

2004 WISCONSIN TRAFFIC CRASH FACTS

Prepared by the
Wisconsin Department
of Transportation

2004 Facts and Figures

- 784 persons were killed in Wisconsin motor vehicle traffic crashes. This is an average of two lives lost each day on Wisconsin trafficways.
- 55,258 persons were injured in 38,451 reported injury crashes and 714 fatal crashes. 5,257, or 10%, of those injured were known at the time of the crash to have sustained incapacitating injuries.
- Of the 784 persons killed, 9% (56 pedestrians and 14 bicyclists) were not drivers or passengers of motor vehicles. Ten percent (80) were motorcycle drivers or motorcycle passengers.
- Of the 784 persons killed, 42% died in alcohol-related crashes. 33% died in speed-related crashes and 19% died in crashes that involved both speed and alcohol.
- Of the 548 drivers who were killed and tested for alcohol concentration, 195 drivers (36%) had an alcohol concentration of .08 or above.
- 59% of persons killed in passenger car and light truck crashes (for instances in which safety belt use could be determined) were not using safety restraints.
- 77% of all motorcyclists killed in crashes (for instances in which helmet use could be determined) were not wearing helmets.
- Sixty percent of all crashes occurred off the state highway and interstate systems, on county trunk and local roads. City police and county sheriffs responded to 110,943 (86%) of these crashes.
- The total number of registered vehicles was 5,278,402 a 2% increase over 2004.
- The total number of licensed drivers was 3,933,348, a negligible decrease from 2004.
- The estimated fatality rate per 100 million miles of travel was 1.30.

Crashes, Not Accidents

Traffic crashes are not accidents, but are avoidable events caused by a single variable or chain of variables. Dedicated to reducing traffic injuries and fatalities by addressing the factors that cause them, the Bureau of Transportation Safety coordinates a statewide behavioral highway safety program.

Dear Traffic Safety Advocate:

The Wisconsin Department of Transportation is pleased to provide you with a copy of the 2004 edition of the *Wisconsin Traffic Crash Facts* book. This book serves as a resource for traffic safety professionals and those interested in making Wisconsin's roadways, sidewalks, and bicycle paths safe for all of us who travel them.

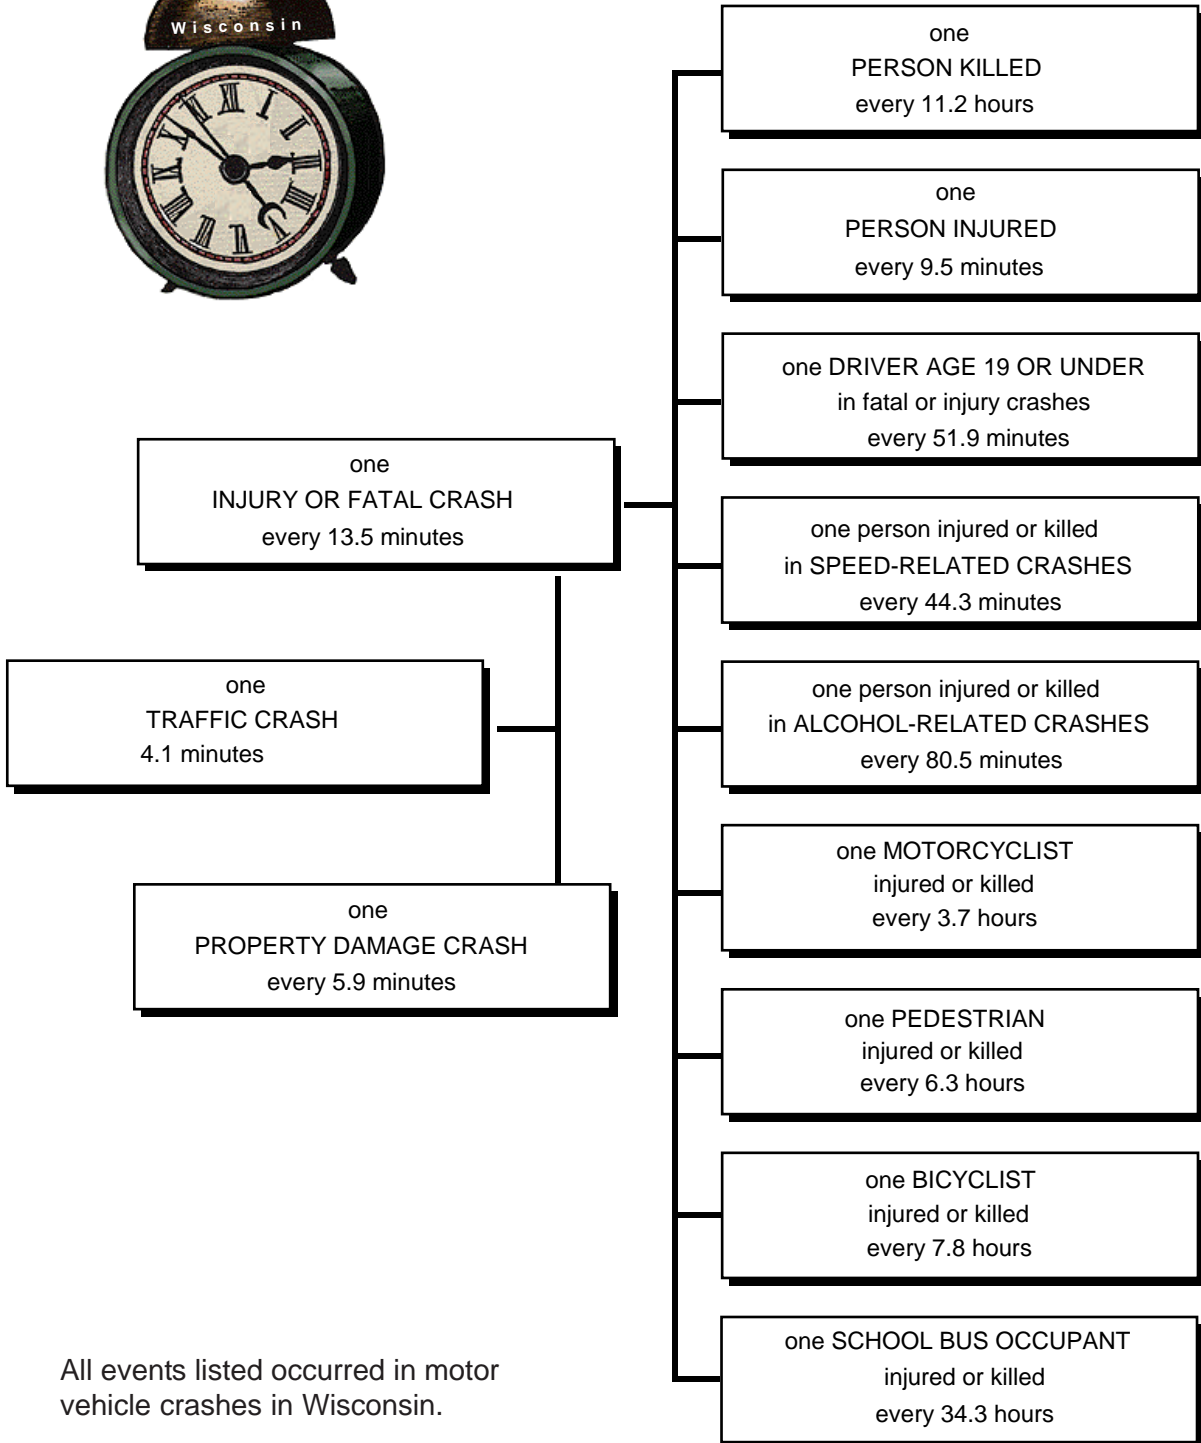

This book is comprised of statewide information about traffic crashes and their human consequences. The statewide counts are parsed to several levels of detail including: types of crashes, the county or municipality location of crashes, types of vehicles in crashes, severity of injuries, and age and gender of drivers. I extend my thanks to the principal researcher of this project, Mary Elizabeth Kunkel.

To view this publication online, visit www.dot.wisconsin.gov/. To obtain additional copies of the Crash Facts Book or more information about transportation safety in Wisconsin, please contact us.

Sincerely,

Major Daniel W. Lonsdorf, Director
Bureau of Transportation Safety

Recent Changes in Crash Reporting Threshold

- December 20, 1979** - Property damage threshold increased from \$200 to \$400 combined damage. \$200 threshold for government-owned property.
- July 31, 1981** - Property damage threshold \$500 to "any one person's property." \$200 threshold for government-owned property.
- April 19, 1988** - Property damage threshold \$500 to "any one person's property." Government-owned property changed to \$500 for government-owned vehicles, and \$200 for all other government-owned property.
- January 1, 1996** - Property damage threshold changed to \$1,000 to "any one person's property." Government-owned property changed to \$1,000 for government-owned vehicles, and remained at \$200 for all other government-owned property.

The "reporting threshold" is the minimum set of criteria that must be met before a crash is considered to be reportable. The above represent changes to the reporting threshold over recent years. See the Glossary at the end of the book for a full definition of a "reportable crash".

Note: Economic loss is calculated using 2003 National Safety Council estimates plus 3%, the consumer price index. Costs used were: Fatality: \$1,154,000, Incapacitating injury: \$57,200, Nonincapacitating injury: \$18,700, Possible injury: \$10,300, and Property damage: \$8,400.

Although this method of calculating economic loss is the same one used for the 1999, 2000, 2001, and 2002 *Wisconsin Traffic Crash Facts* books, it differs from that used in some prior *Wisconsin Traffic Crash Facts* books where a single cost figure was used for all non-fatal injuries, regardless of severity.

Average crash response time is the difference between time notified and time of arrival as reported by the investigating officer. Times are shown in minutes. About 15% of the crashes that happen are excluded from this analysis due to missing time values on the MV4000. The enforcement agency type *County Traffic* was previously included in the *Other* column, but there is now no enforcement agency of that type. This year, the enforcement agency type *Other* includes the *Department of Natural Resources*, *University of Wisconsin system campus police*, the *State Fair Park police*, *Capitol Police*, and several police departments that serve Indian tribes.

This report is from the crash database and from the citation file and represents only the citations for the year 2004 that have been adjudicated as of the end of June, 2005. It does not consider the outcome of the adjudication. *Hazardous* citations are those issued in circumstances where the driver or vehicle condition has increased the risk of a crash. *Other hazardous* citations include offenses such as *failure to yield* right of way and *inattentive driving*. *Nonhazardous* citations include offenses such as *no or expired registration* and *no license plates*. An OWI arrest often results in two citations being issued (one for *operating under the influence* of an intoxicant and one for having a *prohibited alcohol concentration*). Mostly, this table counts only one OWI citation per arrest. Juvenile and commercial OWIs are excluded. Select other traffic violations are also excluded.

A traffic control should be reported for each unit in a crash; multiple traffic controls are noted in multiple unit crashes. The controls can be the same for each unit or different. If they are the same, both are listed. Less than one control would be noted if the officer didn't record a traffic control. For example, controls are not required to be noted for single unit, property damage deer crashes.

Some editions of this publication include 15 year olds with the 16 year olds in terms of licensure, but not in terms of crash involvement.

*This is the number of times a driver in this age group was involved in a crash. Drivers who have crashed more than once are counted more than once.

Fatal Crash Rates by Age Group

Total Crash Rates by Age Group

Primary Driver Contributing Factors in Crashes

Fatal Crashes

Total Crashes

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It does not address contributing factors on the part of pedestrians. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in prior years and may not directly compare.

2003 Safety Responsibility (SR) Program Results*

Wisconsin does not require proof of automobile insurance for driver licensure or for vehicle registration. State governments have found that such laws may not reduce the number of uninsured motorists, because policies are easily cancelled after leaving the motor vehicle office. Verifying continued insurance coverage has proven difficult and costly to enforce.

However, since 1946, Wisconsin has required all motorists involved in reportable crashes (see page 2 of this book) to submit evidence to the Division of Motor Vehicles of their financial ability to pay for damages they caused. Failure to prove financial ability results in suspension of operating and registration privileges.

During the most recent year for which Safety Responsibility Program results are available, 2003, there were 9,487 claims (verifications of damages or injuries filed against an uninsured negligent driver and/or vehicle owner) made against 12,091 uninsured drivers and/or owners exceeding \$39 million in damages. These claim amounts include estimated court costs. In over one-third of the crashes, the driver and the owner were different persons.

4,217 (35% responded to the notice of suspension by settling the claims prior to suspension, 213 posted the required security deposit. 7,874 drivers and owners failed to comply with the requirements spelled out on the Notice of Suspension, which resulted in the suspension of their operating and registration privileges. 2,662 suspended motorists complied with the Safety Responsibility requirements after the Suspension Orders were entered. 4,225 motorists accepted the one year suspension of privileges. As of April 20, 2005, 987 of the motorists are still withdrawn.

Approximately 2% of the drivers or owners of the 208,127 vehicles involved in reportable crashes during 2003 were uninsured, failed to pay for the damages and accepted a one year suspension of privileges. This rate compares favorably to other states.

This report does not inform us about the status of the driver's license. Of the 1,101 drivers in fatal crashes, 948 (86%) held Wisconsin licenses, 121 (11%) held out of state licenses. Of the 61,719 drivers in injury crashes, 61,719 (90%) held Wisconsin licenses, 3,909 (6%) held out of state licenses. 120,165 (84%) of the 142,725 drivers in property damage crashes held Wisconsin licenses; 8,223 (6%) held out of state licenses. For the drivers who crash in this state and who are licensed by another state, the most common license-issuing state is Illinois, at 33%.

The numbers in this table represent the number of times a given driver PCC was cited as a possible contributing circumstance in a crash. They do not represent numbers of crashes or drivers. 97,862 of the 128,308 total crashes (76%) had driver PCCs listed for a driver in the crash. 638 of the 714 fatal crashes (89%) and 34,654 of the 38,451 injury crashes (90%) had driver PCCs cited.

This report counts all units in reportable crashes (see page 2 of this book) except pedestrians. These numbers do not represent crashes. Because only units that have collided with a motor vehicle on a public roadway are included, this report does not accurately reflect the volume of bicycle, all-terrain vehicle, or snowmobile crashes in Wisconsin or even on Wisconsin public roads. A *fire fighter on emergency* is a fire fighter or emergency medical technician / first responder (paid or volunteer) who is responding to an emergency summons using a vehicle not owned by a fire fighting or emergency agency.

A *Commercial Motor Vehicle Driver* is a person who is operating a vehicle for which a Commercial Drivers License (CDL) is required. This report, however, does not inform us as to the driver's license status; it counts drivers of such vehicles involved in crashes. Commercial motor vehicles are those weighing 26,000 pounds or more, carrying hazardous materials requiring placarding, or designed to carry sixteen or more persons including the driver. The *Total Drivers* column includes some persons for whom gender was not reported on the crash report.

The numbers in this table represent the number of times a given driver PCC was cited as a possible contributing circumstance in a motorcycle crash. They do not represent numbers of crashes or drivers. Of the 2,423 crashes involving at least one motorcycle, 1,371 (56%) had driver PCCs cited for a motorcycle driver in the crash. Of the 81 fatal crashes, 60 (81%) had motorcycle driver PCCs cited. Of the 2,015 injury crashes, 1,117 (58%) had motorcycle driver PCCs cited.

Single Unit Motorcycle Crashes Primary Driver Contributing Factors

This report counts Primary Driver Possible Contributing Circumstances (PCCs) marked on the accident report form as well as citations issued by law enforcement officers. It only counts one of the PCCs or citations per crash and counts some PCCs before others. Therefore, for example, the portion of primary PCCs noted as inattentive represents only PCCs for inattention that were the sole PCC given. The numbers for this report were calculated differently than in years prior to 2001 and may not directly compare.

VI. SPEED- RELATED CRASHES

SPEED LIMIT

65

This section details the occurrence of speed-related crashes, including:

- Age of Driver
- County and Highway Class
- Severity of Crash

Speed-Related Crashes

A *speed-related crash* is defined as a crash in which at least one driver involved in the crash received a citation for speeding or was listed on the accident report as *exceeding speed limit* or *speed too fast/condition*. In 2004, speed was listed as a contributing cause in 18% of all crashes and in 33% of all fatal crashes. Some crashes involved both speed and alcohol; those crashes are included in both the speed-related crash tables and the alcohol-related crash tables.

A crash is considered to be *Speed-Related* when at least one driver was listed on the crash report as *exceeding speed limit* or *speed too fast/condition* or received a citation for speeding.

2003 Rural Interstate Summary

Wisconsin continues to monitor crashes on the Rural Interstate System. This is in connection with legislation that became effective on June 17, 1987, authorizing 65 mile per hour speed limits on these portions of highway.

In 2003, the overall crash rate for the 516 miles of rural interstate was 74.26. The crash rate is the number of crashes per 100 million vehicle miles traveled. Overall, vehicle miles traveled on rural interstate highways decreased by 13.5% in 2003. This is mostly due to the expansion of urban areas into areas that were previously rural; travel on roads previously classified as *rural* is now counted in *urban* mileage.

The charts below list the crash rates on rural interstate highways by crash severity.
