

The new publication plan for local area indexes, that began with the index for January 1998, is summarized below:

- Monthly indexes are now published for the three largest metropolitan areas. Because of sample design considerations, indexes for the Philadelphia and San Francisco areas, both formerly published monthly, are now published every other month.
- Bimonthly indexes are published for the next 11 largest areas, including Atlanta and Seattle, which used to

have semiannual average indexes.

- Semiannual average indexes are now published for 12 additional areas, including Pittsburgh and St. Louis, which formerly had bimonthly indexes.
- BLS continues to publish separate indexes for the four Census regions of the United States. However, beginning in 1998, there are only two area size classes for metropolitan areas, instead of the former three: Size A-areas with a population greater than 1.5 million; and Size B/C - areas with less than 1.5 million population. This cutoff of 1.5 million in population reflects a rise from the former cutoff of 1.2 million and is important because cities in size class A are those for which the Bureau publishes city level indexes. The B/C size class is a combination of the old size B and size C metropolitan areas. In addition to the two metropolitan area size indexes for each region, separate size D indexes for urban nonmetropolitan areas continue to be published for both the Midwest and the South. Separate indexes for Northeast and West urban nonmetropolitan areas were discontinued in 1987.

The following is the full list of areas for which indexes are currently published:

Metropolitan areas for which a local index is published monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Metropolitan areas for which a local index is published bimonthly:

In odd months (i.e., January, March, etc.)

Boston-Brockton-Nashua, MA-NH-ME-CT
Cleveland-Akron, OH
Dallas-Fort Worth, TX
Washington-Baltimore, DC-MD-VA-WV

In even months (i.e., February, April, etc.)

Atlanta, GA
Detroit-Ann Arbor-Flint, MI
Houston-Galveston-Brazoria, TX
Miami-Fort Lauderdale, FL
Philadelphia-Wilmington-Atlantic City,
PA-NJ-DE-MD
San Francisco-Oakland-San Jose, CA
Seattle-Tacoma-Bremerton, WA

Metropolitan areas for which a local index is published semiannually (In January and July)

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

BLS to Maintain Current Reference Base of 1982-84=100 for most CPI index series

The Bureau of Labor Statistics previously indicated its intention to change the numerical reference base for both the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) from their present 1982-84=100 base to a 1993-95=100 base, effective with release of the January 1999 index in February 1999. BLS also indicated that the alternate, or 1967=100 base, would be discontinued in 1999 as well. This plan was initially described in the December 1996 *Monthly Labor Review*, a publication which contained several articles that dealt with the 1998 CPI Revision.

BLS has now decided not to implement this rebasing plan. Instead, BLS will maintain the reference base of 1982-84=100 used for most items. In addition, the 1967=100 reference base will continue to be the alternate base for the All Items indexes. This decision is based in part on the fact that historical data have less precision after rebasing. Rebasing is simply an arithmetic transformation that does not substantially impact the index. Because the rebased index values are smaller, however, the loss of precision due to rounding is more serious. In addition, retaining the old index reference bases would spare users the inconvenience associated with conversion.

Changes in the numerical reference base should not be confused with BLS plans to update the market basket of the CPI. With release of the January CPI in February 1998, the expenditure weights applied to CPI categories will be based on consumer spending patterns for 1993-95.

A Note on Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, sea-

sonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1993 through 1997 were replaced at the end of 1997. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period.

Seasonally adjusted data, including the All items index levels, are subject to revision for up to 5 years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for intervention analysis seasonal adjustment.

For the fuel oil and the motor fuels indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure was used to offset the effects of changes in pricing methodology. For the tobacco and smoking products index, this procedure was used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention analysis seasonal adjustment was used to offset the effects of excise tax increases. For the nonalcoholic beverages index, the procedure was used to offset the effects of a large increase in coffee prices due to adverse weather. For the water and

sewerage maintenance index, the procedure was used to account for a data collection anomaly.

A description of intervention analysis seasonal adjustment, as well as a list of unusual events modeled and seasonal factors for these items may be obtained by writing

to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or by calling Claire McAnaw Gallagher on (202) 606-6968 or by sending e-mail (gallagher_c@bls.gov).

CPI-U 12-month changes, 1988 to present

(This article has been reprinted from May 1998, *Monthly Labor Review*, pp. 36–39.)

Consumer inflation in 1997 at 11-year low

*Factors underlying the slowdown in consumer prices
included falling prices for energy and moderating food costs;
if food and energy are excluded,
the index shows the smallest increase in 32 years*

Todd Wilson

The Consumer Price Index for All Urban Consumers (CPI-U) All Items for the U.S. city average increased 1.7 percent in 1997, down from a 3.3-percent advance during the prior year.¹ The 1997 rise was the smallest annual increase since the 1.1-percent advance in 1986, when oil prices collapsed. A combination of declining energy prices and moderating food inflation contributed to last year's relatively low consumer inflation. Lower prices for consumer energy followed falling world crude oil prices, as oil supplies outpaced usual demand, and as demand for oil turned out to be weaker than expected. Decelerating food inflation accompanied decreasing prices for animal feed and wheat.

The CPI-U excluding food and energy prices (often called the core CPI-U) increased 2.2 percent, the smallest calendar-year rise in 32 years. Decreasing commodities prices across a wide variety of items, including new and used cars and housefurnishings, contributed to the slowdown in inflation in 1997. Commodities prices, subject to greater global competition than those for services, rose just 0.2 percent. Within commodities, prices for durable goods decreased 1.5 percent; nondurable goods increased 0.8 percent. Services fees, which increased 2.8 percent in 1997, decelerated as well, although not nearly as much as did commodities prices. (See table 1.)

Other economic measures

After adjustment for inflation, the economy expanded 3.7 percent during 1997 on a fourth-quarter to fourth-quarter basis. Last year's increase in real gross domestic product was the largest calendar-year rise during the current economic expansion, which began in 1991. The unemployment rate decreased more than one-half percentage point this past year to 4.7 percent in December, the lowest yearend level since 1969.

The combination of last year's record-low consumer inflation and record-low unemployment rate is unusual. Generally, a sustained unemployment rate under 5 percent has been accompanied by accelerating, not decelerating, inflation. Although a slight acceleration in wages and salaries has accompanied the relatively low unemployment rate, the acceleration has been weaker than the past would indicate. The Employment Cost Index (ECI) for wages and salaries for private industry workers increased 3.9 percent last year (more than twice the rate of consumer inflation), after rising 3.4 percent during 1996.

On balance, the Producer Price Index (PPI) declined as well during 1997, adding further downward pressure to business' materials costs and consumer prices. Excluding energy from each of the following PPI's, finished consumer goods decreased

Todd Wilson is an economist in the Office of Prices and Living Conditions, Bureau of Labor Statistics.

¹ Data are not available.

² No relative importance is published for gasoline. The relative importance

for motor fuel, which includes gasoline and diesel fuel, is 3.171.

NOTE: Data are not seasonally adjusted.

0.1 percent, intermediate materials rose 0.2 percent, and crude materials declined 2.7 percent. Much of the decline in crude materials reflects sharp decreases in prices for nonferrous metal ores, copper base scrap, cotton, cattle hides, and foodstuffs and feedstuffs. The PPI does not reflect changes in import prices.

Energy and food prices

Energy. The behavior of energy prices changed significantly in 1997, compared with 1996. The 1996 energy markets reflected tight supply and demand conditions. World crude oil prices reached \$23 per barrel in October, the highest level since the Persian Gulf War. Prices of all petroleum-based products followed oil prices and rose sharply as well in 1996; gasoline prices increased 12.4 percent and fuel oil costs rose more than 23 percent.²

The situation changed significantly in 1997. The Organization of Petroleum Exporting Countries (OPEC) began to exceed production quotas, resulting in increased inventories and falling prices. Non-OPEC production rose as well, especially from Mexico, Brazil, and other Latin American nations. By yearend, crude oil prices were less than \$17 a barrel.

In the first quarter of 1997, milder-than-expected winter weather resulted in reduced demand for fuel oil. Meanwhile, oil production outpaced demand. As increased production flooded oil markets, world petroleum prices plummeted through April.³

Later in the year, beginning in October and lasting through December, petroleum and gasoline prices again moved sharply lower. Factors behind these decreases included a weakening in demand from the troubled economies of East Asia, a milder-than-usual autumn in much of the northern

hemisphere that accompanied the El Niño weather system, and an increase in OPEC oil production, particularly from Venezuela.

In 1997, the decrease in crude oil prices translated into sharply lower prices for gasoline and home heating oil. Gasoline charges declined 6.1 percent in 1997. Last year's sharp decrease largely reflects declining petroleum prices, lower gasoline demand due to cooler-than-normal driving weather during the spring and early summer, and rising crude oil and gasoline stocks, which reached levels not seen for several years. Because 1997's autumn and early winter weather was milder than usual, many oil refiners did not switch production from gasoline to heating oil, as they usually do at that time of year. Consequently, gasoline inventories climbed quite high.

At the same time, charges for household fuel oil decreased 11.7 percent in 1997. Energy services (electricity and natural gas) rose just 0.2 percent in 1997, after increasing 3.8 percent during the preceding year. Electricity prices decreased 1.3 percent. Natural gas costs increased just 3.3 percent, down sharply from an 11-percent rise in 1996.

Food. Food inflation decelerated sharply last year, with prices increasing just 1.5 percent, following a 4.3-percent advance in 1996. Grocery store food prices (food at home) rose 1.0 percent in 1997, after rising 4.9 percent during the previous year. Declining prices for beef and veal, dairy products, pork, poultry, eggs, and fresh fruits led the deceleration.

Beef and veal charges decreased 0.7 percent last year, after rising 2.4 percent in 1996. The number of cows slaughtered increased in 1997, mainly a result of disappointing forage conditions, a number of winter storms, and record-high hay prices. Furthermore, negative publicity on recalled E-coli-contaminated beef dampened domestic and international demand. Finally, declining pork prices acted to suppress beef and veal costs. Charges for dairy products declined 0.5 percent in 1997, after increasing more than 10 percent in the prior year. In contrast to 1996, in 1997, farmers spread out their available forage until new crop supplies became available, thereby avoiding a decrease in milk output per cow.

Pork prices decreased 1.5 percent in 1997, following an 11.3-percent rise during the prior year. Last year represented an expansionary phase of the pork production cycle, as both breeding stocks and the number of hogs slaughtered increased. A reduction in corn feed prices has encouraged the expansion to last longer than it otherwise would have. After peaking in July 1996, the PPI for corn decreased nearly 50 percent by December 1997. Other mitigating factors include lower-than-anticipated exports to Japan and increased imports.

Poultry costs were down 1.6 percent last year, following a nearly 8-percent rise in 1996. As with hogs, lower feed costs

resulted in increased flocks of chickens. Also, exports to Russia, China, and the European Union were lower than expected. After increasing 12 percent in 1996, the index for eggs decreased 7.2 percent last year. Following record wholesale egg prices in 1996, both the size of flocks and productivity per hen rose in 1997.

Fresh fruits prices decreased 4.7 percent in 1997, after increasing 12 percent during the previous year. Apple supplies were abundant, as the second-largest Washington crop on record went to market. Last year was also a record harvest year for grapefruit, for which demand has been decreasing since the 1992-93 season. Additionally, California had a record harvest of grapes; a large volume of imported Mexican grapes contributed to lower prices as well. Finally, there were bumper crops of California plums and strawberries, and California and Georgia peaches.

Lower charges for fresh fruits were offset by a 13.2-percent increase in fresh vegetable prices. Prices for tomatoes rose 31 percent, following freezing and cold weather in Florida, and cold weather and excessive rainfall in Mexico. Lettuce prices increased more than 18 percent.

Prices of cereals and bakery products increased just 1.5 percent last year, less than half as much as during 1996. Declining wheat prices were largely responsible for the moderation. After peaking in May 1996, the PPI for wheat decreased more than 40 percent by December of last year.

Items other than food and energy

Shelter, cable television, and housefurnishings. The shelter index rose 3.4 percent last year, higher than a 2.9-percent rise during the prior year. Except for the household maintenance and repairs category, higher increases than in 1996 were registered in all categories within the shelter component, including residential rent, lodging while out of town, lodging while at school, tenants' insurance, owners' equivalent rent, and household insurance.

Charges for cable television increased 6.9 percent. Factors behind the rise included higher rates for both basic service and extended basic service, and installation fees that were returning from sale price levels.

Higher shelter and cable television costs were partially offset by a 1.4-percent decrease in housefurnishings charges. The following decreases were reported within this category: textile housefurnishings, -3.3 percent; furniture and bedding, -0.7 percent; and appliances including electronic equipment, -3.9 percent.

New vehicles and used cars. New-vehicle prices decreased 0.9 percent last year, the first calendar-year decrease since 1971. Demand for new vehicles weakened in 1997 largely as

a result of sharply declining used-car prices, owners holding on to their cars and trucks longer, and increasing demand for new vehicle leasing. This resulted in intensified domestic and foreign competition. Domestic manufacturers responded with cost-cutting techniques (for example, increased use of outsourcing and reductions in the numbers of models offered) and offered incentives to dealers and customers. The cost-saving measures enabled manufacturers of domestic vehicles to remain competitive, despite flat domestic demand (sales were up just 0.1 percent from 1996) and rising imports.

Between January and November of 1997, Japan's carmakers, for example, increased exports to the United States by more than 11 percent. The strengthening of the U. S. dollar, which makes imported goods less expensive, accounts for some of that increase.

Used-car prices decreased 4.9 percent in 1997, the largest decrease in 11 years. Record numbers of leased vehicles (most of them 2 or 3 years old) coming off lease in 1997 resulted in a large increase in supplies of used cars and trucks. From 1993 to 1997, the number of vehicles leased in this country nearly doubled, from 1.6 million to 2.9 million. Cars coming off lease added downward price pressure to used cars, which in turn dampened prices of competing new automobiles. Moreover, the increased incidence of leasing, as an alternative to buying, may have directly held down prices of new and used vehicles.

Medical care. Medical care inflation continued to decelerate in 1997 for the seventh consecutive year. The medical care index increased just 2.8 percent, slightly lower than the 1996 advance. Annual percent increases in these charges have not been this low since 1965. Increases in the indexes for most components of medical care were lower last year, including prescription drugs, physicians' services, and hospital and related services. Prescription drug prices increased 2.5 percent in 1997, down from a 3.2-percent rise in 1996. In 1997, a number of mergers took place that created economies of scale leading to a moderation of upward price pressure. The government took action in some cases to preserve the competitive environment by requiring the sale of some individual stores to competitors. Expiring patents led to an

increase in the number of lower priced generic drugs. Many new drugs were approved by the Food and Drug Administration in 1997, leading to a significant increase in the number of drug choices.

Fees for physicians' services rose 2.7 percent, the smallest increase since 1972. The practice by insurance companies of paying physicians a smaller percentage of their regular fees continued in 1997, as a result of the continued growth in managed care programs. Physicians' fees for noninsured patients also rose less than in recent years.

Charges for hospital and related services continued their 7-year trend of smaller increases. Charges for these services increased 3.2 percent, following a 4.1-percent rise in 1996.

Other goods and services. Prices for tobacco and smoking products rose 7.2 percent last year, the highest increase since 1992. Most of the rise in tobacco charges reflects increases in cigarette prices. Last year, leading tobacco companies raised these charges at the wholesale level, partially in an attempt to finance huge settlement costs stemming from lawsuits. Also, increases in State excise taxes on cigarettes raised such prices even further. Tuition and other school fees, and school books and supplies each increased more than 5 percent. Personal financial services rose 6.0 percent in 1997, reflecting higher costs for tax preparation services and electronic tax filing. Legal service fees increased 5.1 percent, in part because of higher fees associated with uncontested divorces, short will preparation, and legal briefs. Finally, the funeral expenses index rose 5.1 percent. Much of the increase can be attributed to higher costs for funeral services. Additionally, higher charges were reported for cremations, caskets, vaults, cemetery lots, and memorials. □

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

⁶ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁷ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

⁶ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁷ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1997=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

1 Areas on pricing schedule 2 (see Table 10) will appear next month.

2 Index on a November 1977=100 base in Miami.

3 Indexes on a December 1984=100 base

4 Revised index for New York-Northern NJ-Long Island: Mar. 1998= 151.4.

Revised index for Boston-Brockton-Nashua: Mar. 1998= 141.8.

Revised index for Chicago-Gary-Kenosha: Mar. 1998= 134.4.

Revised index for Cleveland-Akron: Mar. 1998= 137.2.

Revised index for Washington-Baltimore: Mar. 1998= 98.1.

Revised index for Dallas-Fort Worth: Mar. 1998= 143.9.

Revised index for Los Angeles-Riverside-Orange County: Mar. 1998= 135.3.

Revised index for U.S. city average: Mar. 1998= 140.1.

5 Revised index for New York-Northern NJ-Long Island: Mar. 1998= 143.8.

Revised index for Boston-Brockton-Nashua: Mar. 1998= 141.1.

Revised index for Chicago-Gary-Kenosha: Mar. 1998= 131.6.

Revised index for Cleveland-Akron: Mar. 1998= 136.7.

Revised index for Washington-Baltimore: Mar. 1998= 98.2.

Revised index for Dallas-Fort Worth: Mar. 1998= 144.3.

Revised index for Los Angeles-Riverside-Orange County: Mar. 1998= 131.5.

Revised index for U.S. city average: Mar. 1998= 137.4.

6 Special index based on a substantially smaller sample.

7 Indexes on a December 1993=100 base.

8 Indexes on a December 1997=100 base.

9 Revised index for Chicago-Gary-Kenosha: Mar. 1998= 140.2.

10 Revised index for Chicago-Gary-Kenosha: Mar. 1998= 125.5.

Revised index for Cleveland-Akron: Mar. 1998= 125.5.

11 Revised index for New York-Northern NJ-Long Island: Mar. 1998= 128.1.

Revised index for Chicago-Gary-Kenosha: Mar. 1998= 117.2.

Revised index for Cleveland-Akron: Mar. 1998= 116.8.

Revised index for Dallas-Fort Worth: Mar. 1998= 137.1.

Revised index for Los Angeles-Riverside-Orange County: Mar. 1998= 123.2.

Revised index for U.S. city average: Mar. 1998= 127.5.

12 Revised index for Chicago-Gary-Kenosha: Mar. 1998= 127.6.

Revised index for Los Angeles-Riverside-Orange County: Mar. 1998= 127.0.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ The 'All items' index size B/C is on a December 1996=100 base.

² The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

³ Indexes on a December 1986=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Table X. New Consumer Price Index Publication Structure of Expenditure Categories

All items	Citrus fruits
All items - old base	<i>Oranges, including tangerines</i>
Food and beverages	Other fresh fruits
Food	Fresh vegetables
Food at home	Potatoes
Cereals and bakery products	Lettuce
Cereals and cereal products	Tomatoes
Flour and prepared flour mixes	Other fresh vegetables
Breakfast cereal	Processed fruits and vegetables
Rice, pasta, cornmeal	Canned fruits and vegetables
<i>Rice</i>	<i>Canned fruits</i>
Bakery products	<i>Canned vegetables</i>
Bread	Frozen fruits and vegetables
<i>White bread</i>	<i>Frozen vegetables</i>
<i>Bread other than white</i>	Other processed fruits and vegetables including dried
Fresh biscuits, rolls, muffins	<i>Dried beans, peas, and lentils</i>
Cakes, cupcakes, and cookies	Nonalcoholic beverages and beverage materials
<i>Fresh cakes and cupcakes</i>	Juices and nonalcoholic drinks
<i>Cookies</i>	Carbonated drinks
Other bakery products	Frozen noncarbonated juices and drinks
<i>Fresh sweetrolls, coffeecakes, and doughnuts</i>	Nonfrozen noncarbonated juices and drinks
<i>Crackers, bread, and cracker products</i>	Beverage materials including coffee and tea
<i>Frozen and refrigerated bakery products, pies, tarts, turnovers</i>	Coffee
Meats, poultry, fish, and eggs	<i>Roasted coffee</i>
Meats, poultry, and fish	<i>Instant and freeze-dried coffee</i>
Meats	Other beverage materials including tea
Beef and veal	Other food at home
Uncooked Ground beef	Sugar and sweets
Uncooked Beef roasts	Sugar and artificial sweeteners
Uncooked Beef steaks	Candy and chewing gum
Other uncooked beef and veal	Other sweets
Pork	Fats and oils
Bacon, breakfast sausage, and related products	Butter and margarine
<i>Bacon and related products</i>	<i>Butter</i>
<i>Breakfast sausage and related products</i>	<i>Margarine</i>
Ham	Salad dressings
<i>Ham, excluding canned</i>	Other fats and oils including peanut butter
Pork chops	<i>Peanut butter</i>
Other pork including roasts and picnics	Other foods
Other meats	Soups
<i>Frankfurters</i>	Frozen and freeze-dried prepared foods
<i>Lunchmeats</i>	Snacks
<i>Lamb and organ meats</i>	Spices, seasonings, condiments, sauces
<i>Lamb and mutton</i>	<i>Salt and other seasonings and spices</i>
Poultry	<i>Olives, pickles, relishes</i>
Chicken	<i>Sauces and gravies</i>
<i>Fresh whole chicken</i>	<i>Other condiments</i>
<i>Fresh and frozen chicken parts</i>	Baby food
Other poultry including turkey	Other miscellaneous foods
Fish and seafood	<i>Prepared salads</i>
Fresh fish and seafood	Food away from home
Processed fish and seafood	Full service meals and snacks

<i>Video game hardware, software and accessories</i>	
Sewing machines, fabric, and supplies	
Music instruments and accessories	
Recreation services	SPECIAL AGGREGATE INDEXES
Club membership dues and fees for participant sports	Commodities
Admissions	Commodities less food and beverages
<i>Admission to movies, theaters, concerts</i>	Nondurables less food and beverages
<i>Admission to sporting events</i>	Nondurables less food, beverages, and apparel
Fees for lessons or instructions	Durables
Recreational reading materials	Services
Newspapers and magazines	Rent of Shelter
Recreational books	Transportation services
Education and communication	Other services
Education	All items less food
Educational books and supplies	All items less shelter
Tuition, other school fees, and child care	All items less medical care
College tuition and fees	Commodities less food
Elementary and high school tuition and fees	Nondurables less food
Child care and nursery school	Nondurables less food and apparel
Technical and business school tuition and fees	Nondurables
Communication	Apparel less footwear
Postage and delivery services	Services less rent of shelter
Postage	Services less medical care services
Delivery services	Energy
Information and information processing	All items less energy
Telephone services	All items less food and energy
Telephone services, local charges	Commodities less food and energy commodities
Telephone services, long distance charges	Energy commodities
<i>Interstate toll calls</i>	Services less energy services
<i>Intrastate toll calls</i>	Domestically produced farm food
Cellular telephone services	Utilities and public transportation
Information and information processing other than telephone services	Purchasing power of the consumer dollar
	Purchasing power of the consumer dollar - old base

Italics denote substratum indexes.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 87 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by the Bureau's trained representatives.

In calculating this index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details, see *BLS Handbook of Methods*, Chapter 17, the Consumer Price Index, Bulletin 2490, April 1997.

Calculating Index Changes

Movements of indexes from one month to another are usually expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be, if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by one hundred	0.040x100
Equals percent change	4.0

Energy Prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears, if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments

and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of bills priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500-kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. These average prices are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption and to provide continuity with prices of natural gas and electricity, formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British thermal unit (Btu) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 Btu's (U.S. Department of Energy)

1 kWh = 3,412 Btu's (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 Btu's (U.S. Department of Energy).

Food and Beverage Prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted

that average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS regional offices or from the Washington office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted changes, each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred, since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1993 through 1997 were replaced at the end of 1997. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is reevaluated, based on certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called intervention analysis seasonal adjustment for some CPI series. Intervention analysis

seasonal adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements, which might distort the seasonal pattern, are estimated and removed from the data, prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for intervention analysis seasonal adjustment.

For the fuel oil and the motor fuels indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure was used to offset the effects of changes in pricing methodology. For the tobacco and smoking products index, this procedure was used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention analysis seasonal adjustment was used to offset the effects of excise tax increases. For the nonalcoholic beverages index, the procedure was used to offset the effects of a large increase in coffee prices, due to adverse weather. For the water and sewerage maintenance index, the procedure was used to account for a data collection anomaly.

A description of intervention analysis seasonal adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or by calling Claire McAnaw Gallagher at (202) 606-6968 or e-mailing her (gallagher_c@bls.gov).

Since the release of seasonal adjustment factors for 1997, in February 1998, seasonal adjustment is performed using X-12-ARIMA. X-12-ARIMA is a new seasonal adjustment software package developed by the U.S. Department of Commerce, Bureau of the Census. The X-12-ARIMA seasonal adjustment program is an enhanced version of the X-11 Variant of the Census Method II seasonal adjustment program. The enhancements include a variety of new diagnostics and modeling tools to help the user detect and remedy any inadequacies in the seasonal adjustments obtained under the program options selected.

Metropolitan Areas

BLS publishes three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd

Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	
PA-NJ-DE-MD	-even
Philadelphia-Wilmington-Atlantic City,	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released two to three weeks into the following month.)

Data are published for an additional group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists are also available in the national and regional offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI is accessible. Data and press releases from other BLS surveys are also available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help using any of these systems.

World Wide Web. BLS maintains a Web site (<http://stats.bls.gov>). This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/cpihome.htm> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to regional office homepages from the main BLS Web site listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as "anonymous," and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All Items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 2850, Washington, DC 20212-0001, or call (202) 606-7828 or any of the BLS regional offices listed below.

CPI Detailed Report. Most comprehensive report of the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA, 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$25 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$29 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA, 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 606-STAT. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI are also available by calling any one of the metropolitan area CPI hot lines listed below. These hotline summaries typically include data for the U.S.

city average, as well as the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 347-3702
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1883
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6971
Denver	(303) 844-1735
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2372
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2406/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
Salt Lake City	(801) 485-6582
San Diego	(619) 557-6538
San Francisco	(415) 975-4406
Seattle	(206) 553-0645
St. Louis	(314) 539-3527
Washington, DC	(202) 606-6994/7828

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 606-7000 or any of the regional offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including CPI, are available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release, selected national, regional and metropolitan area historical summaries, and some technical information. The latest CPI information is posted during the morning of re-

lease day. Call (202) 606-6325. Then, follow the instructions to have the latest *Ready Facts* catalog sent to you. Each regional office also has a fax system in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the eight regional offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 562-2545	(404) 562-2463

Chicago	(312) 987-9288	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 596-4160	(215) 596-1154
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 606-6325	(202) 606-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 606-7000 in the national office, or by contacting any of the regional offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications are available upon request by calling (202) 606-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 606-7000.

Further information may be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC, 20212-0001, telephone (202) 606-7000 or by calling any of the regional offices listed above.
