May 1, 2002

Every year, the Ohio Department of Public Safety compiles statistical data on crashes that occur on Ohio's roads and highways. The Ohio Department of Public Safety designed this information and the manner in which it is presented to be user-friendly as well as helpful in tracking public safety trends.

Motor vehicle crashes remain a top public safety concern in Ohio. According to the National Highway Traffic Safety Administration, one person dies in a fatal accident every 13 minutes; 114 people die every day; and 40,000 people die every year. Car crashes continue to lead the list as the number one cause of death for every age from 5 through 29 years of age.

The Ohio Department of Public Safety works to save lives and reduce injuries by lowering the number of annual motor vehicle crashes through its efforts to educate, to serve and to protect.

Motorists can protect themselves by following the rules of the road including always wearing a safety belt and choosing a designated driver.

Losing a loved one to a motor vehicle crash, especially one that could have been avoided, is heartbreaking. Attach a face to every number you read in these charts and realize that equals a lot of missed birthdays, missed anniversaries and missed holidays. Drive safely.

Sincerely,

Lt. Governor Maureen O'Connor
Director
Ohio Department of Public Safety

Notations

- A new crash form was implemented in July 2000. Therefore data from both the old and new crash forms are combined in crash year 2000. New values were added to the new crash form (ex. Crash Severity Flag of Unknown, Unit Type of SUV-Sport Utility Vehicle, etc.), thus differences may be recognized in the Crash Facts statistics between crash years.
- An alcohol-related crash involves a driver or pedestrian in which A) Yes, Alcohol Suspected, or B) Yes, Alcohol/Drugs Suspected. Prior to 2001, C) Yes, Has Been Drinking (HBD) Not Impaired, was included, however it was removed in 2001 to better represent alcohol related crashes.
- All percentages are rounded. Therefore, totals for those columns are generated from the statistics, not by adding up the columns.
