

# Ohio Department of Public Safety 1994 Traffic Crash Facts

## **DISCLAIMER**

Information contained in this report represents traffic crash data and supporting information from the Ohio Integrated Traffic Records System and various other state agency sources. Data presented herein represents the contents of those files on or about 7/1/94. Most of the data files that are used to generate this report are subject to minor changes over time due to continuing efforts to assure that the data contained therein is as accurate as possible. As such, some details of these reports may not be duplicable from the current Ohio Integrated Traffic Records System data files.

# **CHAPTER 1**

# **GENERAL STATISTICS**

# CHAPTER 1

## GENERAL STATISTICS

**Economic Loss** - The cost of crashes is also used to allow incorporation of those property damage crashes that are reported (the vast majority) as well as to recognize the significantly higher societal cost of fatal crashes. The United States Department of Transportation (US-DOT) cost estimates are used for fatal, injury and property damage crashes. Currently Ohio is using the following cost for crashes as defined within FHWA-RD-91-055, representing the most current thoughts relative to direct, and indirect, costs of traffic crashes. Beginning with 1991 final statistics, the Ohio Department of Public Safety (ODPS) has used the following costs, as prescribed in that bulletin:

**TABLE 1.00**  
**ECONOMIC COST OF TRAFFIC CRASHES**

Severity of Crash	Average Cost Per Crash	Average Cost Per Incident
Fatal Crash	\$ 2,723,000	\$ 2,393,000
Injury Crash	\$ 70,000	\$ 46,000
Incapacitating	\$ 229,000	\$ 170,000
Evident	\$ 48,000	\$ 33,000
Claimed	\$ 25,000	\$ 17,000
Property Damage Only	\$ 4,500	\$ 1,700

In Table 1.00, the cost of a crash "per incident" represents the cost per person killed or injured. Due to differences between Ohio and national distributions of fatal, injury, and property damage crashes, the computed costs will differ, depending upon the choice of a "per crash" or a "per incident" measure. In most cases, the "per crash" statistics are used.

# Definitions

**Alcohol-Related Crash:** A crash in which a vehicle driver or pedestrian had been drinking.

**At Fault:** A term that identifies the person, animal or condition that was the primary cause of a motor vehicle crash.

**Blood Alcohol Concentration (BAC):** The level of alcohol in a person's bloodstream. In Ohio, the legal limit of .10 equals a blood alcohol concentration of one part per thousand.

**Child Safety Seat:** Safety devices designed to fit in motor vehicles that keep children securely in place. The seats are required by law for children who weigh either under 40 pounds or who are less than four years old, or both.

**Crash:** An occurrence involving a moving motor vehicle that produces bodily injury or property damage. Crashes are generally caused by driver error, a defect in the vehicle or in the road pavement, or an obstruction on the pavement. It occurs on a road, or after the motor vehicle runs off the road, but before events are stabilized.

**Drinking Driver or Pedestrian:** A person identified as one who had been drinking at the time of the crash regardless of the level of impairment.

**Driver:** Any person of any age operating a vehicle, including non-motorized vehicles.

**Fatality vs. Fatal Crash:** A fatality is a death that results from a traffic crash. A fatal crash is a motor vehicle crash (single or multiple) that results in the death of one or more people. A fatal crash can cause one or more fatalities.

**Injury (motor-vehicle related):** Personal injuries are classified by the reporting offices as follows:

1. Fatality -- an injury that results in death within 30 days after the crash.
2. Serious visible injury -- an injury other than a fatality that prevents the injured person from continuing the normal activities he/she was capable of performing prior to the crash.
3. Minor visible injury -- an injury, other than a fatality or serious injury, which is evident to the observer at the crash scene.
4. No visible injury -- an injury that is not evident to the observer, but is claimed by the person, or suspected because of behavior.

**Moped:** A pedalcycle that has a motor.

**Motorcycle:** A motorized two-wheeled or three-wheeled vehicle with more than five-brake horsepower.

# DEFINITIONS

## Continued

**Motor Vehicle:** Any self-propelled vehicle that does not run on rails. Examples include, but are not limited to, automobiles, trucks, tractor-trailers and motorcycles.

**Occupant Restraints:** Devices for the protection of vehicle occupants found in motor vehicles that keep the driver and passengers in their seats and prevent them from being ejected from the motor vehicle upon impact. Restraint devices include lap belts, lab/shoulder harness combinations, and air bags.

**Occupant Restraint Usage:** The usage of occupant restraints reported in this documents is based upon either the usage indicated in traffic crash reports or observed usage. Usage rates from field observations include front seat occupants and small children covered by Ohio's child safety seat law.

**Property Damage Crash:** A traffic crash that results in no injuries or fatalities. Ohio laws requires that all crashes resulting in more that \$150 in damage be reported to the Ohio Department of Public Safety on the OH-1 Traffic Crash Report.

**Rural Area:** An unincorporated area or an incorporated area with a population under 2,500.

**Single vs. Multiple Vehicle Crashes:** Single vehicle crashes involved only one motor vehicle, but may include pedestrians. Multiple vehicle crashes involve two or more vehicles and may also include pedestrians.

**Speed Related Crash:** A traffic crash in which one or more vehicles were reported as exceeding the posted speed limit and/or where the reporting officer indicated that excessive speed for roadway conditions or loss of control was a contributing factor.

**Urban Area:** An area that is incorporated, usually a city with a population of 2,500 or more people.

**Youthful Driver:** A driver is considered a youthful driver if his or her age at the time of the crash was between 16 and 24, inclusive.
