ADVISORY CIRCULAR

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration
Washington, D.C.

Subject: PILOT CERTIFICATES: AIRCRAFT TYPE RATINGS

1. **PURPOSE.** This advisory circular provides pilot certificate designations adopted by the Federal Aviation Administration for aircraft type ratings. It incorporates all revisions to previous listings, including new designations for aircraft type certificated as of December 1, 1978.
2. **CANCELLATION.** Advisory Circular 61-86, Pilot Type Rating Certificate Information, dated 6/30/77, is canceled.
3. **BACKGROUND.** Pilot schools, pilot examiners, and the general aviation public have a continuing need for a type rating reference such as that provided by this circular. It is designed to standardize aircraft designations placed on pilot certificates to show pilot type rating qualifications.
 - a. The designators in column 4 of Appendix 1 have been entered on all pilot certificates issued or reissued with aircraft type ratings since May 1, 1977.
 - b. Previously used designations listed in column 3, Appendix 1, will remain in effect and will not require a reissuance or conversion to the new type rating designations in effect as of March 1, 1979.
 - c. Appendix 2 specifies the use of the limitation area on the airman certificate for operational restrictions associated with type ratings.

J. A. FERRARESE
Acting Director
Flight Standards Service

Initiated by: AFS-820

APPENDIX 2. OPERATIONAL RESTRICTIONS

Applicants for type ratings on aircraft not listed in Appendix 1 will be required to present evidence that at least one aircraft of the type concerned has been issued an aircraft type certificate for civilian use.

NOTE: Since experimental aircraft are not issued type certificates, they are not eligible for pilot type ratings.

The following operational restrictions pertaining to type ratings will appear as limitations rather than as a part of the type rating on certificates:

1. Amphibian type ratings, such as CV-PBY5, will be repeated under limitations (Item XIII) with appropriate restriction; i.e., CV-PBY LIMITED TO SEA, unless proficiency has been demonstrated on both land and water.

2. Type ratings restricted to VFR will be repeated under limitations (Item XIII) with appropriate restrictions; i.e., N-B25, VFR ONLY.
