

AC NO: AC 00-23A

DATE: 12/18/68

ADVISORY CIRCULAR

DEPARTMENT OF TRANSPORTATION FEDERAL AVIATION ADMINISTRATION

SUBJECT: NEAR MIDAIR COLLISION REPORTING

1. PURPOSE. This circular advises that the FAA will continue through December 31, 1969, to handle reports of near midair collisions in accordance with the policy established January 1, 1968. Pilots, controllers or other persons involved in near midair collisions are invited to report all such encounters to the FAA. To encourage reporting, the Administrator issued the attached policy statement which grants immunity from FAA enforcement or other adverse action to pilots, controllers and other persons involved in reported near midair collisions. This circular also provides procedures for reporting such incidents.
2. CANCELLATION. Advisory Circular AC 00-23, "Near Midair Collision Study," effective January 1, 1968, is canceled.
3. EFFECTIVE DATE. January 1, 1969, through December 31, 1969.
4. BACKGROUND.
 - a. Prior to 1968, information received by the FAA indicated that many incidents were not reported because persons involved feared possible FAA enforcement action where violations of regulations occurred. As a result, in order to eliminate such fear and encourage voluntary reporting, the FAA implemented a special one-year study during 1968, under the same policy as set forth in this circular. Reporting under this policy has been successful. The report on the 1968 Near Midair Collision Study will be completed approximately May 1, 1969. Subsequent to completion of the report and upon review, determinations will be made as to possible future changes in the system.
 - b. The FAA continues to seek uninhibited reporting of complete, frank and specific information on every near midair collision. In addition to granting immunity from FAA enforcement or other adverse action to any person involved in the reported incident, the Administrator, upon written request of the person making the

12/18/68

report, will withhold from public disclosure the identity of the persons involved and the information contained in the report, as authorized under Section 1104 of the Federal Aviation Act of 1958.

- c. The FAA will continue to monitor reported information for use in the evaluation and development of procedures, regulations and techniques to minimize the collision hazard.

5. GENERAL INFORMATION.

- a. Persons involved in a near midair collision are requested to report the incident to air traffic facilities by radio as soon as possible, clearly stating that they wish to report a "NEAR MIDAIR COLLISION." This will permit immediate action to obtain the identity and necessary data concerning the other aircraft. FAA air traffic control will not ask "DO YOU INTEND TO FILE AN OFFICIAL NEAR MIDAIR COLLISION REPORT?" where pilots are not specific in their remarks. Therefore, pilots must specifically declare that they are reporting a near midair collision.
- b. To reduce radio congestion and pilot preoccupation during flight, the report should only identify the incident and other aircraft involved. A written followup report should then give the details.

6. REPORTING PROCEDURES.

- a. Initial Report. Each person who wishes to report an occurrence as a near midair collision should notify an air traffic facility (controlling if appropriate) via radio; "I wish to report a 'NEAR MIDAIR COLLISION'" and then give:

- (1) Time of incident.
- (2) Location and altitude.
- (3) Reporting aircraft's identification, type and destination.
- (4) Available information on the other aircraft.
- (5) Weather conditions.
- (6) Approximate courses and flight attitude of both aircraft.
- (7) Closest proximity horizontally and vertically between aircraft.

NOTE: It is desirable to have the initial report by radio when time and frequency congestion permit in order to initiate action to identify the other aircraft involved.

- b. In the event a person does not file a report by radio, he should make the initial report either by telephone or in person to the most convenient FAA air traffic facility or Flight Standards District Office either at next point of landing or at destination. FAA representatives will not routinely interview pilots on landing; therefore, if a person desires to be met by an FAA representative, he should advise the facility at the time of his initial radio report.
- c. Written Report. In addition to the initial report, each pilot involved should submit a complete written report of the near midair collision. The attached reporting form is designed to facilitate this report; it may be supplemented by any additional narrative information which the pilot feels would assist in pinpointing the basic causal factors and identifying appropriate corrective measures. This report may be submitted to an FAA Air Traffic or Flight Standards representative or mailed directly to the Washington address on the postage-free reporting form.

NOTE: Although FAA Form 8020-1 refers to Advisory Circular 00-23, it will be equally applicable for use in reporting near mid-air collisions occurring after December 31, 1968, and in accordance with this Advisory Circular.

NOTE: Only a report from one crewmember of each aircraft involved is needed.

NOTE: If a person reporting a near midair collision desires that the identity of the persons involved and the information contained in his report be withheld from public disclosure, the Federal Aviation Act of 1958, Section 1104, requires a written objection to such disclosure. Item 26 on the attached reporting form serves this purpose.

7. AVAILABILITY OF FORMS. Individual copies of the attached reporting form (FAA Form 8020-1) may be obtained free of charge from any FAA Air Traffic Facility, Flight Standards Air Carrier or General Aviation District Office, Area Office or Regional Office. Military commands and organized industry groups may obtain forms in quantity by submitting request to the Department of Transportation, Federal Aviation Administration, Aeronautical Center, Distribution Section, AC-46.2, P. O. Box 25082, Oklahoma City, Oklahoma 73125.

NEAR MIDAIR COLLISION REPORT

This reporting form is for use in conjunction with the FAA's Near Midair Collision Study. The Administrator will take no enforcement or other adverse action, remedial or disciplinary, against any person involved in a near midair collision that is reported to the FAA during the period of this program even though a violation of the Federal Aviation Regulations is disclosed.

Refer to FAA Advisory Circular 00-23 for further details.

One report from a crew member of each aircraft involved will be sufficient for the purposes of this study.

FEDERAL AVIATION ADMINISTRATION
DEPARTMENT OF TRANSPORTATION

DOCKET NO. 85557

EXTENSION OF POLICY REGARDING REPORTS OF NEAR MIDAIR COLLISIONS

The Federal Aviation Administration is extending for another year its 1968 policy that established (32 F.R. 16539) the reporting of near midair collisions. Extension of the policy for another year is considered appropriate since the final FAA report based upon the 1968 study and the resultant evaluation of the data assembled will not be issued until sometime in 1969.

Accordingly, the Administrator will take no enforcement or other adverse action, remedial or disciplinary, against any person involved in a near midair collision that is reported to the FAA during the extension of this policy. This action is taken under his statutory mandate to promote safety in flight. Furthermore, the Administrator will, upon written request of the person making the report, withhold that report, and the identity of those persons involved, from public disclosure in accordance with Section 1104 of the Federal Aviation Act of 1958.

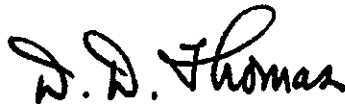

Therefore, it is the policy of the Federal Aviation Administration that if any pilot of an aircraft, Air Traffic Controller, or other person involved in a near midair collision reports the facts, conditions, and circumstances thereof to the FAA -

(a) The Administrator will not subject any person involved in the near midair collision to enforcement or other adverse action, remedial or disciplinary, even though a violation of the Federal Aviation Regulations is disclosed by the report or subsequent investigation; and

(b) Upon written request of the person submitting the report, the Administrator will, to the extent authorized by Section 1104 of the Federal Aviation Act of 1958, withhold the identity of the persons involved in the near midair collision and the information contained in that report from public disclosure.

This policy applies to near midair collisions which occur from January 1, 1969, to December 31, 1969, inclusive.

Issued under the authority of sections 305, 307(c), 312(c), 313(a), 601(a), 701(a), and 1104 of the Federal Aviation Act of 1958 (49 U.S.C. 1346, 1348(c), 1353(c), 1354(a), 1321(a), 1441(a), and 1504).

D. D. Thomas
Acting Administrator

Issued in Washington, D. C., on December 17, 1968.
