## PREFACE

The 1989-90 North Dakota Grain and Oilseed Transportation Statistics Report was prepared by Barry M. Olsen, Student Research Assistant, and Daniel L. Zink, Transportation Economist, Upper Great Plains Transportation Institute. The authors gratefully acknowledge the desktop publishing assistance of Ms. Angela Carroll in constructing this report.

This report represents a continuation of analysis concerned with the patterns and methods of distributing grains and oilseeds from North Dakota. This series began with the analysis of 1956-57 data and was published in Agricultural Economics Reports 15, 17, 44, and 56, and Agricultural Experiment Station Bulletin 462. The compilation and analysis of data for the year 1967-68 in this series was assumed by the Upper Great Plains Transportation Institute. Also, the data representing the 1967-68 period were the first results of the requirements of the North Dakota Public Service Commission that all North Dakota elevators report monthly movements of grains and oilseeds by truck and rail. Prior to 1967-68, these data had been estimated from questionnaires completed by a sample of country elevators.

# NORTH DAKOTA GRAIN AND OILSEED TRANSPORTATION STATISTICS 1989-90

## Objective of Report

The report represents a continuation of analysis concerned with the patterns and methods of distributing grain from North Dakota. The collection and compilation of this type of data began in 1956-57. The objectives of this report, like prior reports, is to provide the necessary data base for identifying trends in the distribution of grain and oilseeds from North Dakota.

## Scope of Report

Data were tabulated according to major characteristics which typically describe commodity flows. The major shipment characteristics considered were: destination, mode, origin, time and commodity. These characteristics were defined as follows:

**Destination:** Minneapolis-St. Paul, Duluth-Superior, West (ID, OR, WA), and miscellaneous markets. Miscellaneous markets consist of Other Minnesota/Wisconsin, Midland/Southwest States (AR, AZ, CA, CO, IA, KS, LA, MO, MT, NE, NM, NV, OK, SD, TX, and WY), North Dakota and other destinations.

**Mode:** Rail or truck. Rail includes Commodity Credit Corporation shipments.

**Origin:** The nine crop reporting districts in North Dakota (Figure 1).

**Time:** By month, from July 1989 to June 1990, and previous years.

**Commodity:** Hard red spring wheat, durum, barley, sunflower, oats, soybeans, flax and corn.

## Source of Data

The data used to analyze North Dakota grain distribution patterns for the period July 1989 through June 1990 were obtained from all country elevators in North Dakota. The data source is the North Dakota Public Service Commission's "Grain Movement Report." Every country elevator in North Dakota is required under state statute to assemble and submit a "Grain Movement Report" to the Public Service Commission on a monthly basis.

## Organization of the Remainder of the Report

The same general commodity flow characteristics are considered in this report as in previous reports of this nature. Flow patterns for each type of grain are described in separate sections in the following order: (1) Total grain and oilseed shipments, (2) Hard red spring wheat, (3) Durum, (4) Barley, (5) Sunflower, (6) Oats, (7) Soybeans, (8) Flax, and (9) Corn.

Some small inconsistencies in totals may be noted when comparing tables and graphs due to rounding error.

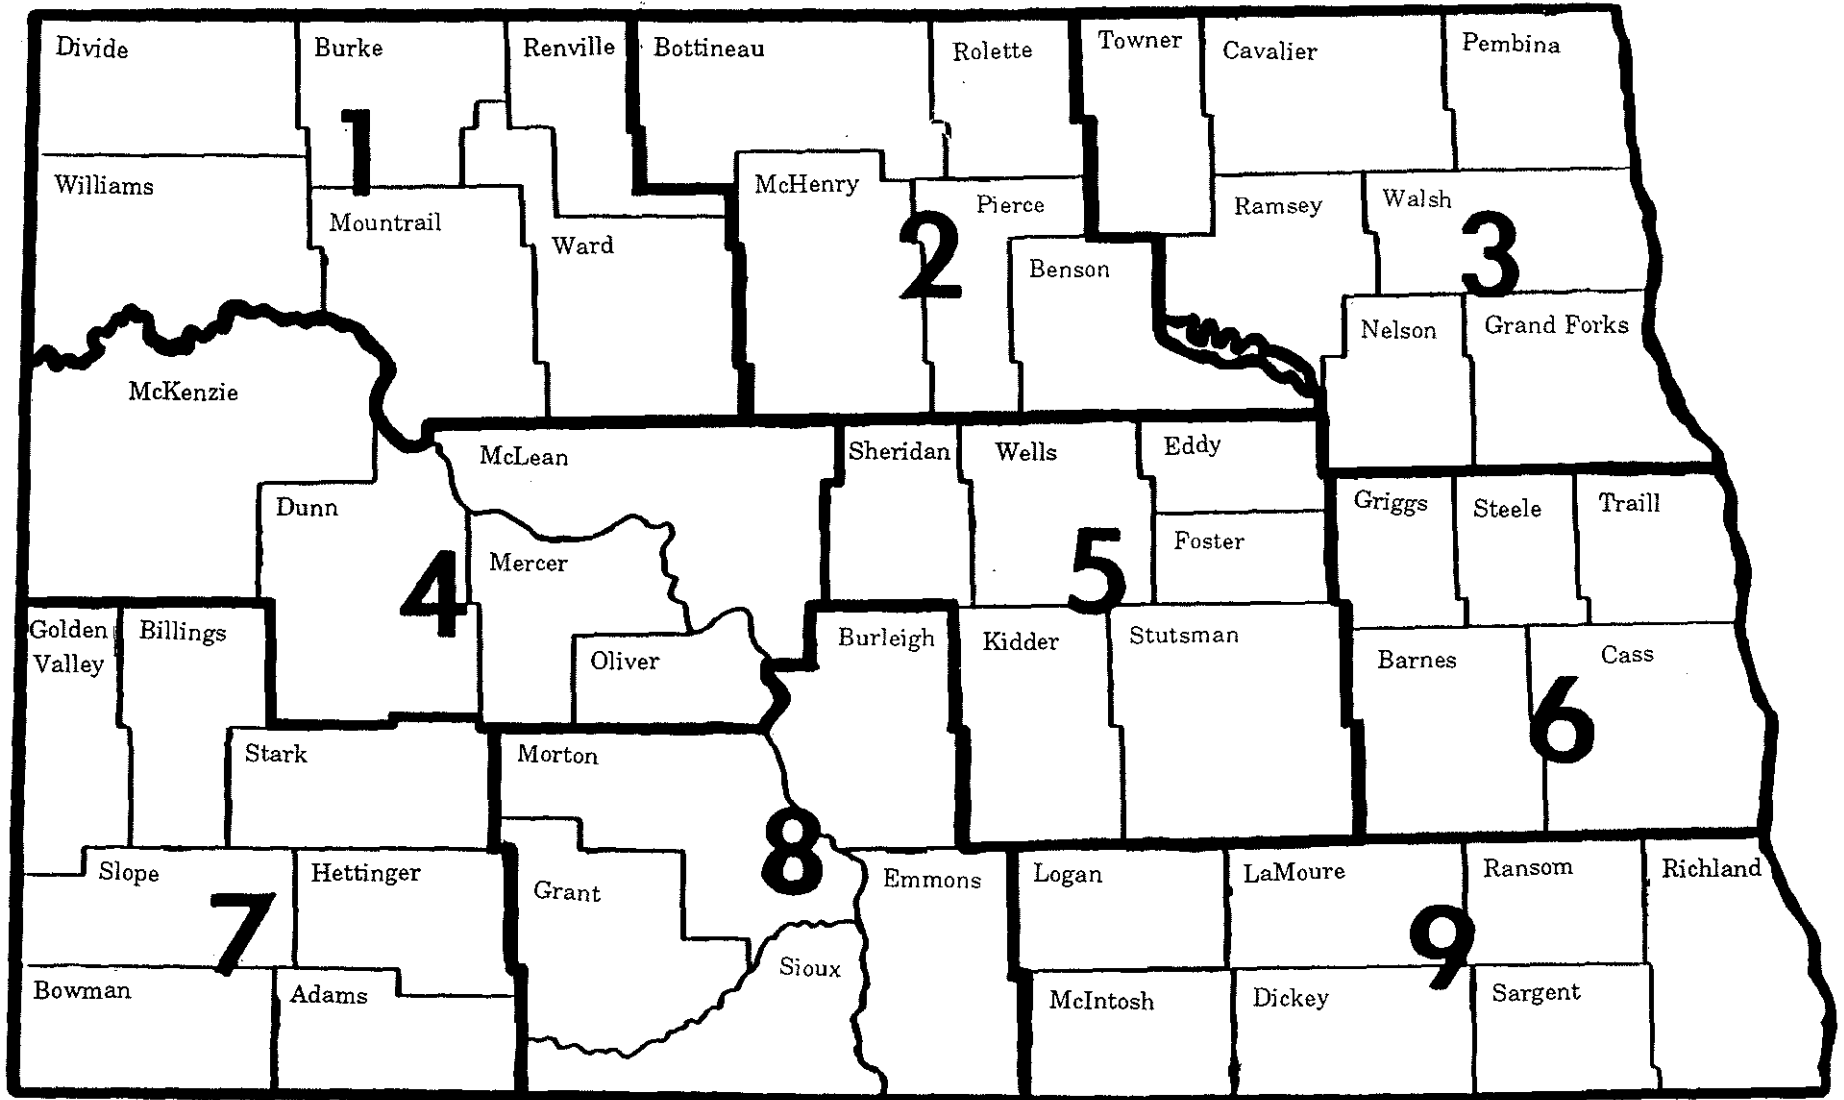

Figure 1. North Dakota Crop Reporting Districts and Counties.
