U. S. DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

SUBJECT

Status of Toll Facilities
in the United States

FHWA BULLETIN

June 28, 1976

The attached brief text and tables provide selected information on all public and private toll facilities of which we have knowledge as of January 1, 1976. Most of the data have previously been reviewed and corrected in the field. Proposed facilities are shown in separate listings where reported by the States, or where other information indicates that additional facilities are being seriously considered. These tables should be used as a general reference, and as a guide in particular to insure that annual finance and mileage reports include data for all publicly owned facilities.

Sufficient copies of these tables are being distributed to supply three copies each for the States and division offices, and two for the regional offices. Additional copies are available upon request.

We will appreciate having any errors or omissions in this material brought to our attention.

A handwritten signature in dark ink, appearing to read "William L. Mertz", is written over the typed name.

William L. Mertz

TOLL FACILITIES IN THE UNITED STATES ;

Bridges ; Ferries,

Tunnels ; Roads,

as of January 1, 1976 ,

INTRODUCTION

In this publication are presented selected data on highway toll facilities in the United States in operation, under construction, or proposed at the beginning of 1976. Table T-1 lists all known toll facilities in operation, under construction, or financed as of January 1, 1976. Table T-2 lists those projects considered to be under serious consideration, awaiting completion of financing arrangements. Table T-3 lists proposals for new toll projects that may or may not become realities, depending upon such factors as legislative approval, financial feasibility, completion of plans, etc.

For each of these facilities is reported, to the extent known, the name, financing or operating authority, ownership, location and termini, feature crossed, length, road system, and--for facilities located on the National System of Interstate and Defense Highways--the Interstate System route number.

This is not intended to be a complete reference volume on toll facilities, nor is it intended to duplicate data that are published elsewhere. Information such as width and clearance on bridges, type of structure, load limits, year built or put in service, cost, toll rates, or annual traffic volumes, are not included. Neither is information on the number and capacity of ferry boats or the seasonal and hourly operating schedules.

Nearly all of the publicly owned toll authorities publish monthly and/or quarterly, semi-annual, and annual reports which give much of this information. In most instances copies can be obtained direct from the authorities. Most of them are also on file in the Federal Highway Administration's library. Information on revenues, expenditures, and outstanding indebtedness for public toll facilities is contained in "Highway Statistics," an annual publication of the Federal Highway Administration.

Other organizations also compile data relating to toll facilities: The International Bridge, Tunnel and Turnpike Association, Inc., with offices at 1225 Connecticut Avenue, NW., Washington, D.C. 20036, maintains an address directory of its membership and serves as an information clearing house and research center; conducting surveys and studies, and publishing a variety of reports, statistics and analyses.

The American Automobile Association, 8111 Gatehouse Road, Falls Church, Virginia 22042, compiles a directory of toll facilities containing such current information as rates, load limits, frequency of service, etc.

Other useful references to toll facilities include "Highway Bond Financing . . . An Analysis 1950-1962" published by the Federal Highway Administration, which compares the methods of financing toll and free road projects through borrowing. Also, in 1966, hearings were held before the Special Subcommittee on the Federal-Aid Highway Program, and the Subcommittee on Roads, of the House Committee on Public Works, on the "Relationship of Toll Facilities to the Federal-Aid Highway Program." The transcript of the hearings, together with a subsequent report (House Report No. 597, 90th Congress, 1st Session) were printed by the Committee on Public Works and contain a vast amount of information on toll facilities.

Most of the data for the present publication were obtained by the field offices of the Federal Highway Administration in cooperation with the State highway departments. The material was analysed and organized in the Highway Statistics Division under the direction of Miss Helen Millson, and the data prepared for publication by Mr. Davy Crockett and Miss Mary Robey.
