The Ohio Department of Public Safety is pleased to present the 2005 Ohio Traffic Crash Facts Book. These detailed statistics have been compiled from law enforcement agencies throughout the state, from the largest metropolitan areas to the smallest rural communities.

This data provides a comprehensive look at Ohio's driving habits. It also helps the Ohio Department of Public Safety and local law enforcement agencies determine priorities and allocate resources dedicated to improving highway safety in Ohio.

The most glaring statistic in this year's information is the major decrease in the total number of crashes. In fact, the 2005 crash total of 358,127 falls considerably below Ohio's 10-year crash average of 386,257. This drastic decline is definitely encouraging to those who educate the motoring public and promote safe driving messages across the state.

What is discouraging about these latest figures is the fact that although we saw far less crashes in 2005, there were significantly more motor vehicle fatalities reported than each of the past two years. While we have made progress to reduce the number of crashes, the severity has increased.

Major campaigns to increase safety belt use have encouraged occupants to buckle up more often. In one year, the safety belt usage rate climbed from 74% to 79%, which is an improvement, but we can still do better. The goal for 2006 is to reach 85%. Remember, safety is within your reach.

The progress we've made reflects our strong commitment to improve safety. I would like to commend everyone who has dedicated their efforts to accomplishing this mission, and hope you will continue to make that a priority. As long as the number of highway deaths remains as high as it is, and until there are no impaired drivers behind the wheel, our work will never be done. Let's all do our part to make 2006 the safest year ever.

Sincerely,

Kenneth L. Morckel, Director
Ohio Department of Public Safety

An **Alcohol-Related** crash involves a driver or pedestrian in which A) Yes, Alcohol Suspected, or B) Yes, Alcohol/Drugs Suspected.

- *Prior to 2001, C) Yes, Has Been Drinking (HBD) Not Impaired, was included, however it was removed in 2001 to better represent alcohol-related crashes.*

Notations

- A new crash form was implemented in July 2000. Therefore data from both the old and new crash forms are combined in crash year 2000. New values were added to the new crash form (ex. Crash Severity Flag of Unknown, Unit Type of SUV-Sport Utility Vehicle, etc.), thus differences may be recognized in the Crash Facts statistics between crash years.
- An alcohol-related crash involves a driver or pedestrian in which A) Yes, Alcohol Suspected, or B) Yes, Alcohol/Drugs Suspected. Prior to 2001, C) Yes, Has Been Drinking (HBD) Not Impaired, was included, however it was removed in 2001 to better represent alcohol related crashes.
- All percentages are rounded. Therefore, totals for those columns are generated from the statistics, not by adding up the columns.
