

Accidents of Motor Carriers of Property 1984

U.S. Department
of Transportation

**Federal Highway
Administration**

Bureau of Motor
Carrier Safety

May 1986

Introduction

This publication represents the 1984 compilation of accident reports submitted to the Federal Highway Administration's Bureau of Motor Carrier Safety (BMCS) by motor carriers of property in interstate or foreign commerce. These accident reports are a vital source of information upon which the BMCS relies in administering its regulatory and enforcement responsibilities.

The analysis of accident information assists BMCS in its ongoing quest to accomplish its mission by enabling BMCS to identify important trends occurring with the industry, identify accident causation factors, establish and measure safety performance standards, and support the initiation of new regulations and/or modify existing regulations.

The Federal Motor Carrier Safety Regulations (FMCSR) require accident reports to be filed whenever an accident occurs that involves a motor vehicle engaged in the interstate, foreign or intrastate operations of a motor carrier subject to the Department of Transportation Act and meet the established reporting criteria.

The accident statistics reported in this publication were generated by motor carriers of property filing accident reports with the BMCS. These statistics do not represent all accidents that have occurred within the regulated motor carrier industry. The statistics were compiled from those accidents that meet the reporting criteria as "reportable accidents." The term "reportable accident" means an occurrence involving a motor vehicle operated by a motor carrier subject to the FMCSR resulting in (1) the death of a human being; (2) bodily injury to a person who, as a result, receives medical treatment away from the scene of the accident; and/or total damage to all property aggregating \$2,000 or more based on actual cost of reliable estimates.

Prior to 1980, there was an annual increase in reported accidents, fatalities and injuries. During 1980 these statistics decreased and have remained relatively stable. However, during 1983 the number of injuries increased, and in 1984 all the statistics showed a substantial increase. A comparison of the 5-year accident experience illustrates our findings.

YEAR	1980	1981	1982	1983	1984
Accidents	31,389	32,306	31,759	31,628	36,854
Fatalities	2,528	2,810	2,479	2,528	2,721
Injuries	27,149	28,533	25,779	26,692	29,149

The information contained in this report must be considered in the terms of the regulatory definitions and instructions for data collection. Comparisons between data contained herein and other data must be made with caution since incompatible associations may be made. The information contained herein is based on accidents involving motor carriers subject to the FMCSR and is distinct and different from any other accident data collected elsewhere. Caution is therefore urged when comparing this motor carrier accident data with other accident data.

The motor carrier industry is urged to use the information contained herein as a tool in assessing its operations and making highways safer. Industry, as well as the general public, are the beneficiaries when Government and the motor carrier transportation industry work together, through accident reporting, to improve highway safety.

Kenneth L. Pierson, Director
Bureau of Motor Carrier Safety
Federal Highway Administration

SUMMARY

This section presents aggregated data concerning accidents, fatalities, injuries and property damage as well as a geographic summary of the same categories.

As an aid for reviewing this statistical report, a number of definitions are furnished which define certain words as they are used in this document.

PRIVATE (carrier)-A Motor carrier whose highway transportation activities are incidental to and in furtherance of its primary business activity.

AUTHORIZED (carrier)-A motor carrier engaged in interstate or foreign commerce and generally subject to economic regulation by the Interstate Commerce Commission. Authorized carriers are also known as "for-hire-carriers," "regulated carriers," or "certificated carriers."

EXEMPT (carrier)-A motor carrier (not a private carrier) transporting commodities or conducting operations not subject to economic regulations of the Interstate Commerce Commission. Exempt carriers include, for example, firms engaged in the transportation of raw agricultural commodities.

MAIL AND OTHER (carrier)-Motor carriers under contract to the U.S. Postal Service or a small number of motor carriers that have not otherwise been classified.

OVER-THE-ROAD TRIP-An intercity movement by motor vehicle.

LOCAL TRIP-Generally an intracity operation or a very short mileage trip involving pickup and delivery service.

NOT REPORTED-Those accidents or accident facts that were omitted from the reports filed by the motor carriers with the Bureau of Motor Carrier Safety.

NOT APPLICABLE-Those accidents or accident facts appearing on a particular statistical table that have no relationship to the parameters of that table.

COLLISION ACCIDENT-Those accidents in which a motor vehicle collides with another motor vehicle, or fixed objects.

NON-COLLISION ACCIDENT-Those accidents wherein no other motor vehicle is involved, or structures, such as, ran-off-roadway, jackknife, overturn, separation of units, fire, loss or spillage of cargo, cargo shift or other non-collision accidents that were not aforementioned. Example-structural failure of trailer, etc.

When more than one of the vehicles involved in an accident is operated by motor carriers subject to the Federal motor vehicle accident reporting requirements, reports of two or more "involvements" may be submitted. Shown under the heading "involvements" are three tables which include data on all drivers of vehicles for which accident reports were filed with the BMCS. During the calendar year 1984 there were 37,313 involvements in 36,854 accidents.

The Accident

THIS SECTION CONTAINS INFORMATION IN THE FOLLOWING AREAS RELATING TO COLLISION AND NON-COLLISION ACCIDENTS:

- TYPE CARRIER
- VEHICLE MOVEMENT
- PHYSICAL CONDITION OF DRIVER
- MECHANICAL DEFECTS
- SEAT BELT INFORMATION

COLLISION ACCIDENTS

Collisions with automobiles, commercial trucks and fixed objects accounted for the majority of collision accidents (93.9%). These types of collision accidents also accounted for 79.6% of all fatalities, 88.6% of the injuries and 89.5% of the property damage. The relative percentages for these collision type accidents are displayed below.

PERCENT OF TOTAL

Collision Involving	Accidents	Fatalities	Injuries	Property Damage	Fatalities Per 100 Accidents
Automobile	65.4	65.0	68.7	44.7	9.5
Commercial Truck	17.6	9.9	14.4	27.8	4.8
Fixed Object	10.9	4.7	5.5	17.0	2.9

NON-COLLISION ACCIDENTS

Ran-off-road, jackknife and overturn accidents accounted for 91.2% of the non-collision accidents. These three categories comprise 95.9% of the fatalities, 96.0% of the injuries and 92.5% of the property damage in non-collision accidents. A more detailed display is shown below.

PERCENT OF TOTAL

Type	Accidents	Fatalities	Injuries	Property Damage
Ran-off-road	29.7	54.6	35.0	35.7
Jackknife	27.8	7.6	20.1	14.7
Overturn	33.7	33.7	40.9	42.1
