1 Introduction

1.1 The CARE Database

Community database on Accidents on the Roads in Europe

Road traffic accidents in the Member States of the European Union annually claim about 43.000 lives and leave more than 1.8 million people injured, representing estimated costs of 160 billion euros. Since 1984, a large number of measures to reduce road accidents have been taken at a regional level. Along with these measures, the Council adopted a Decision on 30 November 1993 on the creation of a Community database on road accidents (93/704/EC), the CARE project.

It was commonly agreed that such a database at the Community level would make it possible to identify and quantify road safety problems, evaluate the efficiency of road safety measures, determine the relevance of Community actions and facilitate the exchange of experience in this field. After a pilot phase of about 3 years, the Council endorsed the "Report from the Commission on the progress with the project and its future prospects" (COM(97) 238 final).

CARE is a Community database on road accidents resulting in death or injury (no statistics on damage-only accidents are kept). The major difference between CARE and most other existing international databases is the high level of disaggregation, i.e. CARE is based on detailed data of individual accidents as collected by the Member States. This structure allows for maximum flexibility and potential with regard to analysing the information contained in the system and opens up a whole set of new possibilities in the field of accident analysis.

National data sets are integrated into the CARE database in their original national structure and definitions, with confidential data blanked out. However, transformation rules are implemented in the CARE database in order to increase data compatibility and thus enhance the functioning of the system.

The process of improving "homogenisation" of accident data within CARE is underway. In the meantime, the inherent incompatibility of national accident data remains a source of possible misinterpretation when performing comparative analyses at international level. Therefore, on-line access to the CARE database is currently restricted to expert users. The summary statistical tables and figures contained here provide an overview of road accident data from 1997 to 2006 (EU-15 and EU-20 without Germany). For some figures other sources than CARE have been used in order to give an overview of EU-25 road accident data.

1.2 Note to the Reader

This Annual Statistical Report provides the basic characteristics of road accidents in 19 member states of the European Union for the period 1997-2006, on the basis of data collected and processed in the CARE database, the Community Road Accident Database with disaggregate data (Council Decision EEC 93/704 final).

The period 1997-2006 has been used in order to maximize the sample of data. However, data for some countries and corresponding years were not yet available in the CARE database at the date of drafting this report. As you can see in following table, five new countries (CZ, EE, HU, MT, PL) were included in 2006. These countries were considered in the tables and figures, where no time line is used. For example if there are comparisons with the year 1997 only EU-14 (the EU-15 excluding Germany) is used.

The next table shows which data from the EU-25 are available in the CARE database (x) and used in this report.

| Code | Country | 1991-1996 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 |
|------|------------------------|-----------|------|------|------|------|------|------|------|------|------|---------------|
| BE | Belgium | x | x | x | x | x | x | x | x | x | x | x |
| CZ | Czech Republic | | | | | | | | | | | x |
| DK | Denmark | x | x | x | x | x | x | x | x | x | x | x |
| DE | Germany | | | | | | | | | | | |
| EE | Estonia | | | | | | | | | | | Test Data x x |
| EL | Greece | x | x | x | x | x | x | x | x | x | x | x |
| ES | Spain | x | x | x | x | x | x | x | x | x | x | x |
| FR | France | x | x | x | x | x | x | x | x | x | x | x |
| IE | Ireland | x | x | x | x | x | x | x | x | | | |
| IT | Italy | x | x | x | x | x | x | x | x | x | | |
| CY | Cyprus | | | | | | | | | | | |

| SW | Sweden | x | x | x | x | x | x | x | x | x | x | x |
| UK | United Kingdom (GB+NI) | x | x | x | x | x | x | x | x | x | x | only GB |

The reader should be aware of the following remarks concerning the contents of this Annual Statistical Report:

- It should be taken into account that analysis and comparisons of the numbers of accidents and injuries are not always possible, as different definitions exist in each EU Member State.
- Fatality data are compatible between countries and use common definitions as a result of the CAREPLUS 1 and CAREPLUS 2* project. Corrective factors have been applied to comply with the international definition of people killed within 30 days after an accident.
[\(\[http://ec.europa.eu/transport/roadsafety/road_safety_observatory/doc/care_glossary.pdf\]\(http://ec.europa.eu/transport/roadsafety/road_safety_observatory/doc/care_glossary.pdf\)\)](http://ec.europa.eu/transport/roadsafety/road_safety_observatory/doc/care_glossary.pdf).
- On fatal accidents data, no corrective factors have been applied to comply with the international definition of persons killed within 30 days.
- Latest available data was used for all tables and figures, i.e. 2006 for all countries except LU (2002), IE and NL (2003), IT (2004) and PL and NI (2005). In time series over the past 10 years from 1997 to 2006 the new member states CZ, EE, HU, MT and PL are not considered in the total trends because data is not available before 2005 (in this regard please see also the footnotes in the tables and figures).
- Minor differences in totals are due to rounding-off differences of data.
- “Unknown” values are not displayed in tables, but totals include the unknowns.
- The EU totals for all people killed are not necessarily the sum of each sub-division of these persons, given that there are no data available for all sub-divisions and all countries. Corresponding percentages refer to the available data.
- Partial or complete reproduction of these statistics is permitted if the source is mentioned and accompanied with the present remarks.
- The basic characteristics of fatal road accidents in the EU member states have been selected as those which might be useful for road accident analysis and where data are available for all or most of the EU countries (these are results of CAREPLUS project on making accident data comparable). More characteristics are available since the CAREPLUS 2 project. More precisely, the basic characteristics of fatal road accidents refer to:

Person class (driver, passenger, pedestrian)

Person killed (age groups and/or gender)

Area type (inside or outside urban area)

Motorway (yes or no)

Junction type (crossroad, level crossing, not at a junction, roundabout, T or Y junction)

Weather conditions (dry, fog or mist, rain, snow/sleet/hail, strong wind)

Modes of transport – vehicle group (agricultural tractor, bus or coach [>8 seats], car or taxi, heavy goods vehicles, lorry under 3,5 tons, pedal cycle, moped, motorcycle, other)

Month (January to December)

Day of the week (Monday to Sunday)

Hour (0-24)

- This report is amongst the first outcomes of the CARE database. The validation of the CARE system is not yet finished and minor amendments to the figures presented might be necessary. Comments can be addressed to safetynet@lboro.ac.uk.

Disclaimer

The information in this document is provided as it is and no guarantee or warranty is given that the information is fit for any particular purpose. Therefore, the reader uses the information at their own risk and liability.

For more information

Further statistical information about fatalities is available from the CARE database at the Directorate-General for Energy and Transport of the European Commission, 28 Rue de Mot, B-1040 Brussels (see ec.europa.eu/transport/roadsafety/road_safety_observatory/care_reports_en.htm).

Traffic Safety Basic Fact Sheets available from the European Commission concern:

- Main Figures
- Children (Aged <16)
- Young People (Aged 16-24)
- The Elderly (Aged >64)
- Pedestrians
- Bicycles
- Motorcycle and Mopeds
- Car-Occupants
- Heavy Goods Vehicles & Buses
- Motorways
- Junctions
- Urban Areas

All these reports and more information about the integrated project "SafetyNet" which is co-financed by the European Commission, Directorate-General Energy and Transport are also available at the SafetyNet website: www.erso.eu/.

6 Glossary

The CARE glossary provides short definitions for variables used in the Annual Statistical Report, and includes short definitions of CARE common values.

The glossary has two components:

- A **definition** of the common value
- The **availability** of the common value in the data file for each Member State.

ACCIDENT

ACCIDENT

Definition: Occurs on a public road. Occurs on a private road to which the public has right of access (except BE, NL, PT). Involves at least one moving vehicle (except UK, PT). Involves at least one injured or killed person. Is reported by the police. Self reporting possible (BE, UK, EL, IT, IE). Self reporting not possible (DK, FI, NL, AT, PT). Confirmed suicides excluded (BE, UK, IE, NL, AT, DK, PT). Confirmed suicides included (ES, IT, LU).

Note: The variation in the groups of road and the coverage of the injury categories included in injury accidents, together with differences in the level of self reported accidents, will lead to significant variations in the number of injury accidents reported, and their reporting rate, between Member States.

FATAL ACCIDENT

Definition: Accident with at least one killed person regardless the injury severity of any other involved persons.

Note: See "killed" definition from Injury Severity defined in Person type item (Death within 30 days of a road accident [UN/ECE Geneva 1995 – Statistics of Road Traffic Accidents in Europe and North America], except AT [3 days before 1992], ES [24 hours in CARE; 24 hours before 1993 in publication], FR [6 days], GR [24 hours], IT [7 days], PT [24 hours]. Suicide not included [except DK, ES, FR]. Natural death not included [except LU, SE]).

Data availability: All countries

TIME TYPE ITEMS

MONTH

Definition: Calendar month

Data availability: All countries (except DK)

HOUR

Definition: Period of 60 minutes. Rounded down to whole hours (except EL, ES, IT: rounded to nearest hour).

Note: Winter time is:

- GMT from November to March (DE from 1996 onwards, GB, IE, NI, PT)
- GMT +1 hour from October to March (BE, AT, DK prior to 1996, DK, ES, FR, IT, LU, NL, SE)
- GMT +2 hours from October to March (EL, FI).

Summer time is one hour ahead of winter time:

- GMT +1 hour from April to October (DK from 1996 onwards, GB, IE, NI, PT)
- GMT +2 hours from April to September (AT, BE, DK prior to 1996, DK, ES, FR, IT, LU, NL, SE)
- GMT +3 hours from April to September (EL, FI)

For PT, unknown hour coded as '12' during daytime and '0' during night time

Data availability: All countries (except DK)

DAY OF WEEK

Definition: 24 hour day within 7 day week.

Note: Data calculated by the CARE system from the date of accident, where data is not available in national files (AT from 1992 onwards, BE, FR prior to 1993, PT, SE).

Data availability: All countries.

PERSON CLASS

DRIVER

Definition: Person driving or riding any motorised vehicle or pedal cycle. Person herding animals is not a driver (except BE, AT). Learner driver is a driver (except ES, PT). Learner driver is a driver during a driving test, but not in a driving lesson (DK). Driving instructor is not a driver (except ES, PT). Driving instructor is a driver during a driving lesson, but not during a driving test (DK).

Note: Uninjured drivers are included in the database (except GB, NI, NL: implicitly included in vehicle records only). Data on driving instructors and learner drivers collected separately from 1993 onwards (SE).

Data availability: All countries.

PASSENGER

Definition: Person on or in a vehicle, who is not the driver. Includes person in the act of boarding or alighting from a vehicle (except DK). Learner driver is not a passenger (except ES, PT). Learner driver is a passenger during a driving lesson, but not during a driving test (DK). Driving instructor is a passenger (except ES, PT). Driving instructor is a passenger during a driving test, but not in a driving lesson (DK).

Note: Uninjured passengers not included in the database (except FR, IE, LU; ES, FI in some cases, AT).

Data availability: All countries.

PEDESTRIAN

Definition: Person on foot. Person pushing or holding bicycle (except DK). Person pushing a pram or pushchair. Person leading or herding an animal (except DK, AT). Person riding a toy cycle on the footway (except AT). Person on roller skates, skateboard or skis (except AT). Does not include person in the act of boarding or alighting from a vehicle (except DK, ES).

Note: Uninjured pedestrians not included in the database (except BE, IE, LU, NL implicitly included in element records; DK, FR, FI, AT, SE if they caused the accident; ES not consistently).

Data availability: All countries.

TYPE OF INJURY

INJURED

Definition: Injured with application of correcting coefficient as stated for the 'Killed at 30 days'. Injured in a road accident. Hospitalisation or medical treatment not necessarily required (except FR). Self declaration of injury (DK if slight; FI, GB, IT, IE, NL). Opinion of the police. Aggregation of the following injury severities: SERIOUSLY INJURED AS REPORTED + SLIGHTLY INJURED + INJURED - 1 COEFFICIENT

Data availability: All countries

FATALITIES

Definition:

Death within 30 days of a road accident (UN/ECE Geneva 1995 – Statistics of Road Traffic Accidents in Europe and North America, annex 1). Suicide not included (except DK, ES, FR). Natural death not included (except LU, SE). Corrective factors have been applied to comply with this international definition for the following countries: EL (24 hours), ES (24 hours in CARE; 24 hours before 1993 in publication), FR (6 days), IT (7 days), AT (3 days before 1992), PT (24 hours).

Data availability: All countries.

| Member State | Correcting factors | | |
|--|--|---------------------|---------------------|
| Greece | $K(30) = K * 1.18$ up to 1995 | | |
| Spain | $K(30) = K * 1.3$ up to 1992 | | |
| | 1993 up to 1996: | Outside urban area | Inside urban area |
| | Driver | $K(30)=K+SI*2.46\%$ | $K(30)=K+SI*1.02\%$ |
| | Passenger | $K(30)=K+SI*2.29\%$ | $K(30)=K+SI*0.94\%$ |
| | Pedestrian | $K(30)=K+SI*7.22\%$ | $K(30)=K+SI*3.87\%$ |
| | 1997 up to 2000: | Outside urban area | Inside urban area |
| | Driver | $K(30)=K+SI*2.44\%$ | $K(30)=K+SI*1.93\%$ |
| | Passenger | $K(30)=K+SI*2.17\%$ | $K(30)=K+SI*1.80\%$ |
| | Pedestrian | $K(30)=K+SI*4.76\%$ | $K(30)=K+SI*5.71\%$ |
| | 2001 up to 2004: | Outside urban area | Inside urban area |
| | Driver | $K(30)=K+SI*2.41\%$ | $K(30)=K+SI*2.17\%$ |
| | Passenger | $K(30)=K+SI*2.24\%$ | $K(30)=K+SI*2.15\%$ |
| | Pedestrian | $K(30)=K+SI*6.17\%$ | $K(30)=K+SI*4.34\%$ |
| France | $K(30) = K * 1.09$ up to 1993 $K(30) = K * 1.057$ from 1994 onwards | | |
| Italy | $K(30) = K * 1.078$ | | |
| Austria | $K(30) = K * 1.12$ only for 1991 | | |
| Portugal | $K(30) = K * 1.3$ up to 1997 $K(30) = K * 1.14$ from 1998 onwards | | |
| K: number of persons killed, SI: number of persons seriously injured | | | |

GENDER

FEMALE

Definition:

Determined by the police (except ES, IT, LU, AT, PT: on the basis of identity documents; DK, FI, SE: on the basis of personal ID number).

Data availability: All countries.

MALE

- Definition: Determined by the police (except ES, IT, LU, AT, PT: on the basis of identity documents; DK, FI, SE: on the basis of personal ID number).
- Data availability: All countries.

AGE

AGE

- Definition: Length of life of person. Rounded down to whole number of years (except EL, IT, NI: rounded to nearest year).
- Note: Age 0 to 1 is exceptionally rounded up (FR, IT, IE, LU, NI, PT). Age over 99 only available for ES, FR (1993 on), NL.
- Data availability: All countries.

AREA TYPE

INSIDE URBAN AREA

- Definition: Area inside urban area boundary signs (except IE, UK). Includes dual carriageways and national roads. Can include motorways (except DK, EL, IT). Opinion of the police (DK, SE).
- Note: Data approximated from speed limit of 40 mph or less (IE, UK).
- Data availability: All countries.

OUTSIDE URBAN AREA

- Definition: Area outside urban area boundary signs. Opinion of the police (DK, SE). Includes motorways.
- Note: Data approximated from speed limit of over 40 mph (IE, UK).
- Data availability: All countries.

MOTORWAY

- Definition: Public road with dual carriageways, and at least two lanes each way. Entrance and exit signposted. Road with grade separated interchanges. Road with a central barrier or central reservation. No crossing permitted. No stopping permitted unless in an emergency. Entry prohibited for pedestrians, animals, pedal cycles, mopeds, agricultural vehicles; learner drivers (BE, GB, EL, IE, NI, PT). Access restricted to motor vehicles (DK, FI, AT). Minimum speed between 50 km/h and 80 km/h (except FR, UK). Maximum speed between 100 km/h and 130 km/h.
- Data availability: All countries.

MODES OF TRANSPORT – VEHICLE GROUP

AGRICULTURAL TRACTOR

- Definition: Motor vehicle for agricultural use, with wheels or caterpillar tracks, with at least two axles. Driving licence required (DK, EL, ES, FI, GB, IT, IE, LU, AT; not in FR). Maximum speed 30 km/h or 40 km/h.
- Data availability: All countries (except DK prior to 1997, AT, FR, GB, IE from 1996 onwards, LU).

Value included in another value:

agricultural machine (FR), construction or agricultural machine (DK, AT prior to 1997), agricultural or industrial tractor (LU), other motor vehicle (GB), other (IE from 1996 onwards).

BUS OR COACH

Definition: Motor vehicle with at least four wheels, used for transporting people. Public or private use. Type D driving licence required (BE, GB, IE, NI). Includes bus, more than 8 and 16 seats, minibus, trolley-bus (except LU), scheduled bus, unscheduled bus, school bus.

Data availability: All countries.

CAR OR TAXI

Definition: Includes car, taxi. Motor vehicle with four wheels. Used to transport only or mainly people. Seating for no more than 8 passengers. Type B driving licence required. Includes taxi-bus (NL).

Data availability: All countries.

HEAVY GOODS VEHICLE

Definition: Includes road tractor, road tractor with semi trailer, lorry over 3,5 tonnes. Motor vehicle with at least four wheels, with a permissible gross vehicle weight of over 3.5 tonnes, used only for the transport of goods. With or without a trailer. Type C driving licence required. Includes lorry, over 3.5 tonnes ; road tractor ; road tractor with semi-trailer ; lorry with trailer ; tanker (except FI).

Note: Lorries cannot systematically be categorised as over 3.5 tonnes (DK, IT).

Data availability: All countries (except DE, IT).

LORRY, LESS THAN 3,5 TONNES

Definition: Motor vehicle with a permissible gross vehicle weight of less than 3.5 tonnes, used only for the transport of goods. Type B driving licence required.

Note: Lorries cannot systematically be categorised as less than 3.5 tonnes (DK, IT).

Data availability: All countries (except DK, IT, LU).

MOPED

Definition: Motor vehicle with two wheels, with an engine size of less than 50 cc. Design speed between 25 km/h and 50 km/h. One or two seats. Minimum age for driver between 14 and 18 (except IT). No driving licence required (ES, FR, FI, GB, IT, PT, SE). Unregistered vehicle (BE, DK, ES, FR, SE).

Data availability: All countries (except IE from 1996 onwards).

Value included in another value: Two wheeled motor vehicle (IE from 1996 onwards).

MOTORCYCLE

Definition: Motor vehicle with two or three wheels (not three wheeled in DK), with an engine size of more than 50 cc. With a trailer possible (except DK). With a sidecar possible. Registered vehicle (except PT). Type A driving licence required. Includes motor scooter (except FR).

Data availability: All countries (except IE from 1996 onwards).

Value included in another value: two wheeled motor vehicle (IE from 1996 onwards).

OTHER VEHICLE

Definition: Includes other non-motor vehicle, other motor vehicle.

PEDAL CYCLE

Definition: Vehicle with at least two wheels, without engine, moved by pedals or hand cranks. With or without a trailer. With or without passengers. Ridden in the carriageway. Ridden on the pavement (except DK, LU).

Data availability: All countries.

PEDESTRIAN

Definition: Wherever a person's person class has been identified as being pedestrian, its vehicle type is "pedestrian". This as opposed to older version of CARE where a pedestrian didn't have a vehicle type.

Data availability: All countries.

JUNCTION TYPE

JUNCTION

Definition: Road intersection with three or more arms. Not grade separated. Includes t junction, y junction, crossroad, level crossing (except DK, FI, GB, NI), roundabout (except FR), multiple junction.

Data availability: All countries (except EL).

CROSSROAD

Definition: Road intersection with four arms. Opinion of the police (DK, ES, FI; not AT).

Data availability: All countries (except BE, EL).

NOT AT A JUNCTION

Definition: Position on road more than 20m from a junction or roundabout (GB, IE, NI, NL, AT). Position on road more than 50m from a junction (FR). Opinion of the police (BE, DK, ES, FI, IT, LU, SE).

Data availability: All countries (except EL).

ROUNDABOUT

Definition: Circular highway. Includes sections of the road leading into it, within 20m (GB, IE, NI, AT). Opinion of the police (DK, ES, FR, IT).

Data availability: All countries (except BE, DK, EL, FI, LU, PT).

T OR Y JUNCTION

Definition: Road intersection with three arms. Includes t junction, y junction, staggered junction.

Data availability: All countries (except BE, EL, FI, IT, PT).
