

LEARNING IN PROGRESS

December 2017

COURSE SPOTLIGHT

NHI has updated another one of its asset management courses: *Developing a Transportation Asset Management Plan*. This 1.5 day Instructor-led Training (ILT) teaches participants to use the transportation asset management plan as an effective planning, communication and accountability tool. It includes the latest FHWA guidance on risk management, life-cycle planning, and financial planning. Visit the full course description page to learn more about this course, sign up for session alerts, or to bring this training to your organization.

JUST LAUNCHED

NHI relies on local agencies to hold Instructor-led and Web-conference Training throughout the year. The following training just launched this month. Bring this training directly to your organization by hosting a session.

- [Introduction to Financial Planning for Transportation Asset Management](#)(TAM): An engaging Web-based Training meant to explore common terms, background information, and the context of financial plans for TAM.
- [Introduction to Transportation Asset Management with Workshop](#): This 1.5 day Instructor-led Training was just updated to reflect the Asset Management Rule (23 CFR part 515). It features a series of workshops to help you apply asset management principles to real-life situations.
- [SRH-2D Model Data Files, Diagnostics & Verifying 2D Model Results](#): This Web-conference Training is designed for hydraulics personnel who have responsibility for, or desire to work with, the hydraulic analysis and design of highway river crossings.
- [Model Terrain Development with Various Data Sources](#): This Web-conference Training teaches learners how to process and effectively use LiDAR and other elevation format types in defining geometry for 2D hydraulic models.

Host a Training

You can also sign up for alerts when new sessions are scheduled by visiting the course description page.
