 Cuide to Transportation

## Bureau of Transportation Statistics

Our mission is to lead in developing transportation data and information of high quality and to advance their effective use in both public and private transportation decisionmaking.

Our vision for the future: Data and information of high quality will support every significant transportation policy decision, thus advancing the quality of life and the economic well-being of all Americans.

The Bureau of Transportation Statistics compiled the data in this guide from multiple sources. The guide is divided into five sections and a glossary:
Transportation System Extent and Use
Transportation and Safety ..... 4
Mobility ..... 10
Transportation and the Economy ..... 20
Transportation, Energy, and the Environment ..... 25
Glossary ..... 29

The U.S. transportation system is an extensive, interrelated network of public and private roads, airports, railroads, transit routes, waterways, terminals, ports, and pipelines. Millions of people and businesses rely on this ever-expanding system to get to work, take vacation trips, conduct business, and ship goods here and abroad. It links regions and connects small and large cities and urban and rural areas.

## Table I

## The Transportation Network: 1999

| Mode | Components |
| :---: | :---: |
| Highway | Public roads |
|  | 46,564 miles of Interstate highway |
|  | I 13,995 miles of other National Highway System roads |
|  | 3,771,456 miles of other roads |
| Air | Public-use airports |
|  | 5,354 airports |
|  | Airports serving large certificated carriers |
|  | 29 large hubs ( 69 airports), 459 million enplaned passengers (see Glossary for definition of "hub") |
|  | 31 medium hubs ( 48 airports), 96 million enplaned passengers |
|  | 56 small hubs ( 73 airports), 39 million enplaned passengers |
|  | 577 nonhubs (604 airports), I7 million enplaned passengers |
| Rail | Miles of railroad operated |
|  | 120,412 miles by Class I freight railroads ${ }^{\text {a }}$ |
|  | 21,250 miles by regional freight railroads |
|  | 28,422 miles by local freight railroads |
|  | 22,74I miles by Amtrak (passenger) |

| Mode | Components |
| :---: | :---: |
| Urban transit(1998) | Directional route-miles serviced ${ }^{\text {b }}$ |
|  | Bus: 157,823 |
|  | Trolley bus: 424 |
|  | Commuter rail: 5, 772 |
|  | Heavy rail: I,527 |
|  | Light rail: 676 |
|  | Stations |
|  | Commuter rail: 972 |
|  | Heavy rail: 997 |
|  | Light rail: 555 |
| Water | 26,000 miles of navigable waterways |
|  | Ferry routes: 487 |
|  | Commercial waterway facilities |
|  | Great Lakes: 619 deep-draft |
|  | 144 shallow-draft |
|  | Inland: 2,376 shallow-draft |
|  | Ocean: $\quad 4,057$ deep-draft |
|  | 2,131 shallow-draft |
|  | Locks: 276 |

Pipeline Oil
(1998) Crude lines: 88,000 miles of pipe

Product lines: 91,000 miles of pipe
Gas
Transmission: 254,000 miles of pipe
Distribution: 981,000 miles of pipe

[^0]> T he highest priority of the U.S. Department of Transportation is to promote safety. Although progress has been made in reducing fatalities, transportation remains the leading cause of accidental deaths and injuries in the United States. In 1999, about 95 percent of transportation fatalities and an even higher percentage of injuries occurred on the nation's roadways.

Table 2
Fatalities by Transportation Mode

| Mode | $\mathbf{1 9 7 0}$ | $\mathbf{1 9 8 0}$ | $\mathbf{1 9 9 0}$ | $\mathbf{1 9 9 5}$ | $\mathbf{1 9 9 9}$ |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Large air carrier | 146 | I | 39 | 168 | 12 |  |
| Commuter air | N | 37 | 7 | 9 | 12 |  |
| On-demand air taxi | N | 105 | 51 | 52 | 38 |  |
| General aviation | 1,310 | 1,239 | 767 | 734 | 628 |  |

| Recreational boating | 1,418 | 1,360 | 865 | 829 | 734 |  |
| Gas and hazardous <br> liquid pipeline | 30 | 19 | 9 | 21 | 21 |  |

[^1]Table 3
Distribution of Transportation Fatalities: 1999

| Category | Number | Percent |
| :---: | :---: | :---: |
| Passenger car occupants | 20,818 | 47.5 |
| Light-truck occupants | 11,243 | 25.6 |
| Pedestrians struck by motor vehicles | 4,906 | 11.2 |
| Motorcyclists | 2,472 | 5.6 |
| Large-truck occupants | 758 | 1.7 |
| Pedalcyclists struck by motor vehicles | 750 | 1.7 |
| Recreational boating | 734 | 1.7 |
| General aviation | 628 | 1.4 |
| Railroad ${ }^{\text {a }}$ (excluding grade crossings) | 530 | 1.2 |
| Other and unknown motor vehicle occupants | 457 | 1.0 |
| Other nonoccupants struck by motor vehicles ${ }^{\text {b }}$ | 149 | 0.3 |
| Heary-rail transit | 84 | 0.2 |
| Waterborne transportation (nonvessel-related) | 67 | 0.2 |
| Bus occupants (school, intercity, and transit) | 58 | 0.1 |
| Grade crossings (not involving motor vehicles) | 57 | 0.1 |
| Waterborne transportation (vessel-related) | 44 | 0.1 |
| Air taxi | 38 | 0.09 |
| Light-rail transit | 17 | 0.04 |
| Gas distribution pipelines | 15 | 0.03 |
| Air carriers | 12 | 0.03 |
| Commuter air | 12 | 0.03 |
| Transit buses (not related to accidents) ${ }^{\text {c }}$ | 11 | 0.03 |
| Hazardous liquid pipelines | 4 | <0.01 |
| Gas transmission pipelines | 2 | <0.01 |
| Demand-responsive transit (not related to accidents) | 0 | 0.0 |
| Total ${ }^{\text {d }}$ | 43,866 | 100.0 |
| Redundant with above ${ }^{e}$ |  |  |
| Grade crossings with motor vehicles | 345 |  |
| Commuter rail (included in railroad) | 95 |  |
| Transit bus (accident-related) | 91 |  |
| Passengers on railroad trains | 14 |  |
| Demand-responsive transit (accident-related) | 1 |  |

${ }_{b}{ }^{2}$ Includes fatalities outside trains, except at grade crossings.
${ }^{\mathrm{b}}$ Includes all nonoccupant fatalities, except pedalcyclists and pedestrians.
${ }_{\text {d }}$ Not included under highway submodes. Includes suicides.
${ }^{d}$ Unless otherwise specified, includes fatalities outside the vehicle.
${ }^{\text {e }}$ For transit bus and demand-responsive transit, occupant fatalities are counted under "bus" and nonoccupant fatalities are counted under "pedestrians," "pedalcyclists," or other motor vehicle categories.

[^2]Table 4
Occupant and Nonmotorist Fatalities in Crashes by Number of Vehicles and Alcohol Involvement: I999

|  | Fatalities | Alcohol <br> involvement | Percent |
| :--- | ---: | ---: | ---: |
| Occupants | 35,806 | $\mathbf{I 3 , I 4 5}$ | 36.7 |
| Single-vehicle crashes | 17,052 | 8,163 | 47.9 |
| Two-vehicle crashes | 15,690 | 4,204 | 26.8 |
| More than two-vehicle crashes | 3,064 | 778 | 25.4 |
| Pedestrians | 4,906 | 2,325 | 47.3 |
| Single-vehicle crashes | 4,488 | 2,090 | 46.6 |
| Multiple-vehicle crashes | 418 | 235 | 56.2 |
| Pedalcyclists | 750 | 286 | $\mathbf{3 8 . 1}$ |
| Single-vehicle crashes | 714 | 267 | 37.4 |
| Multiple-vehicle crashes | 36 | 19 | 55.6 |
| Other/unknown | $\mathbf{1 4 9}$ | 31 | $\mathbf{2 0 . 8}$ |
| Total | $\mathbf{4 I}, 61 \mathrm{I}$ | $\mathbf{1 5 , 7 8 6}$ | $\mathbf{3 7 . 9}$ |

a The total shows one fewer case of alcohol involvement than the sum of the subtotals. This is due to adjustment for rounding in the method used to estimate alcohol involvement.

| Gas and hazardous liquid pipeline | 254 | 192 | 76 | 64 | 107 |

a Includes passenger car occupants, motorcyclists, light-duty and large trucks, bus occupants, pedestrians, pedalcyclists, occupants of unknown vehicle types, and other nonmotorists.
${ }^{\mathrm{b}}$ Injuries resulting from train accidents, train and nontrain incidents, and occupational illness. Includes Amtrak.
${ }^{c}$ Injuries resulting from all reportable incidents, not just from accidents.
Includes commuter rail, heavy rail, light rail, motor bus, demand responsive, van pool, and automated guideway.
${ }^{d}$ Injuries unrelated to vessel accidents, e.g., an individual getting a cut while onboard a vessel.
Key: $N=$ data do not exist; $U=$ unavailable.
Note: Each mode may use different reporting criteria for injuries.

[^3]
## (3) Mobility

> he U.S. transportation network provides a high degree of personal mobility and freight activity. In 1999, the transportation network supported 4.8 trillion passenger-miles and about 3.9 trillion ton-miles. The data in this section confirm that local and long-distance travel and freight shipments continue to grow. Several factors influence this growth: greater vehicle availability, reduced travel costs, population increases, an expanding economy, and higher consumer incomes.

Table 6
Per Capita Passenger Travel and Freight Transportation

|  | Number |
| :---: | :---: |
| Passenger travel (1995) |  |
| Local trips per person, ${ }^{\text {a annual }}$ | 1,568 |
| Local trips per person, ${ }^{\text {a daly }}$ | 4.3 |
| Long-distance trips ${ }^{\text {b }}$ per person, annual | 3.9 |
| Local miles per person, ${ }^{\text {a }}$ annual | 14,115 |
| Local miles per person, ${ }^{\text {a }}$ daily | 39 |
| Long-distance miles per person, annual domestic only | 3,129 |
| Freight transportation (1997) |  |
| Tons per person, annual | 55 |
| Ton-miles per person, annual | 14,383 |

${ }^{2}$ Persons aged 5 and over. A trip is defined as travel from one address to another address.
${ }^{\mathrm{b}}$ Each time a person goes to a destination at least 100 miles away from home and returns.
Notes: Data used for local travel are from the Nationwide Personal Transportation Survey travel-day file and include trips of all lengths made by respondents on a single day; about $95 \%$ of these daily trips were 30 miles or less. Per capita calculations are based on population estimates within each survey, not from the Census Bureau estimate reported in the table.
Sources: U.S. Department of Transportation (USDOT), Federal Highway Administration, Nationwide Personal Transportation Survey, Our Nation's Travel (Washington, DC: 1997.); USDOT, Bureau of Transportation Statistics (BTS) and U.S. Department of Commerce, Census Bureau, 1997 Commodity Flow Survey: United States (Washington, DC: I999); USDOT, BTS, American Travel Survey data, October 1997, person trip and demographic files; plus additional estimates prepared for the BTS by Oak Ridge National Laboratory.

${ }^{\text {a }}$ Data from the Commodity Flow Survey (CFS), plus Bureau of Transportation Statistics estimates to fill in CFS gaps. The estimates cover out-of-scope farm-based truck shipments, truck and rail imports from Canada and Mexico, and air cargo and water imports and exports.

[^12]
## 4 Transportation and the Economy

ransportation is a major sector of the U.S. economy. It moves people and goods, employs millions of workers, generates revenue, and consumes resources and services produced by other sectors of the economy. In 1999, transportation-related goods and services contributed $\$ 980$ billion to a $\$ 9.26$ trillion U.S. Gross Domestic Product.

Figure 4

## U.S. Gross Domestic Product by Major Societal Function: 1999

${ }^{a}$ Includes all other categories, such as entertainment, products and services, personal care, premiums for personal insurance, and payments to pension plans.

Source: U.S. Department of Transportation, Bureau of Transportation Statistics, derived from U.S. Department of Commerce, Bureau of Economic Analysis, Survey of Current Business (Washington, DC: July 2000).

## Top Foreign Trade Freight Gateways by Value of Shipments: 1999

(Billions of I 999 U.S. dollars)

| Rank | Gateway | Exports | Imports | Total |
| :---: | :---: | :---: | :---: | :---: |
| 1 | JFK International, NY (a) | 44.4 | 60.6 | 105.0 |
| 2 | Port of Detroit, MI (l) | 48.5 | 44.1 | 92.6 |
| 3 | Port of Long Beach, CA (w) | 14.3 | 75.2 | 89.5 |
| 4 | Port of Los Angeles, CA (w) | 14.1 | 69.1 | 83.2 |
| 5 | Port of New York, NY and NJ ( w ) | 17.9 | 54.2 | 72.1 |
| 6 | San Francisco Airport, CA (a) | 32.1 | 39.8 | 71.9 |
| 7 | Port of Buffalo-Niagra Falls, NY (I) | 35.2 | 35.6 | 70.8 |
| 8 | Los Angeles International Airport, CA (a) | 35.9 | 31.3 | 67.2 |
| 9 | Port of Laredo, TX (I) | 29.8 | 34.9 | 64.7 |
| 10 | Port of Huron, MI (I) | 17.3 | 32.4 | 49.7 |
| 11 | Chicago, IL (a) | 18.1 | 21.5 | 39.6 |
| 12 | Port of Houston, TX ( w ) | 16.6 | 17.3 | 33.9 |
| 13 | Port of EI Paso, TX (I) | 13.8 | 19.0 | 32.8 |
| 14 | Port of Seattle, WA (w) | 5.5 | 26.2 | 31.7 |
| 15 | Port of Charleston, SC (w) | 11.2 | 18.3 | 29.5 |
| 16 | Port of Oakland, CA (w) | 10.1 | 14.9 | 25.0 |
| 17 | Port of Norfolk, VA (w) | 11.4 | 13.3 | 24.7 |
| 18 | New Orleans, LA (a) | 10.4 | 12.8 | 23.2 |
| 19 | Miami International Airport, FL (a) | 15.1 | 8.0 | 23.1 |
| 20 | Anchorage, AK (a) | 6.3 | 15.4 | 21.7 |

Key: a = air; I = land; w = water.
Notes: Trade excludes low-value shipments (imports valued at less than $\$ 1,250$ and exports valued at less than $\$ 2,500$ ). Air: Includes a low level (generally less than $2 \%-3 \%$ of the total value) of small user-fee airports located in the same region. Air gateways not identified by airport name (e.g., Chicago, IL) include major airport(s) in that geographic area in addition to small regional airports. Due to Census Bureau confidentiality regulations, courier operations are included in the airport totals for JFK, New Orleans, Los Angeles, Chicago, Miami, and Anchorage.
Numbers may not add to totals due to rounding.
Sources: Air-U.S. Department of Commerce, Census Bureau, Foreign Trade Division, special tabulation, November 2000. Water-U.S. Department of Transportation (USDOT), Maritime Administration, Office of Statistical and Economic Analysis, U.S. Waterborne Exports and General Imports: Annual 1998 (Washington, DC: July 2000); and personal communication, Dec. 20, 2000. Land- USDOT, Bureau of Transportation Statistics, Transborder Surface Freight Data, 2000.

Table 16
Value of U.S. International Merchandise Trade by Mode of Transportation: 1999
(Millions of current U.S. dollars)

|  | Exports | Modal \% | Imports | Modal \% | Total trade | Total modal \% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Total | 692,82I | 100.0 | 1,024,766 | 100.0 | 1,717,587 | 100.0 |
| Water | 182,21I | 26.3 | 449,344 | 43.8 | 631,555 | 36.8 |
| Air | 236,649 | 34.2 | 258,883 | 25.3 | 495,533 | 28.9 |
| Truck | 190,064 | 27.4 | 195,349 | 19.1 | 385,413 | 22.4 |
| Rail | 17,466 | 2.5 | 60,948 | 5.9 | 78,414 | 4.6 |
| Pipeline | 258 | 0.04 | 12,058 | 1.2 | 12,316 | 0.7 |
| Other, unknown \& miscellaneous | 66,173 | 9.6 | 48,184 | 4.7 | 114,356 | 6.7 |

Notes:
Water: Excludes intransit data (merchandise shipped from one foreign country to another via a U.S. water port).
Imports: Excludes imports valued at less than $\$ 1,250$. Import value is based on U.S. general imports, customs value basis.

Exports: Excludes exports valued at less than $\$ 2,500$. Export value is FAS (free alongside ship) and represents the value of exports at the port of export, including the transaction price and inland freight, insurance, and other charges.

Key: $\mathrm{R}=$ revised; $\mathrm{U}=$ unavailable.

[^14]
## 5 Iransportation, Energy, and the Environment

Serious energy and environmental issues are associated with transportation. The U.S. transportation sector remains almost entirely dependent on petroleum as an energy source and more than 50 percent of the petroleum used in the United States must now be imported. Petroleum use is responsible for most of the environmental problems resulting from transportation, including carbon dioxide emissions that may contribute to global climate change.

Figure 6
U.S. Petroleum Production and Consumption: 1970-99

Million barrels per day

[^15]Figure 7
Transportation's Share of U.S. Petroleum Use: 1950-99

Note: 1998 and 1999 data are estimates.
Source: U.S. Department of Energy, Energy Information Administration, Annual
Energy Review 2000 (Washington, DC: July 2000), tables 5.12 a \& b.

Figure 8

## U.S. Carbon Dioxide Emissions from Energy Use: 1980-99

Million metric tons of carbon

$1980 \quad 1985 \quad 1990 \quad 1995$

Note: One ton of carbon equals 3.667 tons of carbon dioxide gas. Electric utility emissions are spread across end-user sections.

[^16]Figure 9

## Index of Key Air Pollutant Emissions from U.S.Transportation: 1970-98

Index: $1970=1.0,1990=1.0$ for PM-2.5

| 1970 | 1975 | 1980 | 1985 | 1990 | 1995 | 1998 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Key: $\mathrm{NO}_{\mathrm{x}}=$ oxides of nitrogen; PM-I0 and PM-2.5 = airborne particulates of less than 10 microns or 2.5 microns, respectively; CO = carbon monoxide; VOC = volatile organic compounds.
Note: Transportation emissions include all onroad mobile sources and the following nonroad mobile sources: recreational vehicles and boats, airport service equipment, aircraft, commercial marine vessels, and railroads. Other nonroad sources, such as lawnmowers and farming equipment, are not included. Lead estimates include onroad mobile sources only.

[^17]
## Glossary

Air carrier-Certificated provider of scheduled and nonscheduled services.
Class I railroad-A freight railroad with an annual gross operating revenue in excess of $\$ 250$ million (based on 1991 dollars).
Commuter rail-Urban/suburban passenger train service for short-distance travel between a central city and adjacent suburbs run on tracks of a traditional railroad system. Does not include heavy- or light-rail service.
Directional route-miles-The sum of the mileage in each direction over which transit vehicles travel while in revenue service.
Fatality-For purposes of compiling DOT safety statistics, any injury that results in death within 30 days of a transportation crash, accident, or incident.
General aviation-All civil aviation operations other than those air carriers holding a Certificate of Public Convenience and Necessity. Types of aircraft used in general aviation range from corporate, multi-engine jets piloted by a professional crew to amateur-built, single-engine, piston-driven, acrobatic planes.
Heavy-rail transit-High-speed passenger rail operated on rights-of-way that exclude all other vehicles and pedestrians.
Hub-A geographic area based on the percentage of total enplaned passengers in that area. A hub may have more than one airport in it. This definition should not be confused with the definition used by airlines in describing their "hub and spoke" route structures.
Light-rail transit-Urban transit rail operated on a reserved right-of-way that may be crossed by roads used by motor vehicles and pedestrians.
Nonself-propelled vessels-Includes dry cargo and tank barges and railroad car floats that operate in U.S. ports and waterways.
Other 2-axle, 4-tire vehicles-Includes vans, pickup trucks, and sport utility vehicles. Does not include passenger cars.
Passenger-mile-One passenger transported one mile. One vehicle traveling 3 miles carrying 5 passengers generates 15 passenger-miles.
Personal-use vehicles-Cars, pickup trucks, or vans; other small trucks; rental cars, trucks, or vans; recreational vehicles or motor homes; or motorcycles or mopeds.

Self-propelled vessels-Includes dry cargo vessels, tankers, and offshore supply vessels, tugboats, pushboats, and passenger vessels, such as excursion/sightseeing boats, combination passenger and dry cargo vessels, and ferries.
Ton-miles-A unit of measure equal to the movement of one ton over one mile.
Truck:
Single unit-A large truck on a single frame with at least 2 axles and 6 tires. Excludes "other 2 -axle, 4-tire vehicles" noted above.
Combination-A power unit (truck or truck tractor) and one or more trailing units.
Vehicle-mile-One vehicle traveling one mile.

Statistics published in this Pocket Guide to Transportation come from many different sources. Some statistics are based on samples and are subject to sampling variability. Statistics may also be subject to omissions and errors in reporting, recording, and processing.

## (2) U.S. Department of Transportation

[^0]:    ${ }^{\text {a }}$ There are also 574 miles of railroad operated by U.S. Class I freight railroads in Canada.
    ${ }^{\text {b }}$ Directly operated service. Does not include contracted service.
    Sources: U.S. Department of Transportation (USDOT), Bureau of Transportation Statistics (BTS), Transportation Statistics Annual Report 2000 (Washington, DC: In press), table I-I; USDOT, BTS, National Transportation Statistics 2000 (Washington, DC: In press); Association of American Railroads, Railroad Facts, 2000 (Washington, DC: 2000); USDOT, Federal Highway Administration, Highway Statistics 1998 (Washington, DC: 1999); National Ferry database, as of 10/I0/00; and U.S. Army Corps of Engineers, Navigation Data Center, The U.S. Waterway System, Transportation Facts, available at wnw.wrsc.usace.army.mil/ndc/fcgeodis.htm, as of November 2000.

[^1]:    ${ }^{\text {a }}$ Includes occupants, nonoccupants, and motor vehicle fatalities at railroad crossings.
    ${ }^{\text {b }}$ Includes fatalities from nontrain incidents, as well as train incidents and accidents. Also includes train occupants and nonoccupants, except motor vehicle occupants at grade crossings.
    ${ }^{\text {c }}$ Fatalities resulting from all reportable incidents, not just accidents. Includes commuter rail, heavy rail, light rail, motor bus, demand responsive, van pool, and automated guideway.
    ${ }^{d}$ Fatalities unrelated to vessel accidents, e.g., individual falling overboard and drowning.
    Key: $\mathrm{N}=$ data do not exist or are not cited because of reporting changes.
