# ADVISORY CIRCULAR

## DEPARTMENT OF TRANSPORTATION FEDERAL AVIATION ADMINISTRATION

**SUBJECT:** ANNUAL AVIATION MECHANIC SAFETY AWARDS PROGRAM

1. PURPOSE. This advisory circular provides the current details of the Annual Aviation Mechanic Safety Awards Program. This program is a joint effort of the participating organizations representing the aviation industry. The Federal Aviation Administration will act in an advisory capacity.
2. CANCELLATION. Advisory Circular 60-2M, Annual Aviation Mechanic Safety Awards Program, dated February 6, 1975, is canceled.
3. BACKGROUND. The Federal Aviation Administration established this Aviation Mechanic Safety Awards Program in 1963. Major segments of the aviation industry, together with the Flight Safety Foundation, have annually given their cooperative support to the FAA. The program was intended to eventually become an annual aviation industry award with the FAA acting in an advisory capacity. Effective March 28, 1977, the program was continued by the aviation industry as intended.
4. OBJECTIVE. The Annual Aviation Mechanic Safety Awards give recognition to the AVIATION MECHANIC MAKING THE MOST OUTSTANDING CONTRIBUTION TO AIR SAFETY BY MAINTENANCE PRACTICES. This national effort enables the public to recognize the importance of the aviation mechanic in aviation safety. It also serves to focus the aviation mechanic's attention on the vital safety role played by the mechanic in the practice of aviation maintenance.
5. FURTHER DETAILS. Pertinent details for entering this program, together with the appropriate aviation industry-sponsored entry blank form, are available at airports, aviation centers, aviation fixed-base operators, and at local FAA General Aviation or Flight Standards District Offices.
