FAR GUIDANCE MATERIAL

Subject: THE DEVELOPMENT AND USE OF MAJOR REPAIR DATA UNDER PROVISIONS OF SPECIAL FEDERAL AVIATION REGULATION NO. 36

1. **PURPOSE.** This advisory circular is issued to advise that Special Federal Aviation Regulation (SFAR) No. 36 has been extended for an additional 2 years. In addition, it provides information related to the issuance of an authorization to allow repair stations, air carriers and air taxi/commercial operators of large aircraft to develop and use major repair data not specifically approved by the Administrator in accordance with the requirements of SFAR No. 36.
2. **CANCELLATION.** Advisory Circular No. 140-6A, The Development and Use of Major Repair Data Under Provisions of Special Federal Aviation Regulation No. 36 dated March 13, 1980, is cancelled.
3. **BACKGROUND.** SFAR 36, which became effective January 23, 1978, was issued to relieve qualifying certificated air carriers, operators and repair stations of the requirement to obtain Federal Aviation Administration (FAA) approval of data developed by them for major repairs on a case-by-case basis. SFAR 36 was adopted as an interim rulemaking action to obtain information on which to base a permanent rule change. However, most of the affected certificate holders did not utilize the provisions of SFAR 36 until it was well into its second year and near its expiration date of January 23, 1980. Since the FAA did not have sufficient data upon which to base a permanent rule change, the termination of SFAR 36 was extended for an additional 2-years. The FAA will initiate rulemaking to make the authorizations issued under SFAR 36 a permanent part of the Federal Aviation Regulations (FAR). Since the reason which justified the adoption of SFAR 36 still exists, and in order to allow time for completion of the permanent rule change, it was in the public interest to extend the termination date of SFAR 36 from January 23, 1982, to January 23, 1984.
4. **GENERAL.** Previously authorized certificate holders will not be required to requalify upon expiration of the initial 2-year period. The amendment provides that each authorization issued under this SFAR has an effective period from the date of issuance until January 23, 1984. This rule extension should provide ample time for the provisions to be incorporated into a permanent rule change.

Initiated by: AWS-340

5. ELIGIBILITY. This amendment is applicable to domestic repair stations certificated under Part 145, air carriers certificated under Parts 121 or 127, commercial operators certificated under Part 121, and air taxi operators of large aircraft subject to Section 135 of the FAR.

6. APPLICATION. Application for an authorization can be made by letter to the FAA District Office which has the applicant's certificate responsibility. The letter of application is required to list the information as outlined in SFAR 36.

7. PROCEDURE MANUAL. No person holding an authorization issued under SFAR 36 may exercise any authority under the authorization unless the person obtains FAA approval of, and complies with the procedures contained in, the manual required by SFAR 36.

8. APPLICANT'S RESPONSIBILITY. Before approving a product for return to service after major repair, the certificate holder is responsible for showing compliance with the applicable airworthiness requirements. Normally, these are the rules with which the manufacturer originally showed compliance.
