## Bureau of Transportation Statistics

Our mission is to lead in developing transportation data and information of high quality and to advance their effective use in both public and private transportation decisionmaking.

Our vision for the future: Data and information of high quality will support every significant transportation policy decision, thus advancing the quality of life and the economic well-being of all Americans.

BTS02-02
February 2002

America's transportation system has changed along with the nation's society and economy. The following table puts those changes in perspective:

| Characteristic | 1970 | 2000 |
| :---: | :---: | :---: |
| Resident population (thous.) | 203,984 | 281,422 |
| Total area (thous. sq. mi.) ${ }^{\text {a }}$ | 3,619 | 3,718 (1990) |
| Total civilian labor force (thous.) | 82,771 | 140,863 |
| Real gross domestic product ${ }^{\text {b }}$ | \$3.4 trillion | \$9.2 trillion |
| Median household income ${ }^{\text {b }}$ | \$29,600 | \$39,200 |
| Average household expenditures ${ }^{\text {b }}$ | N | \$35,384 |
| Number of households (thous.) | 63,401 | 104,705 |
| Average life expectancy (years) | 71 | 76.7 (1998) |
| Labor force participation by women | 46\% | 60\% |
| a 1990 data include the Great Lakes and inland and coastal water. Estimate for 2000 not yet available. 1970 data include inland water only. The Census Bureau tabulates area data for the decennial census years only. <br> ${ }^{\mathrm{b}}$ Expressed in 1996 chained dollars (see Glossary for definition). <br> Key: $\mathrm{N}=$ data do not exist. Note: All dollar amounts are 1996 chained dollars. |  |  |
| Sources: Population, area, number of households- U.S. Department of Commerce (USDOC), Census Bureau, Statistical Abstract of United States: 2000, available at www.census.gov; GDP-USDOC, BEA; median household income-USDOC, Census Bureau, available at www.census.gov/ hhes/www/ income00.html; expenditures, employment- U.S. Department of Labor, BLS; life expectancy-Centers for Disease Control and Prevention, available at www.cdc.gov/nchs/fastats.htm. |  |  |

The Bureau of Transportation Statistics compiled the data in this guide from multiple sources. The guide is divided into five sections and a glossary:

Mobility ..... 12
Transportation and the Economy ..... 22
Transportation, Energy, and the Environment ..... 30
Glossary ..... 35

## (1) <br> Transportation System Extent and Use

The U.S. transportation system is an extensive, interrelated network of public and private roads, airports, railroads, transit routes, waterways, terminals, ports, and pipelines. Millions of people and businesses rely on this ever-expanding system to get to work, take vacation trips, conduct business, and ship goods here and abroad. It links regions and connects small and large cities and urban and rural areas.

Table I
The Transportation Network: 2000

| Mode | Components |
| :--- | :--- |
| Highway | Public roads |
|  | 46,677 miles of Interstate highway |
|  | I 14,5 I miles of other National Highway System |
|  | roads |
|  | $3,789,927$ miles of other roads |

| Air | Public-use airports <br> 5,317 airports |
| :--- | :--- |

Airports serving large certificated carriers
29 large hubs ( 72 airports), 479 million enplaned passengers (see Glossary for definition of "hub")
31 medium hubs ( 53 airports), 102 million enplaned passengers
54 small hubs ( 69 airports), 40 million enplaned passengers
585 nonhubs ( 610 airports), I 8 million enplaned passengers

Rail
Miles of railroad operated
120,022 miles by Class I freight railroads in the United States ${ }^{a}$
20,978 miles by regional freight railroads
28,937 miles by local freight railroads
22,74I miles by Amtrak (passenger)

Urban transit Directional route-miles serviced ${ }^{\text {b }}$
Bus: 160,506
Trolley bus: 469
Commuter rail: 5,209
Heavy rail: I,558
Light rail: 834

## Stations

Commuter rail: 983
Heavy rail: I,009
Light rail: 603

| Water | 26,000 miles of navigable waterways |
| :---: | :---: |
|  | Ferry routes: 487 |
|  | Commercial waterway facilities ${ }^{\text {c }}$ |
|  | Great Lakes: 611 deep-draft |
|  | 143 shallow-draft |
|  | Inland: $\quad 2,367$ shallow-draft |
|  | Ocean: $\quad 4,079$ deep-draft |
|  | 2,109 shallow-draft |
|  | Locks: 276 |
| Pipeline(1999) | Oil |
|  | Crude lines: 86,000 miles of pipe |
|  | Product lines: 91,000 miles of pipe |
|  | Gas |
|  | Transmission: 254,000 miles of pipe |
|  | Distribution: 981,000 miles of pipe |

[^0][^1]
## 2 Transportation Safety and Security

The safety of the traveling public is of paramount concern for the U.S. Department of Transportation. Although progress has been made in reducing fatalities, transportation remains the leading cause of accidental deaths and injuries in the United States. Roughly 95 percent of transportation fatalities and an even higher percentage of injuries occurred on the nation's roadways.

Table 2
Fatalities by Transportation Mode

| Mode | 1970 | 1980 | 1990 | 1995 | 2000 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Large air carrier ${ }^{\text {a }}$ | 146 | 1 | 39 | 168 | 92 |

| Recreational boating | 1,418 | 1,360 | 865 | 829 | 701 |
| Gas and hazardous liquid pipeline | 30 | 19 | 9 | 21 | 38 |

[^2][^3]Table 3
Distribution of Transportation Fatalities: 2000

| Category N | Number | Percent |
| :---: | :---: | :---: |
| Passenger car occupants | 20,492 | 46.4 |
| Light-truck occupants | 11,418 | 25.8 |
| Pedestrians stuck by motor vehicles | 4,739 | 10.7 |
| Motorcyclists | 2,862 | 6.5 |
| Large-truck occupants | 741 | 1.7 |
| Other and unknown motor vehicle occupants | 714 | 1.6 |
| Recreational boating | 701 | 1.6 |
| Pedalcyclists struck by motor vehicles | 690 | 1.6 |
| General aviation | 592 | 1.3 |
| RR trespassers (excluding grade crossings) | 461 | 1.0 |
| MV nonoccupants, not otherwise specified ${ }^{\text {a }}$ | 143 | 0.3 |
| RR-related, not otherwise specified ${ }^{\text {b }}$ | 139 | 0.3 |
| Air carriers | 92 | 0.2 |
| Waterborne transportation (nonvessel) | 87 | 0.2 |
| Heavy-rail transit (e.g., subway) | 80 | 0.2 |
| Air taxi | 71 | 0.2 |
| Waterborne transportation (vessel-related) | 32 | 0.07 |
| Light-rail transit | 30 | 0.07 |
| RR employees/contractors on duty | 27 | 0.06 |
| Bus occupants (school, intercity, and transit) | 22 | 0.05 |
| Gas distribution pipelines | 22 | 0.05 |
| Gas transmission pipelines | 15 | 0.03 |
| Transit buses (not related to accidents) ${ }^{\text {c }}$ | 8 | 0.02 |
| Commuter air | 5 | 0.01 |
| Passengers on railroad trains | 4 | < 0.01 |
| Hazardous liquid pipelines | I | <0.01 |
| Total ${ }^{\text {d }}$ | 44,188 | 100.0 |
| Redundant with above ${ }^{\text {e }}$ |  |  |
| Large-truck occupants and nonoccupants | 5,211 |  |
| Public grade crossings, with motor vehicles | 306 |  |
| Grade crossings (not involving motor vehicles) | s) 64 |  |
| Private grade crossings, with motor vehicles | 55 |  |
| Commuter rail (included in railroad) | 87 |  |
| Transit buses (accident-related) | 82 |  |
| Outside planes in crashes | 13 |  |
| Demand-responsive transit (accident-related) | ) 8 |  |

a Includes all nonoccupant fatalities except pedalcyclists and pedestrians.
${ }^{\mathrm{b}}$ Includes fatalities outside trains. c Includes homicides and suicides.
d Unless otherwise specified, includes fatalities outside the vehicle.
e For transit bus and demand-responsive transit, occupant fatalities are counted under "bus" and nonoccupant fatalities are counted under "pedestrians," "pedalcyclists," or other motor vehicle categories.
Key: MV = motor vehicle; RR = railroad.

Table 4
Fatalities in Motor Vehicle Crashes by Number of Vehicles and Alcohol Involvement: 2000

|  | Fatalities | Alcohol involvement | Percent |
| :---: | :---: | :---: | :---: |
| Occupants | 36,249 | 14,108 | 38.9 |
| Single-vehicle crashes | 17,430 | 8,665 | 49.7 |
| Two-vehicle crashes | 15,714 | 4,539 | 28.9 |
| More than two-vehicle crashes | 3,105 | 905 | 29.1 |
| Pedestrians | 4,739 | 2,241 | 47.3 |
| Single-vehicle crashes | 4,313 | 2,016 | 46.7 |
| Multiple-vehicle crashes | 426 | 226 | 53.4 |
| Pedalcyclists | 690 | 257 | 37.2 |
| Single-vehicle crashes | 664 | 247 | 37.1 |
| Multiple-vehicle crashes | 26 | 10 | 40.0 |
| Others/unknown | 143 | 46 | 32.2 |
| Total | 41,821 | 16,653 | 39.8 |

Note: A fatal crash is considered alcohol-related if either a driver or a nonmotorist had a measurable or estimated blood alcohol concentration of 0.01 grams per deciliter or above.
Source: U.S. Department of Transportation, National Highway Traffic Safety
Administration, personal communications, February 2002.

Figure I
Fatalities in Alcohol-Related Crashes

Source: U.S. Department of Transportation, National Highway Traffic Safety Administration, National Center for Statistics and Analysis, Fatality Analysis Reporting System (FARS) database, available at www-fars.nhtsa.dot.gov/ www/query.html, as of September 200 I.

## Figure 2

## Fatality Rates for Selected Modes

## Passenger car occupants

Per 100 million vehicle-miles

Large-truck occupants

Air carriers (actual and smoothed fatality rates) ${ }^{\text {a }}$

Per 100,000 aircraft departures

## Light-truck occupants

Per 100 million vehicle-miles

## Motorcycle riders

Per 100 million vehicle-miles

## General aviation

Per 100,000 aircraft-hours flown

${ }^{\text {a }}$ For air carriers, the data were dampened, or smoothed, to reduce the month-to-month fluctuations. This dampening was performed using an exponential smoothing model, with a weight of 0.95 . Departure data, and hence the denominator of the rates, are not strictly comparable between pre- and post-1977 eras.

| Persons screened (millions) | 585 | 993 | 1,145 | 1,263 | 1,812 |
| Firearms detected | 1,914 | 2,913 | 2,843 | 2,390 | 1,937 |
| Persons arrested <br> Carrying firearms/ explosives | 1,031 | 1,310 | 1,336 | I,194 | 600 |
| Giving false information | 32 | 42 | 18 | 68 | 61 |
| Bomb threats received |  |  |  |  |  |
| Against airports | 1,179 | 477 | 448 | 346 | U |
| Against aircraft | 268 | 153 | 338 | 327 | U |

${ }^{\text {a }}$ Includes operators with a U.S. Department of Transportation, Federal Aviation Administration operating certificate engaged in scheduled passenger or public charter passenger operations and airports at which these operations are conducted.
Key: U = unavailable.

[^5]Figure 3
Worldwide Civil Aviation Hijackings

Note: There were no hijackings in the United States from 199| through 2000. Data are through 2000 and do not include the hijacking of 4 airplanes used in attacks on the United States by terrorists on Sept. II, 200I.

Source: U.S. Department of Transportation, Federal Aviation
Administration, Office of Civil Aviation Security, Criminal Acts Against Civil Aviation, available at http://cas.faa.gov/crimacts/pf/crim2000.pdf, as of Feb. 8, 2002.

## (3) Mobility

> he U.S. transportation network makes possible a high degree of personal mobility and freight activity. In 1999, the transportation network supported 4.8 trillion passenger-miles and about 3.9 trillion ton-miles. The data in this section show growth in local and long-distance travel and freight shipments over time. Factors influencing this growth include, among others: greater vehicle availability, reduced travel costs, population increases, the economy, and consumer income.

## Table 7 <br> Per Capita Passenger Travel and Freight Transportation

|  | Number |
| :---: | :---: |
| Passenger travel (1995) |  |
| Trips |  |
| Local trips per person, ${ }^{\text {a }}$ annually | 1,568 |
| Local trips per person, ${ }^{\text {a }}$ daily | 4.3 |
| Long-distance trips per person, annually | 3.9 |
| Miles |  |
| Local miles per person, ${ }^{\text {a }}$ annually | 14,115 |
| Local miles per person, ${ }^{\text {a }}$ daily | 39 |
| Long-distance miles per person, domestic only | 3,129 |
| Freight transportation (1997) |  |
| Tons per person, annually | 55 |
| Ton-miles per person, annually | 14,383 |
| ${ }^{\text {a }}$ Persons aged 5 and over. <br> Notes: Data used for local travel are from the Nationwide Pers Transportation Survey travel-day file and include trips of al made by respondents on a single day; about 95 percent of trips were 30 miles or less. Per capita calculations are base population estimates within each survey, not from the Cen estimate reported in the table. | sonal ll lengths these daily ed on sus Bureau |

${ }^{\text {a }}$ Data from the Commodity Flow Survey (CFS), plus Bureau of Transportation Statistics estimates to fill in CFS gaps. The estimates cover out-of-scope farm-based truck shipments, truck and rail imports from Canada and Mexico, and air cargo and water imports and exports.

[^10]Transportation is a major sector of the U.S. economy. It moves people and goods, employs millions of workers, generates revenue, and consumes resources and services produced by other sectors of the economy. In 2000, transportation-related goods and services contributed $\$ 1,050$ billion to a $\$ 9.87$ trillion U.S. Gross Domestic Product.

Figure 5

## U.S. Gross Domestic Product by Major Societal Function: 2000

${ }^{\text {a }}$ Includes all consumer and government purchases of goods (e.g., vehicles and fuel) and services (e.g., auto insurance) and exports related to transportation. ${ }^{\mathrm{b}}$ Includes all other categories, such as entertainment, personal care products and services, and payments to pension plans.

## 5 Transportation, Energy, and the Environment

Serious energy and environmental issues are associated with transportation. The U.S. transportation sector remains almost entirely dependent on petroleum as an energy source and more than 50 percent of the petroleum used in the United States is now imported. Petroleum use is responsible for most of the environmental problems resulting from transportation, including carbon dioxide emissions that may contribute to global climate change.

Figure 7
U.S. Petroleum Production and
Consumption

Million barrels per day

[^15]Figure 8
Transportation's Share of U.S. Petroleum Use

Source: U.S. Department of Energy, Energy Information Administration, Annual Energy Review 2000 (Washington, DC: August 2001), table 5.I2.

Figure 9
U.S. Carbon Dioxide Emissions from Energy Use

Key: $\mathrm{P}=2000$ data are preliminary.
Notes: One ton of carbon equals 3.667 tons of carbon dioxide gas.
Electric utility emissions are spread across end-user sections.

[^16]Figure 10
New Passenger Car and Light Truck Fuel Economy Averages: Model Years 1978-2000

[^17]Figure II
Index of Key Air Pollutant Emissions from U.S. Transportation

Index: $1970=1.0,1990=1.0$ for PM-2.5 and ammonia

Key: $\mathrm{NO}_{\mathrm{x}}=$ oxides of nitrogen; PM-10 and PM-2.5 = airborne particulates of less than 10 microns or 2.5 microns in diameter, respectively; CO $=$ carbon monoxide; $\mathrm{VOC}=$ volatile organic compounds.
Notes: Transportation emissions include all onroad mobile sources and the following nonroad mobile sources: recreational vehicles and boats, airport service equipment, aircraft, commercial marine vessels, and railroads. Other nonroad sources, such as lawnmowers and farming equipment, are not included. Lead estimates include onroad mobile sources only.

[^18]
## લlossary

Air carrier-Certificated provider of scheduled and nonscheduled services.
Chained dollars-A method to measure real changes in dollar values between years that uses chain-type indices, rather than constant dollars. The method first calculates the real changes between adjacent years. Annual rates of real changes are then chained (multiplied) together to obtain the rate of real changes between nonadjacent years.
Class I railroad-A freight railroad with an annual gross operating revenue in excess of $\$ 250$ million (based on 1991 dollars).
Commercial waterway facilities-Waterway facilities as counted by the U.S. Army Corps of Engineers are piers, wharves, and docks. Not included are those facilities used exclusively for recreational or active military craft and generally those providing nonmaritime use.
Commuter rail-Urban/suburban passenger train service for short-distance travel between a central city and adjacent suburbs run on tracks of a traditional railroad system. Does not include heavy- or light-rail transit service.
Demand-responsive transit-A nonfixed-route, nonfixedschedule form of transportation that operates in response to calls from passengers or their agents to the transit operator or dispatcher.
Directional route-miles-The sum of the mileage in each direction over which transit vehicles travel while in revenue service.
General aviation-All civil aviation operations other than those air carriers holding a Certificate of Public Convenience and Necessity. Types of aircraft used in general aviation range from corporate, multi-engine jets piloted by a professional crew to amateur-built, single-engine, piston-driven, acrobatic planes.
Heavy-rail transit-High-speed transit rail operated on rights-of-way that exclude all other vehicles and pedestrians.
Hub-A geographic area based on the percentage of total enplaned passengers in that area. A hub may have more than one airport in it. This definition should not be confused with the definition used by airlines in describing their "hub and spoke" route structures or other definitions of hubs used by the Federal Aviation Administration focusing on traffic at individual airports.

Large certificated air carrier-Carriers operating aircraft with a maximum passenger capacity of more than 60 seats or a maximum payload of more than 18,000 pounds. These carriers are also grouped by annual operating revenues: I) majorsmore than $\$ 1$ billion; 2) nationals-between $\$ 100$ million and $\$ 1$ billion; 3) large regionals-between $\$ 20$ million and $\$ 99,999,999$; and 4) medium regionals-less than $\$ 20$ million.
Light-rail transit-Urban transit rail operated on a reserved right-of-way that may be crossed by roads used by motor vehicles and pedestrians.
Light truck-Trucks of 10,000 pounds gross vehicle weight rating or less, including pickups, vans, truck-based station wagons, and sport utility vehicles.
Nonself-propelled vessels-Includes dry cargo and tank barges and railroad car floats that operate in U.S. ports and waterways.
Other 2-axle, 4-tire vehicles-Includes vans, pickup trucks, and sport utility vehicles. Does not include passenger cars.
Passenger-mile-One passenger transported one mile. For example, one vehicle traveling 3 miles carrying 5 passengers generates 15 passenger-miles.
Self-propelled vessels-Includes dry cargo vessels, tankers, and offshore supply vessels, tugboats, pushboats, and passenger vessels, such as excursion/sightseeing boats, combination passenger and dry cargo vessels, and ferries.
Ton-miles-A unit of measure equal to the movement of one ton over one mile.

## Truck:

Single unit-A large truck on a single frame with at least 2 axles and 6 tires. Excludes "other 2-axle, 4-tire vehicles" noted above.
Combination-A power unit (truck or truck tractor) and one or more trailing units.
Vehicle-mile-One vehicle traveling one mile.

Statistics published in this Pocket Guide to Transportation come from many different sources. Some statistics are based on samples and are subject to sampling variability. Statistics may also be subject to omissions and errors in reporting, recording, and processing.

[^0]:    ${ }^{\text {a }}$ There are also 575 miles of railroad operated by U.S. Class I freight railroads in Canada and Mexico.
    ${ }^{\mathrm{b}}$ Directly operated service. Does not include contracted service.
    ${ }^{\text {c }}$ See Glossary for definition of commercial waterway facilites.

[^2]:    ${ }^{2}$ Includes people on planes and on the ground.
    ${ }^{\mathrm{b}}$ Includes occupants, nonoccupants, and motor vehicle fatalities at railroad crossings.
    ${ }^{\text {c }}$ Includes fatalities from nontrain incidents as well as train incidents and accidents. Also includes train occupants and nonoccupants except motor vehicle occupants at grade crossings.
    ${ }^{d}$ Fatalities resulting from all reportable incidents, not just accidents. Includes commuter rail, heavy rail, light rail, motor bus, demandresponsive, van pool, and automated guideway.
    ${ }^{e}$ Fatalities unrelated to vessel accidents, e.g., individual falling overboard and drowning.
    Key: $\mathrm{N}=$ data do not exist or are not cited because of reporting changes; $R=$ revised.
