

Rhonda Faught Secretary, NMDOT

The New Mexico Department of Transportation is pleased to provide the state with a compilation of traffic crash information utilized by our safety partners to implement and develop programs that make our roadways safer for the traveling public.

The mission of the Traffic Safety Bureau of the New Mexico Department of Transportation is to reduce traffic related fatalities, injuries and crashes. The Bureau is responsible for the development of the State Highway Safety and Performance Plan and is instrumental in obtaining federal funds authorized under the Transportation Equity Act. Federal grants administered by the Bureau fund programs associated with occupant protection, child protective education, impaired driving, state and community highway safety, data systems, alcohol incentives, etc.

The Traffic Safety Bureau, law enforcement agencies, and partnering organizations are making great strides in preventing traffic-related crashes. State and federally funded programs such as statewide driver education, DWI driving schools, selective traffic enforcement projects, operation DWI, operation buckle down, Super Blitz checkpoints and saturation patrols, pedestrian safety, motorcycle safety, and related law enforcement training programs are framing the attitudes and beliefs of the driving public.

Our partners, state and local government agencies, non-profit organizations, legislators, and law enforcement agencies are responsible for the successful changes and safer New Mexico roadways.

Thank you all for your service and dedication.

INTRODUCTION

This edition of *New Mexico Traffic Crash Information* reviews traffic crash data in New Mexico from January through December, 2003. It presents crash data in the form of graphs for those who prefer an impressionistic view and tables for those who require reference information. Maps are provided where a geographic perspective is useful.

The statistics shown in this publication reflect only those crashes that occurred on public roadways and resulted in death, personal injury, or \$500 or more in property damage according to the investigating officer's judgement. No account is kept of unreported crashes or crashes that occurred on private property.

The information found in this report was drawn from the Uniform Accident reports, which are distinct from those required by New Mexico's Financial Responsibility Act: statutes 66-5-201 to 66-5-239. These reports are compiled and processed by the Transportation Statistics Bureau of the New Mexico Department of Transportation, and analyzed under contract by the Division of Government Research for statistical analysis and report generation. Since the data are occasionally incomplete or imprecise, discrepancies may be found in a few tables, or in comparison to other data sources. Estimated and revised figures are indicated where applicable. The tables and graphs which appeared in editions of this report prior to 1993 only showed counts of occupants that were involved in fatal or injury crashes. Since 1993, these same tables and graphs display counts of all occupants involved in crashes (i.e., this now includes occupants involved in property-damageonly crashes).

A great debt is owed to those hundreds of police officers across the state who made this report possible.

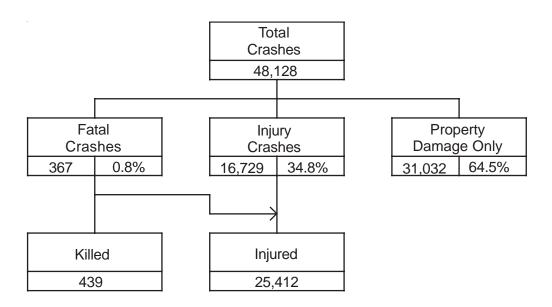

Note: The 1999 crash file contains 15% fewer crashes than the 1998 file. This may be due to problems in implementing the new system after the old system failed, or to underreporting. Care should be used in interpreting differences between 1999 and other years.

The following is a list of terms and associated definitions which appear throughout this report.

- Alcohol-involved a crash in which the Uniform Accident report indicated that 1) a DWI citation was issued, 2) alcohol was a contributing factor to the crash, or 3) a driver or pedestrian involved in the crash had been drinking.
- Crash Rate crashes per 100 Million Vehicle Miles (mvm) unless otherwise specified.
- Death Rate traffic fatalities per 100 Million Vehicle Miles (mvm) unless otherwise specified.
- Drivers drivers do not include pedalcyclists or pedestrians.
- Fatal Crash a crash in which at least one individual was killed.
- Fatalities see killed.
- **Injured** the number of people injured in a crash, as opposed to the number of crashes in which people were injured. Counts include people injured but not killed in fatal crashes.
- **Injury Crash** a crash in which at least one individual was injured. Fatal crashes are not included in this category.
- **Killed** the number of people killed in a crash, as opposed to the number of crashes in which people were killed. The term fatalities is synonymous with killed.
- Local Resident a person whose residence was within 25 miles of the crash site.
- **Minor Injuries -** a possible non-visible injury, or an injury of unknown severity.
- **Property Damage Only (Property Damage)** designates a crash that did not involve injuries or fatalities.
- Rural an area with a population of 2,500 or less.
- Serious Injuries 1) an incapacitating injury, 2) a visible but not incapacitating injury.
- **Traffic Crash** an incident on a public roadway involving one or more motor vehicles that resulted in death, personal injury, or at least \$500 in property damage.
- Urban a town or a city with a population of 2,500 or more.
- **Vehicle Miles** the number of miles traveled annually by motor vehicles. MVM and 100 MVM stand for million and one hundred million vehicle miles, respectively.

- An individual died in a crash every 20 hours.
- A person was injured in a crash every 21 minutes.
- A traffic crash occurred every 11 minutes.

Crashes in New Mexico by Severity, 2003

o Non Alcohol-involved Fatality

Alcohol-involved Fatality

Unlike other graphs and tables in this section, crashes that occur between midnight and 5:59 am are not shifted to the previous day.

In 2003, three times as many people were injured in urban area crashes as in rural.

| | | Cras | | | | |
|-------------------|-------|-------|--------|----------|--------|---------|
| Pueblo or | | | | Property | | |

| Tucumcari | 80 | 8 | 14.4 | 1.44 | 5,564 |

1 Cities selected are those with a population of 3,500 or more.

- 2 Only crashes investigated by local police departments are included. This is not comparable to this table in reports prior to 1997.
- 3 Rates are per 1,000 residents.
- 4 Fatal and injury crashes include crashes involving fatal, incapacitating, and visible injuries, but exclude crashes where there was only complaint of injury.

* may be under reported.

New Mexico's Seven Highest Fatal and Injury Crash Intersections, 2003

| | | Crashes | S | |
|---|-------------|---------|-------|--------|
| Intersection | City | Total | Fatal | Injury |
| Coors Blvd NW & Paseo Del Norte Blvd NE | Albuquerque | 123 | 0 | 48 |
| Jefferson St NE & Paseo Del Norte Blvd NE | Albuquerque | 105 | 0 | 41 |
| Montgomery Blvd NE & Wyoming Blvd NE | Albuquerque | 130 | 0 | 38 |
| Coors Blvd By-pass NW & Ellison Dr NW | Albuquerque | 101 | 0 | 37 |
| Montgomery Blvd NE & San Mateo Blvd NE | Albuquerque | 118 | 1 | 32 |
| NM 584 & Riverside Dr | Española | 71 | 0 | 33 |
| 7 Bar Loop NW & Coors Blvd NW | Albuquerque | 80 | 0 | 32 |

• Intersections are ranked by the total number of fatal and injury crashes. Busy intersections will tend to have the highest number of crashes, but will not necessarily have the highest number of fatal and injury crashes.

New Mexico's Highest Crash Rate Rural Highway Segments, 2003

| | | | | | Crash | ies | |
|---------|-----------|------|----------|-------|-------|--------|-------|
| Highway | Mile post | | County | Total | Fatal | Injury | Rate |
| NM 76 | 4.0 to | 6.1 | Santa Fe | 21 | 0 | 11 | 233.5 |
| US 82 | 1.2 to | 3.0 | Otero | 8 | 0 | 6 | 208.6 |
| NM 28 | 5.3 to | 10.0 | Doña Ana | 10 | 0 | 8 | 203.3 |
| NM 75 | 13.4 to | 15.5 | Taos | 8 | 0 | 4 | 171.7 |
| NM 68 | 40.3 to | 42.4 | Taos | 39 | 1 | 17 | 168.4 |
| NM 28 | 10.0 to | 13.1 | Doña Ana | 8 | 0 | 4 | 167.5 |
| NM 47 | 17.4 to | 19.1 | Valencia | 7 | 0 | 6 | 160.6 |

Map: see inside back cover.

- The highway segment ranking was done on the basis of fatal and injury crashes per million vehicle miles. The most heavily traveled segments are likely to have the most crashes, but will not necessarily have the highest crash rates. Segments selected have high rates compared to segments with similar characteristics.
- The two segements on NM 28 are adjacent, i.e. they form a single segment on the route. They are presented separately because segments are defined based on similar road characteristics.

CRASH DETAILS

Contributing Factors of Crashes in New Mexico, 2003

| Contributing Factor | | _ | Perc | ent of Invo | olvements | | |
|---------------------------|------|---|------|-------------|-----------|------|------|
| Driver inattention | 12.0 | | | | | | |
| Failure to yield | 9.6 | | | | | | |
| Following too close | 9.3 | | | | | | |
| Excessive speed | 8.2 | | | | | | |
| Other improper driving | 4.6 | | | | | | |
| Alcohol-involved | 3.9 | | | | | | |
| Disregard traffic control | 3.8 | | | | | | |
| Improper turn | 3.5 | | | | | | |
| Drove left of center | 1.8 | | | | | | |
| Mechanical defects | 1.7 | | | | | | |
| Improper overtaking | 1.4 | | | | | | |
| Other | 49.4 | | | | | | |
| | | | 10.0 | 20.0 | 30.0 | 40.0 | 50.0 |

• Percent of involvements is the percentage of all vehicles in crashes for which each contributing factor was coded. More than one contributing factor may be coded for each vehicle. For 49 percent of all vehicles, no contributing factors were indicated.

| Vehicle Type | Total | Fatal | Injury | Total |
|---------------|--------|-------|--------|---------------|

Senior Citizens Killed in Crashes in New Mexico, 1999 - 2003

Senior Citizens Injured in Crashes in New Mexico, 1999 - 2003

For this page, drivers and victims are senior citizens (people age 70 and older). Victims are all seniors killed or injured in crashes regardless of the age of the driver.

Prior to 1998 seniors were defined as 55 years or older. This year's data are therefore not comparable to data prior to 1998.

Senior Citizen Crash Facts in New Mexico, 2003

Six percent of all drivers in crashes were seniors, although seniors comprised nine percent of New Mexico's drivers.

- The number of senior injuries decreased from 1,220 to 1,181 in 2003.
- Twenty three male seniors and 17 female seniors died in crashes in 2003.
- Alcohol was a contributing factor in 15 percent of all crash deaths involving seniors.

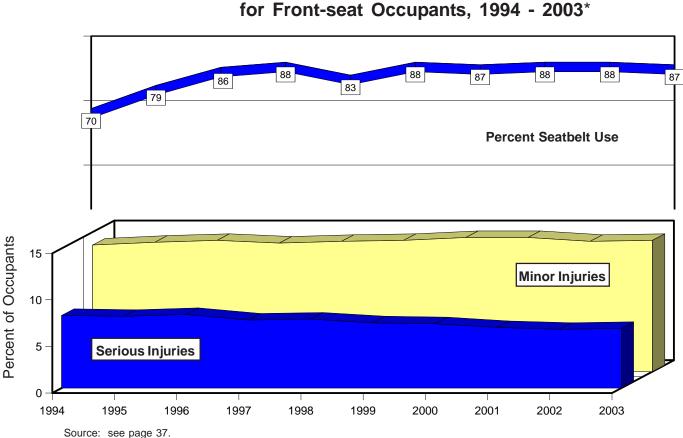

A senior was killed in a traffic crash every nine days and one was injured every seven hours.

■ Senior occupants' self-reported seatbelt use was 95 percent while that of all occupants was 97 percent.

 Eleven percent of crashes involving senior drivers occurred at night, while
27 percent of all crashes occured at night.

SEATBELT

The mandatory seatbelt law for drivers and front-seat passengers in cars became effective on January 1, 1986. A similar law for drivers and front-seat passengers riding in vehicles under 10,000 pounds became effective on June 16, 1989. The law was extended to *all* seating positions as of July, 2001. The fine for non-compliance is \$25.00.

Observed Seatbelt Usage and Crash Injury Severity for Front-seat Occupants, 1994 - 2003*

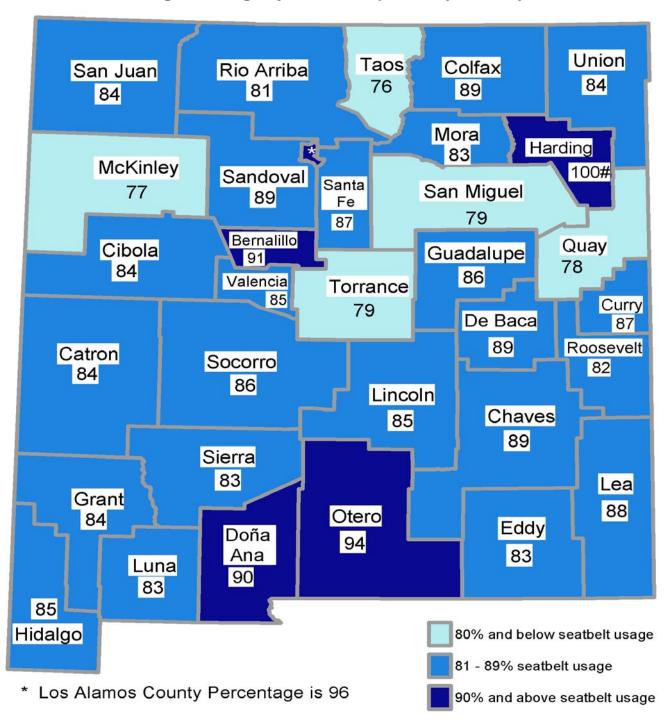

Since 1991, the proportion of people injured in crashes has increased, perhaps due to higher driving speeds. However, as observed seatbelt usage has increased there has been a noticeable shift from more severe to less severe injuries. This is particularly evident between 1990 and 1995, where a steady increase in minor injuries coincided with a consistent decrease in serious injuries. In 1998 a new technique was used to estimate seatbelt usage therefore, data from 1998 and thereafter are not comparable to previous years' data.

Crash Injuries in New Mexico by Reported Seatbelt Usage, 2003*

| | Belt worn ¹ | | Belt no | t worn | Total | |

1 In order to avoid citations, some people in less severe crashes may have reported wearing a seatbelt when they were not.

Information on this page only includes passenger cars, pickups, and vans or 4WD.

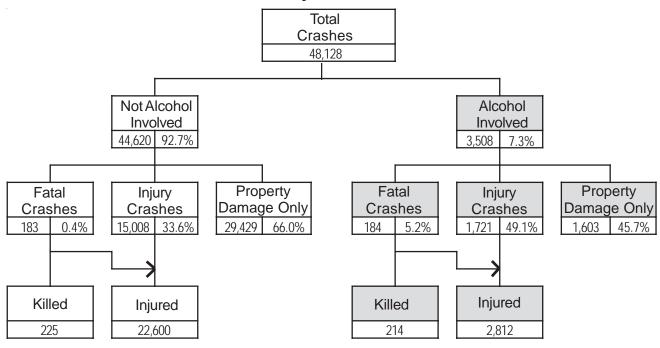

Seat Belt Usage among Injured Occupants by County, 2001-2003

In crashes, two people were injured in Harding County both were wearing seatbelts

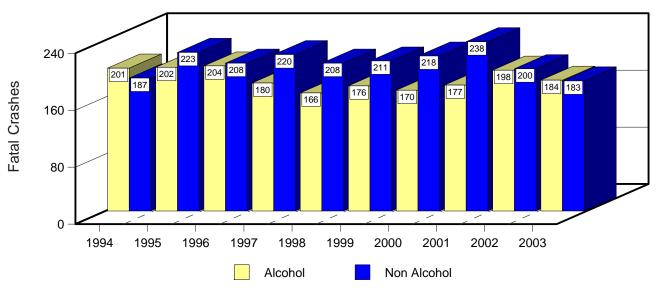

This map shows the average reported seatbelt usage in crashes for 2001-2003. The data are for drivers and right front passengers in vehicles registered in NM who recieved visible or incapacitating injuries in crashes. This proxy for overall seatbelt usage is used here because it has matched the results of observational surveys closely over the past 10 years. The statewide average for 2001-2003 was 87%.

- 50 percent of all fatal crashes involved alcohol.
- A person died in an alcohol-involved crash every 41 hours.
- A person was injured in an alcohol-involved crash every three hours.
- An alcohol-involved crash occurred every 150 minutes.

Crashes in New Mexico by Alcohol Involvement, 2003

Fatal Crashes in New Mexico by Alcohol Involvement, 1994 - 2003

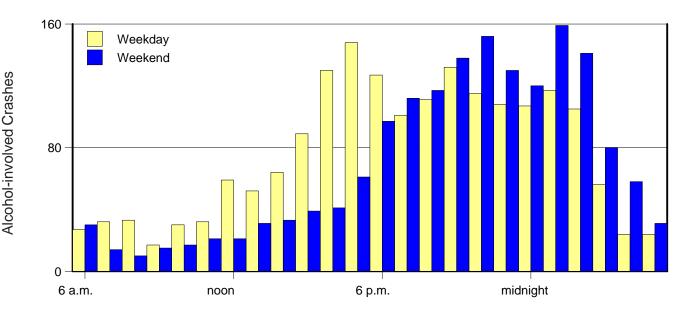

- 54 percent of all alcohol-involved fatal crashes occurred on Friday, Saturday, or Sunday.
- 41 percent of all alcohol-involved crashes happened on Friday or Saturday.
- More alcohol-involved crashes occurred between 5 p.m. and 6 p.m. than any other hour on weekdays.

Alcohol-involved Crashes in New Mexico by Day of the Week, 2003

Percent of Train Crashes Resulting in Fatalities or Injuries by Alcohol-involvement, 1994 - 2003

Percent

Traffic Safety Bureau

The data sources are:

- **Crash Files** information from crash reports submitted by the many law enforcement agencies in the state, which are compiled and processed by the Transportation Statistics Bureau and analyzed by the Division of Government Research, UNM.
- Licensed Drivers driver's license data maintained by the Motor Vehicle Division of the New Mexico Taxation and Revenue Department. Counts are current as of July 2003.
- **Motor Vehicle Registrations** counts are from the Motor Vehicle Division of the New Mexico Taxation and Revenue Department, which are published by the Bureau of Business and Economic Research, UNM (*University of New Mexico, Institute of Applied Research Services, Data Bank, 2002*).
- **Population** counts are from U.S. Department of Commerce, Bureau of the Census, Population Estimates Branch, July 2003.
- **Cost Estimates** the cost of crashes in New Mexico is based on Federal Highway Administration estimation formulae (*The Cost of Highway Crashes*, FHWA-RD-91-055, Federal Highway Administration, 1991). These are estimates, not actual dollar amounts. Included are direct costs such as lost wages and medical expenses, and indirect "willingness to pay" estimates of lost quality of life.
- Million Vehicle Miles (MVM) computations are based on the daily average vehicle miles traveled and system mileages by county and functional classification from the Highway Planning and Research Division of the New Mexico Department of Transportation. In 2000, the MVM for 1993-2000 were re-estimated, which resulted in lower MVMs and thus higher rates. Rates in reports prior to 2000 are not comparable.
- National Death Rates figures are calculated using fatalities from *the Monthly Traffic Fatality Report*, the National Center for Statistics & Analysis - Research & Development, the National Highway Traffic Safety Administration, the U.S. Department of Transportation, and the population counts from the Census Bureau.
- National Crash Rates The data for the national crash rates are derived from the General Estimates System (GES) which began operation in 1988. Care should be taken when comparing National and New Mexico crash rates because the statistics obtained from the GES are estimates based on a sample of crashes.
- Seatbelt data for seatbelts was prepared by the Injury Epidemiology Unit, Office of Epidemiology, Public Health Division (*Occupant Protection Survey, State of New Mexico, Department of Health, 2004*).

We are happy to have prepared this annual report for the New Mexico Traffic Safety Bureau for the twenty fifth year. This report displays a very small fraction of the data and information which are available about traffic crashes and highway conditions in New Mexico. The preparation of this publication entailed the extensive use of computerized files which are maintained by DGR, but owned by the New Mexico Department of Transportation. Hence, special requests for the use of crash data should be directed to the New Mexico Traffic Safety Bureau at (505) 827-0427.

For further information on these products and our specialized services in these and other fields, please contact:

Mr. James Davis, Director - DGR (505) 277-3305. email: dgrint@unm.edu web site: http://www.unm.edu/~dgrint
