SUMMARY OF DATASET

The Census Transportation Planning Package (CTPP) is a set of special tabulations of 1990 census data tailored to meet the data needs of transportation planners. The tabulations also contain a wealth of general interest information on the work force by place of work. The 1990 CTPP is a continuation of a program established for the 1970 census and continued for the 1980 census in the same general format. Production of the 1990 CTPP by the Bureau of the Census is sponsored by the State departments of transportation under a pooled funding arrangement with the American Association of State Highway and Transportation Officials (AASHTO). Funding to develop the CTPP Program is provided by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Project coordination and technical support is provided by the Federal Highway Administration. This preservation dataset is distributed by the Bureau of Transportation Statistics (BTS).

The CTPP 1990 Urban Element contains tabulations at the metropolitan level, by Place of Residence (Part 1); Place of Work (Part 2); and the flows between the residence and work, or Journey to Work (Part 3). The CTPP 1990 Statewide Element provides the same statistics for states, and is available in another record in this repository.
