

COMPLETE INDEX (for Vols. 1–7)

A

- Accessibility
and employment, Vol. 4(2/3):49–66
and road construction, Vol. 5(1):26
business productivity, Vol. 1(3):69–76
concepts and applications, Vol. 4(2/3):15–30
definition of, Vol. 4(2/3):16
demarcation area, Vol. 4(2/3):37
European context, Vol. 4(2/3):38–40
improving, Vol. 4(2/3):49–66
indicators
 composite approach, Vol. 4(2/3):35–36
 constraints-based approach, Vol. 4(2/3):34–35
 gravity approach, Vol. 4(2/3):33–34
 opportunities approach, Vol. 4(2/3):33–34
 travel-cost approach, Vol. 4(2/3):33
 utility-based surplus approach, Vol. 4(2/3):35
modeling, Vol. 4(2/3):15–30, 31–47
 agglomeration effects, Vol. 4(2/3):37–38
 and labor markets, Vol. 4(2/3):54–57, 63–64
 measurement of attraction masses, Vol. 4(2/3):37
 measurement of spatial separation, Vol. 4(2/3):36–37
 path-based accessibility, Vol. 4(2/3):79–90
 unimodality v. multimodality, Vol. 4(2/3):37
neighborhood accessibility, Vol. 4(2/3):67–78
space-time prisms, Vol. 4(2/3):1–14
- Accidents. *See also* Crashes, Safety
air transportation, Vol. 2(1):79, 85
costs, Vol. 4(1):87–90, 99–100
free incidents, travel time, Vol. 2(2):123–131
hazardous materials shipments by rail, Vol. 3(1):81–92
high-risk sites, Vol. 1(1):75–91
increased speed limits, Vol. 4(1):1–26
traffic, Vol. 7(2/3):13–26
trucks, Vol. 1(1):75–91
- Advanced Traveler Information Systems, Vol. 7(2/3):53–70
- AFV. *See* Alternative fuel vehicles
- Age. *See also* Demographic factors
as a determinant of truck accidents, Vol. 3(1):69–73
commuting, Vol. 2(1):104
in relation to highway safety, Vol. 6(2/3):51–65
- Agglomeration effects (accessibility modeling), Vol. 4(2/3):37–38
- Aggregation/disaggregation of data
business interruption impacts, Northridge earthquake, Vol. 1(2):29
freight demand and mode choice, Vol. 2(2):149–58
investment, macroeconomic analyses, Vol. 1(3):65–79
motor vehicle emissions, Vol. 3(2):25
motor vehicle license fees, Vol. 2(2):139
public transit demand in Europe, Vol. 1(1):3, 5, 13
travel demand, country comparisons, Vol. 3(3):1–31
truck trips, statewide, Vol. 3(1):53
urban passenger transport, Vol. 1(1):44
value of time data, Vol. 5(2/3):57–72
- AIC. *See* Akaike's Information Criterion
- Air pollution, Vol. 3(2):1–102
air quality assessment, Vol. 3(2):85–101
air quality planning, local roads, Vol. 6(1):59–69
air transportation, Vol. 2(1):79–80, 85–86
analysis of covariance model, Vol. 3(2):49–64
chase car data, Vol. 3(2):15–28
costs from highway transportation, Vol. 4(1):91–92, 100; Vol. 5(2/3):84
light trucks and passenger cars, Vol. 3(3):48
Mobile Emissions Assessment System for Urban and Regional Evaluation, Vol. 3(2):65–83
Mobile Source Emission Factor Model, Vol. 3(2):39–47, 65, 66, 67, 71, 72, 74–83; Vol. 6(1):17–32
mobile source emissions forecasting, Vol. 6(1):17–32
modal emissions models, Vol. 3(2):29–38, 67–71
motor vehicles, Vol. 1(1):20, 23, 27–28, 30, 33, 48
social costs of motor vehicle use, Vol. 1(1):20, 23, 27–28, 30, 33
trips, relationship to value of time data, Vol. 5(2/3):2–72
and unregistered motor vehicles, Vol. 7(2/3):1–12
urban areas, Vol. 3(2):15–28, 65–102
- Air transportation statistics, Vol. 2(1):71–92
- airline
 flight delay and cancellation analysis, Vol. 7(1):74–84
 low-cost carriers, Vol. 7(1):88–101
 regional carriers, Vol. 7(1):88–101
 traffic, Vol. 7(1):69–85
 networks, Vol. 7(1):87–101
- Air Travel Price Index, Vol. 7(2/3):41–52
- econometric forecasts, Vol. 7(1):7–21
- infrastructure needs, Vol. 2(1):78–79, 84–85
- international freight, Vol. 7(2/3):93–97
- policy formation, Vol. 2(1):74–76, 81–82
- productivity analysis, Vol. 2(1):77–78, 83–84
- safety, Vol. 2(1):79, 85
- use in cost analysis, Vol. 2(1):77–78, 83–84
- use in demand forecasting, Vol. 2(1):76–77, 83–84
- use in environmental analysis, Vol. 2(1):79–80, 85–86
- Akaike's Information Criterion (AIC), Vol. 7(1):3
- Alabama
 time-use behavior model, Vol. 5(1):39
 truck flows, Vol. 1(1):69, 72
- Alaska, truck flows, Vol. 1(1):67, 69, 72
- Alternative and replacement fuels, Vol. 3(2):50–61
- Alternative fuel vehicles (AFV)
 emissions, Vol. 3(2):50, 57–61
 urban transportation, Vol. 3(1):35
- American Travel Survey, Vol. 5(2/3):84
- Analysis of covariance (ANCOVA)
 motor vehicle emissions, Vol. 3(2):49–64
- Analysis of variance (ANOVA), Vol. 2(2):49–63
 motor vehicle emissions, Vol. 3(2):24
 roadway inventory data collection, Vol. 3(3):36–42
- Atlanta, Georgia, parking, Vol. 2(1):93–107
- ARIMA. *See* Box-Jenkins ARIMA time series
- Arizona
 time-use behavior model, Vol. 5(1):39
 truck flows, Vol. 1(1):69, 72
- Arkansas
 time-use behavior model, Vol. 5(1):39
 truck flows, Vol. 1(1):69, 72

- Austin, Texas, neighborhood accessibility assessment, Vol. 4(2/3):70–71, 76–77
- Australia
 crash statistics, Vol. 2(2):159–166
 freight travel time, Vol. 3(3):83–89
 impacts of bypasses on communities, Vol. 5(1):58
 modeling transportation in urban areas, Vol. 3(1):31–52
 public transit fare elasticity, Vol. 1(1):43–57
 travel demand, Vol. 3(3):1–31
- Austria
 crash statistics, Vol. 2(2):159–166
 travel demand, Vol. 3(3):3–5, 13
- Automatic vehicle classification, Vol. 1(3):89–93
- Automatic vehicle identification, Vol. 7(2/3):53–70
- Aviation. *See* Air transportation
- B**
- Bayesian
 approach, Vol. 4(1):27–38; Vol. 5(1):6, 13–14, 24, 77, 82; Vol. 6(1):33–57
 generalized cross validation, Vol. 7(2/3):56–70
 natural cubic splines, Vol. 7(2/3):54–70
 network model, Vol. 7(2/3):13–26
 smoothing splines, Vol. 7(2/3):53–70
- Bayesian Information Criterion (BIC), Vol. 7(1):3
- Bayes theorem, estimating traffic volume, Vol. 4(1):27–38
- Belgium
 crash statistics, Vol. 2(2):159–166
 travel demand, Vol. 3(3):7
- BIC. *See* Bayesian Information Criterion
- Bicycling, accessibility and, Vol. 4(2/3):67–68, 73, 74–75
- Border crossings
 economics, Vol. 7(1):7–21
 forecast accuracy, Vol. 7(1):7–21
 international freight gateways, Vol. 7(2/3):93–97
- Bootstrap methods
 estimation of origin-destination matrices, Vol. 5(2/3):37, 43–44
 validation of motor vehicle emissions, Vol. 3(2) 29–36
- Box-Jenkins ARIMA time series, Vol. 4(1):13–15
 forecasting traffic flows, Vol. 5(1):47–56
 speed limit changes and fatal highway crashes, Vol. 4(1):13–15, 25
- Bridge improvements, Vol. 1(3):65–78
- Bridges
 traffic
 counting, Vol. 6(1):61
 international crossings, Vol. 7(1):7–21
- Bronx, New York, Vol. 4(1):51–53
- Buses, Vol. 1(2):4, 7, 11; Vol. 4(2/3):79–90. *See also* Public transportation
 forecasting usage, Vol. 7(1):39–59
 noise pollution, Vol. 1(3):10–11
- C**
- California
 commodity inflows, Vol. 7(1):36
 highway crashes and older drivers, Vol. 6(2/3):51–65
- Northridge earthquake, Vol. 1(1):v–73
- Port of Los Angeles, international freight, Vol. 7(2/3):93–97
- San Diego, increased roadway capacity, Vol. 5(1):27
- San Francisco, increased roadway capacity, Vol. 5(1):27
- San Francisco Bay Area Rapid Transit
 customer satisfaction among riders, Vol. 4(2/3):71
 employment growth, in relation to, Vol. 4(1):54
 time-use behavior model, Vol. 5(1):39
 travel behavior, home-based workers, Vol. 1(3):25–41
 truck flows, Vol. 1(1):67, 69, 71, 72
 unregistration rates of on-road vehicles, Vol. 7(2/3):1–12
- Canada
 crash statistics, Vol. 2(2):159–166
 freight imported from Canada into the U.S., Vol. 1(1):68–72
- Capital investment in highways
 environmental regulation and, Vol. 2(1):45–60
 macroeconomic analyses, Vol. 1(3):65–79
 positive externalities, Vol. 1(3):81–88
- Carbon dioxide
 air transportation, Vol. 2(1):80
 motor vehicles, Vol. 1(1):28; Vol. 3(2):3–4, 7, 12, 29–32, 34
- Carbon monoxide
 motor vehicles, Vol. 3(2):3–5, 7, 9–10, 12, 29–32, 34, 40, 44–45, 65–84, 86, 91–101
- Cargo
 containerized, Vol. 6(1):71–86
 international, U.S./Mexico, Vol. 7(1):7–21
 train waybill data models and statistics, Vol. 4(1):75–79
- Cars. *See* Motor vehicles, Passenger cars
- Census Transportation Planning Package (CTTP), Vol. 4(2/3):67–78
- CFS. *See* Commodity Flow Survey
- Chase car data
 measuring vehicle emissions, Vol. 3(2):15–28
 potential inaccuracy, Vol. 3(2):17–18
- Chicago streets, Vol. 5(1):1–15
- China, containerized cargo, Vol. 6(1):71–86
- Clean Air Act emissions standards, Vol. 3(2):2–3, 5
- Climate change
 air transportation, Vol. 2(1):79–80
 motor vehicle emissions, Vol. 3(2):v
 motor vehicles, social costs, Vol. 1(1):22
- Cluster analysis, land-use and transportation sketch planning, Vol. 4(1):39–49
- Colorado
 time-use behavior model, Vol. 5(1):39
 truck flows, Vol. 1(1):69, 72
- Commodities
 estimating state-level truck traffic, Vol. 1(1):63–73; Vol. 3(1):53–66
 movement after Northridge earthquake, Vol. 1(2):37–48
 transportation as, Vol. 3(1):15–29
- Commodity Flow Survey, Vol. 3(1):53–66; Vol. 7(1):23–37
 estimating state-level truck activities, Vol. 1(1):63–74
- Commuters, Vol. 1(3):25–39
 activities of, Vol. 5(2/3):19–36

- demographics of, Vol. 2(1):93–107
transit strikes, Vol. 1(3):43–51
travel time, costs of freeway incidents, Vol. 2(2):123–130
survey, Northridge, California, earthquake, Vol. 1(2):
13–15, 31–33
- Commuting
forecasting train usage, Vol. 7(1):39–59
impact of Northridge earthquake, Vol. 1(2):1–4, 8–19,
31–35, 50–51, 59–61
time spent, Vol. 5(1):25–45
- Congestion. *See* Traffic congestion
- Connecticut
time-use behavior model, Vol. 5(1):39
truck flows, Vol. 1(1):67, 69, 72
- Containerized cargo, Vol. 6(1):71–86
- Content analysis, Vol. 1(2):65–73
- Contextual stated preference methods, freight travel time
and reliability, Vol. 3(3):83–89
- Correlation
accessibility measures, Vol. 4(2/3):20–30, 40–41, 87–88
multiple serial correlation, transit investment, Vol.
2(2):113–121
- Costs/cost-benefit analyses
accidents, Vol. 4(1):87–90
air transport statistics, Vol. 2(1):77–78, 83–84
disabled persons, rural vouchers, Vol. 2(1):68
environmental costs
air pollution, Vol. 4(1):91–92
impact on road construction, Vol. 2(1):45–60
motor vehicle noise, Vol. 1(3):1–23; Vol. 4(1):92–93
freeway incidents, travel time, Vol. 2(2):123–131
freight travel time, Vol. 3(3):83–89
highway construction, Vol. 2(1):45–60
highway transportation in New Jersey, Vol. 4(1):81–103
impact of Northridge earthquake on trucking, Vol.
1(2):37–48
infrastructure, Vol. 4(1):90–91
motor vehicle crashes, Vol. 1(1):20, 22–23, 33; Vol.
2(1):20–43; Vol. 2(2):123–131
motor vehicle license fees, Vol. 2(2):133–147
Northridge earthquake, Vol. 1(2):15–18, 19, 21, 37,
40, 44–46
parking pricing, Vol. 2(1):100–106
public transit, Vol. 2(2):113–121
road construction, Vol. 1(3):65–78
social costs of motor vehicle use, Vol. 1(1):15–42
traffic congestion, Vol. 2(2):123–130, Vol. 4(1):87–90
transit, multiple serial correlation, Vol. 2(2):113–121
vehicle operating costs, 86–87
- Covariance matrix, and travel time budgets, Vol. 5(1):35
- Crashes, Vol. 2(1):19–43. *See also* Accidents, Safety
annual mileage as determinant of truck accidents, Vol.
3(1):69, 71, 74
and demographics, Vol. 7(2/3):13–26
fatalities, Vol. 2(2):159–166; Vol. 7(2/3):13–26
economic costs of motor vehicle crashes, Vol. 2(1):23–32,
36–43
effect of alcohol, Vol. 6(2/3):51–65
effect of speed limits, Vol. 4(1):1–26; Vol. 6(1):37–38,
51; Vol. 6(2/3):51–65
international statistics, Vol. 2(2):159–166
at intersections, Vol. 7(2/3):27–39
older drivers, Vol. 6(2/3):51–65
road characteristics in, Vol. 7(2/3):13–26
and speed, Vol. 7(2/3):13–26
types, Vol. 2(1):22, 27–32, 36–43
weather, Vol. 6(1):39–57; Vol. 7(2/3):13–26
- CTPP. *See* Census Transportation Planning Package
- Cuidad Juárez, Mexico, border economics, Vol. 7(1):7–21
- D**
- Dallas-Fort Worth, TX, Vol. 6(1):17–32
- Delaware, truck flows, Vol. 1(1):69, 71, 72
- Demand
demand management, Vol. 4(1):31–37, 51–73
derived, Vol. 5(1):26
elasticities, Vol. 5(1):27; Vol. 6(2/3):91–108
forecasting using air transport statistics, Vol. 2(1):76–
77, 82–83
induced, Vol. 5(1):25–27, 32
transit demand elasticity, Vol. 1(1):1–14
transportation-related final demand, Vol. 1(1):93–102
- Demographic factors. *See also* Age
crashes, Vol. 7(2/3):13–26
determinants of trucking safety, Vol. 3(1):69–79
disabled persons, rural vouchers, Vol. 2(1):61–70
employee demographics in relation to parking, Vol.
2(1):98, 104–105
equity in motor vehicle license fees, Vol. 2(2):133–147
motor vehicle ownership, Vol. 2(1):6–16
Nationwide Personal Transportation Survey, Vol. 2(1):1–17
race as determinant of truck crashes, Vol. 3(1):69, 71–72
- Denmark, crash statistics, Vol. 2(2):159–166
- DIRECTIONS Travel Intelligence System, Vol. 5(2/3):85, 89
- Disabled persons
vouchers for transit use, Vol. 2(1):61–69
- Disaggregation. *See* Aggregation/disaggregation
- Disasters
planning by trucking companies, Vol. 1(2):37–48
research methodology, Vol. 1(2):19–20, 39–40
- District of Columbia. *See* Washington, DC
- Driver behavior and traffic flow, Vol. 5(1):3, 23
- Driver experience as determinant of truck accidents, Vol.
3(1):69, 71, 73–74
- E**
- Econometric analyses, Vol. 3(1):1–14
airline networks, Vol. 7(1):87–101
forecasting, Vol. 7(1):7–21, 87–101
highway safety and older drivers, Vol. 6(2/3):51–65
modeling impacts of bypasses on communities, Vol.
5(1):59
regional, Vol. 7(1):7–21
- Economic factors. *See also* Capital investment in high-
ways, Costs/cost-benefit analysis, Demand, Employ-
ment, Gross Domestic Product
costs of traffic congestion, Vol. 2(2):123–130
efficiency of European railways, Vol. 3(3):61–67

- equity of vehicle license fees by household location, Vol. 2(2):140–143
- equity of vehicle license fees by income, Vol. 2(2):135–140
- estimating marginal highway transportation costs, Vol. 4(1):81–102
- impacts of bypasses on communities, Vol. 5(1):57–69
- importance of transportation, Vol. 1(1):75–91; Vol. 3(1):15–30; Vol. 5(2/3):1–18
- induced travel demand, Vol. 3(1):1–14
- macroeconomic analysis of transportation investments, Vol. 1(3):43–51
- motor vehicles
- license fees, Vol. 2(2):133–147
 - ownership and use, Vol. 2(1):1–17; Vol. 3(3):47–60
 - social costs of owning, Vol. 1(1):15–42
- Northridge earthquake, Vol. 1(2):21–36, 49–64
- impact on goods movement, Vol. 1(2):37–48
- price elasticities, Vol. 7(1):40
- System of National Accounts, Vol. 1(1):93–102
- transportation in the Canadian economy, Vol. 6(2/3):29–49
- Transportation Output Index, Vol. 6(2/3):1–27
- transportation related, Vol. 1(2):21–35
- Transportation Satellite Accounts, Vol. 5(2/3):1–18
- urban transportation, Vol. 3(1):31–52
- value of travel time, Vol. 2(2):123–130
- Efficiency measures, European railways, Vol. 3(3):61–68
- Elasticity
- cross elasticity, urban passenger transport fares, Vol. 1(1):1–14
 - demand on tolled motorways, Vol. 6(2/3):91–108
 - fares for urban passenger transport, Vol. 1(1):43–61
 - modal choice, Vol. 2(2):156–157
 - parking prices, Vol. 2(1):1–3
 - price
 - airline, Vol. 7(1):96
 - public transportation in Spain, Vol. 7(1):40
- El Paso, Texas, border economics, Vol. 7(1):7–21

AUTHOR INDEX (Volumes 1–6)

A

- Armoogum, Jimmy
personal transportation surveys, Vol. 1(3):53–64
- Arnold, Eugene D. Jr.
parking and trip generation, discussion of article,
Vol. 6(1):13–14
- Aultman-Hall, Lisa
GIS-based random sampling for local road traffic
counts, Vol. 6(1):59–69
- Awad, Wael
truck accidents, freeway ramps, Vol. 1(1):75–92

B

- Bachman, William
motor vehicle emissions, Vol. 3(2):65–84
- Balkin, Sandy
speed limit increases and fatal interstate crashes,
Vol. 4(1):1–16, 24–26 (rejoinder)
- Banks, David
introductory statement, Vol. 3(1):v–vi
- Baradaran, Siamak
accessibility performance measures, Vol. 4(2/3):31–48
- Barth, Matthew
motor vehicle emissions, Vol. 3(2):29–38
- Bartin, Bekir
New Jersey highway transportation costs,
Vol. 4(1):81–103
- Berechman, Joseph
accessibility improvements and local employment,
Vol. 4(2/3):49–66
New Jersey highway transportation costs,
Vol. 4(1):81–103
- Berglund, Svante
path-based accessibility, Vol. 4(2/3):79–91
- Bernier, Brad
disabled persons, rural vouchers, Vol. 2(1):61–70
- Bhat, Chandra R.
trip duration modeling for mobile source emissions
forecasting, Vol. 6(1):17–32
- Blincoe, Lawrence J.
motor vehicle crash risk, Vol. 2(1):19–43
- Blum, Ulrich
infrastructure, externalities, Vol. 1(3):81–88
- Boarnet, Marlon G.
Northridge earthquake, business losses and trans-
portation damage, Vol. 1(2):49–63
- Bowling, Sarah T.
GIS-based random sampling for local road traffic
counts, Vol. 6(1):59–69
- Buttke, Carl H.
parking and trip generation, discussion of article,
Vol. 6(1):13–14
- Button, Kenneth
air transport statistics, Vol. 2(1):71–92

C

- Calzada, Christian
freight demand and mode choice, Vol. 2(2):149–158
- Cantos, Pedro
railways, European, efficiency/output, Vol. 3(3):61–68

- Chang, Gang-Len
intercity trip time using a network assignment model,
Vol. 5(2/3):57–72
- Chang, Iljoon
intercity trip time using a network assignment model,
Vol. 5(2/3):57–72
- Chen, Duanjie
household-provided transportation in the Transporta-
tion Satellite Accounts, Vol. 5(2/3):1–18
- Chen, Haibo
traffic forecasting, Vol. 5(1):47–56
- Chin, Shih-Miao
trucking, state-level, Vol. 1(1):63–74
- Chu, Xuehao
measuring vehicle travel by visitors, Vol. 5(2/3):83–90
