Grain trucking is an integral segment of the transportation industry in North Dakota. As changes in the grain marketing infrastructure occur, motor carriers are becoming increasingly important with respect to intrastate as well as interstate grain movements.

This directory was published with two goals in mind. First, it serves as a list to shippers in identifying inter- and intrastate grain haulers. Second, it publicizes firms that operate in the grain trucking industry.

There are two new features in this directory. First, the first section includes truckers who responded to a Transportation Institute post card survey. Greater information is available about these truckers, including the markets served and commodities hauled. Second, the directory also includes a list of potential grain truckers along with their addresses and phone numbers. These are not confirmed grain truckers; thus, any inquiries should be directed to the firm's owner as to the commodities hauled or the markets served.

A special thanks goes out to all the grain truckers who took the time to complete our survey. Unfortunately, not all firms operating in the industry were identified. Therefore, if you know of anyone who would like to be included in future editions of the directory, please contact the Upper Great Plains Transportation Institute. This directory will be updated on a periodic basis so any comments, additions, deletions, or corrections would

be greatly appreciated.

This publication is for reference only and does not accredit or certify the performance of any firm.

example:

Corn	\$ 98.50	=	\$2.50	x	39.4
Wheat	\$139.46	=	\$3.80	x	36.7

Price per short ton = (price per bushel) x (bushels per short ton)

example:

Soybeans	\$216.45	=	\$6.50	x	33.3
Barley	\$ 91.74	=	\$2.20	x	41.7

3) CAPACITY

LIQUID MEASURE

1 quart = 57.75 cubic inches = .946 liters
1 gallon = 231.00 cubic inches = 3.785 liters

DRY MEASURE

1 bushel = 2150.42 cubic inches = 1.244 cubic feet = 35.238 liters
1 cubic meter = 28.38 bushels

CONVERSION FACTORS

gallons x 3.785 = liters
liters x .2642 = gallons
100 gallons = 378.5 liters
100 liters = 26.42 gallons
cubic feet x .804 = bushels
1000 cubic feet = 804 bushels

4) LENGTHS

1 inch = 2.54 centimeters
1 meter = 100 centimeters = 39.37 inches = 3.2808 feet
