July 2007

The Ohio Department of Public Safety is pleased to present the 2006 Ohio Traffic Crash Facts Book, an in-depth highway safety statistical profile and analysis compiled from data supplied by law enforcement agencies from across the state.

This annual report provides a comprehensive look at the driving habits of Ohioans. It also helps the Ohio Department of Public Safety and local law enforcement agencies determine priorities and allocate resources dedicated to improving highway safety in Ohio.

2006 was an historic year for highway safety in the state of Ohio, with the traffic crash fatality rate reaching a 70-year low and seat belt usage rate among Ohioans reaching an all-time high level of 82 percent.

The credit for our safety success goes to the dedicated members of the Ohio State Highway Patrol and our local law enforcement partners, and the continuing trends in the crash fatality rate declines and increased seat belt usage are encouraging to those who educate the motoring public and promote safe driving messages across the state.

While we've made tremendous strides in our key areas of emphasis, we must do more to keep Ohio's youngest drivers safe. Ohio House Bill 343, which took effect in April 2007, places certain restrictions on the operation of motor vehicles by probationary license holders and temporary instruction permit holders who are less than 18 years of age. Under the new law, probationary driver license holders under the age of 17 are not permitted to operate a motor vehicle with more than one person who is not a family member in the vehicle, unless accompanied by the license holder's parent, guardian, or legal custodian.

Studies conducted by the Insurance Institute for Highway Safety have shown that one passenger doubles the risk of a fatal crash among teen drivers, two passengers triple the risk, and three or more passengers increase the risk by more than six. This new law was put into place to keep our children safe on Ohio's highways, and I ask all of our law enforcement partners to work within your communities to educate teen drivers and parents on this new law.

In closing, the progress we've made reflects our strong commitment to improve safety on behalf of Governor Strickland. I commend everyone who has dedicated their efforts to accomplishing this mission. Working together, let's make 2007 another benchmark year for highway safety and public safety.

Sincerely,

Henry Guzmán, Director  
Ohio Department of Public Safety

- *Prior to 2001, C) Yes, Has Been Drinking (HBD) Not Impaired, was included, however it was removed in 2001 to better represent alcohol-related crashes.*

## Notations

- A new crash form was implemented in July 2000. Therefore data from both the old and new crash forms are combined in crash year 2000. New values were added to the new crash form (ex. Crash Severity Flag of Unknown, Unit Type of SUV-Sport Utility Vehicle, etc.), thus differences may be recognized in the Crash Facts statistics between crash years.
- An alcohol-related crash involves a driver or pedestrian in which A) Yes, Alcohol Suspected, or B) Yes, Alcohol/Drugs Suspected. Prior to 2001, C) Yes, Has Been Drinking (HBD) Not Impaired, was included, however it was removed in 2001 to better represent alcohol related crashes.
- All percentages are rounded. Therefore, totals for those columns are generated from the statistics, not by adding up the columns.
